14th October 2013

AstiVita Renewables Limited – Quarterly Results

Based on unaudited management accounts, AstiVita has incurred a trading loss after tax of approximately \$400,000 for the quarter ended 30 September 2013.

Despite the result being an improvement compared to the comparable period last year, we are still completing our ongoing restructure and continue to find issues that are being rectified at a rate that is slower than anticipated.

AstiVita experienced improved sales in July and August 2013 but momentum in sales growth stalled in September. Trading conditions in September were poor due to the Federal Elections and subsequent school holidays.

We will continue to update the market our quarterly results.

Lev Mizikovsky
Chairman
