Dear Sir/Madam

June 2015 Full Year Conference Call Presentation

Attached please find the presentation in relation to the year end and June quarter results conference call and investor update to be held tomorrow morning at 6.30am Perth time. Full details in relation to the call were announced on 24 August 2015.

Yours faithfully
Paladin Energy Ltd

ALEXANDER MOLYNEUX
Interim CEO

PALADIN ENERGY LTD

Annual Results Conference Call and Investor Update 28 August 2015

Alexander Molyneux – Chief Executive Officer

Craig Barnes – Chief Financial Officer

Darryl Butcher – EGM Technical and Project Development

Andrew Mirco – GM Corporate Development and Investor Relations

Disclaimer and Notes for JORC and NI 43-101 Mineral Resources and Ore Reserves

This presentation includes certain statements that may be deemed “forward-looking statements”. All statements in this presentation, other than statements of historical facts, that address future production, reserve or resource potential, exploration drilling, exploitation activities and events or developments that Paladin Energy Ltd (the “Company”) expects to occur, are forward-looking statements.

Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward looking statements include market prices, exploitation and exploration successes, and continued availability of capital and financing and general economic, market or business conditions.

Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. Readers should not place undue reliance on forward-looking information. The Company does not assume any obligation to update or revise its forward-looking statements, whether as a result of new information, future events or otherwise.

In the following presentation, for those deposits that are reported as conforming to the Joint Ore Reserves Committee (JORC) 2004 or 2012 code, the terms Inferred Mineral Resources, Indicated Mineral Resources, Measured Mineral Resources, Ore Reserves, Proved Ore Reserves, Probable Ore Reserves and Competent Person are equivalent to the terms Inferred Mineral Resources, Indicated Mineral Resources, Measured Mineral Resources, Mineral Reserves, Proven Mineral Reserves, Probable Mineral Reserves and Qualified Person, respectively, used in Canadian National Instrument 43-101 (NI 43-101).

The technical information in this presentation that relates to Exploration Results, Mineral Resources and Ore Reserves is based on information compiled by David Princep B.Sc. and Stephanie Raiseborough B.E., both of whom are Fellows of the Australasian Institute of Mining and Metallurgy. Mr. Princep and Ms. Raiseborough each have sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity that they are undertaking to qualify as Competent Persons as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”, and as Qualified Persons as defined in NI 43-101. Mr. Princep and Ms. Raiseborough are full-time employees of the Company and consent to the inclusion of the relevant information in this announcement in the form and context in which it appears.

Previous tonnages, grades, assays and other technical data relating to the Oobagooma deposit are taken from historical records prior to the implementation of the current NI 43-101. While the data is believed to have been acquired, processed and disclosed by persons believed to be technically competent, they were estimated prior to the implementation of NI 43-101 and are therefore regarded as historical estimates for the purposes of NI 43-101 and as an exploration target for the purposes of JORC disclosure. A Qualified Person as defined in NI 43-101 has not done sufficient work to classify the historical estimate as current Mineral Resources. The Company is not treating the historical estimates as current Mineral Resources as defined in NI 43-101 and for this reason the historical estimates should not be relied upon. At present, the Company considers that these resources have no equivalent classification under NI 43-101 and should therefore be considered as unclassified. The historical information is presented on the basis that it may be of interest to investors.

Some of the information in this presentation, in relation to the mineral resources and ore reserves for all deposits except Manyingee and Michelin, was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with JORC Code 2012 on the basis that the information that the estimates are derived from has not materially changed since it was last reported.

PALADIN

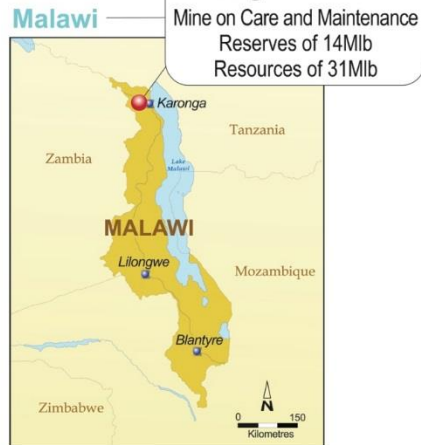

A GLOBAL URANIUM LEADER

OWNS LANGER HEINRICH, A STRATEGIC TIER ONE MINE

HAS OPTIMISATION AS A CORE COMPETENCY

PROVIDES BEST SENIOR LEVERAGE TO URANIUM UPSIDE

Global Uranium Leader

Attributable Reserves and Resources	
Proved + Probable	98.5Mlb U ₃ O ₈
Measured + Indicated	239.3Mlb U ₃ O ₈
Inferred	156.3Mlb U ₃ O ₈
Historic	21.9Mlb U ₃ O ₈

- Paladin 100%
- Paladin 75%
- Geological Assets

Resources and Reserves shown on the map represent 100% of the Resource of Reserve - not the participant's share, and are depleted for mining where appropriate.

