## QUARTERLY ACTIVITIES STATEMENT

For the quarter ended 30 June 2015

### HIGHLIGHTS

- **Co-Funded Drilling Program Application Successful**
  - Co-Funding up to \$200,000 for a deep diamond hole at Glandore to test four mineralised zones
- **Clinker Hill Project Results**
  - Gold lode intersections over 800m strike and open to the south east
  - 6-10m thick intersections of >0.2g/t gold continuous over 400m
  - Strong magnetic signature extension pegged
- **Corporate**
  - Cash of \$916,000 (as at 30 June 2015)
  - Includes R&D Tax Concession Claim - \$442,642 (after costs)

---

### Co-Funded Drill Program / Exploration Incentive Scheme

Aruma Resources Limited (Aruma) was successful in its application for Round 11 of the WA Governments Co-funded exploration drilling programme under the Exploration Incentive Scheme (EIS).

The EIS grants are offered to explorers and prospectors with greenfields exploration projects within WA, with the overall goal being to assist in increasing the longevity and sustainability of the state's resource industry.

Aruma has secured funding for 50% of direct drilling cost up to \$200,000 at Aruma's ongoing Glandore Project. The funding is to be utilised for a single deep diamond drill hole. All appropriate approvals have been completed and once the agreements have been signed drilling may commence.

