29 July 2016

JUNE 2016

QUARTERLY ACTIVITIES & CASHFLOW REPORT

CORPORATE

Following a takeover bid that closed on 29 January 2016, HQ Mining Resources Holding Pty Ltd ("HQ Mining") and associates held 76.46% of the Company's shares.

The Company understands that HQ Mining recognises the Company's immediate funding requirements and intends to facilitate a pro-rata rights issue to raise sufficient funds to complete a PFS at Copper Hill. HQ Mining has indicated its desire for that issue to be completed not later than the December quarter. Pending the proposed capital raising, the Directors have secured the necessary funding to support the ongoing activities of the Company until December through the continuation of a short-term loan facility by HQ Mining. These funds are expected to be available to the Company from early August.

In addition, HQ Mining has provided a letter of funding support which confirms it will provide ongoing funding to support the Company's programs until December or the proposed capital raising is completed, whichever is earlier.

HQ Mining Loan Facility

The Company entered into a loan agreement with HQ Mining for \$320,000 on normal commercial terms, which is now fully drawn.

During the June Quarter administrative issues and funding constraints led to a curtailment of activity over projects. Planning for future work and tenement renewals was undertaken. A review of current projects is provided in the following pages.

Board Changes

Subsequent to the end of the quarter, at an Extraordinary General Meeting held on 13 July Mr Ian Buchhorn was removed as a director of the Company. On 22 July 2016 the Company announced that Mr Ken Hellsten had been appointed to the Board as a director and Chairman.

REVIEW OF PROJECTS

GCR has a portfolio of projects (Figure 1) diversified by both commodity and geological province, with prospectively demonstrated by regional operating mines and significant deposits. These include:

- Central NSW Porphyry Province Copper/Gold – Copper Hill and Cargo
- South Australian Gawler Craton - Iron Oxide/Copper/Gold (IOCG)
- Cobar Region NSW – Base metals/Gold
- Lachlan VMS Belt NSW – Zinc/Copper/Gold
- Northwest Queensland – Phosphate/Uranium

The portfolio of projects has been reduced by divestments over the past year, and discussions continue with several parties interested in acquiring or farming-in to some of the remainder. Changes in administration of exploration in NSW since 1 July 2015 have seen a large increase in documentation requirements for explorers.

Details of the current projects are included in the Mineral Tenements Table at the end of this report.

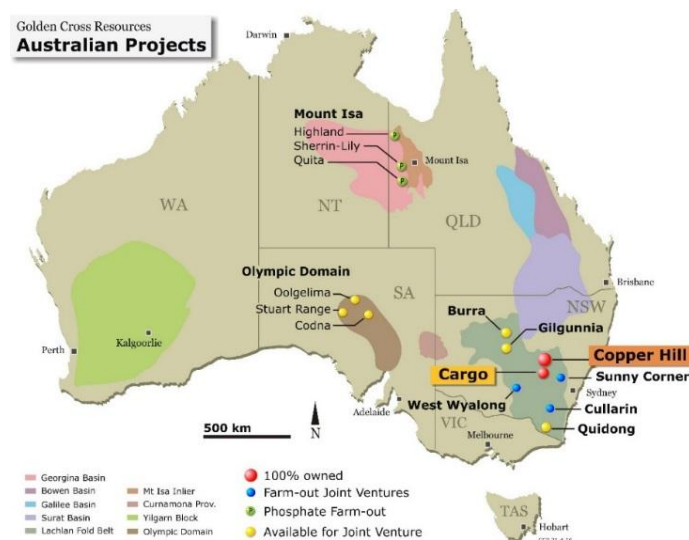

Figure 1: GCR Projects Status Map

Copper Hill

GCR 100%

Copper Hill is located 50 kilometres north of the Cadia Valley Project, which is one of Australia's largest producing goldmines. Porphyry copper-gold deposits of the Copper Hill area occur within the same Ordovician-age volcanic belt that hosts Cadia-Ridgeway and on the northern edge of corridor formed by the WNW-trending Lachlan Transverse Zone (Figure 2).

Following completion of a resource update in March 2015 (refer GCR 25 March 2015), the Company has continued to focus on components of the April 2015 Copper Hill Scoping Study (refer GCR ASX 15 April 2015) and activities required to progress permitting for an eventual mining project.

