

June 2015

QUARTERLY ACTIVITY REPORT

Key Highlights

Production

- Guanaco mine reached production of **12,176 Au oz** and **10,938 Ag oz** for the quarter.
- Gold production for the **full financial year** ended 30 June 2015 of **51,534 Au oz** was in line with the guidance of over 50,000 Au oz.
- Quarterly **all-in sustaining cost (AISC)** of US\$771/AuEq oz, and for the full financial year, AISC of **US\$694/AuEq oz**.
- **Cash cost** for the quarter was US\$597/AuEq oz. This competitive cash cost level was maintained throughout the financial year- the average was **US\$548/AuEq oz**.

Exploration Program

- On-going exploration activities continue at the Guanaco and Amancaya sites.
- Main activities include: detailed ground magnetics, surface studies and sampling and trenching of mineralized intercepts.

Financial

- Total cash position was US\$7 million as of 30 June 2015.
- Cash proceeds from the sale of gold and silver was US\$12.4 million for the quarter.

CHILE

Guanaco Mine

Background

The wholly-owned Guanaco mine remains the Company's flagship asset. Guanaco is located approximately 220km south-east of Antofagasta in Northern Chile at an elevation of 2,700m and 45km from the Pan American Highway. Guanaco is located in the Palaeocene/Eocene belt, a geological structural trend which runs north/south through the centre of Chile, and hosts several large gold and copper mining operations including: Zaldivar, El Peñon and Escondida.

Currently, the majority of the ore processed from the Guanaco operation comes from the Cachinalito underground system and nearby vein systems with higher average grades.

Gold mineralisation at Guanaco is controlled by pervasively silicified, E/NE trending sub-vertical zones with related hydrothermal breccias. Silicification grades outward into advanced argillic alteration and further into zones with propylitic alteration. In the Cachinalito vein system, most of the gold mineralisation is concentrated between depths of 75m and 200m and is contained in elongated shoots. High grade ore shoots (up to 180 g/t Au), 0.5m to 3.0m wide, have been exploited, but the lower grade halos, below 3 g/t Au, can reach up to 20m in width. The alteration pattern and the mineralogical composition of the Guanaco ores have led to the classification as a high-sulfidation epithermal deposit.

Production

Production from underground operations using the heap leach process generated 12,176 gold ounces (Au oz) and 10,938 silver ounces (Ag oz) during the quarter ended 30 June 2015. When measured in gold equivalent ounces* (AuEq oz) total production was 12,339 AuEq oz compared to 11,567 AuEq oz in the prior quarter and 10,418 AuEq oz in the same quarter of the previous year.

Gold and Silver Production

Production	2012 Actual Calendar Year	2013 Actual Calendar Year	2014 Actual Calendar Year	2015 Actual 6-months ⁽³⁾	2015 Actual Financial Year	2015 Budget Calendar Year
Gold (Au oz)	28,902	50,226	50,375	23,601	51,534	50,000
Silver (Ag oz)	74,807	74,031	46,458	20,424	40,108	49,000

For the June 2015 quarter the average operating cash cost¹ (C1) was US\$597/AuEq oz while the all-in sustaining cost² (AISC) was US\$771/AuEq oz (US\$597/AuEq oz and US\$807/AuEq oz respectively for the quarter ended 31 March 2015).

