

STRUCTURAL SYSTEMS AWARDED ELIZABETH QUAY PEDESTRIAN BRIDGE CONTRACT

9 September 2014

- **Valued at \$19.88 million**
- **Joint venture with Decmil and Hawkins Civil (DASSH)**
- **Iconic architectural feature of Elizabeth Quay**

Structural Systems Limited (ASX: STS) ("Structural Systems") is pleased to announce the award of a contract to construct the Pedestrian Bridge to be located at Elizabeth Quay in Perth, Western Australia.

The \$19.88 million bridge contract is a Joint Venture between Structural Systems, Decmil and Hawkins Civil (DASSH) and will connect the new promenades, the Island and ferry terminal at Elizabeth Quay.

Leighton Broad, the managing contractor, is delivering these works that are part of the Elizabeth Quay Inlet and Public Space Development for the West Australian State Government which has an overall value of \$440 million.

The pedestrian bridge will be an iconic architectural feature of Elizabeth Quay. The 110m long arch and suspension bridge will be 20m high, 5m wide and suspended over the inlet with a clearance of 5.2m from the water. It will include feature lighting, distinctive architecture and design, allowing cyclists and pedestrians to enjoy the view of the city and Quay while allowing recreational vessels to pass underneath.

Managing Director of Structural Systems, David Macgeorge, spoke about the win.

"I am very pleased with the award of the Elizabeth Quay Pedestrian Bridge to the DASSH JV. Structural Systems will play a major role in the JV and we are looking forward to delivering a unique bridge structure which will be a landmark for Perth."

"Our ability to deliver complex construction projects is further demonstrated by the award of this contract."

About Structural Systems

The Company commenced as BBR Australia Pty Ltd in 1961 and was listed on the Australian Securities Exchange as Structural Systems Limited in 1987. The Company operates in the construction and resource sectors.
