

RALEIGH FINLAYSON MANAGING DIRECTOR

Saracen

Diggers & Dealers Mining Forum August 2016

Qualification

This presentation has been prepared by Saracen Mineral Holdings Limited (Saracen or the Company) based on information from its own and third party sources and is not a disclosure document. No party other than the Company has authorised or caused the issue, lodgement, submission, despatch or provision of this presentation, or takes any responsibility for, or makes or purports to make any statements, representations or undertakings in this presentation.

You should be aware that as an Australian company with securities listed on the ASX, the Company is required to report reserves and resources in Australia in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (The JORC Code 2012 Edition) ("JORC Code"). You should note that while the Company's reserve and resource estimates comply with the JORC Code, they may not comply with the relevant guidelines in other countries.

This is a presentation about geology, geoscientific interpretation, geoscientific speculation, gold deposits, gold potential, engineering, infrastructure, potential values, costs, risks, and related matters pertinent to Saracen's present and future activities as a publicly listed mineral exploration and production company. It includes forecasts, predictions, targets and estimates of future expenditures which may vary over time.

It is uncertain if further exploration will result in the determination of a Resource or Reserve. Where exploration, operational and feasibility study expenditure estimates and budgets amounts are presented herein, ongoing prioritisation and scaling of expenditures will be subject to results and, where applicable, scheduling changes. Targeted production and other outcomes are subject to change, and may not eventuate, depending on the results of ongoing performance and assessment of data. All Reserves and Resources as referred to herein are in accordance with the JORC Code. Refer to last slide of this presentation for the relevant Competent Person statements. Resources are inclusive of Reserves.

Certain statements contained in the Presentation Materials, including information as to the future financial or operating performance of the Company and its projects, are forward looking statements. Such forward looking statements:

- a) are necessarily based upon a number of estimates and assumptions that, while considered reasonable by the Company, are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies;
- b) involve known and unknown risks and uncertainties that could cause actual events or results to differ materially from estimated or anticipated events or results reflected in such forward looking statements; and
- c) may include, among other things, statements regarding estimates and assumptions in respect of prices, costs, results and capital expenditure, and are or may be based on assumptions and estimates related to future technical, economic, market, political, social and other conditions.

The Company disclaims any intent or obligation to publicly update any forward looking statements, whether as a result of new information, future events or results or otherwise. The words "believe", "expect", "anticipate", "indicate", "contemplate", "target", "plan", "intends", "continue", "budget", "estimate", "may", "will", "schedule" and similar expressions identify forward looking statements.

All forward looking statements contained in the Presentation Materials are qualified by the foregoing cautionary statements. Recipients are cautioned that forward looking statements are not guarantees of future performance and accordingly recipients are cautioned not to put undue reliance on forward looking statements due to the inherent uncertainty therein. The Presentation Materials do not purport to be all inclusive or to contain all information about the Company.

This presentation is not a prospectus, disclosure document or other offering document under Australian law or under any other law. It is provided for information purposes and is not an invitation nor offer of shares for subscription, purchase or sale in any jurisdiction.

Take care to question and carefully evaluate any judgments you might make, on the basis of the Presentation Materials, as to the value of Saracen and its securities. This presentation is not intended to provide the sole or principal basis of any investment or credit decision or any other risk evaluation and may not be considered as a recommendation by Saracen or its officers. Any investor reading the Presentation Materials should determine its interest in acquiring securities in Saracen on the basis of independent investigations that it considers necessary, prudent or desirable.

Saracen and its officers do not accept any liability for any loss or damage suffered or incurred by any investor or any other person or entity however caused (including negligence) relating in any way to this presentation including, without limitation, the information contained in it, any errors or omissions however caused by any other person or entity placing any reliance on the Presentation Materials, its accuracy or reliability.

