Market Announcements Office  
ASX Limited  
20 Bridge Street  
SYDNEY NSW 2000

Dear Sir / Madam

**US FORM 6-K FILING (INTERIM FINANCIAL RESULTS ANNOUNCEMENT FOR THE SIX MONTHS ENDED 31 MARCH 2016, PREPARED FOR DISTRIBUTION IN THE UNITED STATES)**

Westpac Banking Corporation (Westpac) has today filed with the US Securities and Exchange Commission a Form 6-K, which attaches Westpac's Interim Financial Results Announcement for the six months ended 31 March 2016, prepared specifically for distribution in the United States (US Interim Financial Results Announcement). This filing has been prepared to meet US securities law requirements and is necessary to update Westpac's US debt issuance programs.

As the US Interim Financial Results Announcement has been prepared to meet US requirements, its presentation differs in some respects from Westpac's 2016 Interim Financial Results, incorporating the requirements of Appendix 4D (lodged with the ASX on 2 May 2016). In particular, the 2016 Interim Financial Results, incorporating the requirements of Appendix 4D predominantly focuses on cash earnings while the US Interim Financial Results Announcement is focused on Westpac's consolidated statutory results.

A copy of the Form 6-K is attached for release to the market.

Yours sincerely,

Tim Hartin  
Company Secretary

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, DC 20549

# 2016 Interim Financial Results

THE INTERIM FINANCIAL RESULTS ANNOUNCEMENT HAS BEEN  
PREPARED FOR DISTRIBUTION IN THE UNITED STATES OF AMERICA.

---

WESTPAC BANKING CORPORATION ABN 33 007 457 141

## Interim financial results 2016

### Introduction

---

This Interim Financial Results Announcement has been prepared for distribution in the United States.

Our interim period refers to the six months ended 31 March 2016 (First Half 2016). Throughout this profit announcement we also refer to the six months ended 31 March 2015 (First Half 2015) and the six months ended 30 September 2015 (Second Half 2015).

The selected financial information for First Half 2016, First Half 2015 and Second Half 2015 contained in this Interim Financial Results Announcement is based on the financial statements contained in the unaudited consolidated Interim financial report for Westpac Banking Corporation (Westpac) and its controlled entities (the Group) for the six months ended 31 March 2016. The Interim financial report has been prepared and presented in accordance with Australian Accounting Standards (AAS) as they relate to interim financial reports. The Interim financial report also complies with International Financial Reporting Standards as issued by the International Accounting Standards Board (IASB) as they relate to interim financial reports.

All dollar values in this announcement are in Australian dollars unless otherwise noted. References to 'dollars' 'dollar amounts', '\$', 'AUD' or 'A\$' are to Australian dollars, references to 'US\$', 'USD' or 'US dollars' are to United States dollars and references to 'NZ\$', 'NZD' or 'NZ dollars' are to New Zealand dollars. Solely for the convenience of the reader, certain Australian dollar amounts have been translated into US dollars at a specified rate. These translations should not be construed as representations that the Australian dollar amounts actually represent such US dollar amounts or have been or could be converted into US dollars at the rate indicated. Unless otherwise stated, the translation of Australian dollar amounts into US dollar amounts has been made at the rate of A\$1 = US\$0.7677, the noon buying rate in New York City for cable transfers in Australian dollars as certified for customs purposes by the Federal Reserve Bank of New York on 31 March 2016. Refer to Section 5.5 for information regarding the rates of exchange between the Australian dollar and the US dollar applied by the Group as part of its operating activities for First Half 2016, Second Half 2015 and First Half 2015.

In addition to discussing the AAS financial information in this announcement, we also discuss the following non-AAS financial information:

#### Cash Earnings Policy

In assessing financial performance, including divisional results, Westpac Group uses a measure of performance referred to as "cash earnings". Cash earnings is not a measure of cash flow or net profit determined on a cash accounting basis, as it includes non-cash items reflected in net profit determined in accordance with AAS. The specific adjustments outlined below include both cash and non-cash items. Cash earnings, as calculated by the Westpac Group, is viewed as a measure of the level of profit that is generated by ongoing operations and is therefore available for distribution to shareholders.

A reconciliation of cash earnings to net profit attributable to owners of Westpac Banking Corporation for each business division is set forth in Section 4.7, Note 2. To calculate cash earnings, Westpac adjusts net profit attributable to owners of Westpac Banking Corporation for the items outlined below. Management believes this allows the Group to more effectively assess performance for the current period against prior periods and to compare performance across business divisions and across peer companies.

Three categories of adjustments are made to reported results to determine cash earnings:

- Material items that key decision makers at the Westpac Group believe do not reflect ongoing operations;
- Items that are not considered when dividends are recommended, such as the amortisation of intangibles, impact of Treasury shares and economic hedging impacts; and
- Accounting reclassifications between individual line items that do not impact reported results.

Outlined in Section 5.6 are the cash earnings adjustments to the reported result.

#### Average Ordinary Equity

Average ordinary equity is calculated as the daily average of total equity less average non controlling interests. Management believes this measure of average ordinary equity is useful in the calculation of return on equity as it removes the impact of equity attributable to non controlling interests.

Other companies may use different methodologies to calculate average ordinary equity or similar non-AAS financial measures.

### Disclosure Regarding Forward-Looking Statements

This Interim Financial Results Announcement contains statements that constitute 'forward-looking statements' within the meaning of Section 21E of the *US Securities Exchange Act of 1934*.

Forward-looking statements are statements about matters that are not historical facts. Forward-looking statements appear in a number of places in this Interim Financial Results Announcement and include statements regarding Westpac's intent, belief or current expectations with respect to its business and operations, market conditions, results of operations and financial condition, including, without limitation, future loan loss provisions and financial support to certain borrowers. Words such as 'will', 'may', 'expect', 'intend', 'seek', 'would', 'should', 'could', 'continue', 'plan', 'aim', 'estimate', 'anticipate', 'believe', 'probability', 'risk' or other similar words are used to identify forward-looking statements. These forward-looking statements reflect Westpac's current views with respect to future events and are subject to change, certain risks, uncertainties and assumptions which are, in many instances, beyond Westpac's control, and have been made based upon management's expectations and beliefs concerning future developments and their potential effect upon Westpac. There can be no assurance that future developments will be in accordance with Westpac's expectations or that the effect of future developments on Westpac will be those anticipated. Actual results could differ materially from those expected, depending on the outcome of various factors, including, but not limited to:

- the effect of, and changes in, laws, regulations, taxation or accounting standards or practices and government policy, particularly changes to liquidity, leverage and capital requirements;
- regulatory investigations, litigation, fines, penalties, restrictions or other regulator imposed conditions;
- the stability of Australian and international financial systems and disruptions to financial markets and any losses or business impacts Westpac or its customers or counterparties may experience as a result;
- market volatility, including uncertain conditions in funding, equity and asset markets;
- adverse asset, credit or capital market conditions;
- the conduct, behaviour or practices of Westpac or its staff;
- changes to Westpac's credit ratings;
- levels of inflation, interest rates, exchange rates and market and monetary fluctuations;
- market liquidity and investor confidence;
- changes in economic conditions, consumer spending, saving and borrowing habits in Australia, New Zealand and in other countries in which Westpac or its customers or counterparties conduct their operations and Westpac's ability to maintain or to increase market share and control expenses;
- the effects of competition in the geographic and business areas in which Westpac conducts its operations;
- information security breaches, including cyberattacks;
- reliability and security of Westpac's technology and risks associated with changes to technology systems;
- the timely development and acceptance of new products and services and the perceived overall value of these products and services by customers;
- the effectiveness of Westpac's risk management policies, including internal processes, systems and employees;
- the incidence or severity of Westpac insured events;
- the occurrence of environmental change or external events in countries in which Westpac or its customers or counterparties conduct their operations;
- internal and external events which may adversely impact Westpac's reputation;
- changes to the value of Westpac's intangible assets;
- changes in political, social or economic conditions in any of the major markets in which Westpac or its customers or counterparties operate;
- the success of strategic decisions involving diversification or innovation, in addition to business expansion and integration of new businesses; and
- various other factors beyond Westpac's control.

The above list is not exhaustive. For certain other factors that may impact on forward-looking statements made by Westpac, refer to 'Risk factors' in the Directors' report in this Interim Financial Results Announcement. When relying on forward-looking statements to make decisions with respect to Westpac, investors and others should carefully consider the foregoing factors and other uncertainties and events.

<b>Profit for the period</b>	<b>2,848</b>	<b>3,710</b>	<b>4,426</b>	<b>3,642</b>	<b>(16)</b>	<b>2</b>
Profit attributable to non-controlling interests	(7)	(9)	(23)	(33)	(61)	(73)
<b>Net profit attributable to owners of Westpac Banking Corporation</b>	<b>2,841</b>	<b>3,701</b>	<b>4,403</b>	<b>3,609</b>	<b>(16)</b>	<b>3</b>
Effective tax rate	29.2%	29.2%	28.3%	30.6%	90bps	(140bps)

Net profit attributable to owners of Westpac Banking Corporation for First Half 2016 was \$3,701 million, an increase of \$92 million or 3% compared to First Half 2015. Features of this result included a \$476 million or 5% increase in net operating income before operating expenses and impairment charges, a \$158 million or 4% increase in operating expenses and a \$326 million or 96% increase in impairment charges.

Net interest income increased \$493 million or 7% compared to First Half 2015, with total loan growth of 6% and customer deposit growth of 5%. Net interest margin increased 3 basis points, primarily due to repricing of mortgages for increased regulatory capital requirements, and repricing of customer deposits, partially offset by competitive pricing for new loans and higher short term wholesale funding costs. Net interest income, loans, customer deposits and net interest margins are discussed further in Sections 2.2.1 to 2.2.4.

Non-interest income decreased \$17 million or 1% compared to First Half 2015 primarily due to lower banking fees and commissions, including the impact of credit card interchange reductions, and lower institutional activity. Wealth management income reduced due to the partial sale of our BT Investment Management (BTIM) shareholding in Second Half 2015, and the impact of lower asset market values. The increase in trading income mostly reflected lower derivative valuation adjustments. Non-interest income is discussed further in Section 2.2.5.

Operating expenses increased \$158 million or 4% compared to First Half 2015. The lift in operating expenses related to the Group's investment programs, with operating expense increases offset by productivity savings. Operating expenses are discussed further in Section 2.2.8.

Impairment charges increased \$326 million or 96% compared to First Half 2015. On most measures asset quality remained sound, with stressed exposures as a percentage of total committed exposures reducing from 1.12% to 1.03%. The increase in impairment charges was primarily due to additional provisioning following the downgrade of a small number of institutional customers, a small rise in delinquencies and reductions in write-backs. Impairment charges are discussed further in Section 2.2.9.

The effective tax rate of 29.2% in First Half 2016 was lower compared to 30.6% in First Half 2015 due to the finalisation of a prior period tax matter in this half. Income tax expense is discussed further in Section 2.2.10.

<sup>1</sup> Percentage movement represents an increase / (decrease) to the relevant comparative period.

Notes to Section 1.2:

- 1 Based on the average number of fully paid ordinary shares outstanding for the relevant six month period. Earnings are calculated as net profit attributable to owners of Westpac Banking Corporation (WBC). Comparative information has been restated to incorporate the bonus element of the Share Entitlement Offer in the weighted average number of ordinary shares.
- 2 Weighted average number of fully paid ordinary shares on the ASX for the relevant period less Westpac shares held by the Group (Treasury shares). Comparative information has been restated to incorporate the bonus element of the Share Entitlement Offer in the weighted average number of ordinary shares.
- 3 Calculated as net profit attributable to owners of WBC divided by average ordinary equity (annualised).
- 4 Calculated as average total equity less average non-controlling interests.
- 5 Average total equity is the average balance of shareholders' equity, including non-controlling interests.
- 6 Total equity attributable to owners of Westpac Banking Corporation after deducting goodwill and other intangible assets divided by the number of ordinary shares outstanding, less treasury shares held.
- 7 Calculated as Group operating expenses excluding impairment charges divided by group net operating income before operating expenses and impairment charges.
- 8 Calculated as the difference between the average yield on all interest earning assets and the average rate paid on all interest bearing liabilities.
- 9 Calculated as the difference between net interest margin and interest spread, and represents benefits derived from holdings of the net non-interest bearing component of the balance sheet (including equity).
- 10 Calculated by dividing Net interest income by average interest earning assets (annualised).
- 11 Refer to Glossary for definition.
- 12 Impairment provisions relating to impaired loans include individually assessed provisions plus the proportion of the collectively assessed provisions that relate to impaired loans.
- 13 Non-housing loans have been determined on a loan purpose basis.
- 14 Spot balances.
- 15 Second Half 2015 and First Half 2015 have been adjusted to remove BTIM FUM previously consolidated. This provides a comparable view of the performance of the business.
- 16 Averages are based on six months for the halves.

<b>Net profit attributable to owners of Westpac Banking Corporation</b>	<b>2,841</b>	<b>3,701</b>	<b>4,403</b>	<b>3,609</b>	<b>(16)</b>	<b>3</b>

Net profit attributable to owners of Westpac Banking Corporation was \$3,701 million in First Half 2016, a result \$702 million or 16% lower than Second Half 2015 and \$92 million or 3% higher than First Half 2015.

The Group continued to increase the value of its franchise over the six months ended 31 March 2016 with growth in customer numbers, lending and deposit growth ahead of system, good funds under administration flows, increased insurance premiums, well managed net interest margins, and a further strengthening of the balance sheet. This contributed to improving the value of the franchise.

Westpac continued to strengthen its balance sheet with the completion of a \$3.5 billion capital raising that lifted the Group's common equity tier 1 (CET1) capital ratio to 10.5% (up from 9.5% at 30 September 2015). While strengthening the balance sheet, the increased capital has been a significant contributor to the lower return on equity, which fell from 15.1% in First Half 2015 to 13.4% in First Half 2016. Similarly, the associated rise in shares on issue contributed to a 3% reduction in earnings per share to 112.3 cents compared to First Half 2015.

The Board determined an interim ordinary dividend of 94 cents per share, fully franked, unchanged on the 2015 final ordinary dividend. The interim ordinary dividend for First Half 2016 represents a payout ratio of 84.5% and a dividend yield of 6.2%<sup>1</sup>. The Board has also determined to issue shares to satisfy the dividend reinvestment plan (DRP) for First Half 2016 dividend and to apply no discount to the market price used to determine the number of shares issued under the DRP. The interim ordinary dividend will be paid on 4 July 2016 with the record date 13 May 2016.<sup>2</sup> After allowing for the interim dividend, the Group's adjusted franking account balance is \$844 million.

#### Financial performance summary First Half 2016 – Second Half 2015

Net profit attributable to owners of Westpac Banking Corporation was \$3,701 million, down \$702 million or 16%, driven by a decrease in non-interest income due to infrequent items in Second Half 2015 not repeated.

The 3% lift in net interest income was due to 4% growth in average interest-earning assets.

Loans grew 3% supported by a 4% rise in Australian housing and a 2% lift in Australian business lending. New Zealand lending grew 4% over the last six months in NZ\$, (up 3% in A\$ terms). Australian customer deposits grew 4% in First Half 2016 with household deposits expanding at 1.2x system<sup>3</sup> with most of the growth recorded in term deposits. New Zealand customer deposits grew 6% in NZ\$ (5% in A\$).

Much of the 31% fall in non-interest income was due to infrequent items, including: the partial sale of BTIM and move to equity accounting in Second Half 2015; no performance fees in Hastings; and a \$82 million reduction in

<sup>1</sup> Based on the closing share price as at 31 March 2016 of \$30.35.

<sup>2</sup> Record date for 2016 interim dividend in New York is 12 May 2016.

<sup>3</sup> Source: APRA as at 31 March 2016.

## Interim financial results 2016

### Review of Group operations

---

gains from asset sales. Non-interest income was also impacted by weaker asset markets and a fall in cards related income including from regulatory changes to interchange rates.

Operating expenses decreased 10% mainly from lower technology expenses due to changes in Second Half 2015 related to the accounting approach for technology investment spend that did not repeat (\$505 million).

While on most measures asset quality remains sound, impairment charges were \$255 million higher, with much of the rise due to the additional provisions for a small number of larger names, lower write-backs and higher consumer delinquencies in some segments. There was little change to economic overlay provisions.

The effective tax rate was 29.2% in First Half 2016 compared to 28.3% for Second Half 2015. Both halves benefited from the finalisation of prior period taxation matters.

#### Financial performance summary First Half 2016 – First Half 2015

Net profit attributable to owners of Westpac Banking Corporation was \$92 million up or 3%, driven by higher net interest income and lower income tax expense partially offset by lower non-interest income combined with both higher operating expenses and higher impairment charges.

The rise in net interest income reflected a 5% increase in average interest-earning assets and a 3 basis points increase in net interest margins. The rise in margin was mostly due to improved deposit spreads. Asset spreads were little changed as repricing across mortgages and business lending has been largely offset by increased competition across the portfolio.

Lending increased 6% with Australian mortgages growing 8% and Australian business lending rising 6%. Lending in New Zealand increased 7% (in NZ\$) (down 1% in A\$). Customer deposits rose \$21.7 billion, or 5% over the past year taking the deposit to loan ratio to 69.0%.

Non-interest income was 1% lower. This reflects a number of infrequent items including the partial sale of BTIM and the move to equity accounting in Second Half 2015, derivative adjustments and lower performance fees. Excluding these impacts, most of the decline was due to lower card fees including from reductions in interchange rates following regulatory changes and lower institutional fee income in line with more subdued debt origination.

Operating expenses were 4% higher with most of the increase related to higher investment related spending, particularly technology related. Salaries and staff expenses were little changed with normal salary increases offset by \$234 million in productivity savings and lower costs associated with the partial sale and deconsolidation of BTIM in Second Half 2015.

On most measures asset quality improved over the year, impairment charges were \$326 million higher. The increase relates to a rise in impaired provisions for a small number of larger names, and a reduction in write-backs and higher delinquencies contributing to increased collective provisions.

#### Strategic priorities

In September 2015 the Westpac Group provided an update on its strategy, outlining its strategic priorities that will assist the Group achieve its vision:

*To be one of the world's great service companies, helping our customers, communities and people to prosper and grow.*

The five strategic priorities supporting that vision are: performance discipline, service leadership, digital transformation, targeted growth and the workforce revolution. The Group has continued to make good progress on these priorities through the half as outlined below.

### Performance discipline

This strategic priority is focused on delivering superior financial and risk management performance by achieving balanced outcomes across strength / return / productivity and growth. A key performance metric for assessing this priority is targeting a Group return on equity (ROE) of 15%.

This half, the Group's ROE fell below the target, in a large part due to a 9% lift in average ordinary equity but also because of lower cash earnings.

To help lift ROE back towards target, the Group has:

- Adjusted the pricing of mortgages in response to the 50% uplift in capital. Divisions have also sought to wind back discounts available on certain mortgages;
- Become more selective in writing new lending in both business and institutional banking, particularly in segments where long run returns are low. This has included running down trade finance assets in Asia;
- Undertaken a restructuring of Westpac Institutional Bank (WIB) to reduce costs and better align the business to customer segments;
- Enhanced the Group's cost of funds transfer pricing to ensure funding and liquidity costs are better reflected in divisional earnings; and
- Allocated additional capital to all divisions with most directed to the Australian mortgage portfolio.

Maintaining a sector leading balance sheet is also part of this priority and developments over the half included:

- The substantial increase in capital with a CET1 capital ratio of 10.5% which is equivalent to 14.7% on an internationally comparable basis and is at the upper end of peers both locally and globally;
- A stable funding ratio of 83.3%;
- An increase in the deposit to loan ratio to 69%; and
- Stressed exposures as a per cent of total committed exposure remaining low at 1.03%.

### Service leadership

Our goal of being one of the world's great service companies means we are striving to deliver market-leading customer experiences. At the same time we recognise the need to meet or exceed community expectations in how we conduct our business. In assessing the success of this priority we are aiming to increase customer numbers by 1 million between 2015 to 2017.

As part of building our service culture, we continue to identify opportunities for improvement. Developments over First Half 2016 included:

- Launching the 'Service Promise' program across the organisation. The program brings together the best parts of our service elements, behaviours and commitments under a single group-wide approach;
- A 24% reduction in complaints across the Australian Consumer and Business Banks compared to First Half 2015;
- Continued reconfiguration of our network through:
  - Further roll-out of our next generation network with 39% of branches now in the new format;
  - Expansion of the fleet of smart ATMs and 24/7 banking; and
  - Introduced a range of new digital solutions that make it even easier for customers to do business with us.

### Digital transformation

Advances in digital technology provide us the ability to improve the customer experience while simultaneously improving productivity and risk management. In seeking to measure the success of this strategic priority the Group is aiming to reduce its expense to income ratio below 40% by 2018. Developments through First Half 2016 have included:

- Further building on the Group's leading front-end technology, including:
  - Simplifying the process for establishing new transaction accounts, and enabling customers to block / unblock credit cards online;
  - Launching 'Wonder' - which allows Westpac customers to easily see (and access) the equity in their homes; and
  - Rolling-out a new feature that allows St.George customers to immediately connect with call centre personnel through mobile banking - avoiding the need to re-verify their identity and reducing call times.
- Digitising processes to simplify operations, including:

## Interim financial results 2016

### Review of Group operations

---

- Continued roll-out of new functionality to Panorama including direct trading of listed securities for advised investors and the first phase of the Self-Managed Super Fund offering;
- New functionality in the Group's online lending platform for small businesses (called LOLA); and
- Commenced development of the new Customer Service Hub, the first step in our new core systems architecture.

#### Targeted growth

Westpac is seeking to grow value by targeting a small number of high growth segments over the medium term. These include Wealth, SME and Asia.

In Wealth, the Group's franchise and investment has led to continuing fund and insurance premium flows. These trends have, however, been partially offset by lower asset markets along with a more cautious approach from consumers. During First Half 2016, the Group has seen:

- FUM and FUA balances up 4% and 1% respectively; and
- Life Insurance in-force premiums up 4% while General Insurance gross written premiums were stable.

For SME customers, the Group is substantially increasing its reach and capability, through digital self-service options, its Connect models, and new lending and payment solutions. These are simplifying transaction processing, account opening and lending for SME customers while giving them greater access to business specialists via video conferencing. The new lending system (LOLA) is providing a simplified origination process and faster lending decisions, saving both the SME customer and business banker time.

To date over \$34 billion of lending has been conditionally approved, with more than \$0.6 billion drawn.

In Asia, after significant investment to build-out Westpac's capabilities in the region, the Group has moderated growth as returns across the region have become less economic.

#### Workforce revolution

Successful achievement of the Group's vision will depend on the quality of our people and culture. Westpac is already regarded as a leader in staff engagement, diversity and flexibility but we recognise that our workforce needs to continue to evolve to remain competitive.

To support the performance, service and transformation ambitions outlined above, the Group is continuing to invest in the capabilities of its people and its 'One Team' culture. The workforce revolution initiatives are designed to attract and retain the best leaders. This will be achieved by providing employees with the skills and development they need to achieve their potential and ensure the Group continues to develop an engaging, inclusive and highly collaborative culture.

Highlights for the half included:

- Completed the relocation of approximately 6,000 employees to our state-of-the-art agile premises in Barangaroo, over 8,600 employees are now working in agile working environments;
- Launched 'Learning Bank', a new information portal to assist in the development of the Group's leaders;
- Women in leadership is 46%, up from 44% at 31 March 2015;
- Launched Carers@Work program for employees with various carer responsibilities, from ageing parents to grandchildren; and
- Achieved high performer retention of 94.6%.

**Divisional Net Profit after Tax (NPAT) Summary<sup>1</sup>**

**Movement in NPAT (\$m)**

**First Half 2016 – First Half 2015**

**Summary of Business Units (First Half 2016 – First Half 2015)**

Consumer Bank (CB) NPAT increased \$204 million or 17% primarily due to revenue growth.

Business Bank (BB) NPAT decreased \$29 million or 3% primarily due to higher impairment charges and higher operating expenses partially offset by revenue growth.

BT Financial Group (Australia) NPAT decreased \$7 million or 2% primarily due to lower revenue growth partially offset by lower operating expenses.

Westpac Institutional Bank NPAT decreased \$136 million or 21% primarily due to higher impairment charges and operating expenses partly offset by revenue growth and lower income tax expense.

Westpac New Zealand NPAT was flat primarily due to revenue growth and lower impairment charges offset by higher operating expenses.

Group Businesses NPAT increased \$60 million or 67% primarily due to higher revenue partially offset by higher operating expenses.

<sup>1</sup> The NPAT graph illustrates the movements in NPAT for each division in both \$ value and %.

 Review of Group operations

2.2 Review of reported results

2.2.1 Net interest income<sup>1</sup>

\$m	Half Year	Half Year	Half Year	% Mov't	% Mov't
	March 16	Sept 15	March 15	Mar 16 - Sept 15	Mar 16 - Mar 15
Net interest income	7,477	7,283	6,984	3	7
Average interest-earning assets	714,856	689,031	678,568	4	5
Group net interest margin	2.09%	2.11%	2.06%	(2bps)	3bps

**First Half 2016 – Second Half 2015**

Net interest income increased \$194 million or 3% compared to Second Half 2015. Key features include:

- Net interest income excluding Treasury and Markets increased \$336 million or 5%, reflecting 4% growth in average interest-earning assets (AIEA) and an increase in Group net interest margin excluding Treasury and Markets of 2 basis points; and
- In aggregate, Treasury and Markets net interest income decreased \$142 million or 66%, due to lower returns from interest rate risk management.

**First Half 2016 – First Half 2015**

Net interest income increased \$493 million or 7% compared to First Half 2015. Key features include:

- Net interest income excluding Treasury and Markets increased \$616 million or 9%, reflecting 5% growth in AIEA and an increase in Group net interest margin excluding Treasury and Markets of 6 basis points; and
- In aggregate, Treasury and Markets net interest income decreased \$123 million or 62%, due to lower returns from interest rate risk management.

First Half 2016 – Second Half 2015

Total loans increased \$17.4 billion or 3% compared to Second Half 2015. Excluding foreign exchange translation impacts, total loans increased \$19.3 billion or 3%.

Key features of total loan growth were:

- Australian housing loans increased \$15.0 billion or 4% at 1.2x system<sup>3</sup>. The owner occupied portfolio grew 15% to now comprise 54% of the portfolio. The investment property loans portfolio reduced 8% to now comprise 40% of the portfolio. Following the introduction of differential pricing between mortgage products, there were \$17.5 billion of net switching from investment property loans to owner occupied during First Half 2016;
- Australian personal loans and cards increased \$0.6 billion or 3%, reflecting growth in both auto finance and credit cards;
- Australian business loans increased \$3.2 billion or 2%, with 3% growth in institutional lending primarily in the financial services segment and 1% growth in BB, with SME increasing 2%;
- New Zealand lending increased NZ\$2.6 billion or 4% with business lending increasing 5% at system<sup>4</sup> and mortgages increasing 3%; and
- Other overseas lending decreased \$2.8 billion or 17%, primarily from lower trade finance in Asia, as the institutional division sought to reduce lower returning assets.

First Half 2016 – First Half 2015

Total loans increased \$35.6 billion or 6% compared to First Half 2015. Excluding foreign exchange translation impacts, total loans increased \$41.5 billion or 7%.

Key features of total loan growth were:

- Australian housing loans increased \$28.0 billion or 8% with growth at 1.0x system<sup>3</sup>. The Group experienced increased customer activity with new lending volumes up 14%, while run-off increased 7% reflecting accelerated customer repayments;
- Australian personal loans and cards increased \$0.9 billion or 4%, reflecting growth in both auto finance and credit cards;

<b>Total deposits and other borrowings</b>	<b>494,246</b>	<b>475,328</b>	<b>466,743</b>	<b>4</b>	<b>6</b>

First Half 2016 – Second Half 2015

Total customer deposits increased \$14.8 billion or 3% compared to Second Half 2015. Excluding foreign currency translation impacts, customer deposits increased \$16.8 billion or 4%.

