

Low-Cost Producer With Growth

Denver Gold Forum 2015

Rod Antal, President & Chief Executive Officer September 21, 2015

Cautionary Statements

FORWARD-LOOKING STATEMENTS Except for statements of historical fact relating to Alacer, certain statements contained in this presentation constitute forward-looking information, future oriented financial information, or financial outlooks (collectively "forward-looking information") within the meaning of Canadian securities laws. Forward-looking information may be contained in this document and other public fillings of Alacer. Forward-looking information often relates to statements concerning Alacer's future outlook and anticipated events or results and, in some cases, can be identified by terminology such as "may", "will", "could", "expect", "plan", "anticipate", "believe", "intend", "estimate", "projects", "predict", "potential", "continue" or other similar expressions concerning matters that are not historical facts.

Forward-looking information includes statements concerning, among other things, preliminary cost reporting in this presentation, production, cost and capital expenditure guidance; development plans for processing sulfide ore at Çöpler; ability to discover additional oxide gold ore, amount of contained ounces in sulfide ore; results of any gold reconciliations; ability to discover additional oxide gold ore, the generation of free cash flow and payment of dividends; matters relating to proposed exploration, communications with local stakeholders and community relations; negotiations of joint ventures, negotiation and completion of transactions; commodity prices; mineral resources, mineral reserves, realization of mineral reserves, existence or realization of mineral resource estimates; the development approach, the timing and amount of future production, timing of studies, announcements and analyses, the timing of construction and development of proposed mines and process facilities; capital and operating expenditures; economic conditions; availability of sufficient financing; exploration plans, receipt of regulatory approvals and any and all other timing, exploration, development, operational, financial, budgetary, economic, legal, social, regulatory and political matters that may influence or be influenced by future events or conditions. Actual results may vary from such forward-looking information for a variety of reasons, including but not limited to risks and uncertainties disclosed in other Alacer filings at www.sedar.com. Forward-looking statements are based upon management's beliefs, estimate and opinions on the date the statements are made and, other than as required by law, Alacer does not intend, and undertakes no obligation to update any forward-looking information to reflect, among other things, new information or future events.

You should not place undue reliance on forward-looking information and statements. Forward-looking information and statements are only predictions based on our current expectations and our projections about future events. Actual results may vary from such forward-looking information for a variety of reasons, including but not limited to risks and uncertainties disclosed in Alacer's filings at www.sedar.com and other unforeseen events or circumstances. Other than as required by law, Alacer does not intend, and undertakes no obligation to update any forward-looking information to reflect, among other things, new information or future events.

All Mineral Reserves and Mineral Resources referenced in this presentation and the Corporation's other public filings are estimated in accordance with National Instrument 43-101, Standards of Disclosure for Mineral Projects ("NI 43-101") of the Canadian Securities Administrators and Canadian Institute of Mining, Metallurgy and Petroleum standards and the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. While terms associated with various categories of Mineral Reserves or Mineral Resources are recognized and required by Canadian regulations, they may not have equivalent meanings in other jurisdictions outside Canada and no comparison should be made or inferred. Actual recoveries of mineral products may differ from estimates of Mineral Resources due to inherent uncertainties in acceptable estimating techniques. In particular, Inferred Mineral Resources have a greater amount of uncertainty as to their existence, and their economic and legal feasibility. It cannot be assumed that all or any Inferred Mineral Resources that are not Mineral Reserves will ever be converted into Proven Mineral Reserves or Probable Mineral Reserves.

The information in this presentation which relates to exploration results is based on information compiled by James Francis, BSc (Hons) Geology and MSc Mining Geology, MAusIMM, MAIG, who is a full-time employee of Alacer. Mr. Francis has sufficient experience which is relevant to the style of mineralization and type of deposit under consideration and to the activity which is being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves and a qualified person pursuant to NI 43-101 – Standards of Disclosure for Mineral Projects of the Canadian Securities Administrators. Mr. Francis consents to the inclusion in this presentation of the matters based on this information in the form and context in which it appears.

