Thai resources giant selects EnviroSuite

- New international commercial agreement signed with Akara Resources (“Akara”), Thailand’s leading gold producer
- Agreement marks EnviroSuite’s second agreement internationally
- Strong alignment to Company’s growth strategy to expand its client base internationally and across new industries
- The contract provides Akara with access to EnviroSuite’s extensive suite of monitoring and modelling modules for air quality, blasting and complaints management
- Strong client validation and revenue potential for EnviroSuite technology across the global mining industry

Pacific Environment Limited (ASX:PEH, “The Company”) is pleased to announce that it has signed its second international client for EnviroSuite - Akara Resources, Thailand’s leading gold producer and a subsidiary of ASX-listed Kingsgate Consolidated Limited (ASX:KCN).

The new contract delivers the first client for EnviroSuite in Southeast Asia. The new client win is aligned with Pacific Environment’s strategy to grow its EnviroSuite client base internationally and expand its application into new industries.

Under the contract, Akara will have access to EnviroSuite’s extensive suite of monitoring and modelling modules for its Chatree Gold Mine. Specifically, Akara has selected EnviroSuite’s:

- Monitoring module for real-time meteorological and air quality status,
- Modelling module for predictive and risk management operations,
- Complaints module for community engagement, and
- Blast Management modules.

Each module will generate monthly software-as-a-service (SaaS) fees for Pacific Environment.

Akara is committed to its corporate and social responsibilities for local villages surrounding the Chatree Mining Complex and has selected EnviroSuite for its capacity to support community relations, helping it to provide transparency to local communities.

Operationally, the platform will help Akara to improve productivity rates and from a regulatory perspective, EnviroSuite will support Akara’s efforts to receive regulatory permits for a mine expansion plan. In addition, it will ensure a robust environmental management system is in place to maintain regulatory and social licences to operate as well as improving its relationship with regulators.

Commenting on engaging Pacific Environment, Greg Foulis, CEO of Kingsgate Consolidated, said:

“We are excited about rolling out Pacific Environment’s cutting edge technology to further enhance our environmental management, and bring an even greater level of accountability and transparency to our most important stakeholders, the local communities around our world-class Chatree Mining Complex.”

Commenting on this new client win, Peter White, CEO of Pacific Environment, said:

“EnviroSuite is quickly gaining international recognition for the vital insights it delivers to help companies reach operational and regulatory goals, as well as providing essential transparency for community relations. Our new contract with Akara serves as a strong endorsement of the platform and provides excellent client validation for its use in other metal mines. The use in coal and iron ore mines is amply demonstrated by the client base within Australia including BHP Billiton, Rio Tinto, and Anglo American.”