In 2015 the NSW Government announced New Frontiers Co-operative Drilling Round 2, providing grants to explorers to co-fund drilling programs according to criteria including frontier regions, areas under significant cover, and new geological concepts. Applications closed on 29 April 2016 and outcomes are expected at the end of July 2016. Golden Cross made two submissions on the basis of new concepts. At Copper Hill evaluation of previous geological and geochemical data led to identification of a possible skarn horizon west of the main porphyry zones which formed the basis of one submission, with the second relating to the Cargo project (see below).

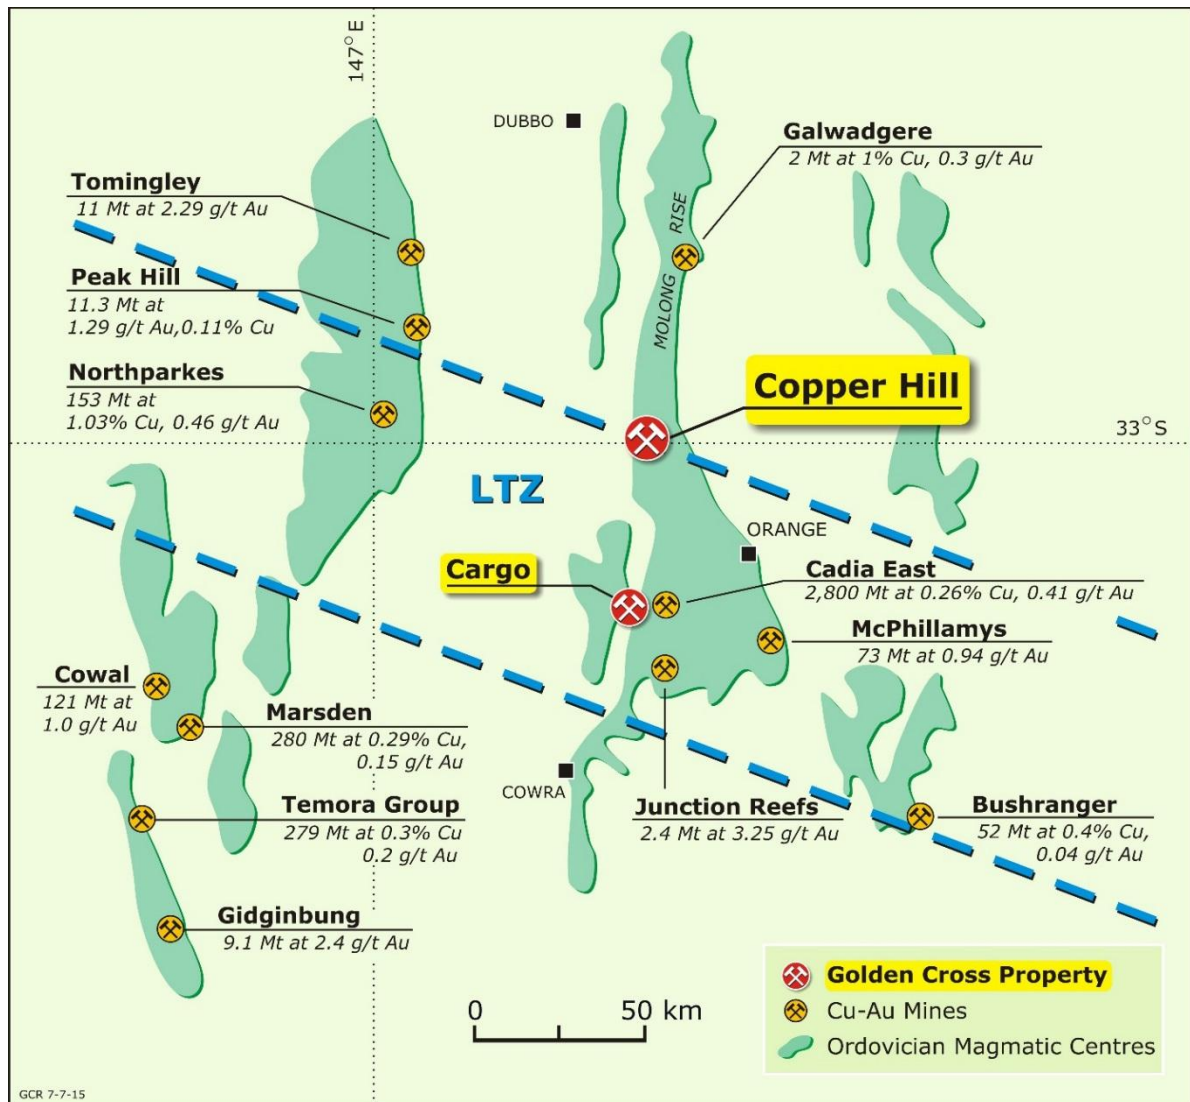

Figure 2: Copper Hill & Cargo on NSW Porphyry Provinces

Cargo GCR 100%

Cargo is situated 12 kilometres west of the Cadia Valley gold-copper mining operations of Newcrest Ltd (Figure 2), in a similar geological setting. Middle to Late Ordovician andesite volcanics and volcanoclastic rocks are intruded by dacite porphyry, magmatic-hydrothermal breccia, micromonzonite and radial veins mined historically for gold (and the probable source of eluvial gold).

Gold resources have previously been reported for the Cargo Spur-Dalcoath lode system to JORC 2004 compliance (refer GCR ASX 21 May 2012). There is potential for further near-surface gold resources on the remaining 14 identified quartz-sulphide lode systems. Drilling