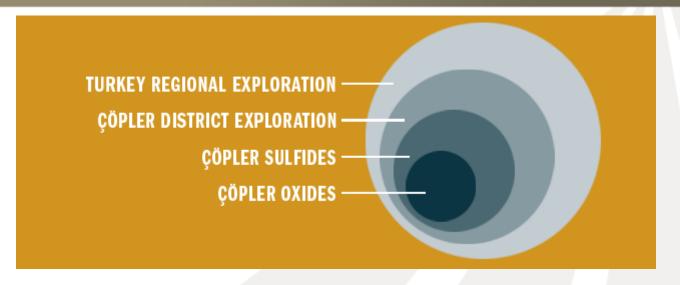

The competent person statements and consents for each of Dr. Harry Parker and Mr. Gordon Siebel (in relation to the Mineral Resource estimates in this presentation) and Mr. Stephen K. Statham and Mr. James Francis (in relation to the Mineral Reserves estimates in this presentation) are included on page 9 of Alacer's announcement dated March 30, 2015 titled "Alacer Gold Increases its Life-of-Mine Gold Production Profile by Over 800,000 ounces, Increasing Oxide Production by Over 245,000 Ounces Following an Updated Resource and Reserve Estimate".

Alacer confirms that it is not aware of any new information or data that materially affects the information included in the R&R Announcement and, in the case of Mineral Resources or Mineral Reserves, all material assumptions and technical parameters underpinning the estimates in that announcement continue to apply and have not materially changed, save for, in both cases, depletion.

Messrs. Seibel, Parker, Swanson, Benbow, Ligocki and Statham consent to the inclusion in this presentation of the matters based on this information in the form and context in which it appears.

This presentation does not represent a solicitation or offer to sell securities. All dollars in this presentation are US\$'s.

- ✓ Sustainable, Low-Cost Producer
- Strong Financial Position
- Organic Growth Underway
- ✓ Well Positioned to Capitalize on Exploration Success
- ☑ Continuing to Execute on our Strategy

Continue to Execute on our Strategy

Achievements since Denver Gold Forum 2014

Expanded Heap Leach Pad

Approval Received for Sulfide Project EIA

Announced Sulfide Project Team

Exceeded 2014
Production
Guidance

Increased Life of Mine Production by >800,000 ozs, and oxide production by >245,000 ozs

Engaged AFW for Sulfide Project Detailed Engineering

Approval Received for 3rd Turkish Incentive Certificate

Improved Guidance

Commenced
Initial Site
Earthworks for
Sulfide Project

Engaged Air Liquide for Sulfide Project Oxygen Plant

Çöpler Pours 1
Millionth Ounce of
Gold

\$250M Credit Facility

Q2 2015

Q3 2015

Q4 2014

Q1 2015

Over 7 Million Man-Hours Worked Without a Lost-Time Injury

Sustainable, Low-Cost Producer

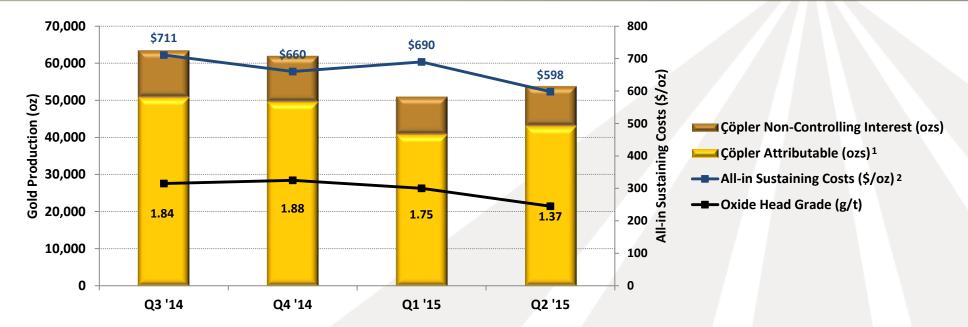

- Excellent health, safety, environment and community relations record
- ☑ Generated approximately \$600M of cash in 4.5 years
- ☑ 2015 Total Cash Costs (C2) Guidance of \$450-\$500/oz, generating significant operating cash flow

Produced 1 Millionth Ounce of Gold With Average Operating Cash Costs (C1) of \$401/oz

Çöpler's Ongoing Operational Excellence

- Q2 2015
 - Production of 53,757 ounces
 - Total Cash Costs² (C2) of \$386/ounce
 - All-in Sustaining Costs² (AISC) of \$598/ounce
 - Operating cash flow of \$24.4M
- On track to meet 2015 guidance of 190,000 to 210,000 ounces at All-in Sustaining Costs² of \$700 to \$750 per ounce

¹ Attributable gold production is reduced by the 20% non-controlling interest at the Çöpler Gold Mine

Total Cash Costs and All-in Sustaining Costs are non-IFRS financial performance measures with no standardized definitions under IFRS. For further information and detailed reconciliations, please see the "Non-IFRS Measures" section of the MD&A for the three month period ended June 30, 2015, which can be found on the Company's website at www.AlacerGold.com.

