ABOUT NUENERGY GAS

NuEnergy is an emerging ASX listed gas and ancillary power generation development company with an immediate focus on establishing unconventional gas exploration & production in Indonesia and Eastern Africa.

The company’s overall strategy is to rapidly prove up CBM and shale gas resources and bring these resources to production through small scale power generation, CNG and mini LNG and via connection to the local gas grid.

NuEnergy has secured strategically located CBM and shale gas concessions in areas where there is a significantly undersupplied gas and power market and where possible where there is abundant energy infrastructure to take gas and/or power to market. NuEnergy has three operated PSCs in Indonesia, two operated CBM & shale gas joint ventures in Tanzania, an Exclusive Prospecting Licence in Malawi for CBM and shale gas and is now exploring for CBM in Mozambique.