Key features of total customer deposit growth were:

- Australian customer deposits increased \$12.9 billion or 4%, with a continued focus on growing higher quality deposits for Liquidity Coverage Ratio (LCR) purposes. As a result, household deposits growth was 1.2x system<sup>2</sup>, term deposits increased 11% and institutional deposits growth was primarily in the Government and education sectors. Customers continued to direct funds to mortgage offset accounts, leading to growth of \$2.9 billion or 9% in Australian non-interest bearing deposits;
- New Zealand customer deposits increased NZ\$3.0 billion or 6%. Household deposit growth of 4% was 1.1x system<sup>3</sup> with targeted growth in at call and transaction accounts that are more valuable from an LCR perspective; and
- The decrease in other overseas customer deposits was due to foreign currency translation impacts.

Certificates of deposits increased \$4.1 billion or 8%, reflecting increased wholesale funding in this form.

First Half 2016 – First Half 2015

Total customer deposits increased \$21.7 billion or 5% compared to First Half 2015. Excluding foreign exchange translation impacts, customer deposits increased \$26.4 billion or 6%.

Key features of total customer deposit growth were:

- A continued focus on Australian customer deposits, with a high value for LCR purposes, has contributed to a 7% increase. As a result household deposits increased at 1.0x system<sup>2</sup> while institutional deposits growth was primarily in term deposits. Customers continued to direct funds to mortgage offset accounts, reflected in growth of \$6.7 billion or 23% in Australian non-interest bearing deposits; and
- New Zealand customer deposits increased NZ\$3.5 billion or 7%, with growth mainly in household deposits.

<sup>1</sup> Spot deposit balances.

<sup>2</sup> Source: APRA.

<sup>3</sup> Source: RBNZ.

2.2.4 Net interest margin

First Half 2016 – Second Half 2015

Group net interest margin was 2.09% for First Half 2016, a 2 basis points decrease from Second Half 2015.

The components of the decline in net interest margin were:

- 4 basis points decline from lower Treasury and Markets income; and
- 1 basis point decline from higher term wholesale funding costs. The increased volatility in global markets contributed to new long term wholesale funding being raised at higher spreads than maturing transactions.

These impacts were partially offset by:

- 3 basis points increase from improved customer deposit spreads across term deposits, online accounts and savings deposits.

In addition, asset spreads in aggregate were little changed. Higher mortgage spreads from increases to Australian mortgage rates, driven by increased regulatory capital requirements (5bps) have been offset by competitive pricing across mortgage, business, personal, and institutional lending, and higher short term wholesale funding costs.

First Half 2016 – First Half 2015

Group net interest margin was 2.09% for First Half 2016, a 3 basis points increase from First Half 2015.

The components of the increase in net interest margin were:

- 7 basis points increase from improved customer deposit spreads on term deposits, online accounts and savings deposits, and a mix benefit following higher transaction deposit balances; and
- 1 basis point increase from capital and other, with the positive impact from higher capital, partly offset by lower hedge rates.

These impacts were partially offset by:

- 3 basis points decline from lower Treasury and Markets income;
- 1 basis point decline from higher term wholesale funding costs. The new issuance more expensive than maturing deals; and
- 1 basis point decline from higher liquidity costs, primarily reflecting the full period impact of Committed Liquidity Facility (CLF) fee.

In addition, asset spreads in aggregate were little changed. Higher mortgage spreads from an increase to Australian mortgage rates, driven by increased regulatory capital requirements; has been offset by competitive pricing across mortgage, business, personal, and institutional lending, and higher short term wholesale funding costs.

## Interim financial results 2016

### Review of Group operations

#### 2.2.5 Non-interest income<sup>1</sup>

\$m	Half Year March 16	Half Year Sept 15	Half Year March 15	% Mov't Mar 16 - Sept 15	% Mov't Mar 16 - Mar 15
Fees and commissions	1,375	1,464	1,478	(6)	(7)
Wealth management and insurance income	922	1,082	1,146	(15)	(20)
Trading income	610	539	425	13	44
Other income	89	1,277	(36)	(93)	large
<b>Total Non-interest income</b>	<b>2,996</b>	<b>4,362</b>	<b>3,013</b>	<b>(31)</b>	<b>(1)</b>

#### First Half 2016 – Second Half 2015

Non-interest income was \$2,996 million in First Half 2016, a decrease of \$1,366 million or 31% compared to Second Half 2015, with infrequent items having a large impact. Infrequent items included asset sales (\$1,123 million), the income foregone following the partial sale of BTIM and move to equity accounting<sup>2</sup> (\$94 million), and no Hastings performance fees this half (\$35 million). Excluding these items, non-interest income decreased \$114 million or 4% as underlying growth was more than offset by the impact of hedging New Zealand future earnings, lower cards related income in CB, lower fees in WIB following a fall in activity and reduced contribution from Ascalon in BTFG.

#### Fees and commissions

Fees and commissions income was \$1,375 million in First Half 2016, a decrease of \$89 million or 6% compared to Second Half 2015. This was primarily due to lower institutional fees (\$43 million) from reduced lending activity and lower debt market issuances. Australian credit card income was also lower (\$42 million) and included regulatory impacts on interchange rates introduced on 1 November 2015.

#### Wealth management and insurance income

Wealth management and insurance income was \$922 million in First Half 2016, a decrease of \$160 million or 15% compared to Second Half 2015, mainly due to the removal of BTIM income following the move to equity accounting<sup>2</sup> (\$99 million), and no Hastings performance fees the half (\$35 million). Excluding these items, wealth management and insurance income decreased \$26 million or 3% compared to Second Half 2015 due to:

- Lower contribution from Ascalon (\$19 million lower) as both lower asset markets and foreign currency translation impacted returns from overseas funds managed by this business;
- FUM / FUA revenue was little changed with lower asset markets largely offsetting positive net flows; partly offset by
- Life and general insurance revenue increased \$9 million, with in-force premium growth of 4% and net earned premium growth of 3%.

#### Trading income

Trading income was \$610 million, an increase of \$71 million or 13% compared to Second Half 2015 primarily in WIB markets.

#### Other income

Other income was \$89 million, a decrease of \$1,188 million or 93% compared to Second Half 2015. This decrease reflected gains from the partial sale of an interest in BTIM (\$1,036 million) in Second Half 2015 that did not repeat, lower income from asset sales and the impact of hedging New Zealand future earnings.

#### First Half 2016 – First Half 2015

Non-interest income was \$2,996 million in First Half 2016, a decrease of \$17 million or 1% compared to First Half 2015 with infrequent items having a large impact. These items included the income foregone following the partial sale of BTIM and move to equity accounting<sup>2</sup> (\$201 million) and no Hastings performance fees this half (\$21 million), partly offset by the derivative valuation methodology adjustment of \$122 million<sup>3</sup>. Excluding these items non-interest income increased \$83 million or 3% primarily from the impact of hedging New Zealand future earnings partially offset by lower cards related income in CB.

<sup>1</sup> Refer to Section 4 Note 4 for reported results breakdown. Refer to Section 5 for reconciliation between reported results and cash earnings.

<sup>2</sup> From 1 July 2015 the Group's share of BTIM earnings is recorded in other income as 'share of associates net profit' (First Half 2016 \$13 million; Second Half 2015 \$5 million).

<sup>3</sup> In First Half 2015 changes were made to derivative valuation methodologies, which include the first time adoption of a Funding Valuation Adjustment (FVA) to the fair value of derivatives. In First Half 2015 the impact of these changes resulted in a \$122 million reduction in non-interest income.

## Interim financial results 2016

### Review of Group operations

#### Fees and commissions

Fees and commissions income was \$1,375 million in First Half 2016, a decrease of \$103 million or 7% compared to First Half 2015 largely due to a decrease in Australian credit card income (\$52 million), which included regulation impacts on interchange rates effective 1 November 2015. Institutional lending fees and BTFG were also lower from reduced activity.

#### Wealth management and insurance income

Wealth management and insurance income was \$922 million in First Half 2016, a decrease of \$224 million or 20% compared to First Half 2015 mainly due to the removal of BTIM income following the move to equity accounting<sup>1</sup> (\$211 million), and no Hastings performance fees this half (\$21 million). Excluding these items, wealth management and insurance income increased \$8 million compared to First Half 2015 due to:

- General insurance income increased 27% reflecting a 5% rise in net earned premiums and lower claims related to weather events;
- Life insurance income increased 10%, with in-force premium growth of 12% and stable loss ratios; and
- FUM and FUA revenue increased \$6 million, with positive net flows in FUM / FUA partly offset by lower asset markets.

#### Trading income

Trading income was \$610 million in First Half 2016, an increase of \$185 million or 44% compared to First Half 2015, with the \$122 million charge from methodology changes to derivative valuation adjustments in First Half 2015 not repeated<sup>2</sup>. Excluding this, trading income increased \$63 million from higher WIB markets income, including a \$34 million lower credit value adjustment (CVA) impact.

#### Other income

Other income was \$89 million in First Half 2016, an increase of \$125 million compared to First Half 2015 reflecting the impact of hedging New Zealand future earnings.

<sup>2</sup> In First Half 2015 changes were made to derivative valuation methodologies, which include the first time adoption of a FVA to the fair value of derivatives. In First Half 2015 the impact of these changes resulted in a \$122 million reduction in non-interest income.

Interim financial results 2016  
Review of Group operations

2.2.7 Markets related income<sup>1</sup>

\$m	Half Year	Half Year	Half Year	% Mov't	% Mov't
	March 16	Sept 15	March 15	Mar 16 - Sept 15	Mar 16 - Mar 15
Net interest income	33	46	55	(28)	(40)
Non-interest income	560	511	394	10	42
<b>Total Markets income</b>	<b>593</b>	<b>557</b>	<b>449</b>	<b>6</b>	<b>32</b>
Customer income	449	439	455	2	(1)
Non-customer income	142	131	147	8	(3)
Derivative valuation adjustments <sup>2</sup>	2	(13)	(153)	(115)	(101)
<b>Total Markets income</b>	<b>593</b>	<b>557</b>	<b>449</b>	<b>6</b>	<b>32</b>

Markets income comprises sales and risk management revenue derived from the creation, pricing and distribution of risk management products to the Group's consumer, business, corporate and institutional customers. Dedicated relationship specialists provide product solutions to these customers to help manage their interest rate, foreign exchange, commodity, credit and structured products risk exposures.

**First Half 2016 – Second Half 2015**

Total markets income increased by \$36 million, or 6%, compared to Second Half 2015, due to growth in both customer and non-customer income. Movements in CVA also benefited First Half 2016 result compared to Second Half 2015.

Customer income increased \$10 million, or 2%, compared to Second Half 2015, driven by both foreign exchange and fixed income sales.

Non-customer income increased \$11 million, or 8%, compared to Second Half 2015, primarily due to an improved result from the Energy desk during First Half 2016.

**First Half 2016 – First Half 2015**

Total markets income increased by \$144 million, or 32%, compared to First Half 2015 primarily due to a significantly lower impact from derivative valuation adjustments<sup>3</sup>.

Excluding derivative valuation adjustments, markets income was down 2% on First Half 2015 due to:

- Customer income decreased from First Half 2015, with lower fixed income sales, partially offset by higher foreign exchange sales. First Half 2015 included a number of large one-off fixed income transactions related to the infrastructure sector, not repeated in First Half 2016; and
- Non-customer income decreased compared to First Half 2015, with lower fixed income results compared to First Half in 2015. This was partially offset by an improved Energy result during First Half 2016.

<sup>1</sup> Markets income includes WIB Markets, BB, CB, BTFG and Westpac New Zealand markets.

<sup>2</sup> Includes CVA and derivative valuation methodology changes.

<sup>3</sup> In First Half 2015 changes were made to derivative valuation methodologies, which included the first time adoption of a FVA to the fair value of derivatives. In First Half 2015 the impact of these changes resulted in a \$122 million charge which reduced non customer, non-interest income.

Interim financial results 2016  
 Review of Group operations

**Markets Value at Risk (VaR)<sup>1</sup>**

\$m	High	Low	Average
<b>Six months ended 31 March 2016</b>	<b>14.2</b>	<b>5.1</b>	<b>9.7</b>
Six months ended 30 September 2015	11.7	5.7	7.6
Six months ended 31 March 2015	10.7	5.9	7.9

The components of Markets VaR are as follows:

Average	Half Year March 16	Half Year Sept 15	Half Year March 15
<b>\$m</b>			
Interest rate risk	5.7	4.2	2.9
Foreign exchange risk	5.1	2.0	1.7
Equity risk	0.3	0.3	0.2
Commodity risk <sup>2</sup>	3.0	3.1	3.1
Credit and other market risks <sup>3</sup>	2.6	3.1	5.0

<b>Net market risk</b>	<b>9.7</b>	<b>7.6</b>	<b>7.9</b>

<sup>1</sup> The daily VaR presented above reflects a divisional view of VaR. It varies from presentations of VaR in Westpac's 2015 Annual Report and Australian Prudential Standard (APS) 330 Prudential Disclosure under Basel III where market risk disclosures are segregated into trading and banking book. VaR measures the potential for loss using a history of price volatility.

<sup>2</sup> Includes electricity risk.

<sup>3</sup> Includes pre-payment risk and credit spread risk (exposures to generic credit rating bonds).

Interim financial results 2016  
Review of Group operations

2.2.8 Operating expenses<sup>1</sup>

\$m			% Mov't		
	Half Year March 16	Half Year Sept 15	Half Year March 15	Mar 16 - Sept 15	Mar 16 - Mar 15
Salaries and other staff expenses	(2,304)	(2,349)	(2,355)	(2)	(2)
Equipment and occupancy expenses	(511)	(486)	(468)	5	9
Technology expenses	(917)	(1,455)	(833)	(37)	10
Other expenses	(836)	(773)	(754)	8	11
<b>Total Operating expenses</b>	<b>(4,568)</b>	<b>(5,063)</b>	<b>(4,410)</b>	<b>(10)</b>	<b>4</b>

First Half 2016 – Second Half 2015

Operating expenses were \$4,568 million, a decrease of \$495 million or 10% compared to Second Half 2015. The key factors of the result were:

- lower technology expenses due to changes in Second Half 2015 related to the accounting approach for technology investment spend that did not repeat (\$505 million);
- delivery of productivity benefits of \$116 million or 2%;
- lower expenses following the partial sale and move to equity accounting of BTIM<sup>2</sup> (\$60 million); partially offset by
- uplift in investment related costs.

Salaries and other staff expenses were \$2,304 million, a decrease of \$45 million or 2% compared to Second Half 2015. This decrease was due to:

- reductions from the impact of the partial sale and move to equity accounting of BTIM;
- lower FTE from productivity initiatives; partially offset by
- the impact of annual salary increases; and
- lower capitalisation of the Group's investment programs.

Equipment and occupancy expenses were \$511 million, reflecting an increase of \$25 million or 5% compared to Second Half 2015. This increase was due to:

- full period impact of rental expenses following the Group's relocation of certain head office functions to Barangaroo; partially offset by
- benefits from corporate property consolidation.

Technology expenses were \$917 million, \$538 million or 37% lower compared to Second Half 2015. This decrease was driven by:

- impact from changes to the accounting approach for technology investment spend, in Second Half 2015 not repeated (\$505 million);
- lower transition costs related to a new telecommunications contract in Second Half 2015, that did not repeat;
- lower software impairments; partially offset by
- the impact of directly expensing a higher proportion of investment spend.

Other expenses were \$836 million, an increase of \$63 million or 8%. This increase was due to:

- seasonally higher credit card reward redemptions;
- increased advertising expenses; and
- professional service costs associated with the Group's investment programs and costs associated with implementing the Group's new operating model.

<sup>1</sup> Refer to Section 4 Note 5 for reported results breakdown. Refer to Section 5 for reconciliation between reported results and cash earnings.

<sup>2</sup> BTIM's contribution to operating expenses has reduced to nil following the partial sale and subsequent move to equity accounting in June 2015.

## Interim financial results 2016

### Review of Group operations

#### First Half 2016 – First Half 2015

Operating expenses were \$4,568 million, an increase of \$158 million or 4%, compared to First Half 2015. This increase was due to:

- higher investment related expenses; offset partially by
- productivity savings; and
- lower expenses associated with the partial sale and move to equity accounting of BTIM<sup>1</sup>.

Salaries and other staff expenses were \$2,304 million, a decrease of \$51 million or 2%, compared to First Half 2015 from:

- lower FTE resulting from productivity initiatives;
- lower BTIM expenses following the partial sale and move to equity accounting; partially offset by
- annual salary increases; and
- increased restructuring costs.

Equipment and occupancy expenses were \$511 million, an increase of \$43 million or 9% compared to First Half 2015 due to:

- higher rental expenses from the relocation of certain head office functions to Barangaroo; partially offset by
- benefits from corporate property consolidation.

Technology expenses were \$917 million, an increase of \$84 million or 10%, compared to First Half 2015. This was driven by:

- increased investment spend and the impact from directly expensing a higher proportion of investment spend; and
- amortisation of software assets and depreciation of technology equipment also increased following delivery of investments across the Group.

Other expenses were \$836 million, an increase of \$82 million or 11%, compared to First Half 2015 reflecting:

- increased professional services costs related to investment programs; and
- costs associated with implementing the Group's new operating model.

#### Full Time Equivalent Employees (FTE)

	As at 31 March 2016	As at 30 Sept 2015	As at 31 March 2015	% Mov't Mar 16 - Sept 15	% Mov't Mar 16 - Mar 15
<b>Analysis of movement in FTE</b>					
Permanent employees	32,021	32,620	33,704	(2)	(5)
Temporary employees	2,656	2,621	2,855	1	(7)
<b>Total employees</b>	<b>34,677</b>	<b>35,241</b>	<b>36,559</b>	<b>(2)</b>	<b>(5)</b>

#### First Half 2016 – Second Half 2015

Total employees decreased by 564 or 2% compared to Second Half 2015, driven by the delivery of productivity initiatives primarily across CB and Westpac New Zealand, and the sale of operations in the Solomon Islands (60 FTE).

#### First Half 2016 – First Half 2015

Total employees decreased 1,882 or 5% compared to First Half 2015, reflecting the partial sale of BTIM (243 FTE), sale of operations in Cook Islands, Samoa, Solomon Islands and Tonga (272 FTE) and delivery of productivity initiatives across the Group.

<sup>1</sup> BTIM's contribution to operating expenses has reduced to nil following the partial sale and subsequent move to equity accounting in June 2015.

Interim financial results 2016  
Review of Group operations

Investment spend

\$m	Half Year	Half Year	Half Year	% Mov't	% Mov't
	March 16	Sept 15	March 15	Mar 16 - Sept 15	Mar 16 - Mar 15
Expensed	256	208	167	23	53
Capitalised software and fixed assets	271	359	291	(25)	(7)
<b>Total</b>	<b>527</b>	<b>567</b>	<b>458</b>	<b>(7)</b>	<b>15</b>
Growth and productivity	336	290	233	16	44
Regulatory change	117	152	108	(23)	8
Other technology	74	125	117	(41)	(37)
<b>Total</b>	<b>527</b>	<b>567</b>	<b>458</b>	<b>(7)</b>	<b>15</b>

Investment cash spend in First Half 2016 was \$527 million. While this was 15% higher than First Half 2015, it was 7% lower than Second Half 2015 reflecting normal project cycles.

Expensed investment spend increased 23% compared to Second Half 2015. This is due to a high proportion of new programs in early planning phases and follows changes to the Group's accounting approach for investment spending (announced in September 2015), which results in a higher portion of technology investment spend being expensed rather than capitalised.

Of the \$527 million in cash investment spend in First Half 2016, 64% was directed to growth and productivity initiatives such as the acceleration of the Group's Service Revolution, further development of BT's Panorama platform and beginning the creation of a Customer Service Hub program. Of the remaining cash investment, 22% was directed to regulatory change initiatives while 14% was spent on other technology programs.

**Growth and productivity** programs over First Half 2016 include:

- Continued enhancement to the award winning Westpac Live online and mobile banking platform including:
  - Creating a more streamlined process for new consumer customers to join us;
  - Simplifying the process for customers to switch their direct debits to Westpac; and
  - Enabling customers to block/unblock their credit and debit cards online materially enhancing the speed and convenience of customers protecting their cards. 168,000 customers have already utilised this service.

After completing the rollout of Westpac Live to business customers in 2015, digital sales were up 31% year on year, complaints fell 58% and online Net Promoter Score (NPS) was up from -7 to +42.

- A new mobile banking app feature has been added to St.George, Bank of Melbourne and BankSA that allows customers to connect directly with a contact centre from their mobile app and avoiding the need for separate identification questions. This innovation has reduced average call times for customers by around 60 seconds;
- Installation of around 100,000 state of the art wireless and portable merchant terminals. The terminals have a variety of new features including acceptance of Union Pay International with direct currency conversion; and
- Completion of the next stage of BT's integrated wealth platform called Panorama which provides Advisors and investors with a comprehensive range of investment options including:
  - The first phase of the Self-Managed Super Fund offering including fund establishment and administration, consolidated asset reporting, electronic record management and accounting functionality; and
  - Direct trading of listed securities for advised investors.

**Regulatory change programs** are required to achieve compliance with evolving regulatory requirements including new obligations. Investment in First Half 2016 included further enhancements to Stronger Super, Anti Money Laundering and Future of Financial Advice reforms programs.

**Other technology** spend was \$74 million. This includes a significant increase in investment directed at further strengthening the Group's cyber security.

Interim financial results 2016  
 Review of Group operations

**Capitalised software**

\$m	Half Year March 16	Half Year Sept 15	Half Year March 15	% Mov't Mar 16 - Sept 15	% Mov't Mar 16 - Mar 15
Opening balance	1,654	2,102	2,070	(21)	(20)
Total additions	268	356	274	(25)	(2)
Amortisation expense	(271)	(291)	(254)	(7)	7
Impairment expense	-	(21)	(3)	(100)	(100)
Reduction of capitalised technology cost balances	-	(482)	-	(100)	-
Foreign exchange translation	-	(10)	15	(100)	(100)
<b>Closing balance</b>	<b>1,651</b>	<b>1,654</b>	<b>2,102</b>	<b>-</b>	<b>(21)</b>

**Capitalised software** was flat compared to Second Half 2015, with additions being offset by amortisation expense. New additions were lower compared to Second Half 2015 mostly due to the commencement of new programs where spending and capitalisation ratios are generally lower and a reduction in the proportion of investments that are now capitalised following the change in accounting approach.

**Software amortisation** was lower in First Half 2016 compared to Second Half 2015. This was due to a reduction in the capitalised balances in Second Half 2015. These reductions were partially offset by the adoption of an accelerated depreciation approach for existing assets with a useful life greater than three years.

## 2.2.9 Impairment charges

\$m	Half Year	Half Year	Half Year	% Mov't	% Mov't
	March 16	Sept 15	March 15	Mar 16 - Sept 15	Mar 16 - Mar 15
<b>Individually assessed provisions (IAPs)</b>					
New IAPs	(471)	(273)	(293)	73	61
Write-backs	82	142	155	(42)	(47)
Recoveries	92	68	63	35	46
<b>Total IAPs, write-backs and recoveries</b>	<b>(297)</b>	<b>(63)</b>	<b>(75)</b>	<b>large</b>	<b>large</b>
<b>Collectively assessed provisions (CAPs)</b>					
Write-offs	(418)	(463)	(330)	(10)	27
Other changes in CAPs	48	114	64	(58)	(25)
<b>Total new CAPs</b>	<b>(370)</b>	<b>(349)</b>	<b>(266)</b>	<b>6</b>	<b>39</b>
<b>Total impairment charges</b>	<b>(667)</b>	<b>(412)</b>	<b>(341)</b>	<b>62</b>	<b>96</b>

On most measures overall asset quality through First Half 2016 remained sound, with higher new impaired assets from the downgrade of a small number of institutional customers and a small rise in delinquencies partially offset by a reduction of facilities graded as watchlist and substandard. This combined with a reduction in write-backs and recoveries has led to impairment charges relative to average gross loans increasing, but remains modest at 21 basis points. Provisioning levels have increased and economic overlays were little changed over First Half 2016 (up \$5 million) with a balance of \$393 million at 31 March 2016, with around 45% of the overlay allocated to the mining sector.

### First Half 2016 – Second Half 2015

Impairment charges for First Half 2016 were \$667 million, up \$255 million or 62% compared to Second Half 2015, and were equivalent to 21 basis points of average gross loans.

Key movements included:

- Total new IAPs less write-backs and recoveries were \$234 million higher than Second Half 2015, principally due to:
  - Higher charge in WIB reflecting a small number of new large IAPs (\$272 million) and an \$18 million reduction in write-backs and recoveries; and
  - This was partially offset by lower IAPs in BB (down \$51 million) as fewer facilities were downgraded to impaired.
- Total new CAPs added \$370 million to impairment charges in First Half 2016, \$21 million more than recorded in Second Half 2015. Key movements included:
  - Write-offs were lower (\$45 million) in First Half 2016, consistent with normal seasonal patterns in unsecured personal lending;
  - Other changes in CAPs were \$66 million lower in First Half 2016. This was due to increasing seasonal delinquencies, including impact of the mining downturn in WA, SA and QLD, and changes to hardship recognition in delinquencies; and the deterioration in auto finance were offset by higher CAP benefits in WIB. New Zealand was little changed; and
  - Economic overlays were \$5 million higher. More of the economic overlay has been allocated to mining exposures with reductions in retail and Australian agriculture overlays.

### First Half 2016 – First Half 2015

Impairment charges for First Half 2016 were \$667 million, up \$326 million or 96% compared to First Half 2015.

Key movements included:

- Total new IAPs less write-backs and recoveries were \$222 million higher than First Half 2015. New IAPs increased \$178 million primarily from a small number of large impairments in WIB, partially offset by lower new impairments in BB and Westpac New Zealand. Westpac New Zealand had a very small charge in First Half 2016. First Half 2015 also benefited from a larger number of write-backs and recoveries which were \$44 million higher than First Half 2016; and
- Total new CAPs were \$104 million higher with the increase due to an \$88 million lift in write-offs and a rise from growth in the unsecured portfolio in 2016. The benefit from other changes in CAPs was also lower adding \$16 million impairment charges.

#### 2.2.10 Tax expense

##### First Half 2016 – Second Half 2015

The effective tax rate of 29.2% in First Half 2016 was higher than 28.3% in Second Half 2015, with both halves benefitting from the finalisation of prior period taxation matters.

##### First Half 2016 – First Half 2015

The effective tax rate of 29.2% in First Half 2016 was lower than First Half 2015 effective tax rate of 30.6%, as First Half 2016 had a greater benefit resulting from the finalisation of prior period taxation matters.

#### 2.2.11 Non-controlling interests

In First Half 2016 the non-controlling interests primarily represented distributions on the Group's hybrid equity instrument TPS 2006<sup>1</sup>.

Non-controlling interests of \$9 million for First Half 2016 were \$15 million lower than Second Half 2015. The reduction in non-controlling interests primarily relates to the partial sale and move to equity accounting of BTIM.