Substantial shareholders

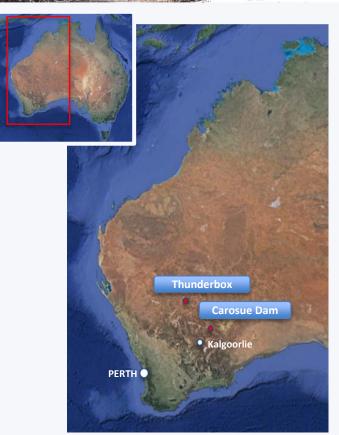

^{*} Australian dollars converted at an exchange rate of A\$0.75 per \$1US

Australia's newest mid-tier gold miner

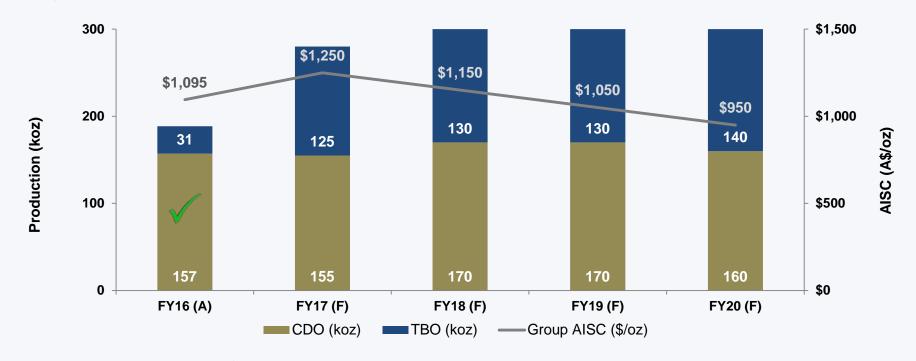

- Production to hit ~300kozpa by the June Q 2017, AISC declining to A\$950/oz in FY20, driving substantial increases in cash-flow
- Two operational centres in Western Australia:
 - Carosue Dam (NE of Kalgoorlie) Outstanding operational track record, multiple high-margin underground mines, ~160-170koz pa
 - Thunderbox (SE of Leinster) Acquired from Norilsk, largescale simple open pit, ~130-140koz pa, multiple growth opportunities including bulk underground mining potential and high grade "sweeteners"
- Large endowment **7.6Moz** Resources, **1.5Moz** Reserves
- A\$42m exploration budget: Aimed at growing production and mine life, supported by outstanding new drill results

Plan the mine, mine the plan

Five-year production outlook (83% classified as Reserves)

Note - Refer to the ASX announcement dated 27th July 2016 – "Tripling of exploration budget to grow production and life"

More than meets the eye...

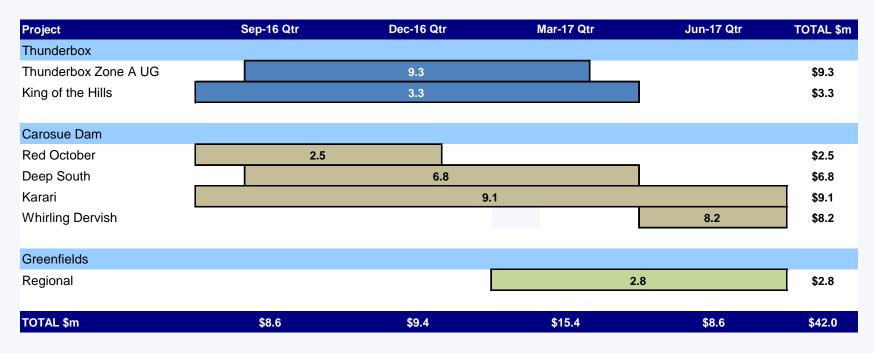

- ▶ Deposits discovered within last 30 years (v ~100 years Goldfields)
- ➤ Average depth of SAR underground mines ~350m (v peers ~680m)
- ► FY17 exploration budget **A\$42m** (v A\$25m over the past 2 years)
- ► All deposits open at depth and along strike

Backed in by an A\$42M drilling investment in FY17

Tripling of exploration budget

Judicious allocation of capital

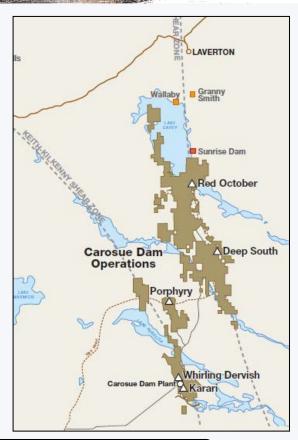

Recent discovery costs have been sub-A\$10/oz e.g. Karari underground

Carosue Dam - Overview

- 2.4Mtpa CIL plant, operated since 2010
- FY17 outlook 155koz
- Ore sources include:
 - Karari Shallow, multiple lodes, growing discovery next to the plant, open in all directions
 - Deep South Shallow, stoping underway, open in all directions
 - Red October Small volume / high grade "sweetener", reinvigorated exploration effort underway targeting extensions and repeats
 - Ore stockpile ~32koz contained, mining cost sunk
- Outstanding exploration upside Extensive tenement holding in world-class ~23Moz Laverton District, 180km strike length of two key regional structures

