

ASX ANNOUNCEMENT

29 April 2016

Focus Minerals Ltd (ASX:FML) Quarterly Activities Report for January – March 2016

Corporate Activity During The Quarter

Financial Position Remains Strong

Focus Minerals Ltd (“Focus” or “the Company”) continues to have the strongest cash balance of any gold explorer listed on the ASX, with \$72.2M in cash and equivalents at 31 March 2016 (31 December \$73.9m).

Cash at Bank and Deposits	\$55.9M
Cash held on bond	\$16.3M
Total Cash and Equivalents	\$72.2M

The Company’s 2015 Full Year Statutory Accounts were released to the market on 31 March, they highlighted the significant efficiencies achieved during the year: Direct exploration expenditure accounted for more than \$8 million of the Company’s net cash burn of \$11 million during 2015.

Annual General Meeting

Focus’ AGM will be held in Perth on 20 May. For further information, please refer to the material sent to each shareholder, or the ASX release of 18 April.

Exploration Activity During The Quarter

The Company’s exploration program continues to prioritise the discovery of additional high grade gold at Laverton and Coolgardie; with the former searching for new large scale deposits and the latter targeting high grade ore to supplement existing resources to enable a profitable restart of operations.

An update on progress on both projects was released on 29 April, a summary of the activities in the March Quarter can be found below.

Coolgardie Gold Project

Activities during March Quarter

During the Quarter, Focus has continued its aggressive exploration at Coolgardie, completing 34 RC holes for 6,816m at Bonnie Vale (7 RC holes for 1,362m) and Greater Tindals (21 RC holes for 4,080m at Possum and 6 RC holes for 1,374m at Undaunted/Lady Charlotte). Results were generally encouraging for all prospect areas (refer to ASX release dated 29 April), with highlights including:

- Bonnie Vale:
 - o BONC119 1m @ 15.05g/t Au from 272m
 - o BONCD070 1m @ 10.30g/t Au from 97m (RC pre-collar for a diamond tail completed after the end of the quarter)
- Possum:
 - o TND16015 1m @ 13.00g/t Au from 110m

- TND16021 1m @ 7.19g/t Au from 125m
- TND16024 1m @ 8.99g/t Au from 33m
 - 7m @ 10.92g/t Au from 66m (incl. 1m @ 45.90g/t Au from 71m)
- TND16026 1m @ 19.80g/t Au from 212m
- TND16037 1m @ 11.65g/t Au from 172m

At Bonnie Vale, drilling focussed on testing down-dip extensions of the Quarry Reef and along-strike extensions of the Westralia Reef, with results from both areas suggesting that mineralisation extends up to 50m away from known mineralisation. Drilling at Greater Tindals focussed on testing extensions to known mineralised systems, and a new discovery was made at Possum South along an approximately 700m strike length south from the historic open pit.

In addition to RC drilling, Focus completed an approximately 7.5 line km 2D seismic survey at Tindals with the aim of imaging known mineralised structures at depth and identifying potential deep targets in the district. Results were received and interpretation work is ongoing.

Planned Activities – June Quarter

Follow-up drilling is planned for both Bonnie Vale and Greater Tindals.

Bonnie Vale

Additional drilling is planned to follow up on the encouraging results at Westralia to continue following the system along strike. Depending on results from diamond drilling, additional infill drilling will be planned at Quarry Reef with the goal of expanding the Mineral Resource.

Greater Tindals

Possum Prospect - The following additional drilling is being planned for Possum:

- Step-out drilling to the south to continue delineating the extent of the mineralised system
- Follow-up drilling testing the extent of high-grade mineralisation around the Possum Pit (e.g. TND16024 1m @ 45.90g/t Au)
- In-fill drilling to increase the confidence in the identified mineralised system with the potential aim of delineating an Inferred Mineral Resource

Brilliant – The following additional drilling is being planned for Brilliant:

- A four hole diamond drill programme (of around 1,000m) testing for deeper extensions to known lodes.
- RC drilling on the western side of the Brilliant Pit to further investigate the potential for footwall lodes around Brilliant.
- In-fill drilling to the northeast of Brilliant following up on encouraging results from the current programme with the goal of growing the current Mineral Resource.