of the central porphyry in 2008 returned long low-grade copper intercepts to a depth of approximately 300 metres, and a conceptual deep target was developed by CMC Consultants based on mineralogical modelling (Figure 3), which became the basis for a second submission for co-funding under New Frontiers Round 2.

Figure 3: Cargo Conceptual Model [Corbett Menzies Cunliffe Consultants 2016]

South Australia Iron Ore Copper-Gold (IOCG) GCR 100%

In South Australia several magnetic / gravity targets have been identified by GCR geophysicists. Three have been prioritised for drilling in 2016, subject to the availability of funding, after encouraging results from the 2013 drill program. The targets are located at the north-western end of the interpreted structural corridor that contains significant copper-gold deposits at Carrapateena, Olympic Dam, Prominent Hill and Cairn Hill (Figure 4).

Activity in the region has increased in response to SA Government initiatives (PACE Drilling & PACE Copper), and Golden Cross received approval for a drilling subsidy of up to \$60,000 for drilling of the three holes. Planning and approval processes are underway for the next stage of drilling.

Approaches continue to be received from parties interested in farming in to these properties.

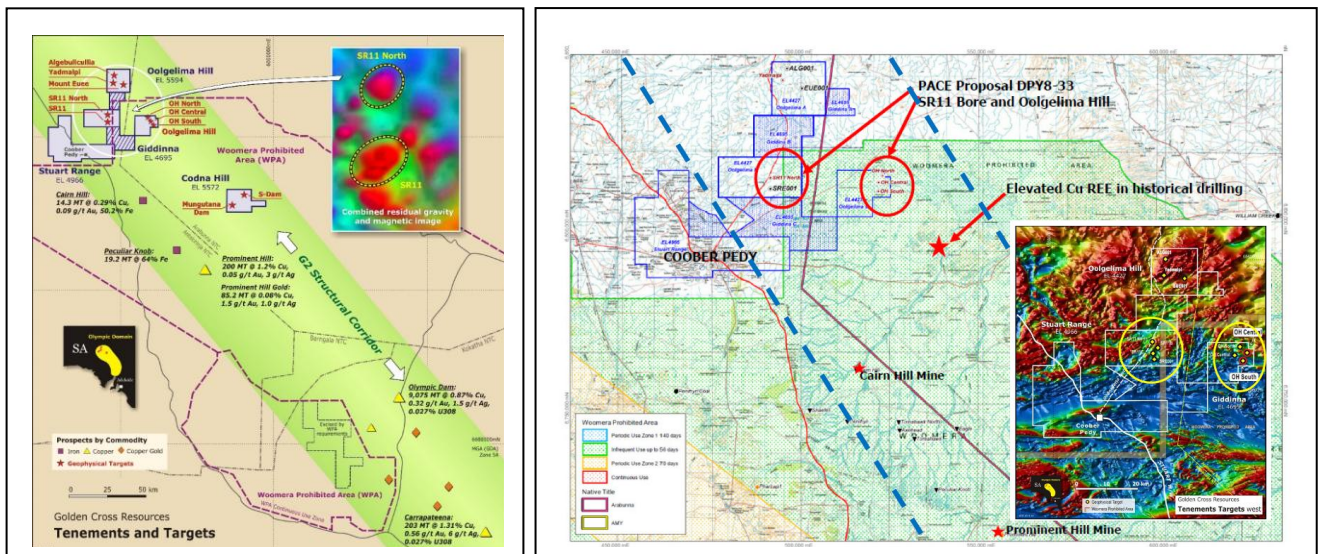

Figure 4: Gawler Craton Projects: Location & Drill Targets
(inset shows targets on magnetic image)