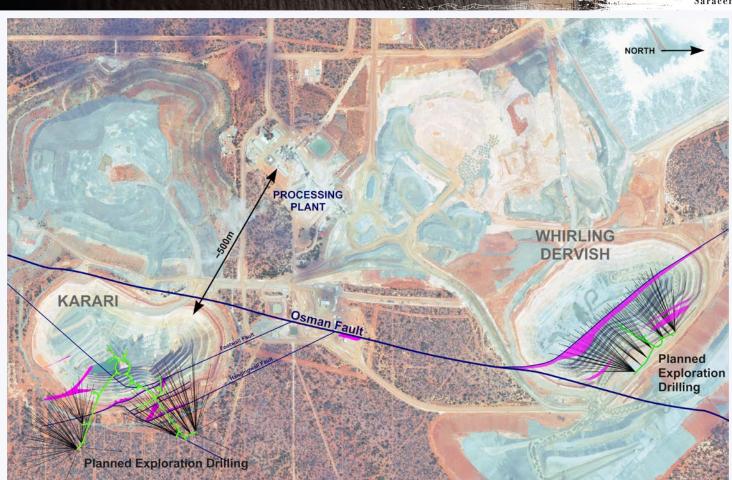

Carosue Dam – We have baseload!

Underwritten by growth deposits:

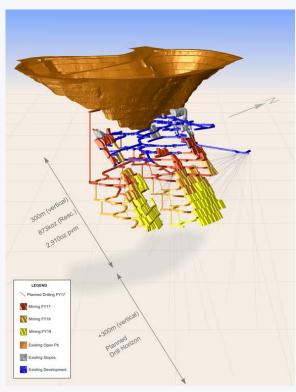

- Highly productive Karari UG mine
 500m from the mill
- Whirling Dervish UG option (technically advanced, permitted)
 <1km from the mill
- Plus 32koz stockpile At the mill
- Augmented by higher grade Deep South
 80km from the mill

Carosue Dam – Drill momentum

Karari

Aggressive drilling

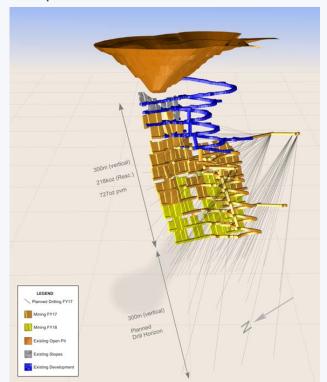

Dedicated drill platforms installed with "shelf life"

Recent drill results include:

16.6m @ 8.2g/t 27.7m @ 6.1g/t 19.0m @ 4.6g/t 6.0m @ 11.2g/t 16.0m @ 4.3g/t 24.0m @ 3.9g/t 27.6m @ 2.5g/t

Open at depth and along strike

Deep South

Aggressive drilling

Dedicated drill platforms planned with "shelf life"

Deepest hole i.e. 18m @ 7.4g/t (outside the Reserve) commands follow-up

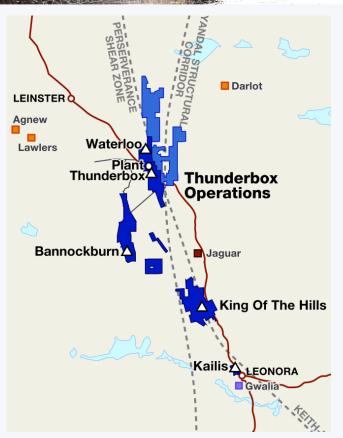

32,000m drilling planned for FY17

Open at depth and along strike

Thunderbox – We've only just begun

- Developed ahead of schedule and under budget
- 2.5Mtpa CIL plant, A\$63m pre-production capex invested
- Stage 1 open pit 596koz contained, ~A\$1000/oz AISC (US\$750/oz), 4-5 year mine life
- Fixed price contracts cover ~50% diesel usage over next two years (A\$0.62/litre v Feasibility Study A\$0.90)
- Multiple growth opportunities beyond the initial open pit:
 - Bulk UG potential Open down-plunge, deepest hole 55m @
 3.0g/t Au, Feasibility Study underway (AMC Consultants)
 - KOTH high grade Drilling and mining commenced
 - Kailis high grade 3.0g/t open pit, AISC A\$880/oz
 - Thunderbox D Zone Near surface northern cut-back

