BAAL GAMMON MINE TEMPORARILY HALTS PRODUCTION DUE TO CYCLONE ITA

The operator of the Monto Minerals Limited (Monto) owned Baal Gammon copper/silver mine in North Queensland, Snow Peak Mining Pty Ltd (Snow Peak), has informed Monto that they have suspended production at the Baal Gammon mine after receiving heavy rainfall associated with Cyclone Ita.

Snow Peak has temporarily halted production at Baal Gammon whilst an assessment of the on-site hydrological balance is conducted and various operational solutions are considered.

Over 13,223t of high grade copper and silver ore have been trucked to the Mt Garnet polymetallic plant since recommencement of production in March 2014.
