

Company Update

October 2016

Nature of this document: The purpose of this presentation is to provide general information about Antipa Minerals Limited (the 'Company'). Unless otherwise stated herein, the information in this presentation is based on the Company's own information and estimates. In attending this presentation or viewing this document you agree to be bound by the following terms and conditions.

Not an offer: This presentation is for information purposes only and does not constitute or form any part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, any securities in the Company in any jurisdiction. This presentation and its contents must not be distributed, transmitted or viewed by any person in any jurisdiction where the distribution, transmission or viewing of this document would be unlawful under the securities or other laws of that or any other jurisdiction. This presentation is not considered a recommendation by the Company or any of its affiliates, directors or officers that any recipient invest in the Company nor does it constitute investment, accounting, financial, legal or tax advice.

Not financial product advice: This presentation does not take into account the individual investment objectives, financial situation and particular needs of each of the Company's Shareholders. You may wish to seek independent financial and taxation advice before making any decision in respect of this presentation. Neither the Company nor any of its related bodies corporate is licensed to provide financial product advice in respect of the Company's securities or any other financial products.

Forward-looking statements: This presentation may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning the Company's planned exploration programme and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "estimate," "expect," "intend," "may," "potential," "should," and similar expressions are forward-looking statements. Although the Company believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.

Disclaimer: No representation or warranty, express or implied, is made by the Company that the material contained in this presentation will be achieved or prove to be correct. Except for statutory liability which cannot be excluded, each of the Company, its directors, officers, employees, advisers and agents expressly disclaims any responsibility for the accuracy, fairness, sufficiency or completeness of the material contained in this presentation, or any opinions or beliefs contained in this document, and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any error or omission there from. The Company is under no obligation to update or keep current the information contained in this presentation or to correct any inaccuracy or omission which may become apparent, or to furnish any person with any further information, unless required to do so by law. Any opinions expressed in the presentation are subject to change without notice. Recipients of this presentation should make their own, independent investigation and assessment of the Company its business, assets and liabilities, prospects and profits and losses, as well as the matters covered in this presentation. Independent expert advice should be sought before any decision based on an assessment of the Company is made.

Unverified information: This presentation may contain information (including information derived from publicly available sources) that has not been independently verified by the Company.

Capital Structure (10 October 2016)

| | |
|--|------------------------|
| Ordinary Shares | 902.8 million |
| Unlisted Options | 96.1 million |
| Current Share Price | A\$0.034 |
| Market Capitalisation | A\$30.7 million |
| 12 month Share Price Range | A\$0.008-A\$0.067 |
| Debt | Nil |
| Cash (30 September 2016) | A\$2.74 million |
| <i>Including Rio Tinto JV funds of \$1.04M</i> | |

Major Shareholders

| | |

Board and Management

Stephen Power
LLB
Executive Chairman

Commercial lawyer with 30 years experience advising participants in the resources industry in Australia and overseas including Africa and South America. Previously a Non-Executive Director of Karoon Gas Australia Ltd. Former external legal advisor to LionOre Mining International.

Roger Mason
BSc (Hons), MAusIMM
Managing Director

Geologist with 29 years resources industry experience involving mining, project, exploration and business development roles covering a range of commodities. Australian and overseas experience including Africa and North America. Former General Manager Geology for LionOre Australia and Norilsk Nickel Australia.