Paladin is the world's only independent pure play uranium miner

- Cash and cash equivalents of **US\$183.7M**
- Cash outflow from operating activities of **US\$24.7M**
- Cash outflow from investing activities of **US\$15.6M**
- Cash inflow from financing activities of **US\$137.6M**

Capital Management

- Total debt reduction¹
 - US\$429.6M since June 2012
 - US\$189.9M during FY2015
- Next maturity is Q4 FY2017
- Outlook for improved operating cash flows
- Strategic initiatives to be considered

Debt Reduction FY2012 to FY2015

Breakdown of Key Debt Instruments ¹	US\$M
LHM Syndicated Facility Agreement	61
Convertible Bonds due April 2017	274
Convertible Bonds due March 2020	150
Total Debt	485

¹Reductions based on face value of debt

Optimisation a Core Competency

- Paladin maintains a world class technical services team focused on cash flow optimisation
- FY2015 key project delivered was BRP
 - ✓ Capital Cost of US\$6.8M
 - ✓ 93% utilisation in first full quarter of operation – likely to achieve >95%
 - ✓ Recovery of sodium bicarbonate 118% of design by end of first quarter
 - ✓ Total direct cost saving projected to be >US\$3/lb (>US\$15Mpa)
 - ✓ Additional secondary benefits

Optimisation a Core Competency

FY2016 Cash Flow Optimisation Initiatives

All in total expenditure including annualised impact and optimisation initiatives¹

¹Includes: Operating cash flows; investing cash flows; and debt servicing (including principal and interest payments on the LHM syndicated facility agreement)

Best Leverage to Uranium Upside

Uranium is not affected by recent commodity rout

Best Leverage to Uranium Upside

Uranium has a positive outlook and Paladin has leverage

Source: TradeTech for historical spot. Analysts' forecast is based on average of 16 analyst forecasts as shown in latest available reports (analysts include: BAML; BMO; Cantor; CIBC; CIMB; Comark; CS; Dundee; JPM; Raymond James; RBC; RFC Ambrian; Salman; Scotiabank; TD; and UBS).

- Current situation is positive
 - Japan restart commenced 10 August
 - 2017 will see record nuclear power generation
 - 65 reactors under construction
 - 59% in Asia
 - Mined supply reduced 10% in 2014
 - Higher prices are needed
- Paladin is leveraged
 - Publicly-listed uranium pure play exposure
 - FY2016 85% spot-related exposure
 - FY2017 & FY2018 almost 100% spot related

PALADIN

1. Maximise LHM operating cash flows through optimisation initiatives that preserve the integrity of the long-term life of mine plan
2. Maintain KM and exploration on a “minimal expenditure, care and maintenance basis”
3. Minimise corporate and administrative costs
4. Consider strategic initiatives with respect to partnerships, strategic investment, funding and corporate transactions

Appendix

Langer Heinrich Project Update

- **Production FY2015**
 - 5.037Mlb
 - recovery 87.6%
 - Bicarbonate Recovery Project (BRP) commenced April 2015 operating 120% of design
 - positive change to plant performance immediate
 - significant reduction in reagent usage
 - positive impacts in other areas of the plant provide consequential benefits
 - C1 Cost US\$29.0/lb

- **C1 Cost being reduced in FY2016**

- C1 cash cost \$25-27/lb

- **Optimisation and innovation for further unit cost reduction**

- further benefits from the BRP project expected
- other focal areas:
 - process recovery
 - operator training and operating systems
 - process plant utilisation

- **Guidance FY2016 of 5.0 - 5.4Mlb**

	Actual FY2015	Actual Jun'15 Qtr
Ore processed	3.4Mt	0.89Mt
Ore feed grade	768ppm	778ppm
Recovery	87.6%	87.8%
U ₃ O ₈ production	5.04Mlb	1.34Mlb

■ Kayelekera Mine

- C&M routines established and costs coming down
- restart feasibility study near completion
- discharge of water continued successfully during the year

■ Michelin Deposit Canada

- successfully upgraded Michelin deposit Measured & Indicated mineral resource by 25% to 84Mlb U_3O_8 , with 23Mlb U_3O_8 remaining in Inferred
- historic NROP (Non Resident Ownership Policy) exemption granted to Paladin to majority own and develop operation at Michelin

■ Manyingee WA

- advancing toward Field Leach Trial (FLT)
- significant project enhancement with new acquisition of Carley Bore