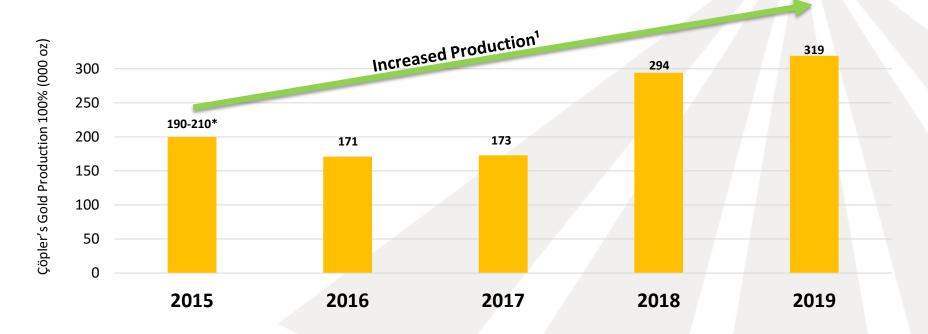

Strong Financial Position

- ✓ No Debt
- **✓** \$250M Credit Facility
 - 7-year term
 - Interest rate of LIBOR + 2.5% to 2.95%,
 - No mandatory hedging
- Third Incentive Certificate Secured
 - Includes tax incentives providing significant cash tax credits
 - Certificate has a 6-year duration to October 2020
 - Certificate includes Sulfide Project and Heap Leach Pad Phase 4 expansion
- ▼ Tax Outlook Confirmed
 - Annual accounting effective tax rate forecast to remain low less than 0%
 - Cash effective tax rate forecast to remain low approximately 5%

Organic Growth Underway

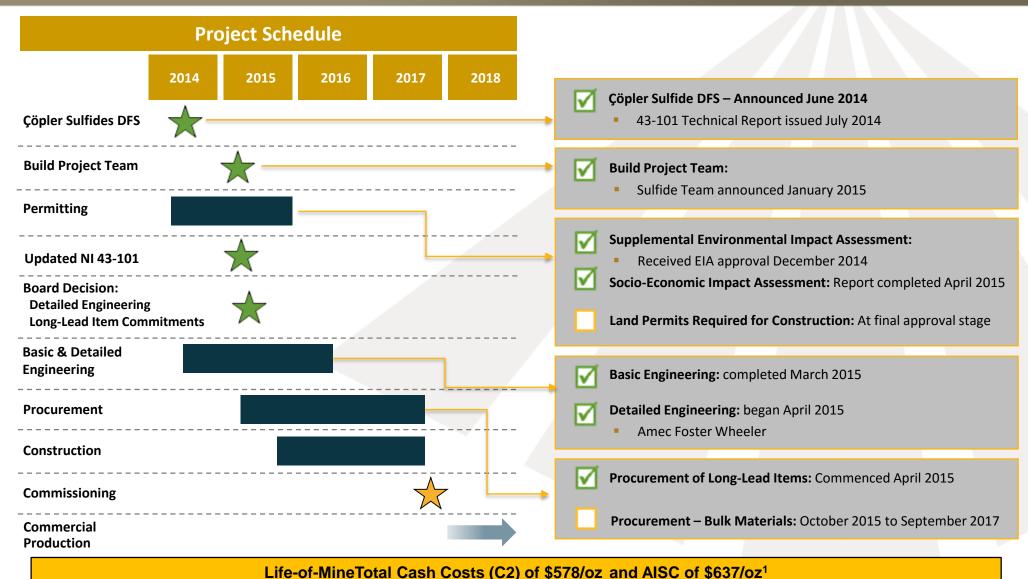

- Increased oxide production in years 2015-2019 generates significant additional free cash flow during construction, commissioning and ramp up of Sulfide Project
 - Oxide production increased by 210,000ozs beyond 2017
- Sulfide Project increased Life-of-Mine production to 3.9Mozs, adding 22 years of production and improving investment case

