ASX – MEDIA RELEASE

19 March 2014

PROPOSED DRILL PROGRAM – LEONORA PROJECT

Anglo Australian Resources NL (ASX: **AAR**) advises that due to abnormal rains and washouts through the Eastern Goldfields, as was discussed in the company's December Quarterly Report, the two-hole drilling program proposed for the Leonora Project in Western Australia has been delayed.

Subject to road conditions and the timing of repairs, an attempt will be made to deliver a drill rig to site during early April.

Further information will be provided as it becomes available.