---

<sup>1</sup> Non-controlling interests include distributions on 2006 Trust Preferred Securities (TPS):

Westpac TPS Trust issued 7,627,375 2006 TPS in Australia at \$100 each on 21 June 2006. The 2006 TPS are preferred units in the Westpac TPS Trust, with non-cumulative floating rate distributions which are expected to be fully franked. Westpac TPS Trust also issued one ordinary unit with an issue price of \$100 to Westpac. Westpac, as holder of the ordinary unit, is entitled to any residual income or assets of the Westpac TPS Trust not distributed to holders of 2006 TPS. The 2006 TPS are scheduled to pay quarterly distributions (30 September, 31 December, 31 March and 30 June) in arrears, subject to certain conditions being satisfied. The distribution rate on 2006 TPS, until 30 June 2016 (the step-up date) is calculated as the Australian 90 day bank bill rate plus 1% per annum (the initial margin), together multiplied by one minus the Australian corporate tax rate (30% during all periods). After the step-up date, the initial margin will increase by a one time step-up of 1% per annum.

### 2.3 Credit quality

The overall credit quality of the portfolio was little changed over First Half 2016 with total stressed exposure to total committed exposures up 4 basis points to 1.03% (see 2.3.1 Credit Quality Key Metrics) remaining at a relatively low level. The portfolio has experienced some pockets of stress with the further downgrade of a small number of institutional customers, a rise in delinquencies in those markets more impacted by the slowdown in mining and higher delinquencies in the auto finance portfolio. Certain 90+ day delinquencies have also increased following changes in how facilities that have been granted hardship assistance are reported. This change results in a more conservative measure of delinquency.

The small rise in stressed assets ratio was due to the impaired exposure ratio which increased 6 basis points to 0.26% and in the 90+ days past due and not impaired category which increased 3 basis points to 0.28%. These increases were partially offset by a 5 basis points fall in the ratio of watchlist and substandard facilities to 0.49% due to some facilities being downgraded to impaired.

#### Portfolio segments

The institutional and commercial segments continue to perform well in aggregate, however there has been a small number of facilities downgraded in First Half 2016. Most of these facilities had been graded as watchlist and substandard and a further deterioration in their financial position has required them to be downgraded to impaired. While lower commodity prices contributed to the deterioration, underperforming acquisitions have also been a major source of the increased stress. Across the Group, there was a small number of large (>\$50 million) facilities that were downgraded to impaired during First Half 2016 (four of the facilities added \$252 million to provisions).

The commercial property segment has continued to show an improvement in asset quality. After peaking in the midst of the financial crisis at 15.5% the stress ratio (stress as a per cent of total committed exposure) has now declined to 1.3%. The level of stress is now at its lowest point for over a decade.

The small and medium business portfolio has also performed well. Where stress is emerging it is mostly attributable to sectors impacted by the slowing of the mining investment cycle and lower commodity prices, along with those industries undergoing structural change (eg. Manufacturing).

In the consumer sector, unsecured consumer delinquencies are higher over First Half 2016 consistent with normal seasonal trends (which typically see delinquencies rise in the first half of the year). The auto finance portfolio has seen a greater increase in delinquencies with around half the increase due to some operational challenges impacting collection processing (and which are expected to be corrected in Second Half 2016) and from increased stress in regions impacted by the slowing of the mining investment cycle. Total Group consumer unsecured 90+ day delinquencies increased 35 basis points since 30 September 2015 and 25 basis points since 31 March 2015. This trend was driven by the Australian portfolios. In New Zealand, unsecured 90+ day delinquencies increased 1 basis point since 30 September 2015 and are 25 basis points lower than 31 March 2015.

Australian mortgage 90+ day delinquencies were at 0.55% at 31 March 2016, an increase of 10 basis points from 30 September 2015 and 8 basis points higher compared to 31 March 2015. Around 4 basis points of this increase has been due to a change in the measurement and reporting of delinquencies for customers granted hardship assistance. The remaining increase in mortgage delinquencies is consistent with normal seasonal trends and some regional challenges. Despite the low level of delinquencies, the modest pace of economic growth and rising unemployment in some regions has contributed to higher delinquencies in certain areas, especially in those states and regions impacted by the slowing of the mining investment cycle. This is being offset by lower delinquencies / stress in New South Wales (NSW) where economic activity has been robust. The investment property segment continues to have a superior delinquency profile with 90+ day delinquencies of 0.38%, well below the portfolio average.

Australian properties in possession decreased by two over First Half 2016 to 253. Realised mortgage losses were \$35 million for First Half 2016, equivalent to 2 basis points.

New Zealand mortgage 90+ day delinquencies improved 10 basis points since 31 March 2015 to 15 basis points at 31 March 2016. The low level of delinquencies over the year reflects low interest rates and the buoyant Auckland housing market.

#### Provisioning

Westpac has maintained adequate provisioning coverage with:

- The ratio of impaired asset provisions to total impaired assets remains high at 47.6% (up from 46.3% during First Half 2016); and
- The ratio of collectively assessed provisions to credit risk weighted assets was 0.87% with the ratio little changed from the 0.86% reported at 30 September 2015.

Total impairment provisions were \$3,669 million with IAPs of \$952 million and CAPs of \$2,717 million.

IAPs have increased by \$283 million primarily from a small number of large institutional names downgraded to impaired during First Half 2016.

## Interim financial results 2016

### Review of Group operations

CAPs balances were \$54 million higher compared to Second Half 2015. Excluding foreign currency translation impacts, movements in collectively assessed provisions can principally be traced to:

- Provision increases relating to higher stressed assets and increasing delinquencies were partially offset by lower provisions associated with several large exposures moving from watchlist and substandard exposures to impaired; and
- The economic overlay balance was little changed during First Half 2016. The provision balance was \$5 million higher at \$393 million at 31 March 2016. Most of the economic overlay has been set for the mining and manufacturing sectors and for some segments of agriculture.

#### 2.3.1 Credit quality key metrics

	As at March 16	As at Sept 15	As at March 15
<b>Stressed exposures by credit grade as a % of TCE:</b>

First Half 2016 – Second Half 2015

Key movements during the half included:

Assets

- Cash and balances with central banks increased \$4.0 billion or 27% reflecting higher liquid assets held in this form;
- Receivables due from other financial institutions increased \$3.9 billion or 41% largely reflecting higher collateral posted with derivative counterparties mainly related to foreign currency swaps and forward contracts;
- Trading securities, other financial assets designated at fair value and available-for-sale securities increased \$2.0 billion or 2%. Holdings of liquid assets increased \$3.0 billion, in part responding to a \$7.4 billion reduction in the CLF, while securities held for trading purposes reduced by \$1.0 billion;
- Derivative assets decreased \$9.0 billion or 19% mainly due to foreign currency translation impacts on cross currency swaps and forward contracts; and
- Loans increased \$17.4 billion or 3%. Refer to Section 2.2.2 Loans for further information on movements.

## Interim financial results 2016

### Review of Group operations

---

#### Liabilities

- Payables due to other financial institutions increased \$2.5 billion or 13%, reflecting increase in Securities sold under agreement to repurchase, partially offset by reduction in collateral received from derivative counterparties and interbank borrowings;
- Deposits and other borrowings increased \$18.9 billion or 4%. Refer to Section 2.2.3 Deposits and other borrowings for further information on movements;
- Other financial liabilities at fair value through the income statement decreased \$2.1 billion or 22% reflecting reduced funding through securities sold under agreements to repurchase;
- Derivative liabilities increased \$2.9 billion or 6% mainly due to foreign currency translation impacts on cross currency swaps and forward contracts;
- Debt issues decreased \$6.0 billion or 4% (\$1.6 billion or 1% increase excluding foreign currency translation impacts). Refer to Section 2.4.2 Funding and Liquidity Risk Management for further information; and
- Loan capital decreased \$0.8 billion or 6% mainly reflecting the redemption of 2004 Trust Preferred Securities.

**Equity** increased \$4.1 billion or 8% mainly reflecting shares issued under the Share Entitlement Offer, 2015 final dividend DRP and retained profits.

#### First Half 2016 – First Half 2015

Key movements included:

#### Assets

- Cash and balances with central banks increased \$4.1 billion or 28% reflecting higher liquid assets held in this form;
- Trading securities, other financial assets designated at fair value and available-for-sale securities increased \$1.7 billion or 2%. Holdings of liquid assets increased \$4.7 billion responding to a reduction in the CLF partially offset by \$3.0 billion less in securities held for trading purposes;
- Derivative assets decreased \$6.5 billion or 14% mainly due to foreign currency translation impacts on cross currency swaps and forward contracts;
- Loans grew \$35.6 billion or 6%. Refer to Section 2.2.2 Loans for further information on movements; and
- Life insurance assets increased \$1.2 billion or 10%, as an additional managed fund was consolidated.

#### Liabilities

- Payables due to other financial institutions increased \$5.8 billion or 38% reflecting increased securities sold under agreements to repurchase;
- Deposits and other borrowings increased \$27.5 billion or 6%. Refer to Section 2.2.3 Deposits and other borrowings for further information on movements;
- Other financial liabilities at fair value through the income statement decreased \$5.0 billion or 41% reflecting reduced securities sold under agreements to repurchase;
- Debt issues decreased \$3.1 billion or 2%. Refer to Section 2.4.2 Funding and Liquidity Risk Management for further information;
- Life insurance liabilities increased \$0.9 billion or 8%, as an additional managed fund was consolidated; and
- Loan capital increased \$1.1 billion or 9% mainly reflecting Westpac Capital Notes 3 (Additional Tier 1 capital) issuance of \$1.3 billion and foreign currency translation impacts, partially offset by the redemption of 2004 Trust Preferred Securities.

**Equity** increased \$7.7 billion or 15% mainly reflecting shares issued under the Share Entitlement Offer, 2015 interim dividend DRP and partial underwrite, 2015 final dividend DRP and retained profits including gain on partial sale of BTIM less dividends paid.

## 2.4.2 Funding and liquidity risk management

Liquidity risk is the risk that the Group will be unable to fund assets and meet obligations as they become due. This type of risk is inherent in all banks through their role as intermediaries between depositors and borrowers. The Group has a liquidity risk management framework designed with the objective of meeting cash flow obligations under a wide range of market conditions, including name specific and market-wide stress scenarios, as well as meeting the requirements of the LCR<sup>1</sup>.

### Liquid Assets

The Group holds a portfolio of liquid assets. These assets are unencumbered and eligible to be used as collateral for repurchase agreements with the Reserve Bank of Australia or other central banks. As at 31 March 2016, Westpac held in total \$138.5 billion in liquid assets (30 September 2015: \$135.6 billion). At 31 March 2016 the portfolio comprised:

- \$66.9 billion of cash, deposits at central banks, government and semi-government bonds;
- \$13.8 billion of repo-eligible private securities; and
- \$57.8 billion of self-originated AAA rated mortgage backed securities, which are eligible collateral for repurchase agreement with the RBA or the RBNZ.

### LCR

The LCR requires banks to hold sufficient high-quality liquid assets, as defined by APRA, to withstand 30 days under a regulator-defined acute stress scenario.

Given the limited amount of government debt in Australia, the RBA, jointly with APRA, has made available to Australian Deposit-taking Institutions (ADIs) a CLF. Subject to satisfaction of qualifying conditions, the CLF can be accessed to help meet the LCR requirement. In order to have access to a CLF, ADIs are required to pay a fee of 15 basis points (0.15%) per annum to the RBA on the approved facility. Westpac has received approval from APRA for a CLF of \$58.6 billion for the 2016 calendar year (2015 calendar year: \$66.0 billion).

Westpac maintains a buffer over the regulatory minimum of 100%. The Group's LCR as at 31 March 2016 including the CLF of \$58.6 billion, was 127% (30 September 2015: 121%) and the average LCR for the quarter ending 31 March 2016 was 126%<sup>2</sup> (30 September 2015: 121%).

### Net Stable Funding Ratio

The Group will be required to maintain a Net Stable Funding Ratio (NSFR), designed to encourage longer-term funding resilience, of at least 100% when it comes into effect on 1 January 2018. APRA released a discussion paper on the implementation of the NSFR on 31 March 2016 and intends to issue a revised draft of the APRA liquidity standard APS 210 by the end of 2016. Westpac is taking steps to comply with the NSFR from 1 January 2018.

### Funding

The Group monitors the composition and stability of its funding so that it remains within the Group's funding risk appetite. This includes targeting a Stable Funding Ratio (SFR)<sup>3</sup> of greater than 75%.

The Group's SFR at 31 March 2016 was 83.3%, well above its internal target. Our focus on funding asset growth through stable sources was maintained.

The proportion of the Group's total funding sourced from customer deposits increased 68 basis points to 60.0% (30 September 2015: 59.3%). Equity also increased, up 44 basis points to 7.8% of total funding (30 September 2015: 7.4%). Offsetting these increases were modest declines in the proportion of total funding from securitisation, down 29 basis points to 1.4%, and long term funding with a residual maturity greater than one year, down 132 basis points to 14.1%.

At 31 March 2016, the Group had \$122.9 billion of wholesale funding with a residual maturity within one year, representing 16.7% of the Group's total funding. As a proportion of total funding, short term funding increased by 50 basis points in First Half 2016, reflecting a higher proportion of long term funding with a residual maturity within one year. This portfolio remains more than covered by the \$138.5 billion of repo-eligible liquid assets held by the Group. The weighted average maturity of short term funding was 121 days.

In First Half 2016, the Group raised \$20.3 billion of term wholesale funding with a weighted average maturity of 5.1 years (excluding securitisation). Over the period, the Group experienced adequate liquidity in global markets

---

<sup>1</sup> Refer to Glossary for definition.

<sup>2</sup> Calculated using the simple average of LCR liquid assets and cash flows for 31 January 2016, 29 February 2016 and 31 March 2016.

<sup>3</sup> Stable funding ratio is total stable funding divided by total funding. Stable funding includes customer deposits, wholesale term funding with a residual contractual maturity greater than 12 months, securitisation and equity. Total funding includes customer deposits, total wholesale funding (short and long term) and equity.

## Interim financial results 2016

### Review of Group operations

despite periods of heightened volatility, however new term issuance came at higher spreads compared to the prior half.

Westpac continues to target diversity of funding across product, tenor and currency. In First Half 2016 the Group executed benchmark senior bond trades in US\$, A\$, Euro, Sterling, Japanese Yen and a benchmark covered bond trade in US\$. Smaller trades in other currencies were also completed. New term issuance included \$842 million in Tier 2 capital. In addition, the Group raised \$3.9 billion in core equity through its Share Entitlement Offer and DRP.

APRA leverage ratio	5.0%	4.8%	n/a	25bps	n/a

### Westpac's preferred capital range

Westpac's preferred range for its common equity Tier 1 (CET1) capital ratio is 8.75% - 9.25%. The CET1 preferred range takes into consideration:

- Current regulatory minimums;
- The capital conservation buffer (CCB) (including Westpac's domestic systemically important banks (D-SIB) surcharge), which came into effect on 1 January 2016;
- Stress testing to calibrate an appropriate buffer against a severe downturn; and
- Quarterly volatility of capital ratios under Basel III, due to the half yearly cycle of ordinary dividend payments.

The CCB applicable to Westpac as at 31 March 2016 totaled 3.5% and includes a base requirement of 2.5% and Westpac's D-SIB surcharge of 1%. Should the CET1 capital ratio fall within the CCB (currently between 4.5% and 8.0%) restrictions on distributions apply. Distributions for this purpose are defined as payment of dividends, discretionary bonuses and Additional Tier 1 capital distributions.

The preferred capital range is not currently impacted by the countercyclical buffer requirement, which also came into effect on 1 January 2016, as it is currently set to zero for Australia and New Zealand<sup>1</sup>.

The CET1 capital ratio of 10.5% is above Westpac's preferred range as the Group has raised capital ahead of increased capital requirements for Australian residential mortgages effective 1 July 2016. If these capital requirements had been in force as at 31 March 2016, the CET1 capital ratio would be approximately 110 basis points lower.

<sup>1</sup> The countercyclical buffer has been activated in other jurisdictions where Westpac has exposure. Westpac's countercyclical buffer requirement resulting from these exposures is less than 1 basis point at 31 March 2016. Refer to Appendix 1 in the March 2016 Pillar 3 Report.

Common equity Tier 1 capital ratio movement for First Half 2016

Westpac's CET1 capital ratio was 10.47% at 31 March 2016, 97 basis points higher than recorded at 30 September 2015.

Organic capital generation of 3 basis points included:

- First Half 2016 NPAT of \$3.7 billion (101 basis points increase);
- The 2015 final dividend payment net of DRP share issuance (71 basis points decrease);
- Increases in RWA (excluding modelling changes and foreign currency translation) (22 basis points decrease); and
- Other movements included higher capitalised expenses (5 basis points decrease).

Other items impacted CET1 by 94 basis points:

- The Group's entitlement offer completed in November 2015, which raised \$3.5 billion of CET1 capital (96 basis points increase);
- RWA modelling changes (discussed further below) reduced RWA by \$1.7 billion (4 basis points increase);
- Foreign currency translation impacts had a modest impact on the ratio. Exchange rate movements reduced credit RWA by \$1.7 billion (4 basis points increase), while movements in the foreign currency translation of offshore capital, decreased CET1 capital by \$0.2 billion (6 basis points decrease); and
- An increase in the accounting obligation for the defined benefit plan reflecting the impact of lower discount rates used to value defined benefit liabilities (4 basis points decrease).

**Additional Tier 1 and Tier 2 capital**

During First Half 2016, Westpac:

- Redeemed Trust Preferred Securities 2004 (TPS 2004), which reduced Additional Tier 1 capital by \$0.8 billion or 21 basis points;
- Issued Tier 2 instruments totalling \$0.8 billion, which increased Tier 2 capital 23 basis points; and
- The Basel III transitional adjustment for non-compliant Tier 2 instruments increased \$0.3 billion (10 basis points decrease).

The net impact of these changes decreased total regulatory capital 8 basis points.

Movements in RWA for First Half 2016 were as follows:

- Credit RWA increased \$2.7 billion or 0.9% due to:
  - Growth in the portfolio added \$5.6 billion to credit RWA over the half;
  - Modelling changes reduced credit RWA by \$1.7 billion. These included:
    - o Moving from standardised to advanced modelling for the Lloyds asset finance portfolio (\$2.1 billion net decrease<sup>9</sup>);
    - o Reclassification of exposures to the small business category (\$1.3 billion net decrease);
    - o Updates to probability of default parameters for unsecured exposures (\$0.8 billion decrease); and
    - o Partially offset by updates to Loss Given Default (LGD) parameters for corporate exposures (\$2.5 billion increase).
  - Changes in credit quality increased credit RWA by \$1.5 billion;
  - Currency movements decreased credit RWA by \$1.7 billion mainly due to the A\$ appreciating against US\$; and
  - Reduction in mark-to-market related credit risk of \$1.0 billion, related to derivative counterparty exposure.

<sup>1</sup> Corporate – typically includes exposure where the borrower has annual turnover greater than \$50 million, and other business exposures not captured under the definitions of either Business lending or Small Business.

<sup>2</sup> Business lending – includes exposures where the borrower has annual turnover less than or equal to \$50 million and exposure greater than \$1 million.

<sup>3</sup> Sovereign – includes exposures to Governments themselves and other non-commercial enterprises that are owned or controlled by them.

<sup>4</sup> Bank – includes exposures to licensed banks and their owned or controlled subsidiaries, and overseas central banks.

<sup>5</sup> Small business – includes exposures less than or equal to \$1 million.

<sup>6</sup> Specialised lending – property and project finance – includes exposures to entities created to finance and/or operates specific assets where, apart from the income received from the assets being financed, the borrower has little or no independent capacity to repay from other activities or assets.

<sup>7</sup> Securitisation – exposures reflect Westpac's involvement in activities ranging from originator to investor and include the provision of securitisation services for clients wishing to access capital markets.

<sup>8</sup> Operational risk – the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events, including legal risk but excluding strategic or reputational risk.

<sup>9</sup> Standardised RWA reduced \$7 billion. Corporate RWA increased \$0.6 billion, business lending \$0.3 billion, other retail \$1.9 billion and small business \$2.2 billion.

## Interim financial results 2016

### Review of Group operations

- Non-credit RWA increased \$2.0 billion or 4.1% primarily due to:
  - Interest rate risk in the banking book (IRRBB) RWA increased \$1.7 billion reflecting hedging on a higher level of capital and a lower embedded gain as market interest rates increased;
  - Market risk RWA decreased \$1.0 billion from a reduction in the level of interest rate and credit spread risk exposure in the trading book; and
  - Operational risk RWA increased \$1.3 billion;

#### Leverage Ratio

The leverage ratio represents the amount of Tier 1 capital relative to leverage exposure. At 31 March 2016, Westpac's APRA leverage ratio<sup>1</sup> was 5.0%, up 25 basis points since 30 September 2015. The increase is primarily due to capital raised through the Group's Share Entitlement Offer completed in November 2015, partly offset by the redemption of an additional Tier 1 capital instrument.

APRA has yet to prescribe any minimum leverage ratio requirements.

#### Internationally Comparable Capital Ratios

The APRA Basel III capital adequacy requirements are more conservative than those of the Basel Committee on Banking Supervision (BCBS), leading to lower reported capital ratios when compared to international peers. APRA conducted a study in July 2015 outlining its methodology for measuring international comparability.

Based on this study, Westpac's internationally comparable CET1 ratio is 14.7% and internationally comparable total capital ratio is 17.2% at 31 March 2016.

#### Dividends

	Half Year March 16	Half Year Sept 15	Half Year March 15	% Mov't Mar 16 - Sept 15	% Mov't Mar 16 - Mar 15
<b>Ordinary dividend (cents per share)</b>					
Interim (fully franked)	94	-	93	-	1
Final (fully franked)	-	94	-	-	-
<b>Total ordinary dividend</b>	<b>94</b>	<b>94</b>	<b>93</b>	<b>-</b>	<b>1</b>
Payout ratio (reported)	84.5%	67.8%	80.2%	large	large
Adjusted franking credit balance (\$m)	844	793	471	6	79
Imputation credit (cents per share - NZ)	7.0	6.0	6.0	17	17

The Board has determined an interim fully franked dividend of 94 cents per share, to be paid on 4 July 2016, to shareholders on the register at the record date of 13 May 2016<sup>2</sup>. The interim dividend represents a payout ratio of 84.5%. In addition to being fully franked, the dividend will also carry NZ\$0.07 in New Zealand imputation credits that may be used by New Zealand residents.

The Board has determined to satisfy the DRP for the 2016 interim dividend by issuing Westpac ordinary shares. The Market price used to determine the number of shares issued to DRP participants will be set over the 10 trading days commencing 18 May 2016. The Market Price at which ordinary shares will be issued under the DRP will not include any discount.

<sup>1</sup> The APRA leverage ratio is based on the same definition of Tier 1 capital as used by APRA capital requirements and is not comparable to the Basel Committee for Banking Supervision leverage ratio calculation.

<sup>2</sup> Record date in New York is 12 May 2016.

<sup>1</sup> During First Half 2016, the general reserve for credit loss (GRCL) adjustment increased following changes to factors used its calculation. However these changes did not affect the calculation of regulatory expected loss and so had no net impact on the overall level of common equity Tier 1 capital.

Interim financial results 2016  
 Review of Group operations

**Capital deduction for regulatory expected credit loss**

For capital adequacy purposes APRA requires the amount of regulatory expected credit losses in excess of eligible provisions to be deducted from CET1 capital. The table below shows the calculation of this capital deduction.

\$m	As at 31 March 2016	As at 30 Sept 2015	As at 31 March 2015
<b>Provisions associated with eligible portfolios</b>			
Total provisions for impairment charges (Section 4 Note 10)	3,669	3,332	3,505
plus general reserve for credit losses adjustment <sup>1</sup>	208	112	107
plus provisions associated with partial write-offs	288	361	406
less ineligible provisions <sup>2</sup>	(72)	(135)	(131)
<b>Total eligible provisions</b>	<b>4,093</b>	<b>3,670</b>	<b>3,887</b>
<b>Regulatory expected downturn loss</b>	<b>4,823</b>	<b>4,351</b>	<b>4,588</b>
<b>Shortfall in eligible provisions compared to regulatory expected downturn loss</b>	<b>730</b>	<b>681</b>	<b>701</b>
<b>Common equity Tier 1 capital deduction for regulatory expected downturn loss in excess of eligible provisions<sup>3</sup></b>	<b>(730)</b>	<b>(696)</b>	<b>(734)</b>

<sup>1</sup> During First Half 2016 the general reserve for credit losses adjustment increased following changes to factors used in its calculation. These changes did not affect the calculation of regulatory expected loss and so had no net impact on the overall level of common equity Tier 1 capital.

<sup>2</sup> Provisions associated with portfolios subject to the Basel standardised approach to credit risk are not eligible.

<sup>3</sup> Regulatory expected loss is calculated for portfolios subject to the Basel advanced capital IRB approach to credit risk. The comparison between regulatory expected loss and eligible provisions is performed separately for defaulted and non-defaulted exposures. As at March 31 2016 there was no excess of eligible provisions compared to regulatory expected loss for defaulted exposures (30 September 2015: \$15 million).

## 2.6 Sustainability performance

### Approach to operating sustainably

Westpac Group's approach to operating sustainably is designed to anticipate, respond to and shape the most pressing emerging matters that have the potential to materially impact customers, employees, suppliers, shareholders and communities, where the Group has the skills and experience to make a meaningful, positive impact. This view is embedded within core business activities and aligns with the priorities set in both the Group's corporate and sustainability strategies.

Westpac Group identifies the most material sustainability matters through regular assessments of industry trends, internal reports, information from stakeholder engagement and independent research. The table below outlines those matters identified for the half year ended 31 March 2016 that are most material for the Group and its stakeholders.

Westpac Group's sustainability strategy and reporting framework align with the Global Reporting Initiative's G4 guidance and AA1000 AccountAbility Principles Standard (2008) and prioritisation of the most material sustainability topics continues to be subject to annual independent external assurance.