Sulfide Project On Track

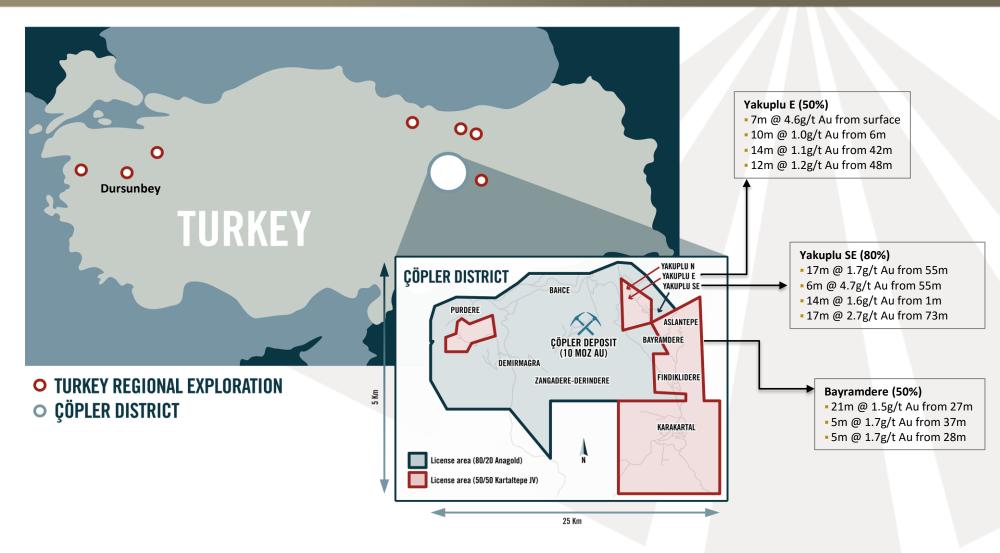

¹Total Cash Costs and AISC costs are non-IFRS financial performance measures with no standardized definitions under IFRS. For further information and detailed reconciliations, see the "Non-IFRS Measures" section of the MD&A for the year ended June 30, 2015 and Çöpler's NI 43-101 Technical Report titled, "Çöpler's Sulfide Expansion Project Feasibility Update", dated March 27, 2015, which can be found on the Company's website at www.AlacerGold.com.

Çöpler District and Regional Exploration

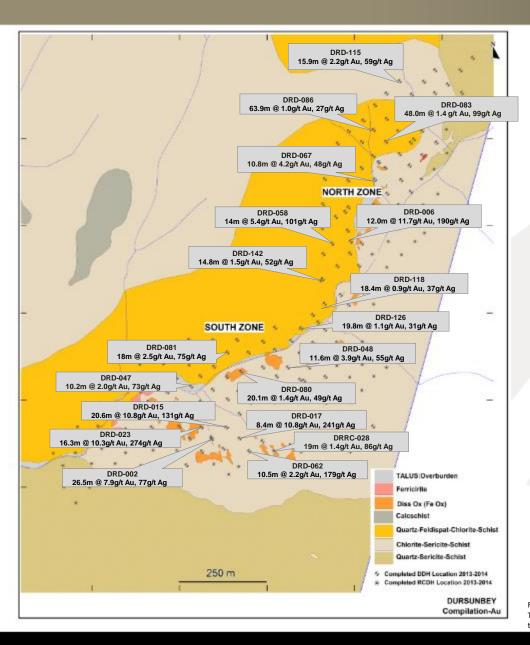

Well Positioned to Capitalize on Exploration Success

Dursunbey Project

- Discovery in western Turkey
- 58,000m & 500 holes drilled through June 2015
- Notable high grade intercepts
- Infill and extensional drilling
- Exercised clawback to 50%
- Metallurgical test work progressing to determine processing options

For additional information, please see press release dated February 24, 2014 entitled "Alacer Announces Results of Exploration in Turkey" and press release dated September 15, 2014 entitled "Alacer Announces Exploration Results in Turkey", which can be found on the Company's website at www.AlacerGold.com.