Lady Charlotte/Undaunted – Additional drilling is being planned for Lady Charlotte/Undaunted to continue testing the strike extent of the system before making decisions on any in-fill drilling.

Laverton Gold Project

Activities during March Quarter

During the March 2016 quarter, 19 reverse circulation holes (KARC169 to KARC187) were drilled on the Karridale Project for a total of 3,838m. The holes were drilled as part of a 25 hole programme that was concluded after the end of the quarter. Full details of the holes are included in the recent update released to the ASX on 29 April.

The drilling provided limited 40m spaced (collar positions) drilling around the historic Karridale and Boomerang underground mines as well as 80m spaced drilling to test for links between the Karridale and Boomerang zones.

Best results were 2m @ 29.40g/t Au from 168m in hole KARD176 and 7m @ 8.98g/t Au from 150m in hole KARC173. A full summary of intersections is provided in the ASX release mentioned above.

Results are still being interpreted prior to further drilling commencing.

Planned Activities – June Quarter

Further RC drilling is planned at Karridale pending compilation of results. Should the RC drilling meet the Company's expectations, deeper diamond core drilling will re-commence.

A new geological interpretation of the Lancefield project will drive an RC drill exploration programme in the second half of 2016. Untested extensions to historic drilling will be tested at Lancefield itself as well as other targets. The Lancefield mine (which is currently suspended) has produced over a million ounces of gold since 1902. The current Mineral Resource at Lancefield is 2.8Mt @ 6.6g/t Au for 596,000 ounces (see Focus' Annual Report released 18 April).

Focus Minerals Ltd

Phone: +61 8 9215 7888

Focus Minerals Limited - Focus owns two large gold projects in Western Australia's Eastern Goldfields. The company is the largest landholder in the Coolgardie Gold Belt, where it owns the 1.2Mtpa processing plant at Three Mile Hill. 250km to the northeast Focus has the Laverton Gold Project which comprises a significant portfolio of highly prospective tenure. Focus also owns the 1.45Mtpa Barnicoat mill in Laverton which has been on care and maintenance since 2009.

Forward Looking Statements

This release contains certain "forward looking statements". Forward-looking statements can be identified by the use of 'forward-looking' terminology, including, without limitation, the terms 'believes', 'estimates', 'anticipates', 'expects', 'predicts', 'intends', 'plans', 'propose', 'goals', 'targets', 'aims', 'outlook', 'guidance', 'forecasts', 'may', 'will', 'would', 'could' or 'should' or, in each case, their negative or other variations or comparable terminology. These forward-looking statements include all matters that are not historical facts. By their nature, forward-looking statements involve known and unknown risks, uncertainties and other factors because they relate to events and depend on circumstances that may or may not occur in the future, assumptions which may or may not prove correct, and may be beyond Focus' ability to control or predict which may cause the actual results or performance of Focus to be materially different from the results or performance expressed or implied by such forward-looking statements. Forward-looking statements are based on assumptions and contingencies and are not guarantees or predictions of future performance. No representation is made that any of these statements or forecasts will come to pass or that any forecast result will be achieved. Similarly, no representation is given that the assumptions upon which forward-looking statements may be based are reasonable. Forward-looking statements speak only as at the date of this document and Focus disclaims any obligations or undertakings to release any update of, or revisions to, any forward-looking statements in this document.

Competent Person's Statement

The information in this announcement that relates to Exploration Results is based on information compiled by Michael Guo (P Geo) who is a member of the Association of Professional Geoscientists of Ontario, Canada, which is a Recognised Professional Organisation (RPO). Mr Guo is employed by Focus Minerals Limited and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Guo consents to the inclusion in this announcement of the matters based on the information compiled by him in the form and context in which it appears.

Notes

- 1 The Quarterly report provides a basis for informing the market how the entity's activities have been financed for the past Quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