Mark Rodda
BA, LLB
Non-Executive Director

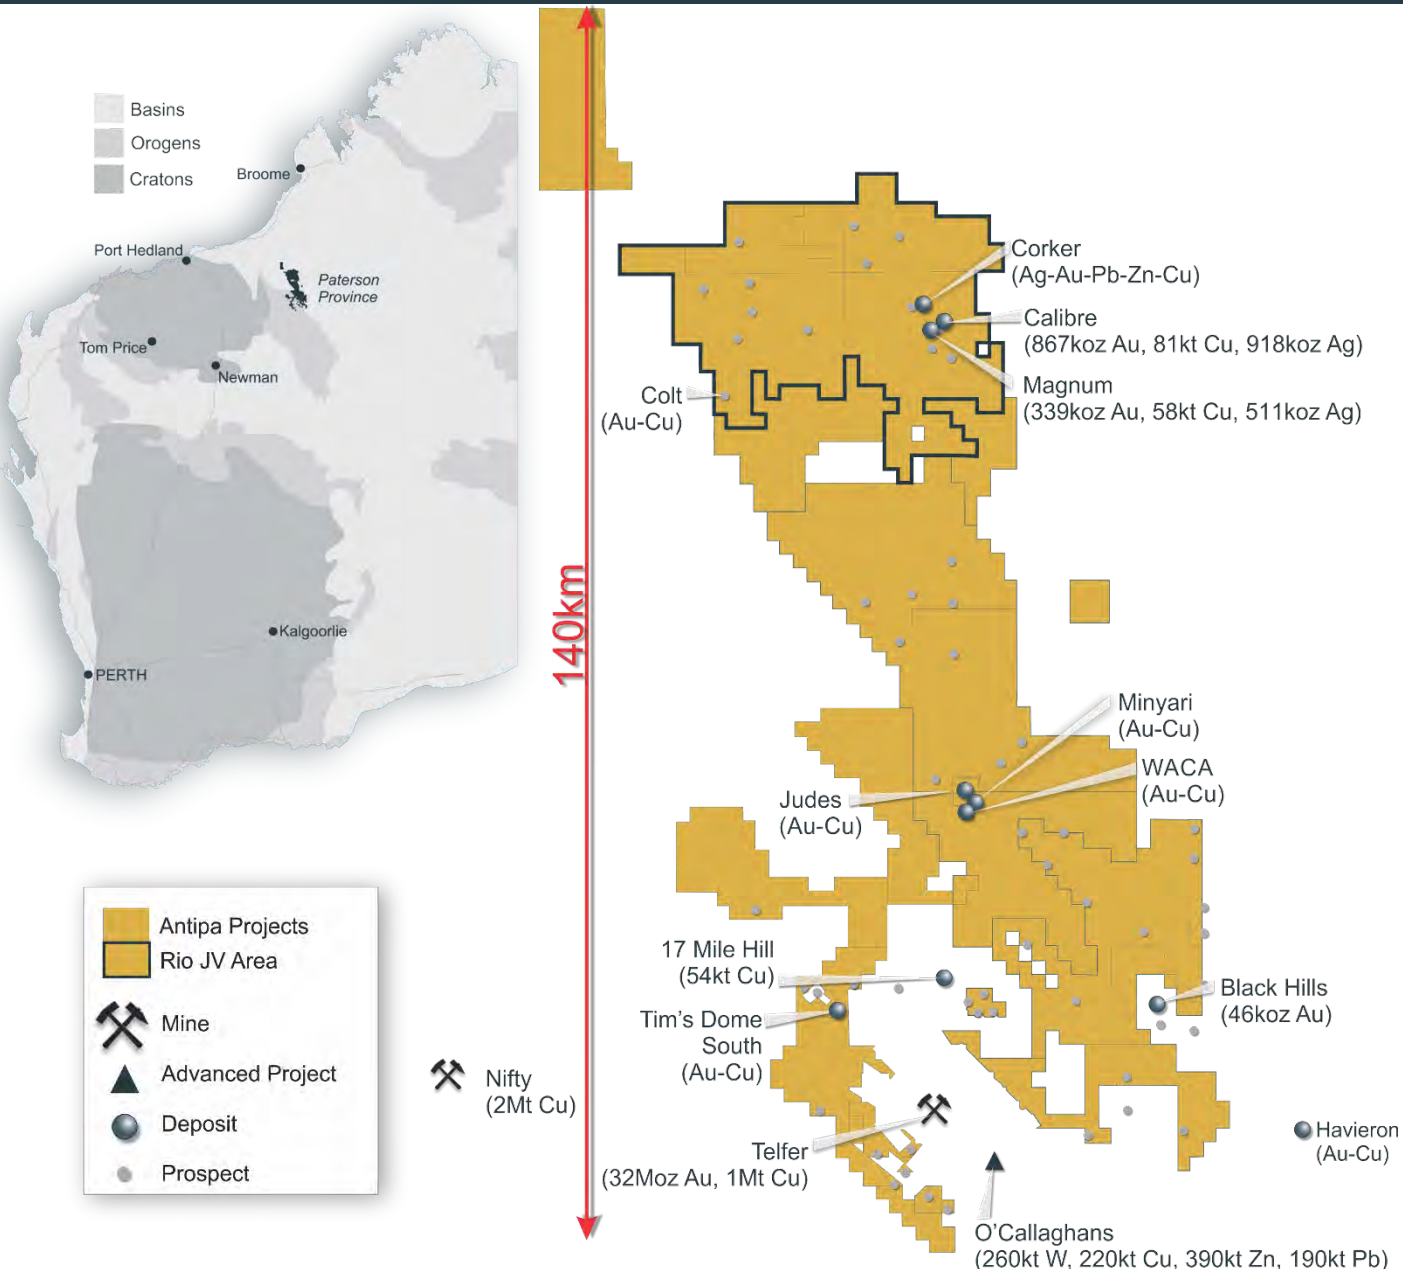

Lawyer with 20 years private practice, in-house legal, corporate secretary and consultancy experience. Extensive experience in the management of acquisitions, financings and restructuring initiatives. Non-Executive Director of Platypus Minerals Ltd. Former Chairman of Coalspur Mines. Former General Counsel and Corporate Secretary for LionOre Mining International.

Peter Buck
MSc, MAusIMM
Non-Executive Director

Geologist with 40 years international exploration and production experience. Associated with the discovery and development of a number of mineral deposits in Australia and Brazil. Non-Executive Director of Independence Group NL. Previous board positions with PMI Gold, Gallery Gold and Breakaway Resources. Former Director - Exploration and Geology for LionOre Australia.

Gary Johnson
MAusIMM, MTMS, MAICD
Non-Executive Director

Metallurgist with 35 years experience as a metallurgist, manager, owner and executive. Former Director of LionOre International related company's Tati Nickel and WMT, which developed and commercialised the Activox technology. Chairman of Platypus Minerals Ltd. Principal of Strategic Metallurgy, Director of Metallurgy Pty Ltd, Lepidico Ltd and St Georges Platinum and Base Metals Ltd. Former Non-Executive Director of both Hard Creek Nickel Corporation and Potash West NL. Former Managing Director of LionOre Technology and Norilsk Nickel Australia.

Large Scale World Class Asset

- Three Large Projects – Citadel, North Telfer and Paterson
- +4,400 km² tenement holding in the underexplored but demonstrated World Class Paterson Province in Western Australia extending to within 3km of Telfer

