**HIGHLIGHTS**

- The Cockatoo Island project was purchased by Pluton Resources Limited and its joint venture partner Wise Energy from Cliffs Asia Pacific Iron Ore Pty Ltd in September 2012. Pluton is the operator and maintains management control of the project. Shipments of ore continued with four shipments made during the Quarter ended 30<sup>th</sup> September 2013.
- The Romblon Project site was on care and maintenance during the Quarter pending the result of the representation made on the lifting of the Cease and Desist Order (CDO) issued by the Mines and Geosciences Bureau (MGB) of the Department of Environment and Natural Resources (DENR) in September 2011. Counsel for SNPDC is actively pursuing all legal avenues with respect to the appeal to the MGB and DENR to lift the CDO.
- The option agreement on the San Marcos Gold Project located in Arizona, USA was signed in the Quarter ending 31<sup>st</sup> March 2013. An experienced consulting firm has been contracted to prepare a 3D model of the deposit based on historical drilling and sampling. A JORC compliant Mineral Resource Report should be completed during the current quarter.

**ROMBLON PROJECT, SIBUYAN ISLAND, ROMBLON PROVINCE (MPSA No. 3042009-IVB))**

**NOTE: Small Scale Mining Permits have expired**

Interest: MPSA 3042009-IVB

The Romblon Project on Sibuyan Island in the Romblon Province in the Philippines is being evaluated as a source of direct shipping lateritic nickel ore (DSO). The nickel resource explored by two Japanese nickel companies in 1972 is covered by a Mineral Production Sharing Agreement (MPSA).

The project is still in the process of being evaluated and also transferred from Altai Resources Philippines Inc (Altai), the original applicant of the MPSA, to Sibuyan Nickel Properties Development Corporation (SNPDC). SNPDC is owned by Pelican Resources Limited in conjunction with its Joint Venture partner All-Acacia Resources Inc.

The Company is undertaking an internal study to evaluate a Direct Reduction Process for laterite nickel ore. The technology to process high iron ore into Sponge Iron (SFE) and high nickel ore into Sponge Nickel (SNI) is being developed in China. Processing nickel laterite ore in the Philippines has the potential to increase the value of the Romblon Nickel Project. The initial Scoping Study will include a

review of Direct Reduction Iron (DRI) facilities currently operating in China and India which may be followed by pilot plant test work if the process has potential to enhance the Romblon Nickel Project.

The Regional Trial Court in Romblon ruled in favour of the Applicant (SNPDC) and declared the Provincial Executive Order as unconstitutional. A Motion for Reconsideration was filed by the Governor of Romblon against the Order. The Regional Trial Court in Romblon issued a Resolution on 14 June 2013 denying the Motion for Reconsideration.

Given the Court's ruling, SNPDC has made representations to the Office of the President of the Philippines (**OP**) where its own appeal in respect of the Cease a Desist Order is still pending and advising the OP of the recent Court Resolution declaring the Executive Order unconstitutional and asking that any pending Appeal be immediately resolved. Counsel for SNPDC is following up on the representation to the OP.

Counsel for SNPDC provided the Mines & Geosciences Bureau (**MGB**) with a copy of the Resolution on the Motion for Reconsideration and keep the MGB apprised of this significant development.

#### *COCKATOO ISLAND PROJECT (M04/235)*

Interest: 100%  
Operator: Pluton Resources Limited

Cockatoo Island project, as previously advised, had been purchased from Cliffs Asia Pacific Iron Ore Pty Ltd by Pluton Resources Limited and its joint venture partner Wise Energy. In January the asset sale agreement between Pluton and the Wise Energy group was terminated with Pluton continuing as operator and manager of the project. Recently the joint venture was reinstated with Pluton as the operator.

There were four shipments of ore during the reporting period and the royalty increased to \$1.00 per tonne. The Company has made arrangements with Pluton to clear the arrears in royalty payments due to Pelican.

## SAN MARCOS GOLD PROJECT, ARIZONA USA

Interest: Option to earn up to 100%  
Operator: Pelican wholly owned USA subsidiary (being incorporated)

Pelican and Australian American Mining Corporation Limited (AusAmerican) entered into an option agreement pursuant to which Pelican was granted an option to enter into a farm-in and joint venture agreement, through a US subsidiary, on the San Marcos Gold Project in La Paz County, Arizona, USA.

Pelican has exercised the option. The parties are now entering into a formal farm-in and joint venture agreement. A wholly owned USA subsidiary company is being incorporated. The key terms of the agreement were announced to the ASX on 14 January 2013.

The Company contracted NickelPhil Consultants to generate a computer model of the data and issue a JORC compliant Mineral Resource report. This work is still in progress and is being undertaken to assist in formulating an ongoing gold exploration programme. The report will be completed during the current quarter.

During the reporting period Pelican completed the incorporation of a wholly-owned USA subsidiary, Dore 5 Resources Inc. (Dore). The appointment of Directors and officers of Dore has been established.

Bank accounts and statutory requirements have been completed to enable Dore to now move forward. Revision of initial budgets will be undertaken over the coming quarter in conjunction with geological core logging of diamond drill holes which were drilled by Australian American.

Dore has also contracted the services of a professional tenement company based in Tucson Arizona to manage the San Marcos group of claims.

## Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
