Maiden drilling Program to commence in December at Eagles Nest Gold Project

HIGHLIGHTS

- Drilling program to commence December
- Program of works approved by DMP.
- Local Kalgoorlie Drilling Company awarded maiden drill program contract.
- Program to test strike extension to 250 metres.

Maximus Resources Limited (ASX:MXR) is pleased to announce that it has received approval for its **maiden drilling program** on the Eagles Nest tenement in the Spargoville project area and has appointed a local drilling contractor to complete the program.

Approval was received from the Department of Mines and Petroleum (DMP) in Western Australia for Maximus to complete 9 Reverse Circulation (RC) holes for 900 metres to test strike extensions and depth extensions on the Eagles Nest tenement. The area contains previous drilling which intersected up to 7 metre widths of mineralisation, to a depth of 150 metres below surface.

Maximus has previously announced an exploration target on this tenement (See ASX announcement 10 November 2015), and this maiden drilling program is designed to commence testing the region.

Maximus has appointed a local Kalgoorlie based drilling contractor and is scheduled to commence drilling in the first week in December 2015.

Maximus' Managing Director Kevin Malaxos said this was a significant event for the company since entering into the farm-in agreement in August this year. "We have increased our equity to 51%, identified numerous quality targets requiring further testing and are due to commence our maiden drilling program, all within the space of 3 months. Our intensity of work on the Spargoville tenement package confirms our belief that a significant project or projects are waiting to be unearthed".

This previous drilling has confirmed mineralised intersections to a depth of 150 metres below surface and indicates a strike length of 150 metres. The planned drilling program is designed to validate the current mineralised strike of 150 metres and test for strike extensions and depth extensions.

Maximus currently holds 51% equity in the Spargoville tenement package, and is advancing towards 90% equity in accordance with the Farm-in Agreement.

The company is currently completing a Share Purchase Plan (SPP) offering eligible shareholders the opportunity to purchase shares at a discount to the 5 day VWAP when announced. Funds raised from

the SPP shall be used predominantly to complete exploration at Spargoville and Narndee. The SPP process closes on Friday 27th November 2015.