Medium and Long Term Growth Opportunities

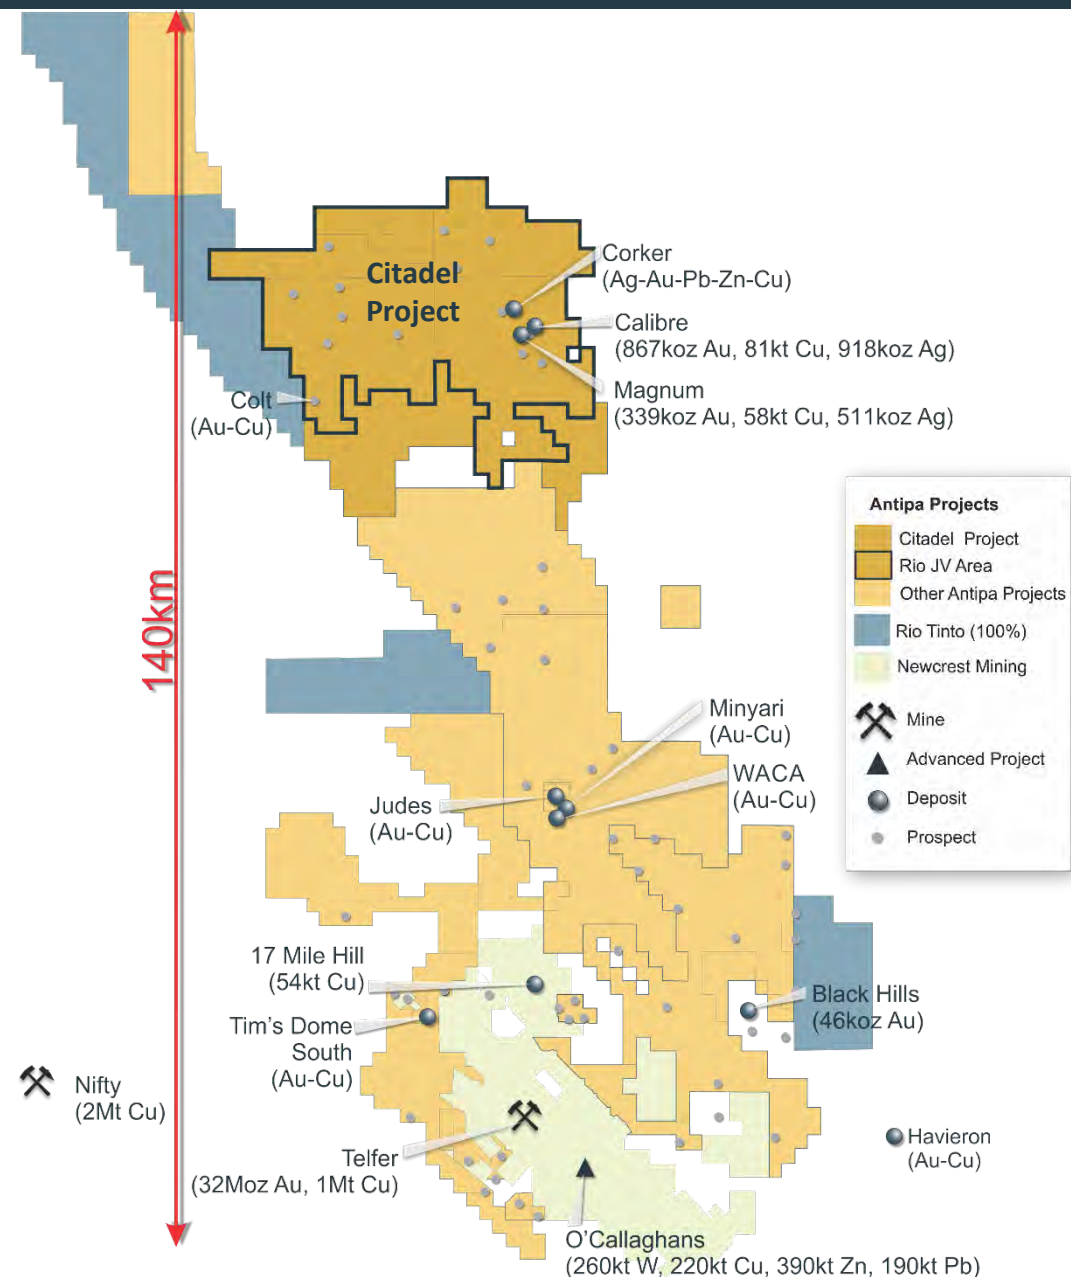

- Citadel Project – Rio Tinto/Antipa focussing on long term Tier 1 discoveries - \$60M Rio Tinto Farm-in for a maximum 75% interest
- North Telfer Project - 100% owned and includes Minyari Deposit which provides immediate exploration and short term development opportunities – shallow, high-grade gold-copper with longer term upside

Experienced Management

- In excess of 150 years of management experience with LionOre Mining International and WMC

Cutting Edge Exploration Techniques

- Rio Tinto IP and other expertise
- VTEM™
- CSIRO – Ultrafine Soil Fractions R&D Project

