About Elemental Minerals Limited

Elemental Minerals Limited (ASX: ELM) is an advanced stage mineral exploration and development company whose primary asset is 97%-owned Sintoukola Potash SARL (SP) in the RoC. SP holds 100% ownership of the Sintoukola Exploration Permit and 100% of the Kola Mining Lease, within which the Kola, Dougou and Dougou Extension (formerly Yangala) Projects are located.

These properties are easily accessed, being located approximately 80km to the north of the city of Pointe Noire. The Projects have the potential to be among the world's lowest-cost potash producers and their location near the Congolese coast of Central West Africa offers a transport cost advantage to key Brazilian and Asian fertilizer markets. The three projects are at varying stages of development; the Kola sylvinitic Project is the Company's lead project.
