

Directors Exercise their Listed Options

Antipa Minerals Limited ("Antipa") is pleased to announce that its Directors have now exercised, or instructed their intermediaries to exercise, all listed 1 cent options expiring on 17 May 2016 ("Options") held by them in the Company.

This exercise of Options by the Directors will result in a further investment in the Company of an aggregate amount of approximately \$370,000.

To date, cleared funds in the amount of \$364,344.32 have been received from the Directors and, as a consequence, the Company has now issued an additional 36,434,432 shares to the Directors.

The Company reminds holders of Options that they may exercise their Option holding, in whole or in part, by payment of 1 cent for each Option at any time up to 5:00pm (WST) on 17 May 2016. Any unexercised Options will be taken up by Veritas Securities Limited in accordance with the terms of the previously announced Underwriting Agreement.

About Antipa Minerals:

Antipa Minerals Ltd is an Australian public company which was formed with the objective of identifying under-explored mineral projects in mineral provinces which have the potential to host world class mineral deposits, thereby offering high leverage exploration potential. The Company owns a 1,335km² package of prospective granted tenements in the Proterozoic Paterson Province of Western Australia known as the Citadel Project. The Citadel Project is located approximately 75km north of Newcrest's Telfer gold-copper-silver mine and includes the gold-copper-silver-tungsten Mineral Resources at the Calibre and Magnum deposits and high grade polymetallic Corker deposit. Under the terms of a Farm-in and Joint Venture Agreement with Rio Tinto, Rio Tinto can fund up to \$60 million of exploration expenditure to earn up to a 75% interest in Antipa's Citadel Project.

The Company has an additional 1,310km² of granted exploration licences, known as the North Telfer Project which hosts the high-grade gold-copper Minyari and WACA deposits and extends its ground holding in the Paterson Province to within 20km of the Telfer Gold-Copper-Silver Mine and 30km of the O'Callaghans tungsten and base metal deposit. The Company has also acquired, from the Mark Creasy controlled company Kitchener Resources Pty Ltd, additional exploration licences in the Paterson Province which are now all granted and cover 1,573km², and a further 138km² of exploration licences (including both granted tenements and applications) known as the Telfer Dome Project, which come to within 5km of the Telfer mine and 7km of the O'Callaghans deposit.