Citadel Project

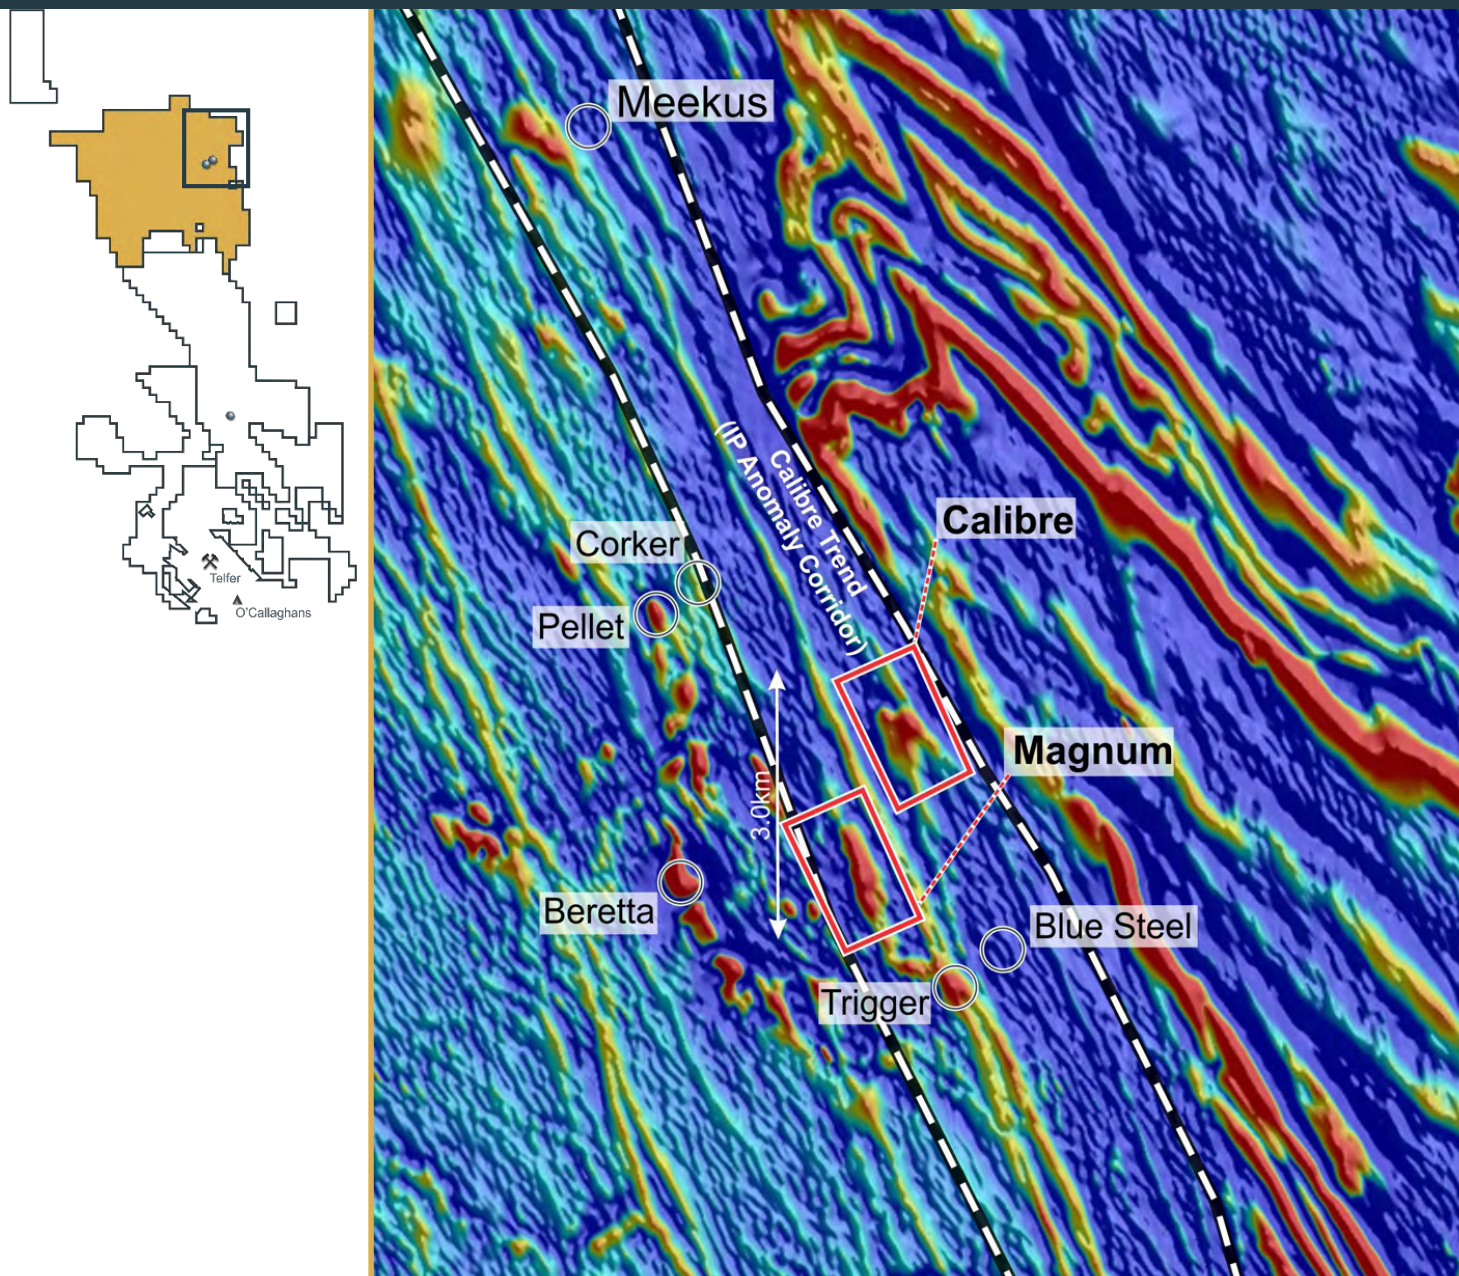

- 1,335km² under-explored region
- Hosts two large mineralised systems – Calibre and Magnum
- Multitude of untested targets

