

**ASX Announcement**

3 December 2015

**Drilling update - Maximus' Eagles Nest Gold Project**

**HIGHLIGHTS**

- Mineralised lode system intersected in first completed drill hole
- Program testing strike extension to 250 metres
- Recent field mapping indicates potential further strike extension beyond 250m

Maximus Resources Limited (ASX:MXR) is pleased to update shareholders on progress of the Eagles Nest drilling program that commenced on Wednesday 2<sup>nd</sup> December.

The first planned Reverse Circulation (RC) drill hole MXENRC008 was drilled to a depth of 67m and intersected the mineralised lode system as predicted below the historic shaft to the north of the mineralised ore zone. The drill rig moved onto hole 2 (MXENRC009) overnight and should be in a position to test the mineralised ore position late today (Thursday 3 December)

The drill program consists of 9 Reverse Circulation (RC) drill holes for 900 metres to test for strike extensions and depth extensions of the mineralised target on the Eagles Nest tenement. Previous drilling along the mapped structure intersected mineralisation up to 7 metres in width to a depth of 150 metres below surface.

The drilling program is designed to validate the current mineralised strike length of 150 metres and test for strike extensions, initially out to 250 metres and further depth extensions. Field mapping completed onsite recently indicates potential additional strike extensions that will be tested in the near future.

All samples collected will be delivered to the Kalgoorlie based assay laboratory early next week for analysis.

Maximus currently holds 51% equity in the Spargoville tenement package, and is advancing towards 90% equity in accordance with the Farm-in Agreement.

The company is currently completing a Share Purchase Plan (SPP) offering eligible shareholders the opportunity to purchase shares at a discount to the 5 day VWAP (volume weighted average price) when announced. Funds raised from the SPP shall be used predominantly to complete exploration at Spargoville and Narndee.

The SPP process closes on Friday 4<sup>th</sup> December 2015.