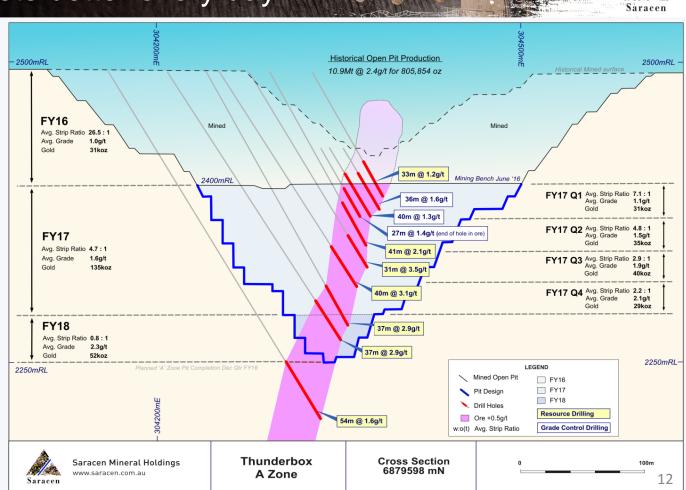

Thunderbox – Gets better every day

Simple, robust open pit:

- A Zone
- High productivity, low cost
- Top down method (no pit staging)
- As the mine progresses:

Strip ratio falls (waste:ore)
Grade rises
AISC falls
Cash flow increases dramatically

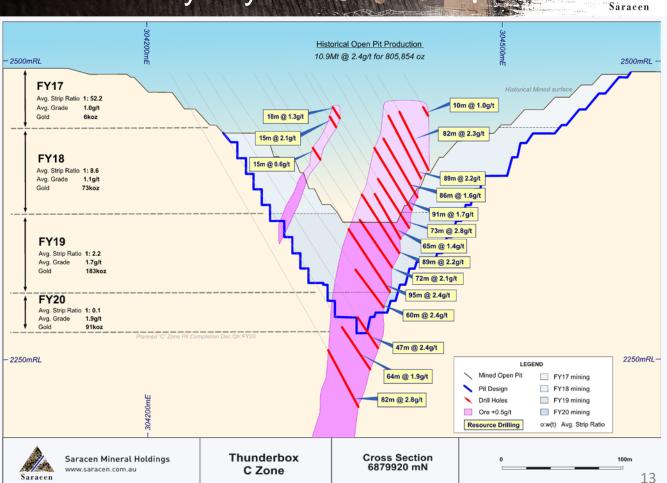

Thunderbox – Gets better every day

Gets better with depth:

Ditto C Zone

i.e. AISC falls and cash flow increases dramatically as the mine progresses

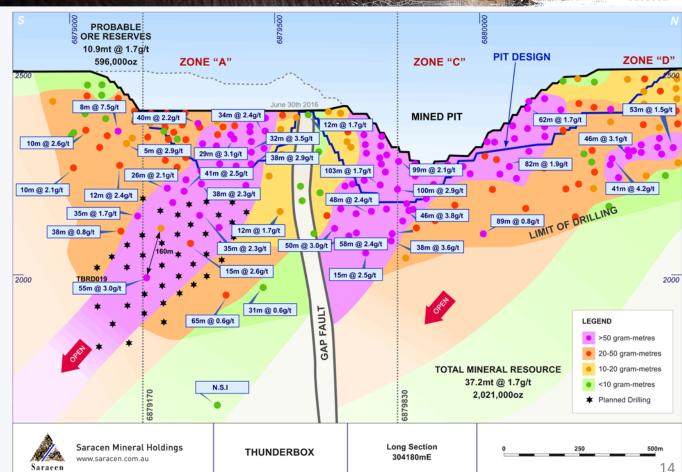

Thunderbox – Drilling the next chapter V

Potential >10 year mine life:

- +30,000m drilling to commence Sep Q 2016
- Targeting down-plunge A Zone
- Follow-up rich hole 55m @ 3.0g/t (TBDR019)
- Drilling will aim to define a multi-year bulk underground mine

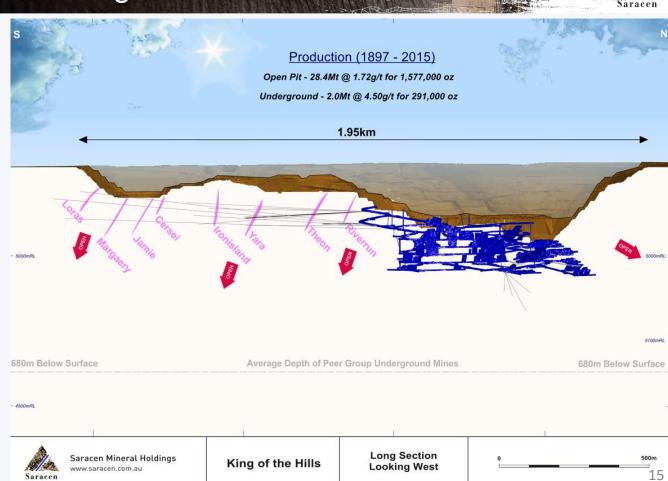

Thunderbox growth – King of the Hills

Sleeping giant... awakens:

- Mining and drilling underway
- Very large mineralised system
- Plethora of early high grade drill results (estimated true width in brackets):
 - 14.8m @ 29.1g/t (10.2m)
 - 12.7m @ 11.6g/t (2.5m)
 - 6.4m @ 21.9g/t (1.5m)
 - 1.4m @ 30.1g/t (0.8m)
 - 4.4m @ 10.0g/t (2.5m)
 - 2.0m @ 44.1g/t (1.0m)
 - 4.0m @ 27.9g/t (2.0m)
 - 0.6m @ 41.2g/t (0.3m)
 - 0.6m @ 52.0g/t (0.5m)
 - 0.4m @ 43.0g/t (0.4m)
 - 1.4m @ 30.3g/t (1.4m)
 - 0.4m @ 71.3g/t (0.4m)

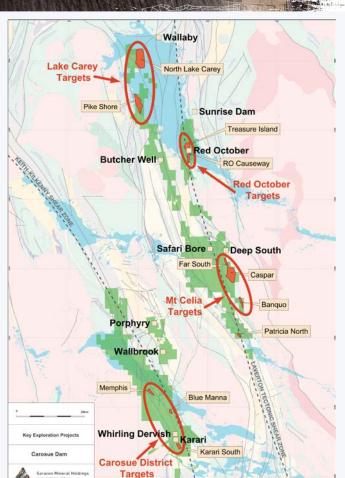

Carosue Dam - Exploration upside

Land of opportunity:

- Two high quality structural zones
- Limited exploration budget in recent years due to focus on Thunderbox development...
- ...enabled the technical knowledge to prepare and de-risk an aggressive campaign
- Multiple high quality targets systematically ranked
- Drilling already in full swing

Carosue Dam – Exploration upside

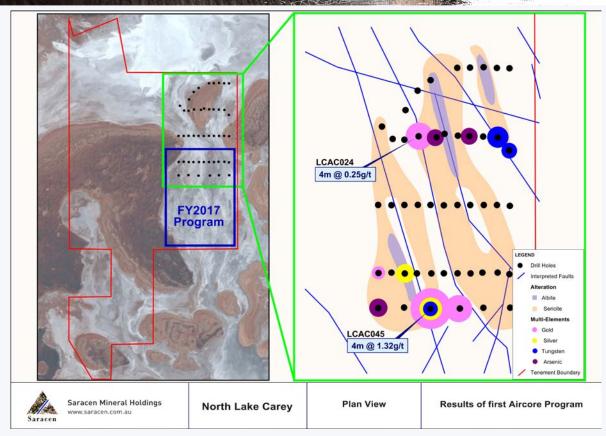

North Lake Carey... in the purple circle:

- Neighbours (AngloGold, Goldfields, Dacian) are extremely active
- With good reason!