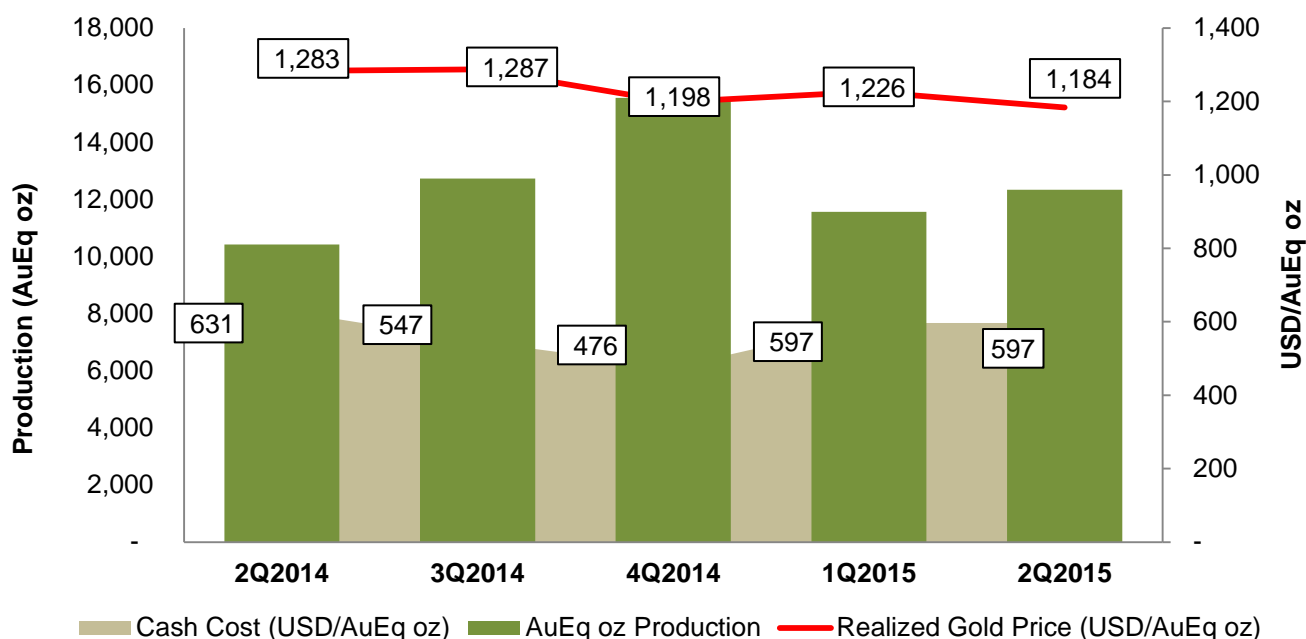

* AuEq ratio is calculated at 67:1 Ag:Au

(1) The operating cash cost (C1) for the Guanaco Mine includes: Mine, Plant, On-Site G&A, Smelting, Refining, and 3% ENAMI Royalty.

(2) The all-in sustaining cost (AISC) for the Guanaco Mine includes: C1, Sustaining Capex, Exploration, and Mine Closure Amortisation.

(3) Six-month period ended June 2015.

AuEq oz Production per quarter (calendar year)

Mining

During the June 2015 quarter, mining continued at the Cachinalito underground operations with a total of 87,535 tonnes mined at an average grade of 6.79 g/t Au and 6.03 g/t Ag. The crushed and leached ore totalled 116,898 tonnes for the quarter at an average grade of 5.89 g/t Au and 5.66 g/t Ag.

Total underground mine development was 717 metres for the June quarter leading to a total of 1,093 metres for the 6-month period ended June.

Safety

During this quarter, no lost-time accidents (LTA) occurred, and two nil-lost-time accidents (NLTA's) were reported involving employees of Guanaco and third party contractors. Safety and environmental protection are core values of the Company. The implementation of best practice safety standards along with a sound risk management program are key priorities for Austral Gold.

Exploration Program

The Geology team continued to advance on the exploration program within the current mine development area of the Guanaco deposit. A new drift is being developed to the south of the Cachinalito Central West sector. This new zone was named Aurora where more than 145 metres of tunnel were developed following a vein.

During the quarter, detailed ground magnetics were continued at Guanaco with the goal of testing mineralized structures beneath the alluvial cover. Additionally, cross-cuts were developed to reach mineralized intercepts recognized during the previous quarter's drilling campaign.

Guanaco Operational Performance

June Quarter (3-months actual) 2015	
Total Ore processed (t)	116,898
Plant grade (g/t Au)	5.89
Gold recovery (%)	77
Gold produced (oz)	12,176
Silver produced (oz)	10,938
Operating cash cost (US\$/AuEq oz)	597

Guanaco Area Tenements Status

A complete list of the mining tenements in which the Company has an interest is presented in Appendix A attached to this report. There have been no changes to the Company's interests in these mining tenements during the quarter. All mining properties are fully owned by the Company through its subsidiaries.

Amancaya Project

Development of the Amancaya Project

As reported in the media release on 29 April 2015, the development of the Amancaya Project continues to advance with the purchase of long lead items, further engineering work and further submissions to finalise the Environmental Impact Statement submission.

During this quarter, the Geology team initiated a detailed surface mapping at a 1:5000 scale and new samples were taken for ICP analysis.