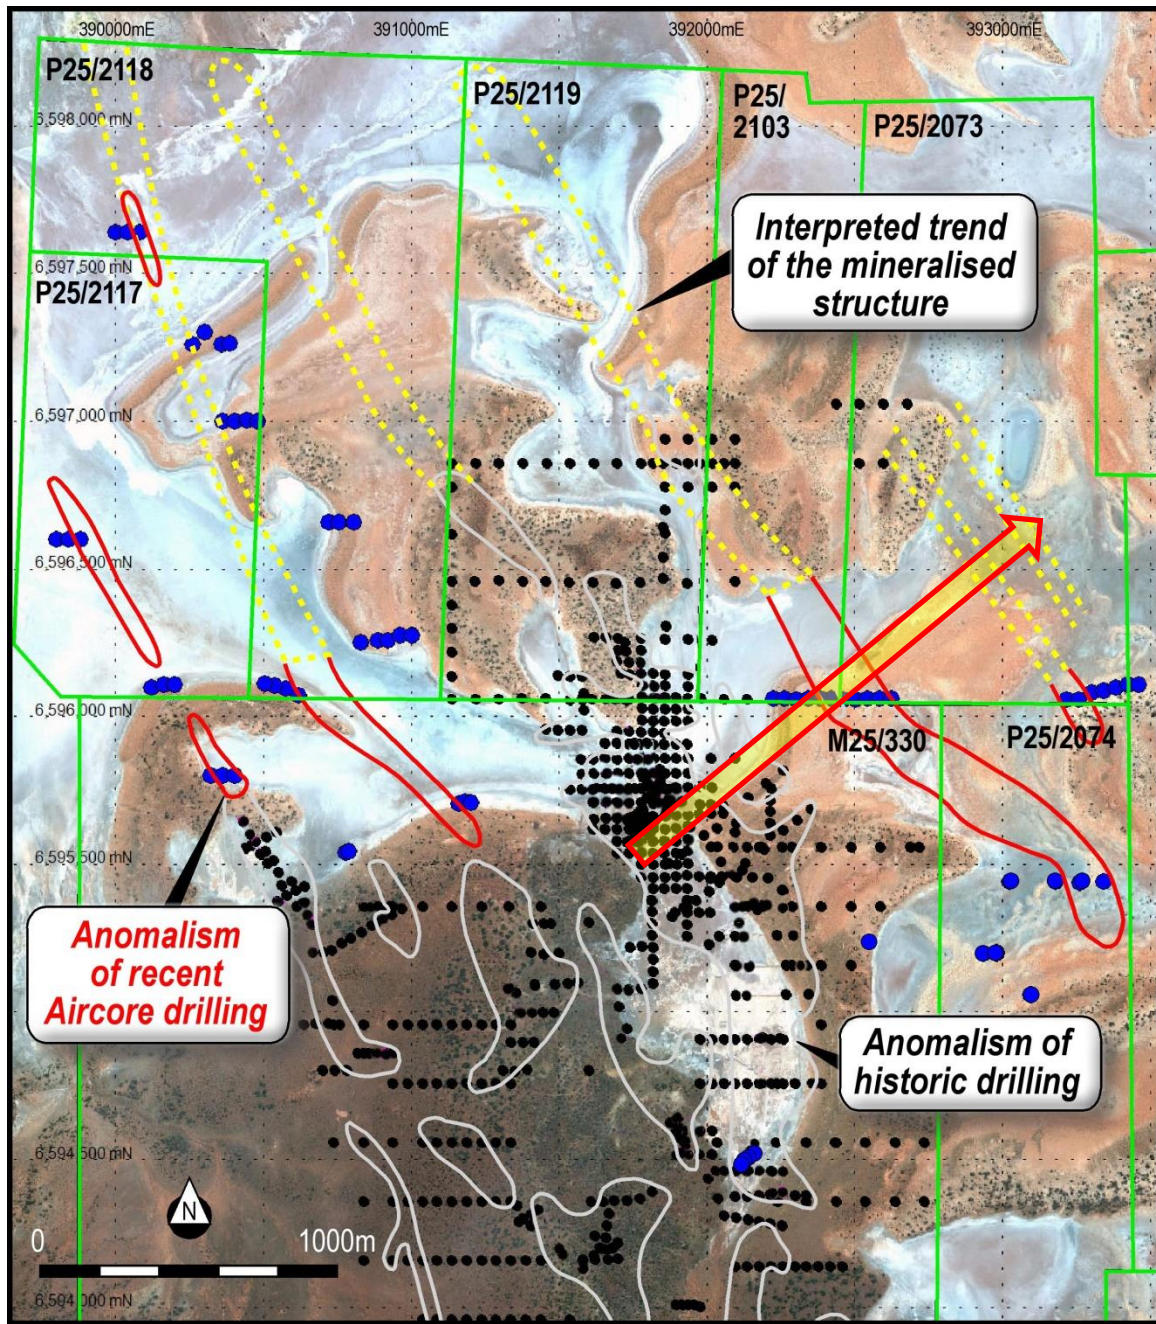

The proposed deep diamond drill hole is designed to test four parallel structural positions of the known mineralised structural positions (Axial Planar and Supergene Lodes) on the eastern limb of the Glandore anticline. The other two of these positions the Eastern and Johnston positions have not historically been drill tested at depth.

The drill hole will define the stratigraphy and nature of the mineralised structure in the Glandore area which will assist in understanding the prospectivity of the untested strike of the structures. Additionally this drill hole will reveal the stratigraphy of the geological units to the east of the outcropping Glandore antiform which has been largely unknown due to the lake cover (Figure 1).

QUARTERLY ACTIVITIES STATEMENT  
FOR THE QUARTER ENDED 30 JUNE 2015

### Clinker Hill Project

During the quarter Aruma received the results of the first pass RC drill program at its 100% owned Clinker Hill Project, P25/2201, 40km east of Kalgoorlie, which returned several highly anomalous significant (>5m at 0.2g/t gold) intersections over a 400m strike. A total of 11 holes for 1,476m were drilled in the program to investigate a strong >40ppb gold-in-soil anomaly which coincided with several dry blowing areas. The anomaly was continuous over >1,600m of strike and between 150 to 250m wide.

The drill results (Table 1) confirmed the soil anomaly and are from re-assaying the anomalous (>0.1g/t gold) 4m initial sample composites. They confirmed the wide intersections of sulphide-rich quartz carbonate lode material logged in the holes are mineralised with assays up to 1.69g/t gold.

| HOLE ID | Easting | Northing | RL  | Depth | Az. | Dip | From | To        | Note | Int. | Au FA25 |

**Table 1 Significant gold intersections (>0.2g/t Au) at Clinker Hill from 1m RC samples  
All coordinates AMG 94, all measurements down hole**

#### Aruma Resources Limited

**Figure 3 RC drilling on geology at Clinker Hill with (yellow) gold mineralisation trends with possible extensions**

The extension indicated by the arrow at the bottom of Figure 3 is generated from the magnetics and the anomaly in drillhole CHRC 1 in the composite sampling, which returned 4m at 0.1g/t Au from 4m. To secure the strong south-east magnetic extension, two new leases have been pegged to the east of the tenement (P25/2319 and 2320). This ground will allow for the continuity of the NNW-SSE trending gold lode defined by magnetics to be investigated and tested.

**Table 2 Project Status and Activity Table**

---

## Proposed Exploration Activities for Q4 FY2014-15

Aruma's lease holdings are constantly being appraised and currently total approximately 3,000km<sup>2</sup>.

All of Aruma's projects have strong metal indicators and proven high grade potential. The ongoing work comprises:

- **Bulloo Downs Copper Project** – Lease consolidation and diamond drilling proposal to test emissivity anomalies on HyMap structures at depth and give detailed stratigraphy of the Bangemall Formation in the Bulloo and Neds Gap structural corridors (subject to funding availability)
- **Glandore** – Project appraisal and planning diamond drilling (subject to funding availability)
- **Glandore Hub – Clinker Hill** – Data interpretation and JV discussions
- **Jundee South** - JV discussions

The Company has cash at 30 June 2015 of \$916,000 having received an R&D tax refund of \$442,000 after costs during the quarter. The Company is considering joint venture partners on all projects due to the scale and scope of work required.

Aruma will also be appraising leases that are becoming available in the Wiluna-Kalgoorlie terrain, especially where adjacent to current projects or with resources or intersections.

In addition to its current projects in Western Australia, Aruma continues to evaluate other potential project opportunities.

### Competent Person's Statement

*The information in this release that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Peter Schwann who is a Fellow of the Australasian Institute of Mining and Metallurgy. Mr Schwann is a full time employee of the Company. Mr Schwann has sufficient relevant experience to qualify as a Competent Person as defined in the JORC Code (2012) and consents to the inclusion of this information in the form and context in which it appears. All exploration results reported have previously been released to ASX and are available to be viewed on the Company website [www.arumaresources.com.au](http://www.arumaresources.com.au). The Company confirms it is not aware of any new information that materially affects the information included in the original announcement. The Company confirms that the form and context in which the Competent Person's findings are present have not been materially modified from the original announcements.*