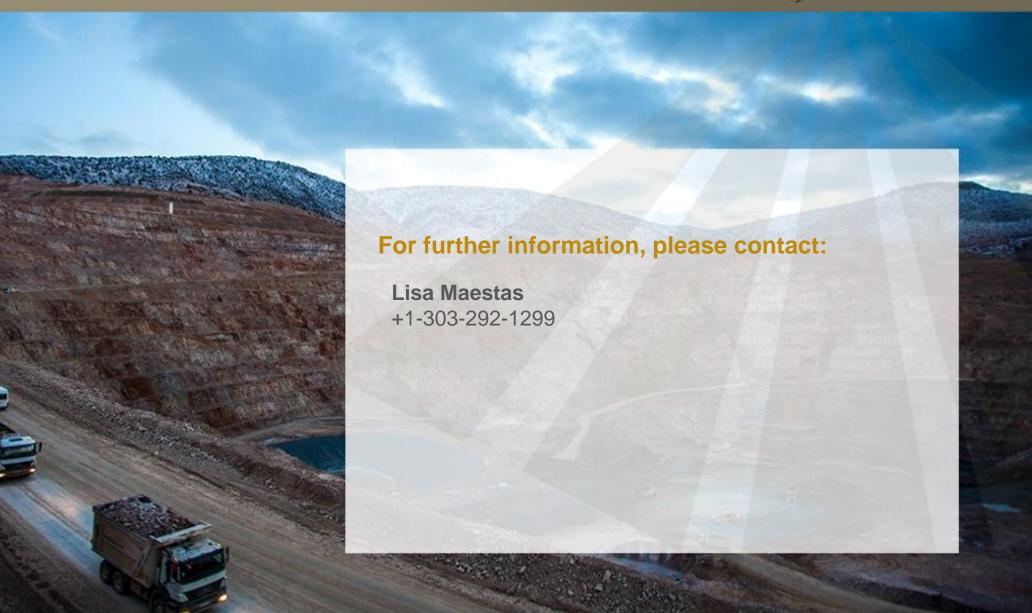

Key Investment Highlights

- **Sustainable, Low-Cost Producer**
 - Produced 1Moz at an average C1 cash cost of \$401/oz
 - Generated approximately \$600M of cash in 4.5 years
- **Strong Financial Position**
 - \$360M in cash and no debt
 - \$250M credit facility
- **Organic Growth Underway**
 - Increased oxide production by 210,000ozs beyond 2017
 - Sulfide Project increases LOM production to 3.9Mozs; adding 22 years of production
- **Well Positioned to Capitalize on Exploration Success**
 - Drilling for near mine satellite oxide pits underway at Yakuplu
 - Metallurgical test work progressing at Dursunbey project
- **Continuing to Execute On Our Strategy**
 - Business reset and right team in place
 - On track to meet 2015 guidance
 - Over 7 million man-hours worked without a lost-time injury

Appendix

Capital Structure

Market Cap ~C\$832M

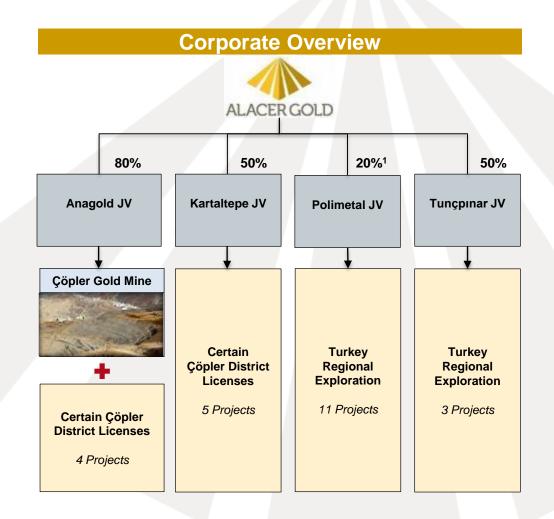

Shares on Issue 291M

Fully Diluted 295M

Turnover ~1.6M shares/day

Cash US\$360M at June 30, 2015

Debt Nil

Strong Turkish Joint Venture with Lidya Mining

¹ Alacer has the right to "claw back" up to a 50% interest in individual projects within the Polimetal JV.

