Dear Ms Sinniah

In response to your letter of 10 February 2016, we wish to advise:

- 1. It is possible to conclude on the basis of the information provided that if the Company were to continue to expend cash at the rate for the quarter indicated by the Appendix 5B, the Company may not have sufficient cash to fund its activities. Is this the case, or are there other factors that should be taken into account in assessing the Company's position?*

There are other factors to be considered.

The Company is aware of its cash position at the end of the quarter and has access to any additional funds from interim loans from the Executive Chairman to meet its funding obligations for any working capital requirements.

The Company is also currently considering the most suitable method for raising capital and will advise the market in due course.

Having regard to the above matters, the Company believes that it will have sufficient funds to fund its activities.

- 2. Does the Company expect that in the future it will have negative operating cash flows similar to that reported in the Appendix 5B for the quarter and, if so, what steps has it taken to ensure that it has sufficient funds in order to continue its operations at that rate?*

As the Company does not have a source of Operating Cash Flow, it does expect to have negative operating cash flows in the future, which is typical of junior exploration companies. The Company currently expects that, in the foreseeable future, the quantum of negative operating cash flow will be broadly similar to that reported for the most recent quarter.

As stated above, the Company is currently considering the most suitable method for raising capital and will advise the market in due course.

Any type of capital raising is expected to provide the Company with sufficient funds to continue its operations at this rate for the foreseeable future.

- 3. What steps has the Company taken, or what steps does it propose to take, to enable it to continue to meet its business objectives?*

---

The Company's response to question 1 above set out steps that it is proposing to take in respect of raising capital to meet its business objectives.

In addition, the Company holds a portfolio of exploration projects, some of which are or could potentially be of interest to other organisations, and from which other organisations funding to investigate such projects could potentially be made available.

The Company is actively pursuing these and other types of arrangements in respect of its various other exploration projects.

*4. Can the Company confirm that it is in compliance with the listing rules, and in particular, listing rule 3.1?*

The Company can confirm that it is compliance with LR 3.1.

*5. Please comment on the Company's compliance with listing rule 12.2, with reference to the matters discussed in the note to the rule.*

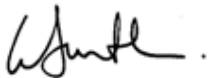

As stated above in responses to question 3, the company holds a portfolio of exploration projects at various stages of advancement.

In the case of two projects – Mandilla and Koongie Park – mineral resources are currently mapped. The Victoria River Project has been considered sufficiently prospective to attract the interest of leading global base metals producer MMG Limited. The Company believes that both its Leonora and Koongie Park Projects have material value.

The Company has minimal liabilities.

For the reasons set out above, and also in the response to your question 1 the Company has access to funds and accordingly, the Company believes that it is in compliance with listing rule 12.2.

Yours sincerely

**Listing rule 3.1**

Listing Rule 3.1 requires a listed entity to give ASX immediately any information concerning it that a reasonable person would expect to have a material effect on the price or value of the entity's securities. Exceptions to this requirement are set out in Listing Rule 3.1A.