Material sustainability matter		How we have responded during the half year ended 31 March 2016
<i>Customer experience</i>	Customers' needs are becoming more complex, and at the same time they want banking to be simpler and more efficient.	<ul style="list-style-type: none"> <li>• Launched 'Our Service Promise', an enhanced customer service and culture program to help employees deliver Westpac Group's Service Revolution;</li> <li>• Invested in innovative product design, for example a new 'One Click' opening of saving accounts for existing customers via digital channels; and</li> <li>• Launched 'Wonder', a tool for home owners to enhance their knowledge and potential options for their property.</li> </ul>
<i>Digital transformation</i>	While digitisation offers opportunities to improve efficiency and deliver services in new ways, Westpac is alert to the emergence of fintech providers and new business models that have the potential to disrupt traditional banking.	<ul style="list-style-type: none"> <li>• Continued to digitally transform the business providing more services online, expanding the 24/7 smart ATM fleet and simplifying digital processes;</li> <li>• Continued to explore partnerships with fintech innovators;</li> <li>• Extended the functionality of Westpac Live, including making proof of balance and statement of recent transactions available via online or mobile banking; and</li> <li>• Launched a new facility across St.George, Bank of Melbourne and BankSA, that allows customers to contact the call centre directly from their mobile banking app, reducing average call times by around one minute.</li> </ul>
<i>Cybersecurity</i>	Potential exposure to cyber attacks remains high due to the evolving nature of technology and Westpac's prominence within the industry.	<ul style="list-style-type: none"> <li>• Further strengthened cybersecurity systems including information security;</li> <li>• Invested in additional dedicated resources to counter new and emerging threats; and</li> <li>• Enhanced the resilience and security of systems to protect the confidentiality, integrity and availability of customer information and sensitive commercial data.</li> </ul>
<i>Conduct and culture</i>	Conduct and culture is vital for maintaining the trust of customers, shareholders and regulators.	<ul style="list-style-type: none"> <li>• Operated within robust risk management and compliance control frameworks, including Westpac Group's Code of Conduct;</li> <li>• Ensured customer focused vision is supported by a set of company-wide values: Integrity, Delighting Customers, Courage, One Team and Achievement. These are further supported by 'Our Service Promise'; and</li> <li>• Remained focused on enhancing processes and governance, including refinements to the design and monitoring of products and services to consistently 'do the right thing' by customers.</li> </ul>
<i>Changing regulatory landscape</i>	Supervision and regulation in jurisdictions Westpac operates continues to evolve, creating uncertainty in the operating environment.	<ul style="list-style-type: none"> <li>• Invested over \$117 million during the half to enhance existing and implement new processes to comply with recent regulatory changes; and</li> <li>• Actively contributed to the Government's consultations in relation to the Financial System Inquiry recommendations.</li> </ul>
<i>Financial and economic performance</i>	Maintaining a healthy financial performance and a sound balance sheet is vital to the Group's long term sustainability.	<ul style="list-style-type: none"> <li>• Delivered another sound performance with a return on average ordinary equity of 13.4% supported by good business growth and well managed margins;</li> <li>• Strengthened the balance sheet with an additional \$3.5 billion in ordinary equity raised, increasing capital ratios to the upper end of peers globally. Other elements of balance sheet remain similarly sound; and</li> <li>• Maintained relatively stable asset quality but increased provisions for some companies, sectors and regions showing signs of stress.</li> </ul>

## Interim financial results 2016

### Review of Group operations

Material sustainability matter	How we have responded during the half year ended 31 March 2016
<i>Social impact</i>	<p>As one of the oldest and largest banks in the region, Westpac Group plays an important role in creating positive social impact – both through core business activities and community investment.</p> <ul style="list-style-type: none"> <li>Reported for the first time against Westpac Group's Social Impact Framework in the 2015 Sustainability Performance Report;</li> <li>Launched Westpac Foundation's new Social Scale-up Grants program which aims to improve the sustainability of social enterprises focused on creating employment opportunities for people experiencing disadvantage;</li> <li>15 social enterprises backed by Westpac Foundation created a further 588 jobs and 2,174 employment pathways during the half year to December 2015;</li> <li>Awarded the first 100 scholarships through the \$100 million Westpac Bicentennial Foundation; and</li> <li>Matched employees charitable donations dollar for dollar through the Matching Gifts program, bringing charitable distributions to \$5.4 million for the 2015/16 Matching Gifts program.</li> </ul>
<i>Climate change</i>	<p>As a major financial institution, Westpac Group has an important role to play in supporting the transition to a sustainable economy model aligned to a Two Degree Economy.</p> <ul style="list-style-type: none"> <li>Continued to support the sustainable transition to a Two Degree economy, through lending and investments, direct operations and through engagement with all stakeholders; and</li> <li>Commenced a scenario analysis to assess the risks and opportunities of operating in a Two Degree economy, with results expected to be reported publicly in Second Half 2016.</li> </ul>
<i>Talent attraction and retention</i>	<p>Attracting, retaining and developing the right people requires innovative recruitment strategies and working conditions to match changing employee expectations.</p> <ul style="list-style-type: none"> <li>Introduced a market leading Enterprise Agreement which creates substantial benefits for employees;</li> <li>Launched the 2016 Equilibrium program to transition senior women into the financial services industry. Many of the 2015 participants secured permanent roles and promotions in the organisation;</li> <li>Named as one of only two organisations identified as a best-practice case study in the Bain report: 'The Power of Flexibility'; and</li> <li>Retained the Employer of Choice for Gender Equality citation awarded by the Workplace Gender Equality Agency.</li> </ul>
<i>Inclusion and diversity</i>	<p>As the population ages and becomes more culturally diverse, Westpac Group needs to think creatively about how to find, develop and retain the right employees and tailor services that consider diverse customer needs.</p> <ul style="list-style-type: none"> <li>Named Inclusive Workplace of 2015 in the Australian Human Resources Institute Awards;</li> <li>Hosted 60 events for International Women's Day across Australia and internationally on the UN-endorsed theme: "Pledge for Parity";</li> <li>Established the Anti-Family Violence Working Group and drafted a strategy to support customers, employees and community members who are victims of family violence; and</li> <li>Piloted a high school to university student transition program as part of our 10-year partnership with CareerTrackers Indigenous Internship program to recruit at least 40 Aboriginal or Torres Strait Islander university student interns every year for the next decade.</li> </ul>

#### Additional highlights and awards

- Assessed as the most sustainable bank globally in the 2015 Dow Jones Sustainability Indices (DJSI) and assigned a Gold Class ranking in the RobecoSAM Sustainability Yearbook for 2015, released in January 2016. Westpac Group achieved its highest ever score of 94;
- Ranked as one of the 2016 Global 100 Most Sustainable Corporations in the World by Corporate Knights, announced at the World Economic Forum in January 2016. Westpac has featured in the Global 100 for 10 of the last 11 years;
- Included in the CDP<sup>1</sup> 2015 ASX200 Climate Disclosure Leadership Index, achieving a score of 100 out of 100. The Group achieved an A- performance band and was a finalist in the 2015 best climate disclosure award category; and
- Released BTFG's Responsible Investment Position Statement articulating an approach to responsible investing and to provide a framework for understanding and managing environmental, social and corporate governance impacts, risks and opportunities across the portfolios within BTFG.

<sup>1</sup> Formerly the Carbon Disclosure Project.

## Interim financial results 2016

### Review of Group operations

#### Sustainability objectives

Westpac Group has set measureable objectives against the following three priority areas as part of its 2013-2017 Sustainability Strategy:

- Embracing societal change: helping improve the way people work and live, as our society changes;
- Environmental solutions: helping find solutions to environmental challenges; and
- Better financial futures: helping customers to have a better relationship with money, for a better life.

#### Performance against sustainability objectives<sup>1</sup>

Priority	Objectives	First Half 2016 progress
Help improve the way people work and live, as our society changes	Ensure our workforce is representative of the community	<ul style="list-style-type: none"> <li>• Women in leadership at 46%, up from 44% one year ago;</li> <li>• Recruited an additional 70 people who identify as Aboriginal and/or Torres Strait Islander, bringing to 220 those recruited against our goal of 500 by 2017; and</li> <li>• Participation of mature aged workers (50+) is 21.2%, up from 20.9% one year ago.</li> </ul>
	Extend length and quality of working lives	<ul style="list-style-type: none"> <li>• Mean employee retirement age was 61.5 years, steady compared to one year ago; and</li> <li>• Launched Carers@Work program to support employees to balance their working and caring responsibilities.</li> </ul>
	Anticipate the future product and service needs of ageing and culturally diverse customers	<ul style="list-style-type: none"> <li>• Launched BTFG's 'Ask an Adviser' online educational engagement tool to directly engage with customers, in a way that is more responsive to their needs; and</li> <li>• Launched Ruby Connection's financial education social media campaign to engage women over 35 in relation to their evolving product and service needs.</li> </ul>

### 3.0 Divisional results<sup>1</sup>

Divisional results are presented on a management reporting basis.

The accounting standard AASB 8 *Operating Segments* requires segment results to be presented on a basis that is consistent with information provided internally to Westpac's key decision makers. In assessing financial performance, including divisional results, Westpac uses a measure of performance referred to as 'cash earnings'<sup>2</sup>. Cash earnings is not a measure of cash flow or net profit determined on a cash accounting basis, as it includes non-cash items reflected in net profit determined in accordance with AAS. To calculate cash earnings, the specific adjustments to the net profit attributable to owners of Westpac Banking Corporation include both cash and non-cash items and are outlined below. Cash earnings is viewed as a measure of the level of profit that is generated by ongoing operations and is therefore available for distribution to shareholders. Management believes this allows the Group to more effectively assess performance for the current period against prior periods and to compare performance across business divisions and across peer companies.

A reconciliation of cash earnings to net profit attributable to owners of Westpac Banking Corporation for each business division is set out in Note 2 to the financial statements.

Three categories of adjustments are made to reported results to determine cash earnings:

- material items that key decision makers at Westpac believe do not reflect ongoing operations;
- items that are not considered when dividends are recommended, such as the amortisation of intangibles, impact of Treasury shares and economic hedging impacts; and
- accounting reclassifications between individual line items that do not impact reported results.

In presenting divisional results on a management reporting basis, internal charges and transfer pricing adjustments are included in the performance of each division reflecting the management structure rather than the legal entity (these results cannot be compared to results for individual legal entities). Where management reporting structures or accounting classifications have changed, financial results for comparative periods have been revised and may differ from results previously reported.

Our internal transfer pricing frameworks facilitate risk transfer, profitability measurement, capital allocation and business unit alignment, tailored to the jurisdictions in which we operate. Transfer pricing allows us to measure the relative contribution of our products and divisions to the Group's interest margin, and other dimensions of performance. Key components of our transfer pricing frameworks are funds transfer pricing for interest rate and liquidity risk, and allocation of basis and contingent liquidity costs, including capital allocation.

Following a restructuring announced last year, the Group is now reporting under a new operating structure that better aligns divisions with the Group's customer base and improves accountability for customer outcomes. The key change has been the creation of two new divisions; CB and BB. The Group's other main customer facing divisions have been little changed and include BT Financial Group (BTFG), Westpac Institutional Bank and Westpac New Zealand.

The discussion of our divisional results and certain data in Sections 3 and 5 are presented on a cash earnings basis, unless otherwise stated. Cash earnings are not directly comparable to statutory results presented in other parts of this Interim Financial Results Announcement.

---

<sup>1</sup> Refer to Glossary for definition.

<sup>2</sup> Cash earnings adjustments are explained in Section 6.

#### 3.1 Consumer Bank

Consumer Bank (CB) is responsible for sales and service to consumer customers in Australia under the Westpac, St.George, BankSA, Bank of Melbourne and RAMS brands. Activities are conducted through a dedicated team of specialist consumer bankers along with an extensive network of branches, call centres and ATMs. Customers are also supported by a range of internet and mobile banking solutions. Through its network of branches, CB also assists with the provision of banking services to small business and commercial customers. In addition, CB works in an integrated way with BTFG and WIB in the sales and service of select financial services and products including in wealth and foreign exchange. The revenue from these products is mostly retained by the product originators.

## Financial performance

### First Half 2016 – Second Half 2015

CB is a large earnings contributor to the Group accounting for 37% of the Group's cash earnings. In First Half 2016, CB's profit before impairment charges and income tax expense grew 6% and cash earnings increased 5%. CB's strategy is focused on attracting new customers, deepening relationships and continuing to simplify the business for both customers and our people. This focus has seen an increase in customers, above system growth in the balance sheet, improved net interest margin and improved efficiency with a reduction in the expense to income ratio.

Highlights for First Half 2016 included:

- Attracting more customers by adopting a segment-based focus:
  - Customer numbers increased 1% with a rise in customers joining via online channels;
  - Achieved above system growth in mortgages which increased 4% or 1.1x system<sup>1</sup> and deposits up 3% or 1.2x system<sup>2</sup>; and
  - Rolled out an enhanced process for new customers seeking to open an account. Called "walk out working", the system enables online verification eliminating the need to go to a branch and enabling accounts to be opened when it suits customers, and making it easier for customers to switch banks by automating the transfer of banking arrangements including importing details of payees, billers and direct debits.
- Deepening relationships:
  - Launched 'Wonder' which enhances customers' knowledge of their property options and their equity in their home. Wonder also makes home loan increases for existing customers easier and faster.
- Simplification. Rolled out a range of enhancements to make it easier for customers and our employees, including:
  - Automated 'proof of balance' requests. Previously over 2 million customers per year came into a branch to obtain proof of their account balance, usually for Government requirements, or for property rental checks. Since launch in mid-March 2016, more than 70,000 customers have accessed this new functionality;
  - Rolled out a new feature in St.George mobile banking called Connect, which enables customers to connect directly with the call centre without the need to re-verify themselves - significantly reducing call times;
  - Reduced customer complaints by 19%; and
  - Continued to optimise the network with amalgamation of 105 locations and the refurbishment of 40 branches.

Net interest income increased 7% with average interest-earning assets rising 3% and net interest margin up 9 basis points:

- Net interest margin increased 9 basis points over the period to 2.37%:
  - Improved spreads on mortgages from repricing of investor property loans and to reflect increased regulatory capital requirements. These increases were partly offset by competition for new lending across all lending categories;
  - Full period impact of improved deposit spreads. Most of the improvement was due to changes in term deposit rates towards the end of 2015, and
  - Increases were partly offset by higher wholesale funding costs.
- Lending up 4% or \$13.0 billion:
  - In mortgages, the division effectively used its portfolio of brands with a series of targeted campaigns and offers delivering 4% mortgage growth at 1.1x system<sup>1</sup> for the half. This growth was achieved despite further tightening of lending criteria and managing to slow investor lending growth below 10%; and
  - Higher credit card balances, consistent with seasonal trends, was the main contributor to the 3% rise in other consumer lending.

<sup>2</sup> Source: APRA Banking System Household Deposits March 2016.

## Interim financial results 2016

### Divisional results

---

- Deposits grew \$5.8 billion or 3%, with most of the increase in term deposits (up 12%). Within other deposits much of the growth was in mortgage offset accounts. Household deposits grew at 1.2x system<sup>1</sup>.

Non-interest income was \$48 million lower compared to Second Half 2015 with most of the decline due to lower cards revenue including from the convergence of interchange fees following the industry-wide three year review of interchange rates. This change had a particular impact on premium cards. Contributing to the fall, Second Half 2015 cards income benefited from a change in card reward point redemption costs.

The division's productivity focus has seen operating expenses increases largely offset by productivity savings with much of the increase in expenses associated with additional investment. This resulted in operating expenses rising 4%. Contributors to operating expenses growth included:

- Higher investment related costs associated with new capabilities including enhancements to online and mobile banking platforms, self-service capabilities and branch optimisation including the cost of exiting certain locations; and
- Productivity savings of \$53 million achieved in the branch network through a range of new digital and self-service capabilities and further optimisation of the network. These changes contributed to a 3% decline in FTE and a 9% reduction in branches.

Asset quality remains sound, although stressed assets to TCE was up 10 basis points to 0.51%. This increase was partly due to normal seasonal trends which sees delinquencies higher in First Half 2016, combined with higher personal lending delinquencies (mostly in WA and Queensland). Changes in the measurement of customers in hardship arrangements also contributed to the rise. Impairment charges rose \$42 million (or 19%) from the increase in delinquencies and the 4% rise in the loan portfolio.

#### First Half 2016 – First Half 2015

CB increased cash earnings \$204 million or 16%, with profit before impairment charges and income tax expense rising \$308 million or 15%.

Net interest income increased 15% from a 6% rise in average interest-earning assets and a 19 basis point improvement in net interest margin:

- The 19 basis point rise in net interest margin was due to improved asset spreads, mostly from the repricing of mortgage rates driven by higher regulatory capital requirements, and changes to rates on investor property lending. Deposit spreads also improved from both repricing and mix impacts. Partly offsetting these benefits were higher wholesale funding costs;
- Mortgages increased 8%, growing at around 1.0x system<sup>2</sup> while other lending (mostly credit cards) grew at 4%; and
- Deposits increased \$13.5 billion, with growth skewed to high quality, more stable sources.

Non-interest income was \$60 million lower or down 13% mostly from lower cards revenue including from reduced interchange fees and higher card rewards costs (a negative revenue).

Operating expenses increased 7% mostly from higher investment related expenses. Investment spending has been directed to transforming the customer experience and driving improved efficiency. The impact of increased operating expenses was partly offset by productivity benefits of \$110 million.

Impairment charges increased \$18 million, or 7%, due to the increase in delinquencies and portfolio growth of 7%.

#### 3.2 Business Bank

Business Bank (BB) is responsible for sales and service to micro, SME and commercial business customers for facilities up to approximately \$150 million. The division operates under the Westpac, St.George, BankSA and Bank of Melbourne brands. Customers are provided with a wide range of banking and financial products and services to support their lending, payments and transaction needs. In addition, specialist services are provided for cash flow finance, trade finance, automotive and equipment finance, property finance and treasury services. The division is also responsible for consumer customers with auto finance loans. BB works in an integrated way with BTFG and WIB in the sales and service of select financial services and products including corporate superannuation, foreign exchange and interest rate hedging. The revenue from these products is mostly retained by the product originators. CB provides sales and service of select financial products for certain SME customers. The associated costs and revenue remains in BB.

#### Financial performance

##### First Half 2016 – Second Half 2015

BB generated cash earnings of \$988 million in First Half 2016, up \$26 million, or 3% with profit before impairment charges and income tax expense also rising 3%. The Profit before impairment charges and income tax expense was supported by disciplined balance sheet growth and a 1 basis point improvement in net interest margin.

The division is seeking to transform its business, building the value of each of its key segments through four streams of work. Initiatives under each stream include:

- Building banker capability:
  - Investing further in training for all bankers including the Group's 'Best Banker' professional accreditation program; and
  - Expanding the team of industry specialists to better support commercial customers.

## Interim financial results 2016

### Divisional results

---

- Enhancing distribution:
  - Completed the roll-out of Westpac Live. Success of the new platform is reflected in a 31%<sup>1</sup> rise in digital sales, a 58% reduction in complaints and online NPS<sup>2</sup> rising from -7 to +42;
  - Rolled out 100,000 new state-of-the-art merchant terminals. Improvement in merchant capability has contributed to a 16%<sup>3</sup> reduction in merchant complaints and a 3% rise in the number of merchant customers<sup>4</sup>; and
  - Connect, our video capability for connecting small and medium business customers directly to specialists, continues to support business growth with a 38% increase in lending through this channel.
- Best in class origination and servicing:
  - Continued to extend LOLA, our simplified loan origination platform. The system has conditionally approved \$34 billion of lending for small businesses with \$600 million settled to date. LOLA has enhanced the customer experience and improved productivity with approval times reduced from around 15 days to < 1 day<sup>5</sup>;
  - Launched Business Link Trade Platform, enabling customers to use their credit card to facilitate payments and manage international suppliers; and
  - Developed new online functionality that enables business customers to more rapidly open accounts and begin operating immediately.
- Specialist capabilities:
  - Continued to build on the division's specialist business portfolio including trade, cash flow lending, auto finance and equipment finance.

Net interest income increased \$57 million or 3%, with average interest-earning assets rising 3% and net interest margin rising by 1 basis point:

- The 1 basis point increase in net interest margin was due to:
  - Increased mortgage spreads which included repricing driven by higher regulatory capital requirements and from increased deposit spreads. Repricing of business lending occurred late in the half so its impact was modest; and
  - Partially offsetting this increase has been higher funding costs and intense competition in business lending leading to lower spreads on both new business and facilities being renewed.
- Lending increased \$2.8 billion or 2%, with the disciplined asset growth focused on higher returning segments:
  - Mortgages increased \$1.7 billion or 3% with growth across micro, SME and commercial businesses; and
  - Business loans increased \$1.1 billion, or 1%, with growth diversified across a range of industries with particular strength in services industries.
- Deposits grew \$4.4 billion or 4%, fully supporting lending growth in the half and contributing to a 164 basis point rise in the deposit to loan ratio to 71.2%. Growth was solid in term deposits (up 11%) and transaction accounts (up 3%) as the business focused on higher value LCR deposits.

Non-interest income was up \$12 million or 2%, from an increase in facility fees and merchant revenue, including from the successful roll-out of enhanced merchant terminals.

Operating expenses increased \$16 million or 2%. Higher salary and technology costs were partly offset by efficiency gains from moving to the new BB structure and from a realignment of customer segmentation to better match bankers with customer sophistication and opportunity.

Asset quality has remained sound with stressed assets 2.13% of total committed exposures, declining 7 basis points over the half. Business impaired assets were lower although there has been a rise in delinquencies in mortgages and in auto finance.

While on most measures asset quality has been sound, impairment charges increased \$17 million. Over the half, individually assessed provisions less write-backs and recoveries were lower, consistent with the reduction in impaired assets whilst collective provisions were higher reflecting the rise in delinquencies, particularly in the auto finance portfolio.

## Interim financial results 2016

### Divisional results

---

#### First Half 2016 – First Half 2015

Cash earnings of \$988 million, down 3%. Profit before impairment charges and income tax expense was up \$75 million or 5%, driven by volume growth, and a rise in non-interest income.

Net interest income was up \$102 million or 5%, supported by a 6% rise in average interest-earning assets, partly offset by a 2 basis point decline in net interest margin:

- Improved deposit spreads and the benefits from mortgage repricing were more than offset by a reduction in spreads in business lending and higher funding costs;
- Lending was up \$8.6 billion or 6%:
  - Mortgages increased \$4.5 billion or 9%;
  - Business lending increased \$3.7 billion or 5% over the period mostly from term lending and equipment finance; and
  - Other lending increased \$0.5 billion or 6% primarily from growth in auto loans.
- Most of the 4% increase in deposits was in transaction accounts.

Non-interest income was up \$18 million or 3%, from an increase in facility fees and higher merchant revenue.

Operating expenses increased \$45 million or 5%. The increase in investments aimed at enhancing the division's capabilities and higher business as usual costs were partially offset by productivity benefits.

On most measures, asset quality improved over the year with the level of impaired and stressed assets both reducing. Impairment charges, however, were up \$118 million. The rise in provisions was principally due to higher delinquencies in the mortgage and auto finance portfolios combined with a reduction in write-backs from a slowing in the rate of portfolio improvement. These rises were partially offset by lower new individual provisions.

## Interim financial results 2016

### Divisional results

#### 3.3 BT Financial Group (Australia)

BT Financial Group (Australia) (BTFG) is the wealth management and insurance arm of the Westpac Group providing a broad range of associated services. BTFG's funds management operations include the manufacturing and distribution of investment, superannuation, retirement products, wealth administration platforms, private banking, margin lending and equities broking. BTFG's insurance business covers the manufacturing and distribution of life, general and lenders mortgage insurance. The division also uses third parties for the manufacture of certain general insurance products as well as actively reinsuring its risk using external providers excluding Consumer Credit Insurance (CCI). BTFG operates a range of wealth, funds management, and financial advice brands and operates under the banking brands of Westpac, St. George, Bank of Melbourne and BankSA for Private Wealth and Insurance. BT Investment Management Limited (BTIM) is 31% owned by BTFG (following a partial sale in 2015) with the business being equity accounted from July 2015. BTFG works in an integrated way with all the Group's Australian divisions in supporting the insurance and wealth needs of customers.

#### Financial performance

Given the normal seasonality in the wealth business associated with insurance claims and fund activity, cash earnings for BTFG is best compared to the prior corresponding period. In addition to seasonality, the comparative periods also include earnings from the portion of BTIM that was sold in Second Half 2015. Following the sell down of Westpac's interest to 31% the remaining holding is equity accounted, rather than consolidated into the BTFG results from 1 July 2015.

#### First Half 2016 – Second Half 2015

- Cash earnings decreased \$9 million, or 2%, with a higher contribution from insurance and a higher contribution from capital and other more than offset by a lower result from Funds Management. The decline in funds management was mostly due to lower markets and the partial sale of BTIM. The partial sale of BTIM reduced cash earnings by \$8 million, although as it was accompanied by a deconsolidation of the business it had a more significant impact on individual earnings line items;
- Funds Management cash earnings were \$21 million lower or 7%, with lower markets and the partial sale of BTIM. Outside of these impacts, the business continued to have positive FUA and FUM flows and had a good contribution from Private Wealth. Partially offsetting these gains was lower Advice income;
- Insurance cash earnings were up \$5 million or 3%. The business has continued to expand with good growth in Life insurance in-force premiums and higher premiums in Lenders Mortgage Insurance (LMI). Loss rates across the business were broadly unchanged; and
- The cash earnings contribution from Capital and other was up \$7 million, mostly due to higher returns on invested capital.

## Interim financial results 2016

### Divisional results

#### First Half 2016 – First Half 2015

- Cash earnings were little changed over the year (down \$1 million). The division recorded an improved performance in Insurance which was fully offset by the partial sale of BTIM and a lower contribution from Capital and other, mostly from lower markets;
- Funds Management cash earnings were down \$15 million or 5%, with the decline mostly due to a lower contribution from BTIM following its partial sale (\$16 million). Average FUM (ex BTIM) and FUA increased 3% and 5% respectively and this was further supported by an improved performance from Private Wealth. Offsetting these improvements was lower Advice income, softer FUM / FUA margins, decline in asset markets and FX movements which contributed to lower returns from investments managed by Ascalon;
- The Insurance contribution was up \$28 million or 21% from growth in in-force premiums and lower claims because there were less severe weather events in First Half 2016. The LMI contribution also increased, up \$6 million, mostly due to the negotiation of new arrangements for LMI on mortgages with a Loan to Value Ratio greater than 90% with Arch Capital Group; and
- Cash earnings from Capital and other was down \$14 million, mostly from lower returns on invested capital.

Corporate Super		14.0%	3

#### Impact of partial sale of BTIM

The partial sale of our holding in BTIM in June 2015 reduced the Group's ownership to 31%. In considering the impact of the partial sale, the contribution to cash earnings of the BTIM shares sold was \$16 million in First Half 2015 and \$8 million in Second Half 2015. This contribution was wholly in the Funds Management business.

BTIM is now equity accounted with the share of profit less tax Westpac is required to pay, recorded in non-interest income.

The partial sale and move to equity accounting occurred on 30 June 2015. The table below shows the contribution by line item received by the Group from the shares sold.

Cash earnings	Half Year	Half Year	Half Year
\$m	March 16	Sept 15	March 15
Non-Interest income	-	89	191
Expenses	-	(58)	(126)
Tax & Non controlling Interests	-	(23)	(49)
<b>Total cash earnings</b>	<b>-</b>	<b>8</b>	<b>16</b>

<sup>1</sup> Other movement includes market movement and other client transactions including fund transfers, account fees and distributions.

<sup>2</sup> Retail includes Annuities, Retail Investment, Retirement Products and Retail Superannuation.

<sup>3</sup> Other includes Capital and Reserves.

<sup>4</sup> Market share FUM / FUA based on published market share statistics from Plan for Life and Morningstar as at 31 December 2015 and represents the addition of St. George Wealth and BT Wealth business market share at this time.

## Interim financial results 2016

### Divisional results

---

#### Financial performance

##### First Half 2016 – Second Half 2015

The Funds Management business delivered cash earnings of \$262 million, down \$21 million, or 7%. First Half 2016 results reflect full period impact following the partial sale of BTIM in June 2015 and move to equity accounting \$8 million. The value of the funds business continued to increase with a larger balance sheet in Private Wealth and continuing FUM and FUA flows. These gains were offset by reduced asset markets, FX movements and a lower contribution from Advice.

BTFG has continued to build on its market position over the half including:

- Ranked number 1 on all Platforms (including Corporate Super) with FUA share of 19.6%<sup>1</sup>;
- Ranked number 1 on Retail Super (excluding Cash) with 18.6% FUA<sup>1</sup>;
- Ranked number 3 on Corporate Super with a 14.0% share of FUA<sup>1</sup>;
- BT Super for Life retail balances were up a further 3% over the half to \$6.0 billion. Asgard Infinity balances have now reached \$9.5 billion since launching in October 2011; and
- Continued the phased roll out of the Panorama platform with the launch of direct trading of listed securities and the capability to manage Self-Managed Super Funds. These enhancements complement the features already on Panorama, including Cash, term deposits, and a comprehensive range of managed funds.

Net interest income was \$18 million or 8% higher, primarily from a 4% increase in mortgages in Private Wealth. This was supported by improved spreads across both mortgages and deposits.

Non-interest income decreased \$138 million, or 17%. The partial sale of BTIM and move to equity accounting reduced non-interest income by \$89 million. Excluding this impact, non-interest income was down \$49 million or 7% with the key drivers being:

- FUM flows were positive;
- Advice income was down \$22 million as investors continue to maintain a cautious approach;
- The contribution from Ascalon was \$19 million lower due to lower asset markets and an increase in the value of the A\$ reducing the value of offshore investments; and
- FUA income was 1% higher with continuing good inflows and minimal change in margins over the half.