Amancaya Tenements Status

A complete list of the mining tenements in which the Company has an interest is presented in Appendix B attached to this report. There have been no changes to the Company's interests in these mining tenements during the quarter. All mining properties are fully owned by the Company through its subsidiaries.

Figure 1: Austral Gold's geology team for Amancaya

ARGENTINA

8 de Julio

Some of the cateos held as part of the 8 de Julio property expired during the quarter. At the same time, new 'manifestations of discovery' over that part of the property, which is considered to have the highest potential, were requested.

8 de Julio Area Tenements Status

A complete list of the mining tenements in which the Company has an interest is in Appendix C attached to this report. There has been changes to the Company's interests in these mining tenements during the quarter. All mining properties are fully owned by the Company through its subsidiaries.

CORPORATE SUMMARY & FINANCIAL PERFORMANCE

Financial performance and current cash position

Austral Gold's total cash position was US\$7 million as of 30 June 2015.

Cash proceeds for gold and silver sales for the quarter was US\$12.4 million (average realized gold price was US\$1,184/oz). Recuperation of VAT contributed \$3.5 million in cash proceeds.

The final tax payment for 2014 Chilean income tax was paid on 30 April 2015 amounting to US\$3.9 million while US\$1.3 million was paid in advance relating to the 2015 Chilean income tax year, as per local regulations.

During the quarter, a loan for US\$3m was made to Inversiones Financieras del Sur SA, a related party, on better than arm's length terms. The loan will be repaid in 2 instalments with US\$1.5 million to be repaid on 30 September 2015 and the remaining balance plus 4% interest accrued on the loan, to be repaid on 30 November 2015. The loan is unsecured and borrowers rights and obligations under the loan can be assigned or transferred at any time.

By order of the Board.

Andrew Bursill
Company Secretary

Competent Person's Statement

Dr Robert Trzebski is a Director of Austral Gold Limited. He has a Degree in Geology, a PhD in Geophysics, a Masters in International Project Management and has over 20 years professional experience in mineral exploration, project management and research and development. Dr Robert Trzebski is a member of the Australian Institute of Mining and Metallurgy (AUSIMM) and qualifies as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.' Dr Robert Trzebski consents to the inclusion of the resources noted in this report.

The numbers presented in this report are unaudited figures and may be subject to minor variation.

Appendices: List of tenements in which the Company currently has an interest

Appendix A: Guanaco Site (Chile) tenements

Property Name	Claim Type	Size (hectares)
Mining Concessions under exploration	Constituted Mining Claims	21,236
Las Pailas I to Las Pailas XIII / G-3 a G-16	Mining claims in process	3,415
G-17, 1/20 to G-40, 1/20.	Mining claims in process	6,300
Escondida I, 1/30; Escondida II, III, V, VI, VII, VIII and IX.	Mining claims in process	2,400
Fortuna VII 1/30, VIII 1/20, IX 1/30, X 1/20, XI 1/30, XII 1/20, XIII 1/30 and XIV 1/20.	Mining claims in process	2,000
Mateo I, II, III, IV, V and VI	Mining claims in process	1,700
Fortuna I, 1/30 to Fortuna VI, 1/20.	Mining claims in process	1,500
Escondida IV 1/30, X 1/30, XI 1/20 and XII 1/30	Mining claims in process	1,100
Fortuna XV, 1 to 5	Mining claims in process	50
Total		39,701

Appendix B: Amancaya Site (Chile) tenements

Property Name	Claim Type	Size (hectares)

1.25 Explanation necessary for an understanding of the transactions

--

Non-cash financing and investing activities

2.1 Details of financing and investing transactions which have had a material effect on consolidated assets and liabilities but did not involve cash flows

As reported in the December quarter, on 19 December 2014, 307,930,858 shares in Austral Gold Limited were issued to Inversiones Financieras Del Sur SA as total repayment of its loan outstanding with Austral Gold which amounted to US\$53,733,935. This transaction was approved by shareholders at the Annual General Meeting held on 16 December 2014.

2.2 Details of outlays made by other entities to establish or increase their share in projects in which the reporting entity has an interest

--

Financing facilities available

Add notes as necessary for an understanding of the position.

		Amount available US\$'000	Amount used US\$'000

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