Improved 2015 Guidance

Çöpler Mine		Revised 2015	Previous 2015	Favorable
		Guidance	Guidance	Changes
Heap-leach gold ounces produced (100%)	('000's)	190 to 210	180 to 200	10 ¹
Total Cash Costs ² (C2)	(\$/oz)	450 to 500	525 to 575	75 ¹
All-in Sustaining Costs ² (AISC)	(\$/oz)	700 to 750	775 to 825	75 ¹
Çöpler Sustaining capital expenditure (100%)	(\$millions)	\$35	\$35	-
Çöpler Sulfide capital expenditure (100%)	(\$millions)	\$85	\$100	15
Exploration expenditure (100%)	(\$millions)	\$22	\$22	-

- Improved guidance driven by new mine plan³, updated gold recovery model and lower costs
- Total Cash Costs (C2) will remain among the lowest in the industry
- Sustaining capex includes final Heap Leach Pad Phase 4 expansion of \$24M or ~\$120/oz⁴
- Sulfide Project phasing of capex has been updated after completion of basic engineering;
 2015 spend includes detailed engineering and procurement of long-lead time items
- Exploration focused on identifying satellite oxide deposits within the Çöpler District as well as resource drilling and metallurgical work at Dursunbey

¹ Based on mid point of guidance

Total Cash Costs, All-in Sustaining Costs and All-in Costs are non-IFRS financial performance measures with no standardized definitions under IFRS. For further information, see the "Non-IFRS Measures" section of the MD&A for the three month period ended March 31, 2015, which can be found on the Company's website at www.AlacerGold.com.

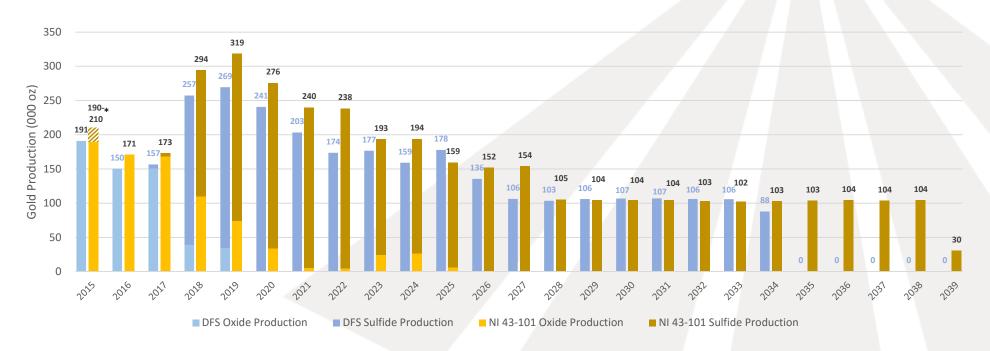

³ Please see Press Release titled "Alacer Gold Increases Its Life-of-Mine Gold Production by Over 800,000 Ounces, Increasing Oxide Production by Over 245,000 Ounces Following an Updated Resource and Reserve Statement" dated March 30, 2015, which can be found on the Company's website at www.AlacerGold.com.

⁴ Assuming mid point of guidance of 200,000 ounces

Life-of-Mine Production Profile

Çöpler Life-of-Mine Production Profile (100% Basis)¹

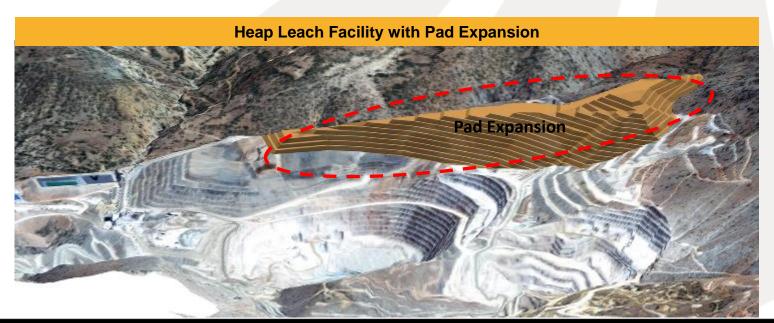

- Sulfide production increases mine life by 22 Years
- Sulfide ounces provide 79% of mine life
- Forecast gold production of 3.1Mozs at an average AISC of \$637/oz