Operating expenses decreased \$71 million or 12%, with the partial sale of BTIM and the move to equity accounting reducing expenses by \$58 million. Excluding the impact of the change to equity accounting, operating expenses were \$13 million lower, despite continued investment in Panorama.

Tax and other non-controlling interests decreased \$30 million, associated with lower earnings and the move to equity accounting for BTIM reducing the value of non-controlling interests.

##### First Half 2016 – First Half 2015

Net interest income was up \$34 million, or 17%, from higher lending volumes and improved net interest margin in Private Wealth.

Non-interest income decreased \$191 million, or 22%. The partial sale of BTIM and the move to equity accounting reduced non-interest income by \$191 million, excluding this impact non-interest income was flat:

- FUM and FUA revenues were higher with increases in average FUM (excluding BTIM) and FUA being partially offset by weaker markets and some margin compression from movements in product mix;
- This was offset by a lower Ascalon contribution due to the revaluation of investments from weaker markets and a rise in the A\$; and
- Advice income was lower with reduction in activity.

Operating expenses decreased \$98 million or 16%. The partial sale and equity accounting of BTIM reduced expenses by \$126 million. Excluding this impact, operating expenses were up \$28 million or 6% mostly from increased investment related costs associated with regulatory change and the continued development of the Panorama platform.

#### Financial performance

##### First Half 2016 – Second Half 2015

The insurance business has continued to grow over the half picking up market share in life insurance in-force premiums and maintaining its position in home and contents insurance. The business also continued to benefit from its well positioned business model which has contributed to loss rates and lapse rates remaining below industry averages. Specific successes over the half included:

- Awarded the Life Insurance Company of the Year, Claims Management Team of the Year by the Plan for Life and the Association of Financial Advisers;
- BT's Claims team has consistently achieved outstanding ratings under various benchmarking surveys, including being twice awarded an A\* rating from C-MAP and top rankings for service quality under the Plan for Life Risk Benchmarking Report; and
- Embedding the strategic partnership with Allianz enabling Westpac customers access to a full suite of general insurance products.

Net operating income increased \$9 million or 3% to \$275 million:

- Life insurance in-force premiums increased 4%. New life sales were lower than Second Half 2015 from both a decline in Advice sales and seasonal factors. Loss ratios were little changed and remain low relative to industry benchmarks;
- General Insurance net earned premiums increased by \$7 million although gross written premiums were relatively stable. Overall loss ratios were also little changed with few catastrophe claims reported in the half; and

<sup>1</sup> Loss ratio is claims over earning premium plus reinsurance rebate plus exchange commission. General Insurance loss ratios have been calculated to align with industry standards and exclude internal commission payments from earned premiums.

<sup>2</sup> LMI gross written premium includes loans >90% LVR reinsured with Arch Capital Group. First Half 2016 gross written premium includes \$102 million from transitional arrangements (Second Half 2015; \$42 million).

<sup>3</sup> Source: Life Insurance – Plan for Life December 2015.

## Interim financial results 2016

### Divisional results

---

- LMI revenue increased \$5 million from changes to LMI arrangements for mortgages where the LVR ratio is >90%. Transitional arrangements are in place with LMI policies initially written by Westpac LMI and then reinsured with Arch Capital Group<sup>1</sup>. Ultimately all business with an LVR>90% will be fully reinsured by Arch Capital Group.

Operating expenses increased \$1 million or 2% with increased volumes lifting salary and other expenses partially offset by efficiency gains.

#### First Half 2016 – First Half 2015

Net operating income increased \$47 million or 21%:

- The General Insurance contribution was up significantly with an \$11 million rise in net earned premiums and significantly lower loss rates as First Half 2015 included higher claims from two severe weather events;
- Life Insurance net earned premiums increased \$34 million, with in-force premiums rising 12% and loss rates remaining flat; and
- LMI revenue was up \$10 million related to the transitional arrangements in place for mortgages where the LVR ratio is >90%.

Operating expenses increased \$6 million or 16%, with increased volumes and higher employee costs in claims management to support the larger portfolio partly offset by productivity benefits.

---

<sup>1</sup> Arch Capital Group is our reinsurance partner for >90% LVR.

<sup>1</sup> In First Half 2015 changes were made to derivative valuation methodologies, which included the first time adoption of a FVA for the fair value of derivatives. The impact of these changes resulted in a \$122 million (pre-tax) charge which reduced non-interest income.

<sup>2</sup> Includes capital benefit.

## Financial performance

### First Half 2016 – Second Half 2015

Westpac Institutional Bank (WIB) experienced challenging conditions over First Half 2016 with cash earnings of \$517 million, \$173 million lower than Second Half 2015. The result was impacted by continuing high levels of liquidity placing pressure on margins, no performance fees in Hastings and lower revenue following the sale of operations in certain Pacific Islands. At the same time, after recording impairment benefits for each of the last three years, impairments were a charge of \$178 million in First Half 2016. WIB has continued to focus on delivering superior service to customers while applying a disciplined approach to managing the business focusing on balance sheet and expenses while maintaining sound asset quality.

The division continues to be the lead institutional bank in Australasia with the business building its capabilities across key markets and segments. Highlights for the half have included:

- Leading position in FX markets, fixed income and transactional banking:
  - No.1 Australian bank for FX Globally (Euromoney FX Poll 2015); and
  - 'Australia and New Zealand Loan House of the Year' in the 2015 IFR Asia Awards.
- Continuing to enhance WIB's receivables and payments capabilities, including expanding PayWay functionality and further expanding the use of the QuickSuper gateway (clearing house solution for superannuation funds and employers); and
- Responding to changes in the operating environment, WIB commenced a restructure of the business to:
  - Support a faster, more streamlined service capability;
  - Create a more efficient business model, reducing duplication and customer touchpoints; and
  - Realign sales and transactional areas to customer needs contributing to a reduction of around 100 roles.

Net interest income declined 2%, with a 2% increase in average interest-earning assets offset by a 7 basis point decline in net interest margin.

- Institutional margins continued to be impacted by higher levels of liquidity from global quantitative easing and increased competition for high LCR value deposits;
- Lending was down \$0.7 billion over the half, as growth in structured finance in Australia was offset by a decline in trade finance, mostly in Asia; and
- Deposits increased 4% principally from the Government and education sector.

Non-interest income decreased \$34 million or 4% driven by lower Hastings revenue.

Operating expenses decreased \$10 million or 1% due to disciplined expense management and productivity initiatives. The sale of certain Pacific Island operations also contributed to the decline.

On most measures asset quality in WIB remained sound. However, during the half we have seen deterioration of a small number of stressed individual names. This, along with a reduction in write-backs, has contributed to an impairment charge of \$178 million, compared to an impairment benefit of \$15 million in Second Half 2015.

### First Half 2016 – First Half 2015

WIB delivered cash earnings of \$517 million, down \$136 million, or 21%.

Net interest income decreased \$53 million, or 6%, due to an 11 basis point decline in net interest margin:

- Margin pressure continued to be experienced across both lending and deposits. Lending spreads continue to be impacted by high levels of global liquidity while high quality deposits are in high demand to meet LCR requirements;
- Lending increased 5%, from good growth in structured finance, and higher demand in the consumer and agricultural sectors. Growth was partially offset by lower trade finance balances; and
- Deposits increased 7% principally from the Government and education sector.

Non-interest income increased \$86 million or 12%. Excluding the derivative valuation methodology adjustments in First Half 2015 of \$122 million, non-interest income declined \$36 million driven by lower Hastings revenue.

Operating expenses increased \$29 million or 5% primarily due to increased investment including meeting additional regulatory and compliance requirements. These increases were partially offset by lower expenses following the sale of certain Pacific Island operations.

On most measures asset quality in WIB remains sound, however, during the half there has been additional deterioration of a small number of stressed individual names. Write-backs and recoveries were also lower. This has seen WIB record an impairment charge of \$178 million, compared to an impairment benefit of \$23 million in First Half 2015.

### Divisional results

#### 3.5 Westpac New Zealand

Westpac New Zealand is responsible for sales and service of banking, wealth and insurance products for consumers, business and institutional customers in New Zealand. Westpac conducts its New Zealand banking business through two banks in New Zealand: Westpac New Zealand Limited, which is incorporated in New Zealand and Westpac Banking Corporation (NZ Division), a branch of Westpac, which is incorporated in Australia. The division operates via an extensive network of branches and ATMs across both the North and South Islands. Business and institutional customers are also served through relationship and specialist product teams. Banking products are provided under the Westpac brand while insurance and wealth products are provided under Westpac Life and BT brands, respectively. New Zealand also has local infrastructure, including technology, operations and treasury. All figures are in New Zealand dollars (NZ\$).

## Financial performance (NZ\$)

### First Half 2016 – Second Half 2015

Westpac New Zealand has continued to enhance its position in New Zealand with growing customer numbers, good growth in lending and deposits, and an expanding presence in funds management and insurance. Despite these gains, earnings growth was lower in First Half 2016 with cash earnings of \$445 million down 5%.

Westpac New Zealand is seeking to build service leadership and transform the customer experience with a focus on digital innovation and self-serve to provide greater flexibility and convenience for customers while growing the value of the business. Highlights in First Half 2016 included:

- Delivering more for customers:
  - Largely completed the migration of customers onto Westpac One, the division's internet and mobile banking platform. The new platform has contributed to:
    - A 12% rise in online applications; and
    - Around one third of all applications now being originated online.
  - Continued the network reconfiguration, including further expanding the fleet of Smart ATM's (up 5%) now operating in two thirds of branches. This includes being the first to roll-out the next-generation of ATMs, providing additional functionality and enhanced security today and will increase functionality in the future; and
  - Further enhanced the division's Airpoints offer, launching the country's first Airpoints debit card. Over 18,000 cards issued to date.
- Growing in target segments:
  - Business lending increased 5% and at system<sup>1</sup>, with good success in agriculture sector lending;
  - Following the Airpoints launch, market share in credit cards has increased 1 percentage point to 24%<sup>1</sup>; and
  - Continued to expand wealth, with FUM up 8% and a lift in customers with a wealth product up 29 basis points to 28.5%.

Net interest income was \$18 million or 2% lower, with a rise in average interest-earning assets more than offset by a 12 basis point decline in net interest margin to 2.15%. The decline in net interest margin was due to:

- Lower asset spreads from both intense competition and mix impacts of customers switching into lower spread fixed rate mortgages. Fixed rate mortgages make up around 80% of the portfolio;
- Lower Treasury income; and
- Partially offset by improved deposit spreads from repricing, especially online accounts.

Net loans increased \$2.7 billion, or 4%:

- Mortgages increased \$1.4 billion or 3% which was a little below system<sup>1</sup> as the division sought to limit margin compression. Most growth was in facilities with an LVR less than 80%; and
- Business lending rose \$1.3 billion or 5%, with most of the growth broadly spread across the finance, food processing, electricity, property and agriculture sectors.

Deposits expanded \$3.0 billion, with the increase more than fully funding lending growth in the half. Around 60% of the growth was booked in institutional and in online savings accounts.

Non-interest income decreased \$6 million or 2%;

- The decline was principally due to lower asset sales which contributed \$23 million to income in Second Half 2015; and
- Partially offset by improved cards income and a higher contribution from both wealth (with an 8% uplift in FUM) and insurance.

Operating expenses increased \$9 million, or 2%, with the rise due to increased investment, including the business transformation program and the brand relaunch.

Asset quality remained sound with stressed assets to TCE remaining low at 1.78%. The ratio increased by 18 basis points over the half largely due to lower milk prices impacting on the dairy portfolio. Impaired assets

## Interim financial results 2016

### Divisional results

---

(included in stressed) declined by 6 basis points. Consumer delinquency levels remained at near record lows as the proportion of loans with an LVR >80% continued to fall.

The low impairment charge of \$9 million was due to a lower number of new impaired assets and lower collectively assessed provisions, particularly in business.

#### First Half 2016 – First Half 2015

Westpac New Zealand delivered an \$8 million increase in cash earnings (up 2%) although profit before impairment charges and income tax expense were down 1% from lower non-interest income and higher investment contributing to a lift in expenses.

Net interest income increased \$26 million, or 3%, with a 7% increase in average interest-earning assets partly offset by an 8 basis points decline in net interest margin:

- Competition has remained intense, especially in fixed rate mortgages and business term lending reducing spreads on new and refinanced lending;
- Partly offset by improved deposit spreads mostly from repricing of online savings accounts;
- Net Loans increased \$5.1 billion or 8%:
  - Mortgages increased \$2.6 billion or 6% slightly below system<sup>1</sup>, as the division chose not to match some of the more aggressive fixed rates in the market;
  - Business lending increased \$2.3 billion or 9% with around a third of the rise due to agricultural lending which has been a particular area of focus; and
  - Other lending increased 5%, with most of the growth in credit cards, following the addition of new Airpoints cards introduced in 2015.
- The 7% growth in deposits was mostly in at call and transaction accounts which increased \$3.4 billion as the division focused on growing deposits with a high LCR value.

Non-interest income was little changed, decreasing \$2 million or 1% from:

- A decline in merchant income and lower card fees due to the higher cost of Airpoints rewards; and
- Largely offset by an increase in wealth and insurance revenue (\$7 million). FUM and FUA balances were up 17% and 5% respectively and insurance premiums were 3% higher.

Most of the increase in operating expenses was due to investment related costs, including transformation costs and increased technology expenses, including changes to the technology capitalisation approach. Operating expense increases were partly offset by productivity gains associated with the continuing switch to digital and self-serve channels.

Asset quality improved over the year on almost every dimension and across business and consumer segments. Impairment charges decreased \$22 million, as the division benefited from lower new impaired asset provisions and lower collective provisions, particularly in business.

### Divisional results

#### 3.6 Group Businesses

This segment comprises:

- Group items, including earnings on capital not allocated to divisions, accounting entries for certain intra-group transactions that facilitate the presentation of the performance of the Group's operating segments, earnings from non-core asset sales and certain other head office items such as centrally raised provisions;
- Treasury, the primary focus of which is the management of the Group's interest rate risk and funding requirements by managing the mismatch between Group assets and liabilities. Treasury's earnings are primarily impacted by the hedging decisions taken on behalf of the Group to manage net interest income outcomes and assist net interest income growth;
- Customer & Business Services<sup>1</sup>, which encompasses banking operations, customer contact centres, product marketing, compliance, legal and property services;
- Group Technology<sup>1</sup> which comprises functions responsible for technology strategy and architecture, infrastructure and operations, applications development and business integration; and
- Core Support<sup>2</sup>, which comprises functions including finance, risk and human resources.

#### Treasury Value at Risk (VaR)<sup>3</sup>

\$m	High	Low	Average
Six months ended 31 March 2016	14.2	5.9	9.0
Six months ended 30 September 2015	16.9	8.0	12.2
Six months ended 31 March 2015	14.6	5.8	10.4

<sup>1</sup> Costs are fully allocated to other divisions in the Group.

<sup>2</sup> Costs are partially allocated to other divisions in the Group, with costs attributed to enterprise activity retained in Group Businesses.

<sup>3</sup> VaR includes trading book and banking book exposures. The banking book component is based on interest rate risk positions used in the measurement of interest rate risk in the banking book for capital adequacy purposes (and excludes spread and basis risk).

**Financial performance**

**First Half 2016 – Second Half 2015**

Group Businesses delivered cash earnings of \$93 million, down \$23 million or 20%, on Second Half 2015.

Net operating income increased \$3 million or 1% compared to Second Half 2015. The increase in net interest income was primarily due to improved Treasury performance from interest rate risk management and increased earnings from higher capital balances. Non-interest income was lower as profits from property sales in Second Half 2015 did not repeat.

Operating expenses increased \$26 million compared to Second Half 2015 due mainly to an increase in employee provisions.

Impairment charges increased \$7 million compared to Second Half 2015, with increases to centrally held economic overlay provisions related to the mining sector, mostly offset by a reduction to provisions related to the retail and Australian agriculture sector.

Income tax expense and non-controlling interests decreased \$7 million compared to Second Half 2015 primarily due to lower operating profit before tax. Both periods benefited from the finalisation of prior period taxation matters.

**First Half 2015 – First Half 2016**

Group Businesses delivered cash earnings of \$93 million, up \$86 million on First Half 2015.

Net interest income increased \$151 million in First Half 2016, with improved Treasury performance related to interest rate risk management and increased earnings from higher capital balances.

Operating expenses increased \$56 million in First Half 2016 from higher restructuring costs and an increase to employee provisions.

Impairment charges increased \$5 million in First Half 2016, primarily due to an increase in centrally held economic overlay provisions.

The lower effective tax rate in First Half 2016 was due to the finalisation of prior period tax matters (\$63 million booked in First Half 2016).

#### 4.0 Interim financial report 2016

##### 4.1 Directors' report

The Directors of Westpac present their report together with the financial statements of Westpac and its controlled entities (collectively referred to as 'the Group') for the half year ended 31 March 2016.

##### Directors

The names of the Directors of Westpac holding office at any time during, and since the end of, the half year and the period for which each has served as a Director are set out below:

Name	Position
Lindsay Maxsted	Chairman since December 2011 and Director since March 2008.
Brian Hartzler	Managing Director & Chief Executive Officer since February 2015.
Elizabeth Bryan AM	Director since November 2006.
Ewen Crouch AM	Director since February 2013.
Alison Deans	Director since April 2014.
Craig Dunn	Director since June 2015.
Robert Elstone	Director since February 2012.
Peter Hawkins	Director since December 2008.
Peter Marriott	Director since June 2013.

---

##### Review and results of the Group's operations during the half year

Net profit attributable to owners for First Half 2016 was \$3,701 million, an increase of \$92 million or 3% compared to First Half 2015. Features of this result included a \$476 million or 5% increase in net operating income before operating expenses and impairment charges, a \$158 million or 4% increase in operating expenses and a \$326 million or 96% increase in impairment charges.

Net interest income increased \$493 million or 7% compared to First Half 2015, with total loan growth of 6% and customer deposit growth of 5%. Net interest margin increased 3 basis points, primarily due to repricing of mortgages for increased regulatory capital requirements, repricing of customer deposits, and higher Treasury income including the impact of ineffective hedges, partially offset by competitive pricing for new loans and higher short term wholesale funding costs.

Non-interest income decreased \$17 million or 1% compared to First Half 2015 primarily due to lower banking fees and commissions, including the impact of credit card interchange reductions, and lower institutional activity. Wealth management income reduced due to the partial sale of our BTIM shareholding in Second Half 2015, and the impact of lower asset market values. The increase in trading income mostly reflected lower derivative valuation adjustments.

Operating expenses increased \$158 million or 4% compared to First Half 2015. The lift in operating expenses related to the Group's investment programs, with operating expense increases offset by productivity savings.

Impairment charges increased \$326 million or 96% compared to First Half 2015. On most measures asset quality remained sound, with stressed exposures as a percentage of total committed exposures reducing from 1.12% to 1.03%. The increase in impairment charges was primarily due to additional provisioning following the downgrade of a small number of institutional customers, a small rise in delinquencies and reductions in write-backs.

The effective tax rate of 29.2% in First Half 2016 was lower compared to 30.6% in First Half 2015 due to finalisation of a prior period tax matter.

The Board has determined an interim dividend of 94 cents per share, an increase of 1% over the interim dividend determined for First Half 2015. The interim dividend is fully franked.

## Significant developments during the half year ended 31 March 2016

### Corporate significant developments

#### *Inquiry into Australia's Financial System*

In 2013, the Federal Government established an inquiry into Australia's financial system (FSI). The FSI examined how the financial system could be positioned to best meet Australia's evolving needs and support Australia's economic growth.

On 7 December 2014, the FSI released its Final Report which made 44 recommendations relating to a broad number of matters across the financial sector. Westpac supported the majority of the FSI's recommendations.

On 20 October 2015, the Government announced its formal response to the FSI's recommendations. The Government endorsed the overwhelming majority of the recommendations across the five key areas the FSI considered: Resilience; Superannuation; Innovation; Consumer Outcomes; and the Regulatory System.

The Government continues to establish a number of consultation processes to consider detailed implementation. Westpac is actively contributing to these ongoing consultations, which we expect to continue for a number of years.

#### *ASIC reform package*

On 20 April 2016, the Federal Government announced a package of policy reforms designed primarily to strengthen the powers and funding of ASIC.

As part of this package, the Government announced that it would accelerate the implementation of certain recommendations made by the FSI, including:

- granting ASIC a product intervention power;
- introducing a new 'principles-based' product design and distribution obligation on issuers and distributors; and
- reviewing ASIC's enforcement regime (including the penalties available).

The Government is expected to establish consultation processes to consider the detailed implementation of these reforms.

#### *FSI's recommendations on bank capital*

The Government's response endorsed APRA's actions to date in implementing the FSI's capital-related recommendations, and confirmed APRA's responsibility for the implementation of the remaining capital proposals.

To date, APRA has formally responded to two of the FSI's recommendations. On 13 July 2015 APRA released the results of a study comparing the capital position of the Australian major banks against a group of international banking peers. The study was conducted by APRA in response to Recommendation 1 of the FSI that proposed Australian bank capital ratios should be in the top quartile of global peers to demonstrate the banks are 'unquestionably strong.'

APRA's study confirmed that the Australian major banks are well capitalised. Based on capital adequacy ratios as at 30 June 2014, the study found that the major banks would need to increase their capital adequacy ratios by at least 200 basis points to be comfortably positioned in the top quartile of their international peers over the medium to long term.

On 20 July 2015, APRA announced an interim change to how risk weighted assets (RWA) will be calculated on Australian residential mortgages for banks that use the Advanced Internal-Ratings Based (IRB) approach to credit risk. This change was in response to Recommendation 2 of the FSI regarding the differential in mortgage capital requirements between Advanced IRB and Standardised banks. The outcome of this change is expected to lead to the ratio of mortgage RWA to mortgage exposures for the Group increasing to approximately 25%, with an effective date of 1 July 2016.

In response, Westpac has completed capital initiatives which increased Common Equity Tier 1 (CET1) capital by approximately \$6 billion. These initiatives included First Half 2015 discounted and partially underwritten dividend reinvestment plan (DRP) (\$2 billion), partial divestment of BTIM (\$0.5 billion) and the Share Entitlement Offer completed in November 2015 (\$3.5 billion).

Further changes relevant to regulatory capital requirements for Australian banks were also proposed by the FSI and are likely to result from current international regulatory reviews being undertaken by the Basel Committee on Banking Supervision (BCBS) and the Financial Stability Board (FSB) considering leverage ratios, risk weight models for Advanced and Standardised banks, and Total Loss Absorbing Capacity (TLAC) for Global Systemically Important Banks (G-SIBs). The final outcomes of these reviews remain uncertain. APRA will be responsible for interpreting these international developments to Australia's circumstances and their final impact will depend on APRA's implementation.

#### *Sale of Westpac's operations in four Pacific Island Nations*

On 14 July 2015, Westpac announced the completion of the sale of its banking operations in the Cook Islands, Samoa and Tonga to Bank of South Pacific Limited (BSP) for \$91 million. On 30 October 2015, Westpac completed the sale of its banking operations in the Solomon Islands for \$24 million.

On 11 November 2015, the Reserve Bank of Vanuatu granted approval for BSP to acquire Westpac's banking operations in Vanuatu. Westpac and BSP are currently working towards entering into binding sale agreements and completion of the sale is expected to occur on 1 July 2016.

#### **Litigation**

##### *Exception fees*

Since 2011, Westpac has been served with three class action proceedings seeking refunds of certain exception fees paid by customers. Similar class actions have been commenced against several other Australian banks. Westpac has agreed with the plaintiffs to put the proceedings against Westpac on hold, pending the outcome of related litigation against one of those other banks. In April 2015, the Full Court of the Federal Court unanimously found all of the exception fees charged by that other bank to be lawful. The plaintiffs appealed certain aspects of that judgment to the High Court of Australia. That appeal was heard in February 2016 and the parties are awaiting the High Court's judgment.

##### *ASIC proceedings*

As part of ASIC's ongoing industry-wide investigations into setting of the bank bill swap reference rate (BBSW), on 5 April 2016, ASIC commenced civil proceedings against Westpac in the Federal Court of Australia, alleging certain misconduct in relation to the setting of the BBSW, including market manipulation and unconscionable conduct. The conduct that is the subject of the proceedings is alleged to have occurred between 6 April 2010 and 6 June 2012. Westpac is defending these proceedings. ASIC is seeking from the court declarations that Westpac breached various provisions of the Corporations Act 2001 (Cth) and the Australian Securities and Investments Commission Act 2001 (Cth), pecuniary penalties of unspecified amounts and orders requiring Westpac to implement a comprehensive compliance program for persons involved in Westpac's trading in the relevant market.

#### **Regulatory significant developments**

##### **Basel Committee on Banking Supervision (BCBS)**

Regulatory reforms and significant developments arising in relation to changes initiated by the BCBS and the FSB include:

##### *Global Systemically Important Financial Institutions (G-SIFIs)*

Each year in November the FSB publishes the list of identified G-SIBs and specifies the higher capital requirements proposed for each. These increased capital requirements are being phased in from January 2016. Westpac has not been named as a G-SIB. However the BCBS has issued a framework for extending the SIFIs requirements to domestic systemically important banks (D-SIBs).

##### *Capital*

In 2010, the BCBS outlined the Basel III capital framework for banks globally as follows:

- an increase in the minimum common equity requirement from 2.0% to 4.5%;
- an increase in the minimum Tier 1 capital requirement from 4.0% to 6.0%;
- a capital conservation buffer at 2.5%, to be met with common equity; and
- a countercyclical buffer of between 0% to 2.5% to be met with common equity or other fully loss absorbing capital.

Australian Authorised Deposit-taking Institutions (ADIs) such as Westpac have been required by APRA to meet the above minimum capital requirements from 1 January 2013 and the capital conservation buffer in full from 1 January 2016. However, Westpac is one of four Australian banks identified by APRA as a D-SIB and is therefore required to meet a higher loss absorbency requirement. This effectively increases the capital conservation buffer by 1% from 2.5% to 3.5%, to be met with common equity. The countercyclical buffer is currently set at zero for Australia and New Zealand.

Further details of Westpac's regulatory capital, leverage ratio and liquidity coverage ratio disclosures as well as the full terms and conditions of the regulatory capital instruments can be accessed at [www.westpac.com.au/about-westpac/investor-centre/financial-information/regulatory-disclosures](http://www.westpac.com.au/about-westpac/investor-centre/financial-information/regulatory-disclosures).

#### *Increased loss absorbency*

In November 2014 the FSB issued a consultation paper for enhancing the TLAC for G-SIBs to operate alongside the Basel III capital requirements. A final paper was released by the FSB in November 2015. At the same time, a consultation paper on TLAC holdings was issued by the BCBS. These proposals form part of the G20's initiatives aimed at 'Ending too-big-to-fail' and ensuring that the resolution of a failing G-SIFI can be carried out without causing systemic disruption or resorting to taxpayer support. The FSB has stated that the TLAC requirement would not be introduced before 2019 and it is not known at this stage whether there is any intention to extend the requirement beyond G-SIBs.

The FSI recommended the implementation in Australia of a framework for minimum loss absorbing and recapitalisation capacity sufficient to facilitate the orderly resolution of ADIs and minimise taxpayer support. In its response to the FSI, the Government endorsed APRA to implement the recommendation in line with emerging international practice.

