### HIGHLIGHTS

#### Merlin Mine - Mining Operations

- Final design of the barge and gantry mining arrangement with mechanical clamshell grab ("Mining Barge") is now complete.
- Tenders for procurement and fabrication of the Mining Barge are currently being assessed.

#### Merlin Mine - Exploration

- No exploration conducted this quarter.
- Exploration portfolio reviewed and non-core exploration projects relinquished.
- Previous work identified seven (7) drill ready targets and seventy-four (74) new exploration target areas which remain to be investigated.

## MERLIN DIAMOND MINE PROJECT

### Background

The Merlin diamond mine project is located some 100km south of the settlement of Borroloola in the Northern Territory and comprises 13 kimberlite pipes. Since 1998, nine of the Merlin pipes have been subject to open-pit mining over a 5 year period. These previous mining operations produced 507,000 carats of high quality diamonds. This included Australia's largest diamond at 104.73cts. In 2004, North Australian Diamonds Ltd acquired the project from the Rio Tinto parties and current management took control in 2008.

### Merlin Diamond Mine - Mechanical Clamshell Grab Mining

The final structural design of the crane gantry frame for the Mining Barge has been completed and tenders for construction of the Mining Barge are currently being reviewed.

### Mineral Resources and Ore Reserves

Merlin's Mineral Resource and Ore Reserve estimates were last updated 30 September 2014. For a full description of these estimates, including material changes since the last estimates and Table 1 of the 2012 JORC Code please see Merlins announcement of 30 September 2014 on Merlins website titled "*Mechanical Clamshell Grab Mining Feasibility Study, Probable Ore Reserve Estimate and Mineral Resource Estimate Update*". Please click [here](#) for the link.

The combined Mineral Resource and Ore Reserve estimates for all of the diamond pipes at the Merlin Mine is 27.8 million tonnes at 16 carats per hundred tonnes representing a total contained 4.35 million carats.

## **Probable Ore Reserve Estimate**

The combined Probable Ore Reserve for all diamond pipes at the Merlin diamond mine is 4.04 million tonnes for an average grade of 15 carats per hundred tonnes (cpht) representing a total contained 0.61 million carats. The Probable Ore Reserve has been estimated on mechanical clamshell mining methods and is the result of a recently completed feasibility study discussed below.

<b>PROBABLE ORE RESERVE SUMMARY @ +5DTC lower cutoff</b>

Mbcm = million bank cubic metres, t/m<sup>3</sup> = tonnes per cubic metre, Mt = million tonnes, cpht = carats of diamonds per hundred tonnes, Mcts = millions of carats of diamonds.

The information in this report that relates to Ore Reserves is based on information compiled by Dr David Tyrwhitt, a Competent Person who is a Fellow of The Australasian Institute of Mining and Metallurgy. Dr Tyrwhitt is employed by DS Tyrwhitt & Associates and is a Director of Merlin Diamonds Ltd. Dr Tyrwhitt has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Tyrwhitt consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

These Ore Reserves are stated as at 30 September 2014 and are defined as ore delivered to the processing plant.

This Probable Ore Reserve is not additional material to the Mineral Resource estimates reported below but is included within the Indicated category of the Mineral Resource estimate.

Rounding of tonnage and carats may result in computational discrepancies.

The information in this report that relates to Exploration Targets, Exploration Results or Mineral Resources is based on information compiled by Mr Mike Kammermann, a Competent Person who is a Member of The Australasian Institute of Geoscientists. Mr Kammermann was employed by Axis Consultants Pty Ltd and has been engaged by Merlin Diamonds Ltd to prepare the documentation for the Mineral Resource estimates. Mr Kammermann has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Kammermann consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

## **EXPLORATION OVERVIEW**

### **Merlin Mining Lease (ML1154) and near Mine**

No exploration work was undertaken this quarter.

#### *Summary of Previous Work*

Review of all available historical data was completed in early 2014 with the identification of seventy-four new target areas that require further investigation. Seven of these targets are ready for immediate drilling (Figure 1). During 2013 the Company's field personnel completed an extensive heavy mineral sampling program on ML1154 and EL26944 targeting areas where sampling density was considered insufficient. Kimberlitic chromites have been recovered from a number of these samples in an area where no known kimberlites occur (Figure 1). This area has been poorly explored in the past relative to other parts of the mining lease and these results are highly encouraging. High resolution ground electromagnetic surveying will be undertaken to define drilling targets.

### Borroloola Alluvial Diamond Project

The company has decided to focus resources on development of the primary mining project at the Merlin Diamond Mine and high priority exploration targets within and immediately surrounding the Mine Lease and will therefore reduce its current exploration portfolio. The Borroloola Project was reviewed during the quarter and was assessed as being a non-core exploration asset and therefore this project, consisting of EL24512 and EL24082, has been relinquished.

## Arnhem Land Exploration

The Company's Arnhem Land project consists of 1 granted exploration licence (EL26206). Numerous exploration licences are currently at the application stage and are held by Merlin Diamonds either outright or under joint venture agreements with other parties.

The licences are located on the North Australian Craton (**NAC**), which is a geologically stable block favourable for kimberlite emplacement. The NAC hosts the Merlin kimberlite field, the Abner Range kimberlite and breccia pipes, and the Roper River and Timber Creek kimberlites.

The majority of the licence applications fall on land controlled by the Arnhem Land Aboriginal Land Trust. Merlin has farmed out the non-diamond rights for the majority of the licence applications to Top End Minerals Limited (Top End). Top End is responsible for negotiations with the Northern Land Council and progress of the licences to grant and to obtain early ground access, Top End has submitted Preliminary Exploration Permit applications to the Northern Land Council, which allow activities such as geological mapping, surface sampling and ground geophysics. These activities will enable Top End to make an early assessment of the prospectivity of some applications and whether to prioritise these for negotiations with the Northern Land Council.

## WESTERN AUSTRALIAN PROJECTS

### Kimberley Diamond Projects

The Company holds three mining licences (M80/492, M80/26 and M80/532) in the Kimberley region of Western Australia. The licences host a number of diamondiferous kimberlite pipes, which the Company has previously evaluated to identify a JORC Compliant Inferred Resource of 869,000 carats. The Company continues to hold the mining licences as they retain commercial potential. The information in the table below was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported.

## Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