COBAR REGION

Canbelego Group & Gilgunnia Group GCR 100%

The Cobar region is well endowed with high grade polymetallic deposits supporting long life mining operations. GCR has a small holding of strategically located tenements remaining in two areas of the region after divestments during 2015-16.

- **Canbelego** – along strike from Mt Boppy Goldmine
- **Gilgunnia** – along strike from Aurelia Metals Limited's Hera gold/base metal deposit and surrounding Peel Mining's high grade copper discovery at Mallee Bull.

The Canbelego and Gilgunnia tenements are available for farm-in.

LACHLAN VMS PROVINCE

Silurian formations prospective for volcanic associated massive sulphide deposits extend over 300km from the Orange-Bathurst region in the north through Woodlawn and Captain's Flat and southwards into eastern Victoria. GCR has three projects in this region:

- **Quidong**
GCR 100%
Quidong has extensive occurrences of carbonate-hosted zinc/lead and gold mineralisation, and potential intrusive related gold mineralisation, which occurs elsewhere in the region. Previous data and GCR field reconnaissance have identified high grade zinc-lead-gold drill targets which remain to be tested. This project is available for farm-in.
- **Sunny Corner**
JV with Argent Resources Ltd. GCR 30%
No activity reported by JV partner.
- **Cullarin**
JV with Heron Resources Ltd. GCR 21.1%
During the quarter Heron lodged a renewal application for EL7954.

OTHER JOINT VENTURES

West Wyalong

Argent Minerals Ltd 51%, GCR 49%

The previous tenements were consolidated into one, with the granting of EL8340 from 20 April 2016. Argent continues to define exploration targets using IP surveys (refer Argent ASX 29 June 2016 – "Investor Presentation").

Isa Phosphate JV

Paradise Phosphate Ltd 80%, GCR 20%

Golden Cross subsidiary King Eagle Resources Ltd has a 20% free carried interest in three phosphate deposits within the project, and 100% interest in all minerals other than phosphate.

Following press reports subsequent to quarter end, GCR became aware that a Receiver and Manager had been appointed to Paradise Phosphate Ltd in March 2016. The Company is clarifying the effect of this on the JV.

Notes

(1) EL/ELA = Exploration Permit/Licence/Application; EPM = Exploration Permit for Metals

(2) Full names for abbreviations are as follows:

ARD Argent Minerals Limited (ASX: ARD)

GCO Golden Cross Operations Pty Ltd, a wholly owned subsidiary of GCR

KER King Eagle Resources Pty Limited, a wholly owned subsidiary of GCR

TRO TriAusMin Minerals Limited, a wholly-owned subsidiary of Heron Resources Limited (ASX:HRR)

GCRP GCR Panama, Inc, a wholly owned subsidiary of GCR

MTI MapIntec Technologies Inc.

(3) TriAusMin (a subsidiary of Heron Resources Ltd since August 2014) earned an initial 62.5% interest by spending \$200,000 to 13 September 2010. Further expenditure by TRO has increased TRO's interest to 78.9% and diluted GCO's interest to 21.1%.

(4) ARD initially earned 51% in the Sunny Corner Joint Venture by spending \$500,000 by 1 June 2011 in Stage 1. It earned 70% by additional expenditure of \$186,000 by July 2013 (for a total expenditure of \$686,000).

(5) ARD earned 51% in the West Wyalong Joint Venture by spending \$750,000 by 1 June 2011. ARD may earn a further 19% to total 70% by additional expenditure of \$600,000 (for a total expenditure of \$1,350,000) by June 2017. Royal Gold Inc. holds a 2.5% net smelter return.