#### *Reform of the risk-based capital framework*

In December 2014, the BCBS released two consultation papers on proposals for Capital Floors and proposed revisions to the Standardised Approach for Credit Risk. Since then, the BCBS has released two further consultation papers related to the risk based capital framework. The first was released in December 2015, which put forward possible amendments to the Standardised Approach for Credit Risk and the second was released in March 2016, which proposed constraints on the use of internal models for the calculation of risk weighted assets. In March 2016, the BCBS also released a consultation paper covering the Standardised Measurement Approach for Operational Risk. This paper proposed the removal of the use of internal model approaches to measure operational risk capital and replacement of these with a revised framework based on the proposed Standardised Measurement Approach. The revised standards for the Minimum Capital Requirements for Market Risk were released by the BCBS in January 2016.

In combination, these reform measures are intended to improve the consistency and comparability of bank capital ratios. However, finalisation of the remaining BCBS changes is not expected before the end of 2016, after which APRA will need to consult on, and then finalise, the Australian standards. Until that time, it is not possible to determine the impact on Westpac.

#### *Leverage ratio*

The Basel III capital framework also introduced a leverage ratio requirement. The BCBS proposes that introducing a simple, non-risk based leverage ratio requirement would act as a credible supplementary measure to the risk-based capital requirements. In January 2014, the BCBS published an amended leverage ratio framework. In May 2015, APRA released new disclosure requirements in relation to the leverage ratio which will initially only apply to select ADIs, including Westpac, and from 1 July 2015 required the disclosure of the leverage ratio on a quarterly basis. In April 2016, the BCBS published a consultation paper requiring a minimum leverage ratio of 3% as a Pillar 1 requirement from January 2018.

### **Other regulatory developments**

#### *Liquidity*

APRA released a discussion paper on the implementation of the Net Stable Funding Ratio (NSFR) on 31 March 2016. APRA has advised they will include the NSFR requirement, designed to encourage longer-term funding resilience, in a revised draft of the APRA liquidity standard APS 210 by the end of 2016 and intends to apply the NSFR from 1 January 2018 in line with the BCBS's effective date. Westpac is taking steps to comply with the NSFR from 1 January 2018.

#### *Committed Liquidity Facility (CLF) annual revision*

The Reserve Bank of Australia makes available to ADIs a CLF that, subject to qualifying conditions, can be accessed to meet Liquidity Coverage Ratio requirements under APRA prudential standard *APS 210 Liquidity*. This amount is reviewed annually. Westpac has received approval for a CLF of \$58.6 billion for the 2016 calendar year (2015 calendar year: \$66.0 billion).

#### *OECD Common Reporting Standard*

The Organisation for Economic Cooperation and Development (OECD) has developed Common Reporting Standard (CRS) rules for the automatic exchange of customer tax residency and financial account information amongst OECD member states.

CRS will require the Westpac Group to identify the tax residency of all customers and to report the tax residency and financial account details of non-resident customers to the relevant authorities in jurisdictions with which Australia has entered into an exchange of information agreement.

Australian financial institutions will have to collect customer tax residency information from 1 July 2017 and will have to report these details and associated financial account information from July 2018. Implementation of the rules will impose additional costs and operational burdens on Westpac.

Certain countries (such as the United Kingdom and India) have implemented the rules with effect from 1 January 2016. Westpac has implemented changes to its business operations to comply with the CRS requirements in these countries from 1 January 2016.

#### *OTC derivatives reform*

The international regulatory reforms relating to over-the-counter (OTC) derivatives continue to be implemented by financial regulators across the globe.

In Australia, Westpac commenced reporting OTC derivatives transactions to a Prescribed Repository in accordance with the *Derivative Transaction Rules (Reporting) 2013* on 1 October 2013. Westpac continues to work with ASIC and industry associations in relation to the implementation of these rules.

On 11 December 2015, the *ASIC Derivative Transaction Rules (Clearing) 2015* were enacted. These rules mandate central clearing in Australia for OTC interest rate derivatives denominated in Australian Dollars, as well as the G4 currencies of US Dollars, Euro, British Pounds and Yen. The mandate applies to certain Australian and foreign financial institutions that meet clearing thresholds (including Westpac). This clearing obligation commenced on 4 April 2016.

Separately, European rules for central clearing of interest rate derivatives in these G4 currencies were published in December 2015. These rules require Westpac to clear trades from 21 June 2016.

As a provisionally-registered Swap Dealer with the US Commodity Futures Trading Commission (CFTC), Westpac is subject to a range of entity-level and transaction-level requirements pursuant to the Dodd-Frank Act.

Pursuant to the European Market Infrastructure Regulations (EMIR) established by the European Securities and Markets Authority (ESMA), from October 2014, Westpac is subject to certain risk mitigation obligations in relation to OTC Derivatives traded with European counterparties or through its London Branch. Further, Westpac is also subject to OTC derivatives trade reporting regulations imposed by the Monetary Authority of Singapore, Hong Kong Monetary Authority and various provincial financial regulators in Canada.

Westpac continues to monitor developments in response to requirements imposed by international regulators. These include regulations published by the CFTC and the Securities and Exchange Commission under the Dodd-Frank Act; by the ESMA and local European financial regulators under the EMIR and Markets in Financial Instruments Directive (MiFID II); and by various financial regulators in Asia and Canada.

Westpac also continues to monitor the international response to the final policy framework for establishing margin requirements for uncleared OTC derivatives as published by the BCBS and the International Organisation of Securities Commission (IOSCO) on 2 September 2013. There has been significant progress in developing rules implementing these margin requirements in many jurisdictions. Authorities in Asia, the EU and Australia are developing proposals which potentially impact Westpac. The CFTC and US prudential regulators finalised their rules in March 2016 and October 2015 respectively, which will also impact Westpac's trading.

#### **New Zealand**

Regulatory reforms and significant developments in New Zealand include:

##### *Reserve Bank of New Zealand (RBNZ) – housing review stage two – residential property investors*

The RBNZ concluded stage two of its housing review in 2015 and amended its Capital Adequacy Frameworks to provide for a new asset class treatment for property investor residential mortgage loans. The new classification, which applies to all locally incorporated banks, came into force on 1 November 2015 for new lending. Banks have until 31 October 2016 to re-classify their existing residential loans. The capital requirements for lending to the new property investor residential mortgage class will increase as a higher risk weighting will apply.

##### *RBNZ – New loan to value ratio (LVR) restrictions*

Restrictions on high LVR lending are part of the RBNZ's macro-prudential policy framework and have been in place since October 2013. In May 2015 the RBNZ announced that in response to growing market risk from the Auckland housing market it was proposing changes to its LVR policy. From 1 November 2015 new lending for residential property investment in the Auckland council area where the LVR is greater than 70% cannot exceed 5% of a bank's new residential mortgage lending for that category, carried out in the measurement period. The initial measurement period is six calendar months and thereafter a period of three calendar months. Similar restrictions apply to other categories of residential mortgage lending. For example, new lending to owner occupiers in Auckland where the LVR is greater than 80% cannot comprise more than 10% of that new residential mortgage lending in the relevant measurement period. In addition, residential mortgage lending in other parts of New Zealand with an LVR greater than 80% is capped at 15% of that new residential mortgage lending.

#### *RBNZ – Review of outsourcing policy*

In August 2015 the RBNZ released a consultation paper proposing revisions to its Outsourcing Policy (BS11). The RBNZ considers that the Outsourcing Policy is closely linked to its Open Bank Resolution (OBR) policy and the proposed changes reflect this. In summary, the RBNZ is proposing to broaden the functionality that a bank would need to continue delivering in the event of statutory management and is proposing three areas where outsourcing to related parties would be prohibited. In this respect the RBNZ is seeking to ensure that the bank has direct ownership and control over certain data that would be required to enable the bank to calculate its financial positions at the end of each business day. In particular it must have its own SWIFT gateway and licence for the processing of transactions, and it should be able to undertake its regulatory reporting using its own data. The RBNZ is also proposing that banks be required to notify the RBNZ about proposals to outsource prior to an agreement being entered into and that a notice of non-objection be obtained in some or all instances. Submissions closed in December 2015. Further communication from the RBNZ is expected in the first half of 2016.

#### *RBNZ Regulatory Stocktake*

The RBNZ is undertaking a stocktake of the regulatory framework applying to banks with the aim of improving the efficiency, clarity and consistency of regulatory requirements. One of the key issues being considered is the RBNZ's off-quarter disclosure requirements. The RBNZ released its first consultation document on potential changes to the prudential regime arising out of the stocktake in July 2015 and published a summary of submissions and its policy decisions in December 2015. The RBNZ has decided to recommend to the Minister of Finance that the requirement for overseas incorporated registered banks to publish off-quarter disclosure information should be removed. For locally-incorporated banks it will be consulting on an option which would involve the RBNZ publishing a quarterly electronic 'dashboard' of key financial information on individual banks. The dashboard information would be drawn from statistical and prudential returns that banks submit privately to the RBNZ and would replace the existing off-quarter disclosure statement requirements for these banks. Consultation on the proposal is expected in the first half of this year. Any changes to the off-quarter disclosure regime are not expected to take effect before 2017.

#### **Risk factors**

Our business is subject to risks that can adversely impact our financial performance, financial condition and future performance. If any of the following risks occur, our business, prospects, financial performance or financial condition could be materially adversely affected, with the result that the trading price of our securities could decline and as a security holder you could lose all, or part, of your investment. You should carefully consider the risks described and the other information in this Interim Financial Results Announcement before investing in our securities. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties that we are unaware of, or that we currently deem to be immaterial, may also become important factors that affect us.

#### **Risks relating to our business**

***Our businesses are highly regulated and we could be adversely affected by failing to comply with existing laws and regulations or by changes in laws, regulations or regulatory policy***

As a financial institution, we are subject to detailed laws and regulations in each of the jurisdictions in which we operate or obtain funding, including Australia, New Zealand, the United Kingdom, the United States and Asia. We are also supervised by a number of different regulatory and supervisory authorities which have broad administrative powers over our businesses. In Australia, the relevant regulatory authorities include the Australian Prudential Regulation Authority (APRA), Reserve Bank of Australia (RBA), Australian Securities and Investments Commission (ASIC), Australian Securities Exchange (ASX), Australian Competition and Consumer Commission (ACCC), the Australian Transaction Reports and Analysis Centre (AUSTRAC) and the Australian Taxation Office (ATO). The Reserve Bank of New Zealand (RBNZ) and the Financial Markets Authority (FMA) have supervisory oversight of our New Zealand operations. In the United States we are subject to supervision and regulation by the US Office of the Comptroller of the Currency (OCC), the Board of Governors of the Federal Reserve System, the Commodity Futures Trading Commission (CFTC) and the US Securities and Exchange Commission (SEC). In the United Kingdom, we are subject to supervision and regulation by the Financial Conduct Authority (FCA) and the Prudential Regulation Authority (PRA). In Asia, we are subject to supervision and regulation by local authorities, including the Monetary Authority of Singapore (MAS) and the Hong Kong Monetary Authority (HKMA). In other jurisdictions in which we operate, including various Pacific countries, we are also required to comply with relevant requirements of the local regulatory bodies.

Westpac is responsible for ensuring that we comply with all applicable legal and regulatory requirements (including accounting standards) and industry codes of practice in the jurisdictions in which we operate or obtain funding, as well as meeting our ethical standards.

Compliance risk is the risk of legal or regulatory sanction or financial or reputational loss, arising from our failure to abide by applicable legal and regulatory standards. In Australia, an example of the broad administrative power available to regulatory authorities is the power available to APRA under the Banking Act 1959 in certain

circumstances to investigate our affairs and/or issue a direction to us (such as a direction to comply with a prudential requirement, to conduct an audit, to remove a Director, executive officer or employee or not to undertake transactions). Other regulators also have the power to investigate, including looking into past conduct. In recent years, there have been significant increases in the nature and scale of regulatory investigations, enforcement actions and the quantum of fines issued by global regulators. The nature of these reviews can be wide ranging and may result in litigation, fines, penalties, revocation, suspension or variation of conditions of relevant regulatory licences or other administrative action by regulators. For example, in April 2016, ASIC commenced civil proceedings against Westpac in the Federal Court of Australia, alleging certain misconduct in relation to the setting of the BBSW in the period April 2010 to June 2012, including market manipulation and unconscionable conduct. Westpac intends to defend the proceedings. During the half year ended 31 March 2016, Westpac has received other notices and requests for information from its regulators. Regulatory investigations, litigation, fines, penalties or restrictions or regulator imposed conditions could adversely affect our business, reputation, prospects, financial performance or financial condition.

As with other financial services providers, we face increasing supervision and regulation in most of the jurisdictions in which we operate or obtain funding, particularly in the areas of funding, liquidity, capital adequacy, conduct and prudential regulation, anti-bribery and corruption, anti-money laundering and counter-terrorism financing and trade sanctions. In December 2010 the Basel Committee on Banking Supervision (BCBS) announced a revised global regulatory framework known as Basel III. Basel III, among other things, increased the required quality and quantity of capital held by banks and introduced new standards for the management of liquidity risk. The BCBS continues to refine this framework and APRA is expected to incorporate the majority of these changes into its prudential standards. Further details on the Basel III framework are set out in 'Significant developments during the half year ended 31 March 2016'.

During the half year ended 31 March 2016, there were also a series of other regulatory releases from authorities in the various jurisdictions in which we operate or obtain funding proposing significant regulatory change for financial institutions. This includes new accounting and reporting standards which have been finalised and global OTC derivatives reform. Other areas of proposed or potential change that could impact us include changes to tax legislation, including dividend imputation, regulation relating to remuneration, consumer protection and competition legislation, privacy and data protection, anti-bribery and corruption, anti-money laundering and counter-terrorism financing laws and trade sanctions. In addition, further changes may occur driven by policy, prudential or political factors. For example, in 2013, the Australian Government commissioned a Financial System Inquiry (FSI) with broad terms of reference. The FSI's Final Report made 44 recommendations and the Government endorsed the overwhelming majority of them. The Government is now establishing a number of consultation processes to consider detailed implementation. The Australian Government or other regulators may also initiate further reviews, or commissions of inquiry, which could lead to additional regulatory change. The final impact of the FSI and the impact of any additional reviews or inquiries is difficult to predict but may result in further substantial regulatory changes which could have a material impact on our business, prospects, financial performance or financial condition.

Regulation is becoming increasingly extensive and complex. Some areas of potential regulatory change involve multiple jurisdictions seeking to adopt a coordinated approach. This may result in conflicts with specific requirements of the jurisdictions in which we operate and, in addition, such changes may be inconsistently introduced across jurisdictions.

Changes may also occur in the oversight approach of regulators. It is possible that governments in jurisdictions in which we operate or obtain funding might revise their application of existing regulatory policies that apply to, or impact, Westpac's business, including for reasons relating to national interest and/or systemic stability. The powers exercisable by our regulators may also be expanded in the future. For example, on 20 April 2016, the Federal Government announced that it would accelerate the implementation of certain recommendations made by the FSI, including the recommendation that ASIC be granted a product intervention power. Further details on the Federal Government's reform package are set out in 'Significant Developments during the half year ended 31 March 2016'.

Regulatory changes and the timing of their introduction continue to evolve and we currently manage our businesses in the context of regulatory uncertainty. The nature and impact of future changes are not predictable and are beyond our control. Regulatory compliance and the management of regulatory change is an increasingly important part of our planning processes. We expect that we will be required to continue to invest significantly in compliance and the management and implementation of regulatory change and, at the same time, significant management attention and resources will be required to update existing or implement new processes to comply with the new regulations.

Regulatory changes may also impact our operations by requiring us to have increased levels of liquidity and higher levels of, and better quality, capital as well as place restrictions on the businesses we conduct, (including limiting our ability to provide products and services to certain customers), require us to amend our corporate structure or require us to alter our product or service offerings. If regulatory change has any such effect, it could adversely affect one or more of our businesses, restrict our flexibility, require us to incur substantial costs and impact the profitability of one or more of our business lines. Any such costs or restrictions could adversely affect our business, prospects, financial performance or financial condition.

For further information refer to 'Significant developments during the half year ended 31 March 2016' in this Interim Financial Results Announcement and our 2015 Annual Report, specifically 'Significant developments' in Section 1 and the sections 'Critical accounting assumptions and estimates' and 'Future developments in accounting standards' in Note 1 to the financial statements.

***Adverse credit and capital market conditions or depositor preferences may significantly affect our ability to meet funding and liquidity needs and may increase our cost of funding***

We rely on deposits and credit and capital markets to fund our business and as a source of liquidity. Our liquidity and costs of obtaining funding are related to credit and capital market conditions.

Global credit and capital markets can experience periods of extreme volatility, disruption and decreased liquidity as was demonstrated during the Global Financial Crisis. While there have now been extended periods of stability in these markets, the environment remains volatile and unpredictable. The main risks we face are damage to market confidence, changes to the access and cost of funding and a slowing in global activity or through other impacts on entities with whom we do business.

As of 31 March 2016, approximately 32% of our total funding originated from domestic and international wholesale markets. Of this, around 60% was sourced outside Australia and New Zealand. Customer deposits provide around 60% of funding. Customer deposits held by Westpac are comprised of both term deposits which can be withdrawn after a certain period of time and at call deposits which can be withdrawn at any time.

A shift in investment preferences could result in deposit withdrawals by customers which could increase our need for funding from other, potentially less stable or more expensive forms of funding.

Separately, if market conditions deteriorate due to economic, financial, political or other reasons, there may also be a loss of confidence in bank deposits and we could experience unexpected deposit withdrawals. In this situation our funding costs may be adversely affected and our liquidity and our funding and lending activities may be constrained.

If our current sources of funding prove to be insufficient, we may be forced to seek alternative financing. The availability of such alternative financing, and the terms on which it may be available, will depend on a variety of factors, including prevailing market conditions, the availability of credit, our credit ratings and credit market capacity. Even if available, the cost of these alternatives may be more expensive or on unfavourable terms, which could adversely affect our financial performance, liquidity, capital resources and financial condition. There is no assurance that we will be able to obtain adequate funding and do so at acceptable prices, nor that we will be able to recover any additional costs.

If Westpac is unable to source appropriate funding, we may also be forced to reduce our lending or begin selling liquid securities. Such actions may adversely impact our business, prospects, liquidity, capital resources, financial performance or financial condition.

Westpac enters into collateralised derivative obligations, which may require Westpac to post additional collateral based on movements in market rates, which have the potential to adversely affect Westpac's liquidity.

For a more detailed description of liquidity risk, refer to 'Funding and liquidity risk management' in Note 22 to the financial statements in our 2015 Annual Report.

***Sovereign risk may destabilise financial markets adversely***

Sovereign risk is the risk that foreign governments will default on their debt obligations, will be unable to refinance their debts as they fall due, or will nationalise parts of their economy including assets of financial institutions such as Westpac.

Sovereign defaults could negatively impact the value of our holdings of high quality liquid assets. There may also be a cascading effect to other markets and countries, the consequences of which, while difficult to predict, may be similar to or worse than those experienced during the Global Financial Crisis. Such an event could destabilise global financial markets adversely affecting our liquidity, financial performance or financial condition.

***Failure to maintain credit ratings could adversely affect our cost of funds, liquidity, competitive position and access to capital markets***

Credit ratings are independent opinions on our creditworthiness. Our credit ratings can affect the cost and availability of our funding from capital markets and other funding sources and they may be important to customers or counterparties when evaluating our products and services. Therefore, maintaining high quality credit ratings is important.

The credit ratings assigned to us by rating agencies are based on an evaluation of a number of factors, including our financial strength, structural considerations regarding the Australian financial system and the credit rating of the Australian Government. A credit rating downgrade could be driven by a downgrade of the Australian Government, the occurrence of one or more of the other risks identified in this section or by other events including changes to the methodologies used by the rating agencies to determine ratings.

Failure to maintain our current credit ratings could adversely affect our cost of funds and related margins, collateral requirements, liquidity, competitive position and our access to capital markets. The extent and nature of these impacts would depend on various factors, including the extent of any ratings change, whether our ratings differ among agencies (split ratings) and whether any ratings changes also impact our competitors or the sector.

***A systemic shock in relation to the Australian, New Zealand or other financial systems could have adverse consequences for Westpac or its customers or counterparties that would be difficult to predict and respond to***

There is a risk that a major systemic shock could occur that causes an adverse impact on the Australian, New Zealand or other financial systems.

As outlined above, during the past decade the financial services industry and capital markets have been, and may continue to be, adversely affected by market volatility and the negative outlook for global economic conditions. A shock to one of the major global economies could again result in currency and interest rate fluctuations and operational disruptions that negatively impact the Group.

Any such market and economic disruptions could adversely affect financial institutions such as Westpac because consumer and business spending may decrease, unemployment may rise and demand for the products and services we provide may decline, thereby reducing our earnings. These conditions may also affect the ability of our borrowers to repay their loans or our counterparties to meet their obligations, causing us to incur higher credit losses. These events could also result in the undermining of confidence in the financial system, reducing liquidity, impairing our access to funding and impairing our customers and counterparties and their businesses. If this were to occur, our business, prospects, financial performance or financial condition could be adversely affected.

The nature and consequences of any such event are difficult to predict and there can be no certainty that we could respond effectively to any such event.

***Declines in asset markets could adversely affect our operations or profitability***

Declines in Australian, New Zealand or other asset markets, including equity, residential and commercial property and other asset markets, could adversely affect our operations and profitability.

Declining asset prices also impact our wealth management business. Earnings in our wealth management business are, in part, dependent on asset values because we typically receive fees based on the value of securities and/or assets held or managed. A decline in asset prices could negatively impact the earnings of this business.

Declining asset prices could also impact customers and counterparties and the value of security (including residential and commercial property) we hold against loans and derivatives which may impact our ability to recover amounts owing to us if customers or counterparties were to default. It may also affect our level of provisioning which in turn impacts our profitability and financial condition.

***Our business is substantially dependent on the Australian and New Zealand economies***

Our revenues and earnings are dependent on economic activity and the level of financial services our customers require. In particular, lending is dependent on various factors including economic growth, business investment, business and consumer sentiment, levels of employment, interest rates and trade flows in the countries in which we operate.

We conduct the majority of our business in Australia and New Zealand and, consequently, our performance is influenced by the level and cyclical nature of lending in these countries. These factors are in turn impacted by both domestic and international economic conditions, natural disasters and political events. A significant decrease in Australian and New Zealand housing valuations could adversely impact our home lending activities because borrowers with loans in excess of their property value show a higher propensity to default and in the event of defaults our security would be eroded, causing us to incur higher credit losses. The demand for our home lending products may also decline due to adverse changes in taxation or buyer concerns about decreases in values.

Adverse changes to the economic and business conditions in Australia and New Zealand and other countries such as China, India and Japan, could also adversely affect the Australian economy and our customers. In particular, due to the current relationship between Australia and China, particularly in the mining and resources sectors, a slowdown in China's economic growth could negatively impact the Australian economy. Changes in commodity prices and broader economic conditions could in turn result in reduced demand for our products and services and affect the ability of our borrowers to repay their loans. If this were to occur, it could negatively impact our business, prospects, financial performance or financial condition.

***An increase in defaults in credit exposures could adversely affect our liquidity, capital resources, financial performance or financial condition***

Credit risk is the risk of financial loss where a customer or counterparty fails to meet their financial obligations to Westpac. It is a significant risk and arises primarily from our lending activities.

We establish provisions for credit impairment based on current information. If economic conditions deteriorate, some customers and/or counterparties could experience higher levels of financial stress and we may experience a significant increase in defaults and write-offs, and be required to increase our provisioning. Such events would diminish available capital and could adversely affect our liquidity, capital resources, financial performance or financial condition.

Credit risk also arises from certain derivative contracts we enter into and from our dealings with, and holdings of, debt securities issued by other banks, financial institutions, companies, governments and government bodies the financial conditions of which may be affected to varying degrees by economic conditions in global financial markets.

For a discussion of our risk management procedures, including the management of credit risk, refer to the 'Risk management' section and Note 22 to the financial statements in our 2015 Annual Report.

***We face intense competition in all aspects of our business***

The financial services industry is highly competitive. We compete, both domestically and internationally, with retail and commercial banks, asset managers, investment banking firms, brokerage firms, other financial service firms and businesses in other industries with emerging financial services aspirations. This includes specialist competitors that may not be subject to the same capital and regulatory requirements and therefore may be able to operate more efficiently. Digital technologies are changing consumer behaviour and the competitive environment. The use of digital channels by customers to conduct their banking continues to rise and emerging competitors are increasingly utilising new technologies and seeking to disrupt existing business models, including in relation to digital payment services. The Group faces competition from established providers of financial services as well as the threat of competition from banking businesses developed by non-financial services companies.

If we are unable to compete effectively in our various businesses and markets, our market share may decline. Increased competition may also adversely affect us by diverting business to our competitors or creating pressure to lower margins.

Increased competition for deposits could also increase our cost of funding and lead us to access other types of funding or reduce lending. We rely on bank deposits to fund a significant portion of our balance sheet and deposits have been a relatively stable source of funding. We compete with banks and other financial services firms for such deposits. To the extent that we are not able to successfully compete for deposits, we would be forced to rely more heavily on other, potentially less stable or more expensive forms of funding, or reduce lending.

We are also dependent on our ability to offer products and services that match evolving customer preferences. If we are not successful in developing or introducing new products and services or responding or adapting to changes in customer preferences and habits, we may lose customers to our competitors. This could adversely affect our business, prospects, financial performance or financial condition.

For more detail on how we address competitive pressures refer to 'Competition' in Section 1 of our 2015 Annual Report.

***We could suffer losses due to market volatility***

We are exposed to market risk as a consequence of our trading activities in financial markets and through the asset and liability management of our financial position. This is the risk of an adverse impact on earnings resulting from changes in market factors, such as foreign exchange rates, interest rates, commodity prices and equity prices. This includes interest rate risk in the banking book, such as the risk to interest income from a mismatch between the duration of assets and liabilities that arises in the normal course of business activities. If we were to suffer substantial losses due to any market volatility it may adversely affect our business, prospects, liquidity, capital resources, financial performance or financial condition. For a discussion of our risk management procedures, including the management of market risk, refer to the 'Risk management' section in our 2015 Annual Report.

***We could suffer losses due to operational risks***

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. It also includes, among other things, technology risk, model risk and outsourcing risk. While we have policies and processes to manage the risk of human error these policies and processes may not always be effective.

We could incur losses from fraudulent applications for loans or from incorrect or fraudulent payments and settlements, particularly real-time payments. Fraudulent conduct can also emerge from external parties seeking to access the bank's systems and customers' accounts. If systems, procedures and protocols for managing fraud fail,

or are ineffective, they could lead to loss which could adversely affect our business, prospects, reputation, financial performance or financial condition.

As a financial services organisation, Westpac is heavily reliant on the use of data and models in the conduct of its business. We are therefore exposed to model risk, being the risk of loss arising because of errors or inadequacies in data or a model, or in the control and use of the model.

Westpac relies on a number of suppliers, both in Australia and overseas, to provide services to it and its customers. Failure by these suppliers to deliver services as required could disrupt services and adversely impact Westpac's operations, profitability or reputation.

Operational risks could impact on our operations or adversely affect demand for our products and services.

Operational risks can directly impact our reputation and result in financial losses which would adversely affect our financial performance or financial condition.

Entities within the Group may be involved from time to time in legal proceedings arising from the conduct of their business. The Group's material contingent liabilities are described in Note 14 in this interim financial report. There is a risk that these contingent liabilities may be larger than anticipated or that additional litigation or other contingent liabilities may arise.

For a discussion of our risk management procedures, including the management of operational risk, refer to the 'Risk management' section in our 2015 Annual Report.

***We could suffer information security risks, including cyberattacks***

The proliferation of new technologies, the increasing use of the internet and telecommunications to conduct financial transactions and the growing sophistication and activities of attackers (including organised crime and state-sponsored actors) have resulted in increased information security risks for major financial institutions such as Westpac and our external service providers.

