Australian Securities Exchange**

**Partnership with Libelium**

**Pacific Environment Limited** (ASX:PEH, “The Company”) is pleased to announce that we have signed a Partnership deal with Libelium, an Internet of Things (IoT) platform provider based in Spain. Libelium designs and manufactures hardware and software for wireless sensor networks, enabling fast, efficient delivery of IoT, M2M and Smart Cities solutions across a wide spectrum of applications.

The partnership admits Pacific Environment Limited as a member of the Libelium IoT Marketplace Partner Program, which aims to commercialise IoT kits combining Libelium’s hardware with EnviroSuite technology. Libelium is building a global distribution network with existing resellers in Asia, North and South America, Europe and Oceania.

At the recent Mobile World Congress in Barcelona, Pacific Environment in conjunction with Libelium exhibited two vertical solutions, EnviroSuite Ambient and EnviroSuite Indoor, which demonstrated applications in community odour impacts and hospital infection control, respectively. The two companies have now agreed to collaborate to produce a suite of turn-key hardware/software solutions to sell into Libelium’s customer base.

More than 2,000 developers from 75 countries representing companies ranging from startups to universities to large international corporations have adopted Libelium’s technology for projects in North America, Australia, Asia and Europe.

Previous Libelium customers include NASA, Sony Ericsson, Boeing, Phillips and 3M among others. Libelium is also currently partnered with IBM on its BlueMix platform.

**Ms Alicia Asín, Chief Executive Officer of Libelium, commented on the agreement:**

*“We are excited to collaborate with EnviroSuite to create world-leading proactive environmental management solutions in order to benefit our clients and add value to their operations.*

*The combination of EnviroSuite’s industry-leading dashboard and Libelium sensors, will empower the user with real-time environmental monitoring, forecasting and archived data in*

*order to make the best possible decisions. The potential for the application of EnviroSuite and Libelium solutions across a diverse range of industries around the world is huge.”*

**Murray d’Almeida, Chairman of Pacific Environment said that,**

*“This a classic ‘hand in glove fit’ with Libelium’s hardware and EnviroSuite’s software combining to create a complete IoT product that can be rapidly developed and deployed across Libelium’s global customer network.”*

*Pacific Environment Executive Chairman Murray d’Almeida and Chief Executive Officer Peter White sign the partnership agreement with Libelium Chief Executive Officer Alicia Asin at the Mobile World Congress, in Barcelona.*

**About Libelium**

Libelium was co-founded in 2006 by Alicia Asin (CEO) and David Gascòn (CTO). The company designs and manufactures hardware and APIs for wireless sensor networks that rapidly enable the Internet of Things (IoT). It is based in Zaragoza, Spain.

Around the globe, commercial deployments based on Libelium's open wireless sensor platform include applications such as water control, parking, traffic congestion, environmental monitoring and precision agriculture.

**About EnviroSuite**

At a time when organisations worldwide are under continual pressure to improve operational margins there is building pressure from governments and communities alike for better environmental performance.

EnviroSuite provides a unique solution to both of these issues across multiple industries. By using real-time operational monitoring and instantaneous alerts EnviroSuite enables organisations to avoid costly and damaging environmental incidents. At the same time EnviroSuite's predictive capabilities allows planners up to a 72-hour outlook in which to optimise their operational efficiencies. Grounded in years of scientific research and innovative practical projects EnviroSuite enables these organisations a social and corporate licence to operate.

There is global demand for this solution across multiple industry sectors including ports, waste water, resources, hospital, government, and heavy industry. EnviroSuite is a winner of the 2015 Australian Technologies Competition.