Çöpler Heap Leach Pad Expanded to 58Mt

- Heap Leach Pad Phase 4 ("HLP4") was previously designed for ultimate pad capacity of 49 million tonnes
- Design change to HLP4 in December 2014 increased pad capacity to 58 million tonnes, extending oxide production through 2025
 - Current mine plan does not fill pad capacity
- Additional oxide production during Sulfide Project construction and commissioning further de-risks the Project
- Engineering on a second heap leach pad in a new location will advance in 2015

Sulfide Project Demonstrates Robust Economics

	LOM Key Metrics As of Januar	y 1, 201	5 ¹ (100%)	
			Oxide - HL	Sulfide - POX
	Total Ore Processed	Kt	25,061	40,166
	Au Grade	g/t	1.24	2.57
LOM	Au Recovery	%	72%	93%
Operating Parameters	Total Au Production	koz	814 ²	3,109
	Operating Costs	\$/t	\$35.46	
	Total Cash Costs ³ (net of by-prod)	\$/oz	\$578	
	AISC ³ (net of by-prod)	\$/oz	\$6	537
By products	Annual Avg. Ag Production	koz	3	5
By-products	Annual Avg. Cu Production	klbs	2,841	
Сарех	Development Capex ¹	\$ mm	\$633	
	LOM Sustaining Capex ⁴	\$ mm	\$209	
NPV ⁵	NPV _{0%}	\$ mm	\$1,	727
	NPV _{5%}	\$ mm	\$9	71

Development Capex is as of July 1, 2014

² Assumes 2015 mid-point of production guidance

Total Cash Costs and AISC costs are non-IFRS financial performance measures with no standardized definitions under IFRS. For further information and detailed reconciliations, see the "Non-IFRS Measures" section of the MD&A for the year ended June 30, 2015.

⁴ Excludes reclamation costs of \$69 million.

Based on gold price of \$1,250 per ounce

Base Case Financial Metrics

After Tax Financial Metrics (as of January 1, 2015)		Base Case (Oxide Only) A	43-101 Case (Heap Leach + POX) B	Incremental B – A
LOM cash flow	(millions)	\$323	\$1,727	\$1,404
NPV at 5%	(millions)	\$310	\$971	\$661
IRR	%	N/A	N/A	18.9%
Payback from start of sulfide gold production	Years	N/A	1.9	

- Updated 43-101 Assumptions as of January 31, 2015
 - Gold price of \$1,250 per ounce
 - Copper price of \$3.18 per pound
 - Silver price of \$20 per ounce
 - US\$/Turkish Lira exchange rate: 2.2
 - Electricity (\$/kWh): 0.09
 - Diesel cost: \$2.12/liter

Sulfide Project - Sensitivities

		Gold Price	Gold Price	Base Case	Gold Price	Gold Price
(as of January 1, 2015)		\$1,100/oz	\$1,200/oz	\$1,250/oz	\$1,300/oz	\$1,400/oz
After-tax						
Total cash flows	\$ millions	\$1,163	\$1,539	\$1,727	\$1,912	\$2,219
Total NPV at 5%	\$ millions	\$615	\$852	\$971	\$1,089	\$1,301
Payback from start of	Years	2.7	2.1	1.9	1.7	1.3
sulfide gold production			4			
Incremental ¹ NPV at 5%	\$ millions	\$368	\$563	\$661	\$758	\$927
Incremental ¹ IRR	%	13.3%	17.1%	18.9%	20.7%	24.2%

¹ Incremental represents the sulfide case less oxide only case

Overview of Sulfide Processing Facility

Proven technology

- Proven technology used for 38% of global gold production
- Autoclave circuit comprised of seven individual pressure vessels
- Temperature of 220° C (430° F), Pressure of 2,900 kPag (420 psi)
- Sulfur grade averages 4.2%, providing the heat required to maintain the process
- Achieves near-complete oxidation of fine-grained, gold-bearing sulfides
- Overall gold recoveries of 94% confirmed from sulfide ore

Çöpler Mineral Resource

Mineral Resources for the Çöpler Deposit (As of December 31, 2014)							
Gold Cut-off Grade (g/t)	Material Type	Resources Category Material	Tonnes (x1000)	Au (g/t)	Ag (g/t)	Cu (%)	Contained Au (oz x 1000)
		Measured	-	,	,	_	_
		Indicated	37,097	1.11	2.91	0.15	1,319