While Westpac has systems in place to detect and respond to cyberattacks, these systems may not always be effective and there can be no assurance that we will not suffer losses from cyberattacks or other information security breaches in the future.

Our operations rely on the secure processing, storage and transmission of information on our computer systems and networks, and the systems and networks of external suppliers. Although we implement measures to protect the security, integrity and confidentiality of our information, there is a risk that the computer systems, software and networks on which we rely may be subject to security breaches, unauthorised access, malicious software, external attacks or internal breaches that could have an adverse impact on our confidential information or that of our customers and counterparties.

Major banks in other jurisdictions have suffered security breaches from sophisticated cyberattacks. Our external service providers or other parties that facilitate our business activities (e.g. vendors, exchanges, clearing houses, central depositories and financial intermediaries) are also subject to the risk of cyberattacks. Any such security breach could result in the loss of customers and business opportunities, significant disruption to Westpac's operations, misappropriation of Westpac's confidential information and/or that of our customers and damage to Westpac's computers or systems and/or those of our customers. Such a security breach could also result in reputational damage, claims for compensation and regulatory investigations and penalties, which could adversely affect our business, prospects, financial performance, or financial condition.

Our risk and exposure to such threats remains heightened because of the evolving nature of technology, Westpac's prominence within the financial services industry, the prominence of our customers (including government, mining and health) and our plans to continue to improve and expand our internet and mobile banking infrastructure.

***We could suffer losses due to technology failures***

The reliability and security of our information and technology infrastructure are crucial in maintaining our banking applications and processes. There is a risk that our information and technology systems might fail to operate properly or become disabled as a result of events that are wholly or partially beyond our control.

Further, our ability to develop and deliver products and services to customers is dependent upon technology that requires periodic renewal. We are constantly managing technology projects including projects to consolidate technology platforms, simplify and enhance our technology and operations environment, improve productivity and provide for a better customer experience. Failure to implement these projects or manage associated change effectively could result in cost overruns, a failure to achieve anticipated productivity, operational instability or reputational damage. In turn, this could place us at a competitive disadvantage and adversely affect our financial performance.

***We could suffer losses due to conduct risk***

Conduct risk is the risk arising from unfair or inappropriate behaviour or practices of the Westpac Group or its staff. We are highly dependent on the conduct of our employees, contractors and external service providers. We could, for example, be adversely affected in the event that an employee, contractor or external service provider engages in unfair or inappropriate conduct. This could include losses from a failure to meet a professional obligation to specific clients, including fiduciary and suitability requirements, or from the nature or design of a product. While we have policies and processes to manage employee, contractor or external service provider misconduct, these policies and processes may not always be effective.

***We could suffer losses due to failures in governance or risk management strategies***

We have implemented risk management strategies and internal controls involving processes and procedures intended to identify, monitor and manage the risks to which we are subject, including liquidity risk, credit risk, market risk (such as interest rate, foreign exchange and equity risk), compliance risk, conduct risk, insurance risk, sustainability risk, related entity (contagion) risk and operational risk; all of which may impact the Group's reputation.

However, there are inherent limitations with any risk management framework as there may exist, or emerge in the future, risks that we have not anticipated or identified.

If any of our governance or risk management processes and procedures prove ineffective or inadequate or are otherwise not appropriately implemented, we could suffer unexpected losses and reputational damage which could adversely affect our business, prospects, financial performance or financial condition.

For a discussion of our risk management procedures, refer to the 'Risk management' section in our 2015 Annual Report.

***Reputational damage could harm our business and prospects***

Our ability to attract and retain customers and our prospects could be adversely affected if our reputation is damaged.

Reputation risk is the risk to earnings or capital arising from negative public opinion resulting from the loss of reputation or public trust and standing. It arises where there are differences between stakeholders' current and emerging perceptions, beliefs and expectations and our current and planned activities, performance and behaviours.

There are various potential sources of reputational damage, including failure to effectively manage risks in accordance with our risk management frameworks, potential conflicts of interest, pricing policies, failure to comply with legal and regulatory requirements, failure to meet our market disclosure obligations, regulatory investigations into past conduct, making inaccurate public statements, environmental, social and ethical issues, engagement and conduct of external suppliers, failure to comply with anti-money laundering and anti-bribery and corruption laws, trade sanctions and counter-terrorism finance legislation or privacy laws, litigation, failure of information security systems, improper sales and trading practices, failure to comply with personnel and supplier policies, improper conduct of companies in which we hold strategic investments, technology failures and security breaches. Our reputation could also be adversely affected by the actions of the financial services industry in general or from the actions of customers, suppliers and other counterparties.

Failure, or perceived failure, to appropriately address issues that could or do give rise to reputational risk could also impact the regulatory change agenda, give rise to additional legal risk, subject us to regulatory investigations, regulatory enforcement actions, fines and penalties, class actions or remediation costs, or harm our reputation among customers, investors and the marketplace. This could lead to loss of business which could adversely affect our business, prospects, financial performance or financial condition.

***We could suffer losses due to environmental factors***

We and our customers operate businesses and hold assets in a diverse range of geographic locations. Any significant environmental change or external event (including fire, storm, flood, earthquake, pandemic or terrorism events) in any of these locations has the potential to disrupt business activities, impact on our operations, damage property and otherwise affect the value of assets held in the affected locations and our ability to recover amounts owing to us. In addition, such an event could have an adverse impact on economic activity, consumer and investor confidence, or the levels of volatility in financial markets.

The risk of loss due to environmental factors is also relevant to our insurance business. The frequency and severity of external events such as natural disasters is difficult to predict and it is possible that the amounts we reserve for such events may not be adequate to cover actual claims that may arise, which could adversely affect our business, prospects, financial performance or financial condition.

***We could suffer losses due to insurance risk***

We have exposure to insurance risk in our life insurance, general insurance and lenders mortgage insurance businesses, which may adversely affect our business, operations and financial condition.

Insurance risk is the risk of mis-estimation of the expected cost of insured events, volatility in the number or severity of insured events, and mis-estimation of the cost of incurred claims.

In the life insurance business, insurance risk arises primarily through mortality (death) and morbidity (illness and injury) risks being greater than expected.

In the general insurance business, insurance risk arises mainly through environmental factors (including storms, floods and bushfires) and other calamities, such as earthquakes, tsunamis and volcanic activity, as well as general variability in home and contents insurance claim amounts. Further details on environmental risk factors are discussed above.

In the lenders mortgage insurance business, insurance risk arises primarily from an unexpected downturn in economic conditions. We could also suffer losses if our reinsurance arrangements are not effective.

***We could suffer losses due to impairment of capitalised software, goodwill and other intangible assets that may adversely affect our business, operations and financial condition***

In certain circumstances Westpac may be exposed to a reduction in the value of intangible assets. As at 31 March 2016, Westpac carried goodwill principally related to its investments in Australia, other intangible assets principally relating to assets recognised on acquisition of subsidiaries and capitalised software balances.

Westpac is required to assess the recoverability of the goodwill balances on at least an annual basis or wherever an indicator of impairment exists. For this purpose Westpac uses a discounted cash flow calculation. Changes in the methodology or assumptions upon which the calculation is based, together with expected changes in future cash flows, could materially impact this assessment, resulting in the potential write-off of part or all of the goodwill balances.

Capitalised software and other intangible assets are assessed for indicators of impairment at least annually or on indication of impairment. In the event that an asset is no longer in use, or its value has been reduced or that its estimated useful life has declined, an impairment will be recorded, adversely impacting the Group's financial condition. The estimates and assumptions used in assessing the useful life of an asset can be affected by a range of factors including changes in strategy and the rate of external changes in technology and regulatory requirements.

***We could suffer losses if we fail to syndicate or sell down underwritten securities***

As a financial intermediary we underwrite listed and unlisted debt and equity securities. Underwriting activities include the development of solutions for corporate and institutional customers who need capital and investor customers who have an appetite for certain investment products. We may guarantee the pricing and placement of these facilities. We could suffer losses if we fail to syndicate or sell down our risk to other market participants. This risk is more pronounced in times of heightened market volatility.

***Certain strategic decisions may have adverse effects on our business***

Westpac, at times, evaluates and may implement strategic decisions and objectives including diversification, innovation, divestment or business expansion initiatives, including acquisitions of businesses. The expansion or integration of a new business can be complex and costly and may require Westpac to comply with additional local or foreign regulatory requirements which may carry additional risks. These decisions may, for a variety of reasons, not deliver the anticipated positive business results and could have a negative impact on our business, prospects, engagement with regulators, financial performance or financial condition.

**Auditor's independence declaration**

A copy of the auditor's independence declaration as required under section 307C of the *Corporations Act 2001* is below.

**Rounding of amounts**

ASIC Class Order 98/100 applies to Westpac and in accordance with that Class Order all amounts have been rounded to the nearest million dollars unless otherwise stated.

**Auditor's Independence Declaration**

As lead auditor for the review of Westpac Banking Corporation for the half year ended 31 March 2016, I declare that to the best of my knowledge and belief, there have been:

- a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the review; and
- b) no contraventions of any applicable code of professional conduct in relation to the review.

This declaration is in respect of Westpac Banking Corporation and the entities it controlled during the period.

A handwritten signature in black ink, appearing to read 'Michael Codling', is written over a light grey signature line.

The above consolidated cash flow statement should be read in conjunction with the accompanying notes.

Details of the reconciliation of net cash (used in)/provided by operating activities to net profit are provided in Note 16.

#### 4.7 Notes to the consolidated financial statements (unaudited)

##### Note 1. Basis of preparation of interim financial report

This general purpose interim financial report for the half year ended 31 March 2016 has been prepared in accordance with Australian Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001* which ensures compliance with International Accounting Standard IAS 34 *Interim Financial Reporting*.

The interim financial report does not include all the notes of the type normally included in an annual financial report. Accordingly, this interim report is to be read in conjunction with the annual financial report for the year ended 30 September 2015 and any relevant public announcements made by Westpac during the interim reporting period in accordance with the continuous disclosure requirements of the *Corporations Act 2001* and the ASX Listing Rules.

The interim financial report complies with current Australian Accounting Standards (AAS) as they relate to interim financial reports.

The interim financial report was authorised for issue by the Board of Directors on 2 May 2016.

ASIC Class Order 98/100 applies to Westpac, and in accordance with that Class Order all amounts have been rounded to the nearest million dollars unless otherwise stated.

##### Amendments to Accounting Standards effective this period

No amendments were adopted during the period.

##### Critical accounting estimates and significant judgments

In preparing the interim financial report, the application of the Group's accounting policies requires the use of judgments, estimates and assumptions.

The areas of judgment, estimates and assumptions in the interim financial report, including the key sources of estimation uncertainty, are consistent with those in the annual financial report for the year ended 30 September 2015.

##### Future developments in accounting standards

The following new standards and interpretations which may have a material impact on the Group have been issued but are not yet effective, and unless otherwise stated, have not been early adopted by the Group:

AASB 9 *Financial Instruments (December 2014)* will replace AASB 139 *Financial Instruments: Recognition and Measurement*. It includes a revised classification and measurement model, a forward looking 'expected credit loss' impairment model and modifies the approach to hedge accounting. Unless early adopted the standard is effective for the 30 September 2019 financial year end. The major changes under the standard are:

- replaces the multiple classification and measurement models in AASB 139 with a single model that has three classification categories: amortised cost, fair value through profit or loss and fair value through other comprehensive income;
- a financial asset can only be measured at amortised cost if two criteria are met: a) the objective of the business model is to hold the financial asset for the collection of the contractual cash flows, and b) the contractual cash flows under the instrument solely represent the payment of principal and interest;
- if a financial asset is eligible for amortised cost measurement, an entity can elect to measure it at fair value if it eliminates or significantly reduces an accounting mismatch;
- requires more timely recognition of expected credit losses using a three stage approach. For financial assets where there has been no significant increase in credit risk since origination a provision for 12 months expected credit losses is required. For financial assets where there has been a significant increase in credit risk or where the asset is credit impaired a provision for full lifetime expected losses is required;
- interest is calculated on the gross carrying amount of a financial assets, except where the asset is credit impaired;

**Note 1. Basis of preparation of interim financial report (continued)**

- there will be no separation of an embedded derivative where the instrument is a financial asset;
- equity instruments must be measured at fair value, however an entity can elect on initial recognition to present the fair value changes on non-trading equity investments directly in other comprehensive income. There is no subsequent recycling of fair value gains and losses to profit or loss; however dividends from such investments will continue to be recognised in profit or loss;
- if an entity holds an investment in asset-backed securities (ABS) it must determine the classification of that investment by looking through to the underlying assets and assess the credit quality of the investment compared with the underlying portfolio of assets. If an entity is unable to look through to the underlying assets, then the investment must be measured at fair value;
- where the fair value option is used for valuing financial liabilities the change in fair value relating to credit risk is presented in other comprehensive income, except where it would create an accounting mismatch. If such a mismatch is created or enlarged, all changes in fair value (including the effects of changes in the credit risk) is recognised in profit or loss. The Group early adopted this amendment from 1 October 2013; and
- aligns hedge accounting more closely with risk management activities by increasing the eligibility of both hedged items and hedging instruments and introducing a more principles-based approach to assessing hedge effectiveness.

The Group is in the process of assessing the full impact of the application of AASB 9. The financial impact on the financial statements has not yet been determined.

AASB 15 *Revenue from Contracts with Customers* was issued on 28 May 2014 and will be effective for the 30 September 2019 financial year. The standard provides a single comprehensive model for revenue recognition. It replaces AASB 118 *Revenue* and related interpretations. The application of AASB 15 is not expected to have a material impact on the Group.

AASB 16 *Leasing* was issued on 24 February 2016 and will be effective for the 30 September 2020 financial year. The main changes under the standard are:

- all operating leases of greater than 12 months duration will be required to be presented on balance sheet. The net present value of these leases will be recognised as an asset and a liability; and
- all leases on balance sheet will give rise to a combination of interest expense on the lease liability and amortisation of the lease asset.

The impact of the standard will be determined by the level of operating lease commitments greater than 12 months duration at adoption and is not yet practicable to determine.

AASB 2016-2 *Amendments to Australian Accounting Standards – Disclosure Initiative: Amendments to AASB 107* was issued on 23 March 2016 and will be effective for the 30 September 2018 year end unless early adopted. Comparatives are not required on first application. The standard requires additional disclosures regarding both cash and non-cash changes in liabilities arising from financing activities. The standard is not expected to have a material impact on the Group.

## Note 2. Segment reporting

Segment results are presented on a basis that is consistent with information provided internally to Westpac's key decision makers.

In assessing financial performance, including divisional results, the Westpac Group uses a measure of performance referred to as 'cash earnings'.

Cash earnings is not a measure of cash flow or net profit determined on a cash accounting basis, as it includes non-cash items reflected in net profit determined in accordance with AAS. The specific adjustments include both cash and non-cash items. Cash earnings, as calculated by Westpac, is viewed as a measure of the level of profit that is generated by ongoing operations and is therefore considered in assessing distributions.

The basis of segment reporting reflects the management of the business, rather than the legal structure of the Group. The operating segment results have been presented on a management reporting basis and consequently internal charges and transfer pricing adjustments have been reflected in the performance of each operating segment. Inter-segment pricing is determined on an arm's length basis.

### Reportable operating segments

Although Westpac announced on 10 June 2015 a new operating structure to better align the Group's divisional structure to customer segments, up to 30 September 2015 the accounting and financial performance continued to be reported (both internally and externally) on the basis of the previous structure. The new operating structure has seen the Group's Australian retail and business banking operations reorganised under two divisions, Consumer Bank and Business Bank. A key rationale for the change has been to improve accountability for the end-to-end customer experience while maintaining the Group's unique portfolio of brands.

In 2015, Westpac also commenced the sale of certain Pacific Island operations. In light of this change, Westpac Pacific will no longer be reported separately. Its results are now included under Westpac Institutional Bank consistent with its line of reporting.

### Revisions to expense allocations and cost of funds transfer pricing

Consistent with Westpac's objective of improving divisional accountability, the Group has also adjusted its expense allocation methodology and cost of funds transfer pricing, as outlined below.

#### Expense allocation

Internal expense allocation methodologies have been adjusted to increase the responsibility of the Group's divisions for expenses that they control. This will see changes to some cost allocations (particularly related to resource usage and investment) and it will also see a higher portion of Group costs (mostly relating to finance, HR and risk functions) retained in the Group Businesses division.

#### Cost of funds transfer pricing changes

Following implementation of the Liquidity Coverage Ratio and other changes to the management of the balance sheet, the Group has adjusted its cost of funds transfer pricing. The changes include:

- improved allocation of liquidity costs to better reflect the funding mix and deposit quality of divisions; and
- changes to the allocation of wholesale funding costs to divisions, including incorporating the credit costs associated with Tier 1 and Tier 2 capital instruments.

The net impact of expense and cost of funds transfer pricing changes has led to a smaller contribution from the Group Businesses division and Westpac Institutional Bank, and larger contributions from Consumer Bank and Business Bank.

The comparative restatements impact all divisional results but have no impact on the Group's reported results or cash earnings.

**Note 2. Segment reporting (continued)**

The tables below present the segment results on a cash earnings basis for the Group:

\$m	Half Year March 16						Group

<sup>1</sup> The presentation of the operating expenses has been revised to better reflect the nature of our business and we have revised comparatives for consistency.

**Note 6. Income tax**

The income tax expense for the half year is reconciled to the profit before income tax as follows:

\$m	Half Year March 16	Half Year Sept 15	Half Year March 15	% Mov't Mar 16 - Sept 15	% Mov't Mar 16 - Mar 15
<b>Profit before income tax</b>	<b>5,238</b>	<b>6,170</b>	<b>5,246</b>	<b>(15)</b>	<b>-</b>
Prima facie income tax based on the Australian company tax rate of 30%	1,571	1,851	1,574	(15)	-
<b>The effect of amounts which are not deductible/(assessable) in calculating taxable income</b>					
Dividend adjustments	(2)	5	6	(140)	(133)
Life insurance:					
Tax adjustment on policyholder earnings	(7)	(39)	39	(82)	(118)
Adjustment for life business tax rates	-	(1)	(3)	(100)	(100)
Hybrid capital distributions	22	22	24	-	(8)
Other non-assessable items	(6)	(39)	(13)	(85)	(54)
Other non-deductible items	15	12	13	25	15
Adjustment for overseas tax rates	(13)	(13)	(14)	-	(7)
Income tax (over)/under provided in prior periods	(61)	(62)	(26)	(2)	135
Other items	9	8	4	13	125
<b>Total income tax expense in the income statement</b>	<b>1,528</b>	<b>1,744</b>	<b>1,604</b>	<b>(12)</b>	<b>(5)</b>
<b>Effective income tax rate</b>	<b>29.2%</b>	<b>28.3%</b>	<b>30.6%</b>	<b>90bps</b>	<b>(140bps)</b>

**Note 7. Earnings per share**

Basic earnings per share (EPS) is calculated by dividing the net profit attributable to equity holders, excluding costs of servicing other equity instruments, by the weighted average number of ordinary shares on issue during the period, excluding the number of ordinary shares purchased by the Group and held as Treasury shares. Diluted EPS is calculated by adjusting the earnings and the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares.

	Half Year March 16		Half Year Sept 15		Half Year March 15	
	Basic	Diluted	Basic	Diluted	Basic	Diluted
<b>Reconciliation of earnings used in the calculation of earnings per ordinary share (\$m)</b>						
Net profit attributable to owners of Westpac Banking Corporation	3,701	3,701	4,403	4,403	3,609	3,609
Restricted Share Plan (RSP) treasury shares distributions <sup>1</sup>	(2)	-	(4)	-	(2)	-
Distributions relating to convertible loan capital instruments	-	108	-	91	-	92
<b>Net profit attributable to owners of Westpac Banking Corporation adjusted for the effect of dilution</b>	<b>3,699</b>	<b>3,809</b>	<b>4,399</b>	<b>4,494</b>	<b>3,607</b>	<b>3,701</b>
<b>Weighted average number of ordinary shares (millions)<sup>2</sup></b>						
Weighted average number of ordinary shares	3,303	3,303	3,168	3,168	3,131	3,131
Effect of own shares held	(9)	(9)	(11)	(11)	(9)	(9)
Potential dilutive adjustment:						
Exercise of options and share rights and vesting of restricted shares	-	4	-	6	-	5
Convertible loan capital instruments	-	189	-	160	-	120
<b>Total weighted average number of ordinary shares</b>	<b>3,294</b>	<b>3,487</b>	<b>3,157</b>	<b>3,323</b>	<b>3,122</b>	<b>3,247</b>
<b>Earnings per ordinary share (cents)<sup>2</sup></b>	<b>112.3</b>	<b>109.2</b>	<b>139.4</b>	<b>135.3</b>	<b>115.5</b>	<b>114.0</b>

<sup>1</sup> While the equity granted to employees remains unvested, Restricted Share Plan (RSP) treasury shares are deducted from ordinary shares on issue in arriving at the weighted average number of ordinary shares outstanding. Despite the shares being unvested, employees are entitled to dividends and voting rights on the shares. Consequently, a portion of the profit for the period is allocated to RSP treasury shares to arrive at earnings attributed to ordinary shareholders.

<sup>2</sup> Comparative information has been restated to incorporate the bonus element of the Share Entitlement Offer in the weighted average number of ordinary shares.

### Note 13. Fair values of financial assets and liabilities

#### Fair Valuation Control Framework

The Group's control environment uses a Fair Valuation Control Framework where the fair value is either determined or validated by a function independent of the party that undertakes the transaction. This framework formalises the policies and procedures used by the Group to achieve compliance with relevant accounting, industry and regulatory standards. The framework includes specific controls relating to the revaluation of financial instruments, independent price verification, fair value adjustments and financial reporting.

A key element of the Fair Valuation Control Framework is the Revaluation Committee, comprising senior valuation experts from within the Group. The Revaluation Committee review the application of the agreed policies and procedures to assess that a fair value measurement basis is applied.

The method of determining fair value according to the Fair Valuation Control Framework differs depending on the information available.

#### Fair value hierarchy

The Group categorises all fair value instruments according to the following hierarchy:

- Level 1

Financial instruments valued using recent unadjusted quoted prices in active markets for identical assets or liabilities. An active market is one in which prices are readily and regularly available and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Valuation of Level 1 instruments require little or no management judgment.

Financial instruments in this class include Commonwealth of Australia and New Zealand government bonds, spot and exchange traded derivatives for equities, foreign exchange, commodities and interest rate products.

- Level 2

Valuation techniques utilising observable market prices applied to these assets or liabilities include the use of market standard discounting methodologies, option pricing models and other valuation techniques widely used and accepted by market participants.

The financial instruments included in this category are mainly Over the Counter (OTC) derivatives with observable market inputs and financial instruments with fair value derived from consensus pricing with sufficient contributors. Financial instruments in the Level 2 category include:

- non-derivative instruments – including government bonds (excluding Australian and New Zealand government bonds), Australian state government bonds, corporate fixed rate bonds and floating rate bonds; and
- derivatives – including interest rate swaps, interest rate futures, credit default swaps, foreign exchange swaps, foreign exchange futures and forwards, foreign exchange options and equity options.

- Level 3

Financial instruments valued using at least one input that could have a significant effect on the instrument's valuation which is not based on observable market data (unobservable input). Unobservable inputs are those not readily available in an active market due to illiquidity or complexity of the product. These inputs are generally derived and extrapolated from other relevant market data and calibrated against current market trends and historic transactions.

These valuations are calculated using a high degree of management judgment.

Financial instruments in the Level 3 category include some asset-backed products and non-Australian dollar-denominated government securities issued by governments where there are no observable secondary markets.

A financial instrument's categorisation within the valuation hierarchy is based on the lowest level input that is significant to the fair value measurement.

**Note 13. Fair values of financial assets and liabilities (continued)**

The table below summarises the attribution of financial instruments carried at fair value to the fair value hierarchy:

\$m	As at 31 March 2016				As at 30 Sept 2015				As at 31 March 2015			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total

<sup>1</sup> Comparatives have been revised for consistency.

**Note 13. Fair values of financial assets and liabilities (continued)****Analysis of movements between Fair Value Hierarchy Levels**

During the period there were no material transfers between levels of the fair value hierarchy. Transfers into or out of Level 3 are discussed in the following table.

The table below summarises the changes in financial instruments carried at fair value derived from non-market observable valuation techniques (Level 3):

\$m	Half Year March 16						
	Trading Securities and Financial Assets Designated at Fair Value	Derivatives	Available-for-Sale Securities	Total Assets	Derivatives	Debt Issues at Fair Value	Total Liabilities
Balance as at 1 October 2015	1,007	44	918	1,969	39	18	57
Gains/(losses) on assets and (gains)/losses on liabilities recognised in:							
Income statements	(4)	(6)	-	(10)	(8)	4	(4)
Available-for-sale reserve	-	-	-	-	-	-	-
Acquisitions and issues	28	12	1,921	1,961	5	-	5
Disposals and settlements	(116)	(8)	(1,958)	(2,082)	(9)	-	(9)
Transfers into or out of non-market observables	-	(1)	-	(1)	(4)	-	(4)
Foreign currency translation impacts	(25)	-	(129)	(154)	-	-	-
<b>Balance as at 31 March 2016</b>	<b>890</b>	<b>41</b>	<b>752</b>	<b>1,683</b>	<b>23</b>	<b>22</b>	<b>45</b>
Unrealised gains/(losses) recognised in the income statement for financial instrument held as at 31 March 2016	(7)	(6)	-	(13)	(3)	-	(3)

Transfers into and out of Level 3 have occurred due to changes in observability in the significant inputs into the valuation models used to determine the fair value of the related financial instruments. Transfers in and transfers out are reported using the end of period fair values.

**Significant unobservable inputs**

Sensitivities to reasonably possible changes in non-market observable valuation assumptions would not have a material impact on the Group's reported results.

**Day one profit or loss**

The closing balance of unrecognised day one profit for the period was \$6 million (30 September 2015: \$6 million profit).

**Note 13. Fair values of financial assets and liabilities (continued)****Financial instruments not measured at fair value**

The following table summarises the estimated fair value of financial instruments not measured at fair value for the Group:

\$m	As at 31 March 2016		As at 30 Sept 2015		As at 31 March 2015	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value	Carrying Amount	Fair Value
<b>Financial assets not measured at fair value</b>

Loan capital	13,017	12,574	13,840	13,495	11,905	11,897
Other financial liabilities	7,104	7,104	6,861	6,861	6,563	6,563
<b>Total financial liabilities</b>	<b>644,770</b>	<b>645,507</b>	<b>630,257</b>	<b>631,223</b>	<b>613,945</b>	<b>616,157</b>

A detailed description of how fair value is derived for financial instruments not measured at fair value is disclosed in Note 23 of the Group's annual financial statements for the year ended 30 September 2015.

<sup>1</sup> Comparatives have been revised for consistency.

**Note 14. Contingent liabilities, contingent assets and credit commitments**

The Group is a party to financial instruments with off-balance sheet credit risk in the normal course of business to meet the financing needs of its customers and in managing its own risk profile. These financial instruments include commitments to extend credit, bill endorsements, financial guarantees, standby letters of credit and underwriting facilities.

The Group's exposure to credit loss in the event of non-performance by the other party is represented by the contract or notional amount of those financial instruments. However, some commitments to extend credit and provide underwriting facilities can be cancelled or revoked at any time at the Group's option. As a significant proportion of these financial instruments are expected to expire without being drawn upon, the contract or notional amounts do not necessarily reflect future liquidity requirements.