(6) PPO (as assignee from Legend International Holdings Inc.) earned 80% interest (in phosphate minerals only) by spending \$3,000,000 by 7 December 2012, leaving KER with 20% free carried interest. KER has 100% rights to all other minerals and is free carried to a decision to mine for phosphate.

(7) MapIntec Technologies Inc., a Panamanian company, has a 10% interest free carried to a decision to mine.

The Production Target and the Mineral Resources on which it is based are extracted from reports released to the market by GCR on 24 March 2015 and 15 April 2015. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the production target in the report dated 15 April 2015 continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Forward-Looking Statements: This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "estimate," "expect," "intend," "may," "potential," "should," and similar expressions are forward-looking statements. Although Golden Cross Resources Limited believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.

Compliance Statement: The information in this report that relates to Exploration Results is based on information compiled by Mr Bret Ferris, who is a Member of the Australasian Institute of Geoscientists (AIG). Mr Ferris a consultant to Golden Cross Resources Limited, and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Ferris consents to the inclusion in the report of the matters based on this information in the form and context in which it appears.

1.22	Cash at end of quarter	112	112

Payments to directors of the entity, associates of the directors, related entities of the entity and associates of the related entities

		Current quarter \$A'000
1.23	Aggregate amount of payments to the parties included in item 1.2	74
1.24	Aggregate amount of loans to the parties included in item 1.10	Nil

1.25 Explanation necessary for an understanding of the transactions

Payment of directors' fees, entitlements and expenses..

+ See chapter 19 for defined terms.

Non-cash financing and investing activities

- 2.1 Details of financing and investing transactions which have had a material effect on consolidated assets and liabilities but did not involve cash flows

Nil

- 2.2 Details of outlays made by other entities to establish or increase their share in projects in which the reporting entity has an interest

Financing facilities available

Add notes as necessary for an understanding of the position.

	Amount available \$A'000	Amount used \$A'000
3.1 Loan facilities	320	320
3.2 Credit standby arrangements	Nil	Nil

Estimated cash outflows for next quarter

	\$A'000
4.1 Exploration and evaluation	125
4.2 Development	-
4.3 Production	-
4.4 Administration	125
Total	250

Reconciliation of cash

Reconciliation of cash at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts is as follows.

	Current quarter \$A'000	Previous quarter \$A'000
5.1 Cash on hand and at bank	63	49
5.2 Deposits at call	75	100
5.3 Bank overdraft	-	-
5.4 Other (Short Term Deposits) (<120 days)	-	-
Total: cash at end of quarter (item 1.22)	112	149

+ See chapter 19 for defined terms.

Changes in interests in mining tenements and petroleum tenements

	Tenement reference and location	Nature of interest (note (2))	Interest at beginning of quarter	Interest at end of quarter
6.1	Interests in mining tenements and petroleum tenements relinquished, reduced or lapsed			
6.2	Interests in mining tenements and petroleum tenements acquired or increased			

Issued and quoted securities at end of current quarter

Description includes rate of interest and any redemption or conversion rights together with prices and dates.

	Total number	Number quoted	Issue price per security (see note 3) (cents)	Amount paid up per security (see note 3) (cents)
7.1	Preference			
	*securities			
	<i>(description)</i>			
7.2	Changes during quarter			
	(a) Increases through issues			
	(b) Decreases through returns of capital, buy-backs, redemptions			
7.3	*Ordinary securities	101,622,227	101,622,227	Various
7.4	Changes during quarter			
	(a) Increases through issues			
	(b) Decreases through returns of capital, buy-backs			
7.5	*Convertible debt securities			
	<i>(description)</i>			

+ See chapter 19 for defined terms.

Mining exploration entity and oil and gas exploration quarterly report

7.6	Changes during quarter (a) Increases through issues (b) Decreases through securities matured, converted				
7.7	Options (description and conversion factor)	250,000	250,000		
7.8	Issued during quarter				
7.9	Exercised during quarter				
7.10	Expired during quarter				
7.11	Debentures (totals only)				
7.12	Unsecured notes (totals only)				

Compliance statement

1 This statement has been prepared under accounting policies which comply with accounting standards as defined in the Corporations Act or other standards acceptable to ASX (see note 4).

2 This statement gives a true and fair view of the matters disclosed.

Name: Carl Hoyer, Company Secretary

Date: 29 July 2016

+ See chapter 19 for defined terms.

Notes

1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.

2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.

3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.

4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.

5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
