ASX ANNOUNCEMENT – 6 January 2016

INFORMATION REGARDING QUEENSLAND TRAIN DERAILMENT

Incitec Pivot Limited (ASX: **IPL**) today advised that, having completed its initial assessment of the impact of the train derailment on 27 December 2015, there is expected to be an adverse one-off impact to Incitec Pivot's full year Net Profit After Tax of approximately \$14 million.

The train, operated by a third party freight operator, was transporting a shipment of sulphuric acid for use at Incitec Pivot's Phosphate Hill fertiliser manufacturing facility in Queensland, Australia. The train derailed near Julia Creek, while en route from Townsville.

While wet weather had been delaying access to the site, Queensland Rail is now building access roads to enable commencement of construction of a rail deviation around the derailment site. Rail services are continuing to operate between Incitec Pivot's Mt Isa and Phosphate Hill facilities. IPL expects full plant operations to resume during the third week of January 2016.

Incitec Pivot's Phosphate Hill plant is still expected to produce 950,000 tonnes of fertiliser during IPL's 2016 financial year. It is not envisaged that fertiliser supply to Australian domestic customers will be affected, assuming a normal winter crop season.

Daniella Pereira
Company Secretary