The Group uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

The Group takes collateral where it is considered necessary to support both on and off-balance sheet financial instruments with credit risk. The Group evaluates each customer's credit-worthiness on a case-by-case basis. The amount of collateral taken, if deemed necessary, on the provision of a financial facility is based on management's evaluation of the credit risk of the counterparty.

Off-balance sheet credit risk-related financial instruments excluding derivatives are as follows:

\$m	As at 31 March 2016	As at 30 Sept 2015	As at 31 March 2015	% Mov't Mar 16 - Sept 15	% Mov't Mar 16 - Mar 15
<b>Credit risk-related instruments</b>					
Standby letters of credit and financial guarantees	4,241	4,642	4,341	(9)	(2)
Trade letters of credit	2,840	2,945	3,046	(4)	(7)
Non-financial guarantees	9,405	9,431	9,622	-	(2)
Commitments to extend credit <sup>1</sup>	178,260	174,391	166,933	2	7
Other commitments	101	184	333	(45)	(70)
<b>Total credit-risk related instruments</b>	<b>194,847</b>	<b>191,593</b>	<b>184,275</b>	<b>2</b>	<b>6</b>

**Contingent assets**

The credit commitments shown in the above table also constitute contingent assets. These commitments would be classified as loans in the balance sheet on the contingent event occurring.

**Additional liabilities and commitments****Litigation**

Contingent liabilities exist in respect of actual and potential claims and proceedings. An assessment of the Group's likely loss has been made on a case-by-case basis for the purpose of the financial statements and specific provisions have been made where appropriate.

- Since 2011, Westpac has been served with three class action proceedings seeking refunds of certain exception fees paid by customers. Similar class actions have been commenced against several other Australian banks. Westpac has agreed with the plaintiffs to put the proceedings against Westpac on hold pending the outcome of related litigation against one of those other banks. In April 2015, the Full Court of the Federal Court unanimously found all of the exception fees charged by that other bank to be lawful. The plaintiffs appealed certain aspects of that judgment to the High Court of Australia. That appeal was heard in February 2016 and the parties are awaiting the High Court's judgment.
- Westpac has been served with a class action proceeding brought on behalf of Westpac customers who borrowed money to invest in Storm Financial-badged investments. Westpac intends to defend these proceedings.

<sup>1</sup> Commitments to extend credit include all obligations on the part of the Group to provide credit facilities. As facilities may expire without being drawn upon, the notional amounts do not necessarily reflect future cash requirements. In addition to the commitments disclosed above at 31 March 2016, the Group offered \$7.8 billion (30 September 2015: \$9.3 billion, 31 March 2015: \$12.3 billion) of facilities to customers, which had not yet been accepted.

**Note 14. Contingent liabilities, contingent assets and credit commitments (continued)**

- As part of ASIC's ongoing industry-wide investigations into setting of the bank bill swap reference rate (BBSW), on 5 April 2016, ASIC commenced civil proceedings against Westpac in the Federal Court of Australia, alleging certain misconduct in relation to the setting of the BBSW, including market manipulation and unconscionable conduct. The conduct that is the subject of the proceedings is alleged to have occurred between 6 April 2010 and 6 June 2012. Westpac is defending these proceedings. ASIC is seeking from the court declarations that Westpac breached various provisions of the *Corporations Act 2001* (Cth) and the *Australian Securities and Investments Commission Act 2001* (Cth), pecuniary penalties of unspecified amounts and orders requiring Westpac to implement a comprehensive compliance program for persons involved in Westpac's trading in the relevant market.

**Regulatory reviews**

Globally, regulators continue to progress various reviews involving the financial services sector. The nature of these reviews can be wide ranging and, for example, currently include investigations into potential misconduct in financial markets. During the year, Westpac has received various notices and requests for information from its regulators as part of both industry-wide and Westpac-specific reviews. The outcomes and total costs associated with such reviews remains uncertain.

**Settlement risk**

The Group is subject to a credit risk exposure in the event that another counterparty fails to settle for its payments clearing activities (including foreign exchange). We seek to minimise credit risk arising from settlement risk in the payments system by aligning our processing method with the legal certainty of settlement in the relevant clearing mechanism.

**Financial Claims Scheme**

Under the Financial Claims Scheme (FCS) the Australian Government provides depositors a free guarantee of deposits in eligible ADIs up to and including \$250,000. The FCS applies to an eligible ADI if APRA has applied for the winding up of the ADI and the responsible Australian Government minister has declared that the FCS applies to the ADI.

The *Financial Claims Scheme (ADIs) Levy Act 2008* provides for the imposition of a levy to fund the excess of certain APRA FCS costs connected to an ADI. The levy would be imposed on liabilities of eligible ADIs to their depositors and cannot be more than 0.5% of the amount of those liabilities.

**Businesses disposed in Half Year March 2016***Pacific Islands*

Westpac sold its banking operations in the Solomon Islands to the Bank of South Pacific Limited. Settlement occurred on 30 October 2015, with a gain on sale of \$5 million recognised in non-interest income.

The total cash consideration received, net of transaction costs, was \$24 million.

**Businesses disposed in Half Year September 2015***Partial sale of BT Investment Management Limited (BTIM)*

Westpac sold a 28% interest in BT Investment Management (BTIM) via both an Institutional Offer (19%) and Retail Offer (9%) priced at \$8.20 per share. Following settlement of the institutional offer transaction on 23 June 2015 the Group lost control of BTIM. Following the completion of the retail offer on 16 July 2015, Westpac held 31% of BTIM.

A gain on sale of \$1,036 million was recognised in non-interest income. This gain consisted of both the realised gain on the 28% of BTIM sold (\$492 million) and also an unrealised gain on the 31% retained (\$544 million).

The remaining 31% investment in BTIM was initially recognised at \$745 million being its fair value on the transaction date. Subsequently, the investment will be accounted for using the equity method. Refer Note 35 of the Group's annual financial statements for the year ended 30 September 2015, for further details regarding the retained ownership interest.

The total cash consideration received, net of transaction costs, was \$654 million.

*The Warehouse Financial Services Limited*

Westpac sold The Warehouse Financial Services Limited on 30 September 2015, with a gain of \$3 million recognised in non-interest income.

The total cash consideration received, net of transaction costs, was \$4 million.

<sup>1</sup> The presentation has been revised to better reflect the nature of our business. Certain cash flows have been reclassified between operating activities and comparatives have been revised for consistency. Changes did not have an impact on the reported net increase/decrease in cash and cash equivalents.

**Note 16. Notes to the consolidated cash flow statement (continued)***Pacific Islands*

Westpac sold its banking operations in Samoa, Cook Islands, and Tonga to the Bank of South Pacific Limited (BSP). Settlement occurred on 10 July 2015, with a loss of \$3 million recognised in operating expenses.

The total cash consideration received, net of transaction costs, was \$85 million.

**Details of the assets and liabilities of controlled entities over which control was lost**

**Restricted cash** The amount of cash and cash equivalents not available for use at 31 March 2016 was \$56 million (30 September 2015: \$132 million; 31 March 2015: \$37 million) for the Group.

**Note 17. Subsequent events**

Since the end of the half year the directors have recommended the payment of an interim dividend of 94 cents per fully paid ordinary share (First Half 2015: 93 cents), fully franked. The aggregate amount of the proposed dividend expected to be paid on 4 July 2016 out of retained earnings at 31 March 2016, but not recognised as a liability, is \$3,130 million.

The Board has determined to satisfy the DRP for the 2016 interim dividend by issuing Westpac ordinary shares. The Market Price used to determine the number of shares issued to DRP participants will be set over 10 trading days commencing on 18 May 2016 and will not include any discount.

No other matter or circumstance has arisen since half year ended 31 March 2016 which is not otherwise dealt with in this interim financial report, that has significantly affected or may significantly affect the operations of the Group, the results of its operations or the state of affairs of the Group in subsequent periods.

#### 4.8 Statutory statements

##### Directors' declaration

In the Directors' opinion:

- (i) the interim financial statements and notes set out on pages 80 to 111 are in accordance with the *Corporations Act 2001*, including that they:
  - a. comply with Australian Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and
  - b. give a true and fair view of the Group's financial position as at 31 March 2016 and of its performance for the six months ended 31 March 2016; and
- (ii) there are reasonable grounds to believe that Westpac will be able to pay its debts as and when they become due and payable.

This declaration is made in accordance with a resolution of the Directors.

For and on behalf of the Board.

Lindsay Maxsted  
Chairman

Brian Hartzler  
Managing Director and  
Chief Executive Officer

Sydney, Australia  
2 May 2016

**Independent auditor's review report to the members of Westpac Banking Corporation**

**Report on the interim financial report**

We have reviewed the accompanying interim financial report of Westpac Banking Corporation (the Corporation), which comprises the consolidated balance sheet as at 31 March 2016, the consolidated income statement and consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated cash flow statement for the half year ended on that date, selected explanatory notes and the directors' declaration for the Consolidated Entity. The Consolidated Entity comprises the Corporation and the entities it controlled during that half year.

**Directors' responsibility for the interim financial report**

The directors of the Corporation are responsible for the preparation of the interim financial report that gives a true and fair view in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the interim financial report that is free from material misstatement whether due to fraud or error.

**Auditor's responsibility**

Our responsibility is to express a conclusion on the interim financial report based on our review. We conducted our review in accordance with Australian Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the financial report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the Consolidated Entity's financial position as at 31 March 2016 and its performance for the half year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*. As the auditor of Westpac Banking Corporation, ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of an interim financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

**Independence**

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*.

**Conclusion**

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the interim financial report of Westpac Banking Corporation is not in accordance with the *Corporations Act 2001* including:

- a) giving a true and fair view of the Consolidated Entity's financial position as at 31 March 2016 and of its performance for the half year ended on that date; and
- b) complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

### 5.2 Dividend reinvestment plan

The Group operates a DRP that is available to holders of fully paid ordinary shares who are resident in, or whose address on the register of shareholders is in Australia or New Zealand. As noted in Section 2.5, the Directors have made certain determinations in relation to the calculation of the Market Price which will apply to the DRP for the 2016 interim dividend only.

Shareholders who wish to commence participation in the DRP, or to vary their current participation election, must do so by 5.00pm (AEST) on 16 May 2016.

Shareholders can provide these instructions by:

- For shareholders with holdings that have a market value of less than \$50,000 (for a single holding) or less than \$1,000,000 (per shareholding held within a Link Market Services portfolio), logging into the Westpac share registrar's website at [www.linkmarketservices.com.au](http://www.linkmarketservices.com.au) and electing into the DRP or amending their existing instructions online; or
- Completing and returning a DRP Application or Variation form to Westpac's share registry. Registry contact details are listed in Section 5.4.

### 5.3 Changes in control of Group entities

During the six months ended 31 March 2016 the following controlled entity was acquired:

- Planwise AU Pty Ltd (acquired 11 January 2016).

During the six months ended 31 March 2016 the following controlled entities ceased to be controlled:

- Core Infrastructure Income Feeder 1 LP (sold 13 October 2015);
- Core Infrastructure Income Feeder 2 LP (sold 13 October 2015);
- Core Infrastructure Income Master LP (sold 13 October 2015);
- Crusade Global Trust 2 of 2005 (terminated 2 February 2016);
- Crusade Global Trust 1 of 2006 (terminated 2 February 2016); and
- Bella Trust No. 2 (terminated 16 March 2016).

<sup>1</sup> As at 31 March 2016.

**5.5 Exchange rates****5.5.1 Exchange rates against A\$**

Six months to/as at Currency	31 March 2016		30 September 2015		31 March 2015	
	Average	Spot	Average	Spot	Average	Spot
US\$	0.7210	0.7652	0.7507	0.6997	0.8225	0.7635
GBP	0.4892	0.5336	0.4873	0.4615	0.5302	0.5167
NZ\$	1.0841	1.1092	1.0896	1.0983	1.0708	1.0202

**5.5.2 Exchange rate risk on future NZ\$ earnings**

Westpac's policy in relation to the hedging of the future earnings of the Group's New Zealand division is to manage the economic risk where Westpac believes there is a likelihood of depreciation of NZ\$ against A\$. Westpac manages these flows over a time horizon under which up to 100% of the expected earnings for the following twelve months and 50% of the expected earnings for the subsequent twelve months can be hedged. As at 31 March 2016, Westpac had hedges in place for forecast Second Half 2016 earnings (average rate \$1.07) and for forecast First Half 2017 earnings (average rate \$1.11).

<b>Total</b>	<b>203</b>	<b>(361)</b>	<b>169</b>

#### Notes

Outlined below are the cash earnings adjustments to the reported result:

1. Partial sale of BTIM: During Second Half 2015 the Group recognised a significant gain following the partial sale of the Group's shareholding in BTIM. This gain was treated as a cash earnings adjustment given its size and that it does not reflect ongoing operations;
2. Capitalised technology cost balances: Following changes to the Group's technology and digital strategy, rapid changes in technology and evolving regulatory requirements, a number of accounting changes were introduced in Second Half 2015, including moving to an accelerated amortisation methodology for most existing assets with a useful life of greater than three years, writing off the capitalised cost of regulatory program assets where the regulatory requirements have changed, and directly expensing more project costs. The expense recognised to reduce the carrying value of impacted assets was treated as a cash earnings adjustment given its size and that it does not reflect ongoing operations;
3. Amortisation of intangible assets: The merger with St. George, the acquisition of J O Hambro Capital Management (JOHCM) and the acquisition of Lloyds resulted in the recognition of identifiable intangible assets. The commencement of equity accounting for BTIM also resulted in the recognition of notional identifiable intangible assets within the investments in associate's carrying value. The intangible assets recognised relate to core deposits, customer relationships, management contracts and distribution relationships. These intangible items are amortised over their useful lives, ranging between four and twenty years. The amortisation of these intangible assets (excluding capitalised software) is a cash earnings adjustment because it is a non-cash flow item and does not affect cash distributions available to shareholders;
4. Acquisition, transaction and integration expenses: Costs associated with the acquisition of Lloyds have been treated as a cash earnings adjustment as they do not reflect the earnings expected from the acquired businesses following the integration period;
5. Lloyds tax adjustments: Tax adjustments arising from the acquisition of Lloyds have been treated as a cash earnings adjustment in line with our treatment of Lloyds acquisition and integration costs;
6. Fair value on economic hedges (which do not qualify for hedge accounting under AAS) comprise:
  - The unrealised fair value (gain) / loss on foreign exchange hedges of future New Zealand earnings impacting non-interest income is reversed in deriving cash earnings as they may create a material timing difference on reported results but do not affect the Group's cash earnings over the life of the hedge; and
  - The unrealised fair value (gain) / loss on hedges of accrual accounted term funding transactions are reversed in deriving cash earnings as they may create a material timing difference on reported results but do not affect the Group's cash earnings over the life of the hedge.
7. Ineffective hedges: The unrealised (gain) / loss on ineffective hedges is reversed in deriving cash earnings for the period because the gain or loss arising from the fair value movement in these hedges reverses over time and does not affect the Group's profits over time;
8. Treasury shares: Under AAS, Westpac shares held by the Group in the managed funds and life businesses are deemed to be Treasury shares and the results of holding these shares are not permitted to be recognised as income in the reported results. In deriving cash earnings, these results are included to ensure there is no asymmetrical impact on the Group's profits because the Treasury shares support policyholder liabilities and equity derivative transactions which are re-valued in determining income;

## Interim financial results 2016

### Cash earnings

---

9. Buyback of Government guaranteed debt: The Group previously bought back certain Government guaranteed debt issues which reduced Government guarantee fees (70 basis points) paid. In undertaking the buybacks, a cost was incurred reflecting the difference between current interest rates and the rate at which the debt was initially issued. In the reported result, the cost incurred was recognised at the time of the buyback. In cash earnings, the cost incurred was being amortised over the original term of the debt that was bought back, consistent with a 70 basis point saving being effectively spread over the remaining life of the issue. The cash earnings adjustment gives effect to the timing difference between reported results and cash earnings; and

Accounting reclassifications between individual line items that do not impact reported results comprise:

- Policyholder tax recoveries: Income and tax amounts that are grossed up to comply with the AAS accounting standard covering Life Insurance Business (policyholder tax recoveries) are reversed in deriving income and taxation expense on a cash earnings basis; and
- Operating leases: Under AAS rental income on operating leases is presented gross of the depreciation of the assets subject to the lease. These amounts are offset in deriving non-interest income and operating expenses on a cash earnings basis.

The guidance provided in Australian Securities and Investments Commission (ASIC) Regulatory Guide 230 has been followed when presenting this information.

## 7.0 Glossary

Shareholder value	
Average ordinary equity	Average total equity less average non-controlling interests.
Average tangible ordinary equity	Average ordinary equity less average goodwill and other intangible assets (excluding capitalised software).
Dividend payout ratio – cash earnings	Ordinary dividend to be paid divided by cash earnings.
Dividend payout ratio – net profit	Ordinary dividend per share divided by net profit per share attributable to the owners of WBC.
Earnings per ordinary share	Net profit attributable to the owners of WBC divided by the weighted average ordinary shares (reported).
Fully franked dividends per ordinary shares (cents)	Dividends paid out of retained profits which carry a credit for Australian company income tax paid by Westpac.
Net tangible assets per ordinary share	Net tangible assets (total equity less goodwill and other intangible assets less minority interests) divided by the number of ordinary shares on issue (reported).
Return on equity (ROE)	Net profit attributable to the owners of WBC divided by average ordinary equity.
Weighted average ordinary shares (reported)	Weighted average number of fully paid ordinary shares listed on the ASX for the relevant period less Westpac shares held by the Group ('Treasury shares').
Productivity and efficiency	
Expense to income ratio	Operating expenses divided by net operating income.
Full-time equivalent employees (FTE)	A calculation based on the number of hours worked by full and part-time employees as part of their normal duties. For example, the full-time equivalent of one FTE is 76 hours paid work per fortnight.
Revenue per FTE	Total operating income divided by the average number of FTE for the period.
Total banking expense to income ratio	Total banking operating expenses divided by total banking operating revenue. Total banking business includes Consumer Bank, Business Bank, WIB (including Westpac Pacific and excluding Hastings), Private Bank (part of BTFG), New Zealand banking operations and the Group Businesses.
Business performance	
Average interest-earning assets	The average balance of assets held by the Group that generate interest income. Where possible, daily balances are used to calculate the average balance for the period.
Average interest-bearing liabilities	The average balance of liabilities owed by the Group that incur an interest expense. Where possible, daily balances are used to calculate the average balance for the period.
Divisional margin	Net interest income (including capital benefit) for a division as a percentage of the average interest earning assets for that division.
Net interest margin	Calculated by dividing net interest income by average interest-earning assets.
Net interest spread	The difference between the average yield on all interest-earning assets and the average rate paid on interest bearing liabilities.
Capital adequacy	
Common equity tier 1 capital ratio	Total common equity capital divided by risk weighted assets, as defined by APRA.
Credit risk weighted assets (Credit RWA)	Credit risk weighted assets represent risk weighted assets (on-balance sheet and off-balance sheet) that relate to credit exposures and therefore exclude market risk, operational risk, interest rate risk in the banking book and other assets.
Internationally comparable capital ratios	Internationally comparable regulatory capital ratio's are Westpac's estimated ratios after adjusting the capital ratios determined under APRA Basel III regulations for various items. Analysis aligns with the APRA study titled 'International capital comparison study' dated 13 July 2015.
Risk weighted assets (RWA)	Assets (both on and off-balance sheet) are risk weighted according to each asset's inherent potential for default and what the likely losses would be in case of default. In the case of non asset backed risks (ie. market and operational risk), RWA is determined by multiplying the capital requirements for those risks by 12.5.
Tier 1 capital ratio	Total tier 1 capital divided by risk weighted assets, as defined by APRA.
Total regulatory capital ratio	Total regulatory capital divided by risk weighted assets, as defined by APRA.

### Glossary

Asset quality	
90 days past due and not impaired	<p>Includes facilities where:</p> <ol style="list-style-type: none"> <li>contractual payments of interest and / or principal are 90 or more calendar days overdue, including overdrafts or other revolving facilities that remain continuously outside approved limits by material amounts for 90 or more calendar days, including from First Half 2016 accounts for customers who have been granted hardship assistance; or</li> <li>an order has been sought for the customer's bankruptcy or similar legal action has been instituted which may avoid or delay repayment of its credit obligations; and</li> <li>the estimated net realisable value of assets / security to which Westpac has recourse is sufficient to cover repayment of all principal and interest, or which are not secured but there is a reasonable expectation that full recovery or the amount due will be made and interest is being taken to profit on an accrual basis.</li> </ol> <p>These facilities, while in default, are not treated as impaired for accounting purposes.</p>
Collectively assessed provisions (CAPs)	<p>Loans not found to be individually impaired or significant will be collectively assessed in pools of similar assets with similar risk characteristics. The size of the provision is an estimate of the losses already incurred and will be estimated on the basis of historical loss experience for assets with credit characteristics similar to those in the collective pool. The historical loss experience will be adjusted based on current observable data. Included in the collectively assessed provision is an economic overlay provision which is calculated based on changes that occurred in sectors of the economy or in the economy as a whole.</p>
Impaired assets	<p>Includes exposures that have deteriorated to the point where full collection of interest and principal is in doubt, based on an assessment of the customer's outlook, cashflow, and the net realisation of value of assets to which recourse is held:</p> <ol style="list-style-type: none"> <li>facilities 90 days or more past due, and full recovery is not in doubt: exposures where contractual payments are 90 or more days in arrears and the net realisable value of assets to which recourse is held may not be sufficient to allow full collection of interest and principal, including overdrafts or other revolving facilities that remain continuously outside approved limits by material amounts for 90 or more calendar days;</li> <li>non-accrual assets: exposures with individually assessed impairment provisions held against them, excluding restructured loans;</li> <li>restructured assets: exposures where the original contractual terms have been formally modified to provide for concessions of interest or principal for reasons related to the financial difficulties of the customer;</li> <li>other assets acquired through security enforcement (includes other real estate owned): includes the value of any other assets acquired as full or partial settlement of outstanding obligations through the enforcement of security arrangements; and</li> <li>any other assets where the full collection of interest and principal is in doubt.</li> </ol>
Individually assessed provisions (IAPs)	<p>Provisions raised for losses that have already been incurred on loans that are known to be impaired and are assessed on an individual basis. The estimated losses on these impaired loans is based on expected future cash flows discounted to their present value and, as this discount unwinds, interest will be recognised in the income statement.</p>
Stressed assets	<p>Watchlist and substandard, 90 days past due well secured and impaired assets.</p>
Total committed exposure (TCE)	<p>Represents the sum of the committed portion of direct lending (including funds placement overall and deposits placed), contingent and pre-settlement risk plus the committed portion of secondary market trading and underwriting risk.</p>
Watchlist and substandard	<p>Loan facilities where customers are experiencing operating weakness and financial difficulty but are not expected to incur loss of interest or principal.</p>
Other	
Business NPS	<p>Source: DBM Consultants Business Financial Services Monitor, March 2016, 6MMA, MFI customers, all businesses.</p>
Committed Liquidity Facility (CLF)	<p>The RBA makes available to Australian Authorised Deposit-taking Institutions a CLF that, subject to qualifying conditions, can be accessed to meet LCR requirements under APS210 Liquidity.</p>
Consumer NPS	<p>Source: Roy Morgan Research, March 2016, six month moving average (6MMA). Main Financial Institution (MFI), as defined by the customer. Consumers aged 14 and over.</p>
Credit Value Adjustment (CVA)	<p>CVA adjusts the fair value of over-the-counter derivatives for credit risk. CVA is employed on the majority of derivative positions and reflects the market view of the counterparty credit risk. A Debit Valuation Adjustment (DVA) is employed to adjust for our own credit risk.</p>
Customer satisfaction – overall business	<p>Source: DBM Consultants Business Financial Services Monitor, March 2016, 6MMA. MFI customers, all businesses. The Customer Satisfaction score is an average of customer satisfaction ratings of the customer's main financial institution for business banking on a scale of 0 to 10 (0 means 'extremely dissatisfied' and 10 means 'extremely satisfied').</p>
Customer satisfaction – overall consumer	<p>Source: Roy Morgan Research, March 2016, 6MMA. Main Financial Institution (as defined by the customer). Satisfaction ratings are based on the relationship with the financial institution. Customers must have at least a Deposit / Transaction account relationship with the institution and are aged 14 or over. Satisfaction is the percentage of customers who answered 'Very' or 'Fairly satisfied' with their overall relationship with their MFI.</p>

## Interim financial results 2016

### Glossary

Other	
Divisional results	<p>Divisional results are presented on a management reporting basis. Internal charges and transfer pricing adjustments are included in the performance of each division reflecting the management structure rather than the legal entity (these results cannot be compared to results for individual legal entities). Where management reporting structures or accounting classifications have changed, financial results for comparative periods have been revised and may differ from results previously reported. Overhead costs are allocated to revenue generating divisions.</p> <p>The Group's internal transfer pricing frameworks facilitate risk transfer, profitability measurement, capital allocation and divisional alignment, tailored to the jurisdictions in which the Group operates. Transfer pricing allows the Group to measure the relative contribution of products and divisions to the Group's interest margin and other dimensions of performance. Key components of the Group's transfer pricing frameworks are funds transfer pricing for interest rate and liquidity risk and allocation of basis and contingent liquidity costs, including capital allocation.</p>
First Half 2015	Six months ended 31 March 2015.
First Half 2016	Six months ended 31 March 2016.
Funding Valuation Adjustment (FVA)	FVA reflects the estimated present value of the future market funding cost or benefit associated with funding uncollateralised derivatives.
High Quality Liquid Assets (HQLA)	As defined by APRA in Australian Prudential Standard APS210 Liquidity, including BS-13 qualifying liquid assets, less RBA open repos funding end of day ESA balances with the RBA.
JOHCM	Refers to J O Hambro Capital Management, a company incorporated in the United Kingdom and acquired by BTIM in October 2011.
Liquidity Coverage Ratio (LCR)	An APRA requirement to maintain an adequate level of unencumbered high quality liquid assets, to meet liquidity needs for a 30 calendar day period under an APRA-defined severe stress scenario. Absent a situation of financial stress, the value of the LCR must not be less than 100%, effective 1 January 2015. LCR is calculated as the percentage ratio of stock of HQLA and CLF over the total net cash out flows in a modeled 30 day defined stressed scenario.
Lloyds	Refers to the acquisition of select Australian businesses of Lloyds Banking Group including Capital Finance Australia Limited and BOS International (Australia) Ltd on 31 December 2013.
Net Stable Funding Ratio (NSFR)	The NSFR is defined as the ratio of the amount of available stable funding (ASF) to the amount of required stable funding (RSF) defined by APRA. The amount of ASF is the portion of an ADI's capital and liabilities expected to be a reliable source of funds over a year time horizon. The amount of RSF is a function of the liquidity characteristics and residual maturities of an ADI's assets and off-balance sheet activities. When it is implemented by APRA from 1 January 2018, ADI's must maintain an NSFR of at least 100%.
Prior corresponding period	Refers to the six months ended 31 March 2015.
Prior half / Prior period	Refers to the six months ended 30 September 2015.
Run-off	Scheduled and unscheduled repayments and debt repayments (from for example property sales, external refinancing), net of redraws.
Second Half 2015	Six months ended 30 September 2015.
Third party liquid assets	HQLA and non LCR qualifying liquid assets, but excludes internally securitised assets that are eligible for a repurchase agreement with the RBA and RBNZ.
Total liquid assets	Third party liquid assets and internally securitised assets that are eligible for a repurchase agreement with a central bank.
Women in Leadership	The proportion of women (permanent and maximum term) in people leadership roles or senior roles of influence as a proportion of all leaders across the Group. Includes CEO, Executive Team, General Managers, Senior Managers as direct reports to General Managers and the next two levels of management. Excludes Westpac Pacific.