Total - Oxide + Sulfide	65,227	2.06	5.70	0.12	4,313,000	3,829,000		

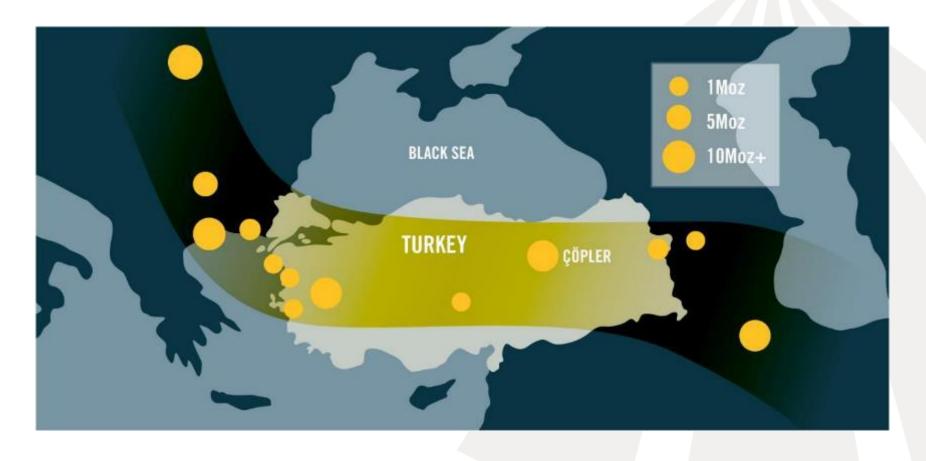

Total Reserve of 3.8M recoverable ounces of gold

Note: Reserves are shown on a 100% basis, of which Alacer Gold owns 80%. Rounding differences will occur. Further information on this resource estimate is in the press release titled "Alacer Gold Increases its Life-of-Mine Gold Production Profile by Over 800,000 Ounces, Increasing Oxide Production by Over 245,000 Ounces Following an Updated Resource and Reserve Estimate", dated March 30, 2015, which can be found on the Company's website at www.AlacerGold.com.

Exceptional Exploration Potential

Leveraging our expertise, assets and strategic advantage in Turkey

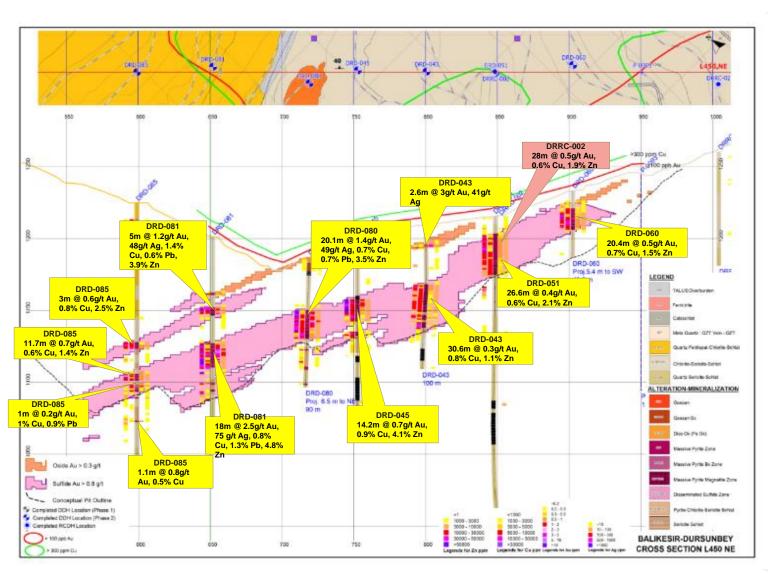

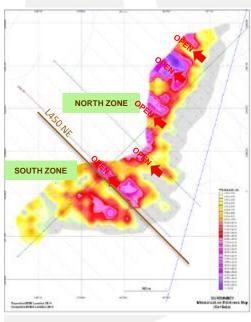

- 18 years in Turkey gives Alacer early-mover advantage
- Tethyan Belt is historically under-explored and has excellent mineral potential

Dursunbey Project

Cross Section L450 NE - Looking NE

For additional information, please see press release dated February 24, 2014 entitled "Alacer Announces Results of Exploration in Turkey" and press release dated September 15, 2014 entitled "Alacer Announces Exploration Results in Turkey", which can be found on the Company's website at www.AlacerGold.com.