Wallaby +8Moz Sunrise Dam +10Moz Granny Smith +2Moz Mt Morgans +3Moz, growing

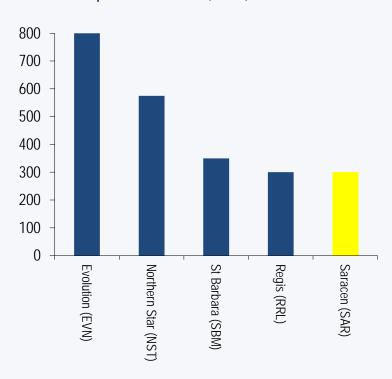

- Looking for the next big one
- SAR drilling in June half FY17

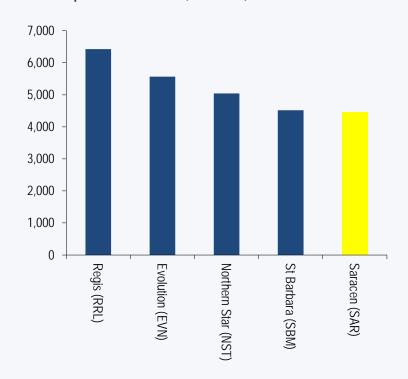

Relative value

Annual production (koz)

EV / production (A\$/oz)

Saracen is a progressive business

	From	to
Delivery	Met or exceeded guidance 4 years straight	Meeting or exceeding guidance
Operating cash flow	FY16A A\$110m (unaudited)	Consensus FY17F A\$180m*
Production	~150koz pa from 1 operation	>300koz pa from 2 operations
Balance sheet	Retired debt, internally funded Thunderbox	Putting cash on balance sheet
Growth	Thunderbox OP, two new UG mines	Thunderbox UG, KOTH etc
Returns	Much improved	Consistent TSR outperformance
Share register	Australian-centric	Global
Exploration	Minimal	Trebled!

^{*} Based on 7 brokers with FY17 consensus production of 297koz and gold price of A\$1834/oz

APPENDIX A – Competent persons

Competent Persons Statements

The information on Mineral Resources and Ore Reserves has been extracted from the ASX announcements titled "2015 Mineral Resources and Ore Reserves" dated 15 October 2015, and "Resource and Reserve upgrade, Carosue Dam set for long life" dated 13 April 2016. These reports are available to view on the ASX Website at www.asx.com.au and on the Company's website at www.saracen.com.au. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources and Ore Reserves, that all market assumptions and technical assumptions underpinning the estimates in the relevant market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

The information in the report to which this statement is attached that relates to Exploration Results and Mineral Resources related to Gold is based upon information compiled by Mr Daniel Howe, a Competent Person who is a member of The Australasian Institute of Mining and Metallurgy and the Australian Institute of Geoscientists. Daniel Howe is a full-time employee of the company. Daniel Howe has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Daniel Howe consents to the inclusion in the report of matters based on his information in the form and context in which it appears.

The information in the report to which this statement is attached that relates to Exploration Results and Mineral Resources related to Nickel is based upon information compiled by Mr Lynn Widenbar, a Competent Person who is a member of The Australasian Institute of Mining and Metallurgy. Lynn Widenbar is a consultant to Saracen Mineral Holdings. Lynn Widenbar has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Lynn Widenbar consents to the inclusion in the report of matters based on his information in the form and context in which it appears.

The information in the report to which this statement is attached that relates to underground Ore Reserves at Red October, Deep South, Karari and Whirling Dervish is based upon information compiled by Stephen King, a Competent Person who is a member of The Australasian Institute of Mining and Metallurgy. Stephen King is a full-time employee of the company. Stephen King has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Stephen King consents to the inclusion in the report of matters based on his information in the form and context in which it appears.

The information in the report to which this statement is attached that relates to all open pit Ore Reserves relating to Gold based upon information compiled by Christopher Burton, a Competent Person who is a member of The Australasian Institute of Mining and Metallurgy. Christopher Burton is a full-time employee of the company. Christopher Burton has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Christopher Burton consents to the inclusion in the report of matters based on his information in the form and context in which it appears.
