## Eight Point Plan

- **Elders sets objectives for next 3 years**
- **Simplified agricultural focus to enhance growth prospects**

Elders (ASX:ELD) today releases its strategic plan for the next three years a copy of which is attached to this announcement.

Elders CEO, Mark Allison, said that, "The Eight Point Plan marks a significant step in Elders' evolution to being an efficient user of capital that produces acceptable returns for all its stakeholders.

"The Eight Point Plan is the culmination of the efforts of all our staff to identify what we exist for, what we excel at, and how we want to deliver the needs of our clients. This plan identifies our sustainable competitive advantages as an agribusiness and by product and geography and anchors our future growth and development on these advantages. Through a distillation of ideas that have been presented by staff and the Board, we have selected eight tangible and achievable agribusiness objectives that we feel confident we can execute over the next three years.

"The Eight Point Plan is accompanied by an aspirational target of creating sustainable EBIT of \$60m and return on capital of 20% in and from FY2017. Whilst a lot of hard work is yet to be done to get there, and whilst agriculture is always subject to climactic and market conditions, we are confident that the foundations for growth are now in place and will be enhanced by the Plan.

"Elders seeks to reclaim its place as the agribusiness delivering the greatest real value to all its stakeholders in both Australia and internationally. Understanding and delivering on the needs of our clients is key to that goal. We firmly believe that the business performance is responding to and will be further enhanced by implementation of the Eight Point Plan."