Rio Tinto Farm-in 2015

Rio may fund up to A\$60 million to earn up to a 75% interest in the Citadel Project by incurring the following exploration expenditure

- \$3 million by March 2017
- \$8 million within a further 3 year period to earn a 51% Joint Venture interest
- \$14 million within a further 3 year period to earn a 65% Joint Venture interest
 - Antipa may resume contributions at this stage to retain 35%
- \$35 million within a further 3 year period to earn a 75% Joint Venture interest

Antipa remains the operator during the initial \$3 million expenditure period

Calibre Deposit

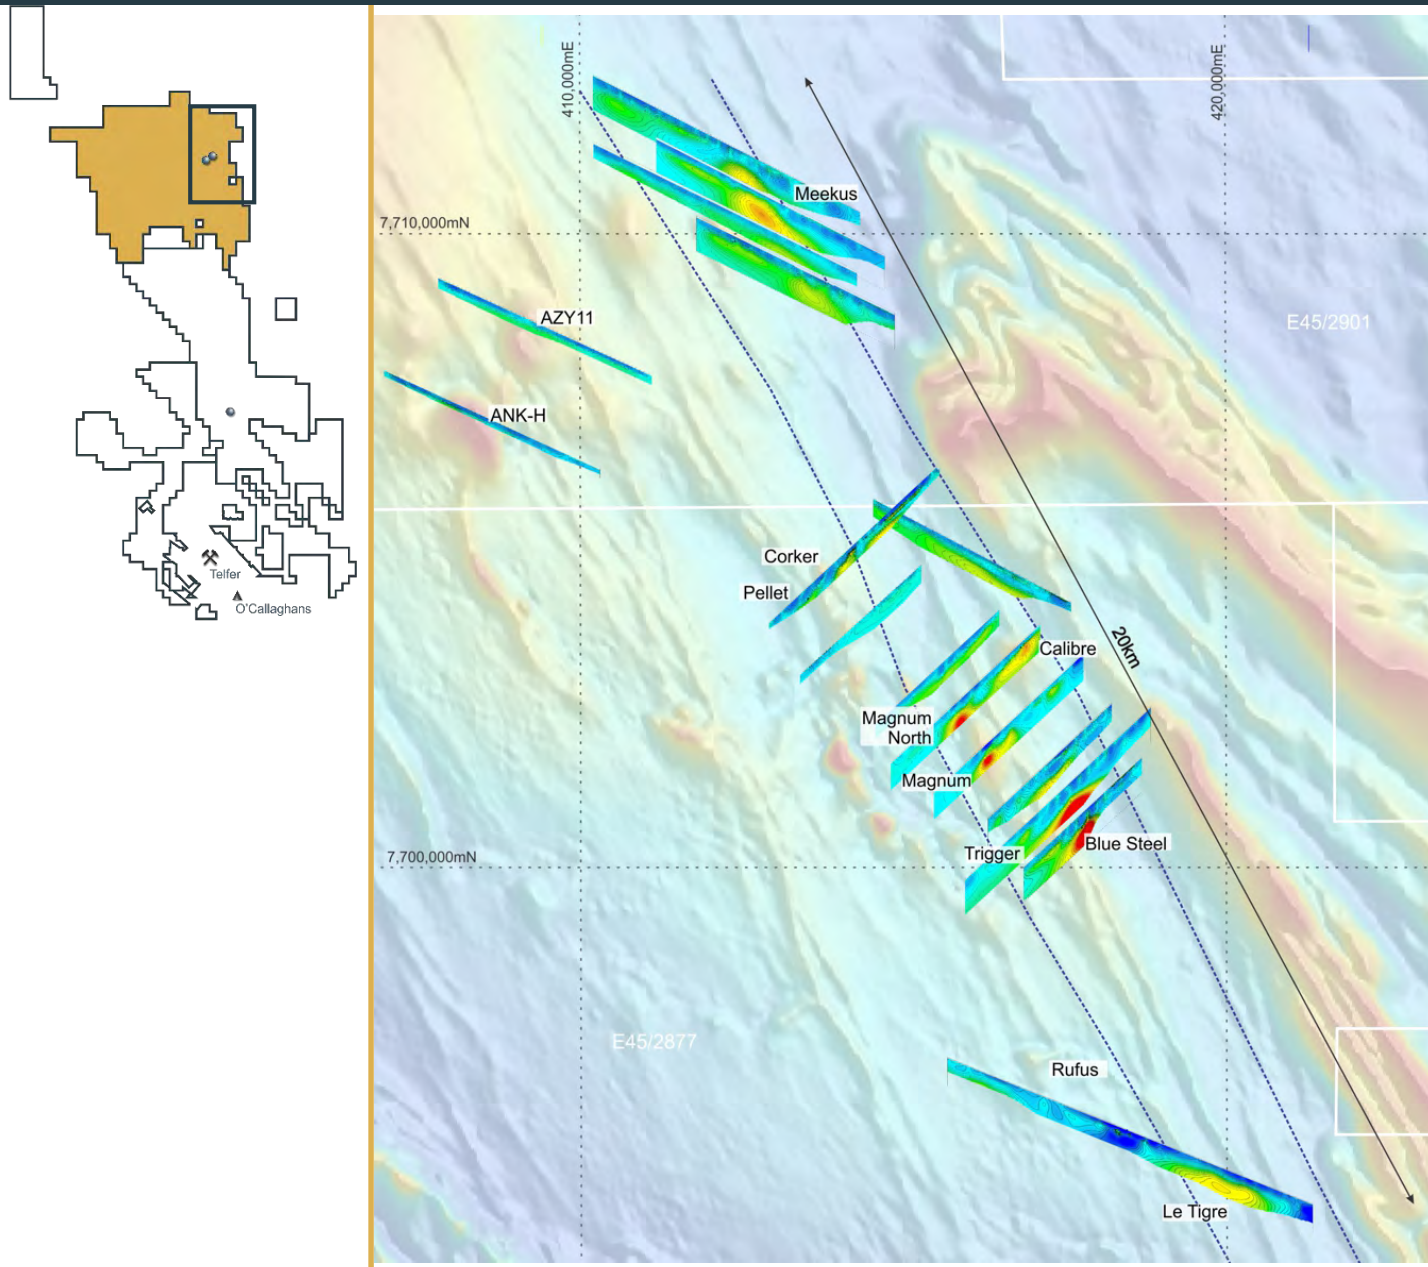

Inferred Mineral Resource 47.8Mt at 0.56 g/t Au, 0.17% Cu and 0.60 g/t Ag for 867koz Au, 81kt Cu and 918koz Ag

- Multi commodity - gold, copper, silver, tungsten
- Large scale mineral system
 - > 1.3km in strike
 - Up to 480m across strike
 - > 550m below surface
 - Open in most directions
- Intersection highlights
 - 30.0m at 2.30 g/t gold and 0.48% copper from 107.0m (15ACC0001)
 - 81.0m at 1.83 g/t gold and 0.15% copper from 93.0m (15ACC0042)
 - 373.3m at 0.60 g/t gold and 0.19% copper from 90.0m (13AMD0033)

Magnum Deposit

Inferred Mineral Resource 16.1Mt at 0.66 g/t Au, 0.36% Cu and 0.99 g/t Ag for 339koz Au, 58kt Cu and 511koz Ag

- Less than 2km from Calibre
- Multi commodity - gold, copper, silver ± tungsten
- Large scale mineral system
 - > 2km in strike
 - Up to 600m across strike
 - > 600m below surface
 - Open in most directions
- Intersection highlights
 - 112.0m at 1.92 g/t gold and 0.10% copper from 450.0m (AKD09)
 - 35.0m at 2.45 g/t gold and 0.11% copper from 230.0m (AKD06)
 - 30.0m at 1.41 g/t gold and 1.59% copper from 264.0m (AKD05)

Citadel Induced Polarisation (IP) Survey

Completed May 2016

Multiple high priority IP chargeability anomalies along a 20km corridor including the Calibre and Magnum deposits

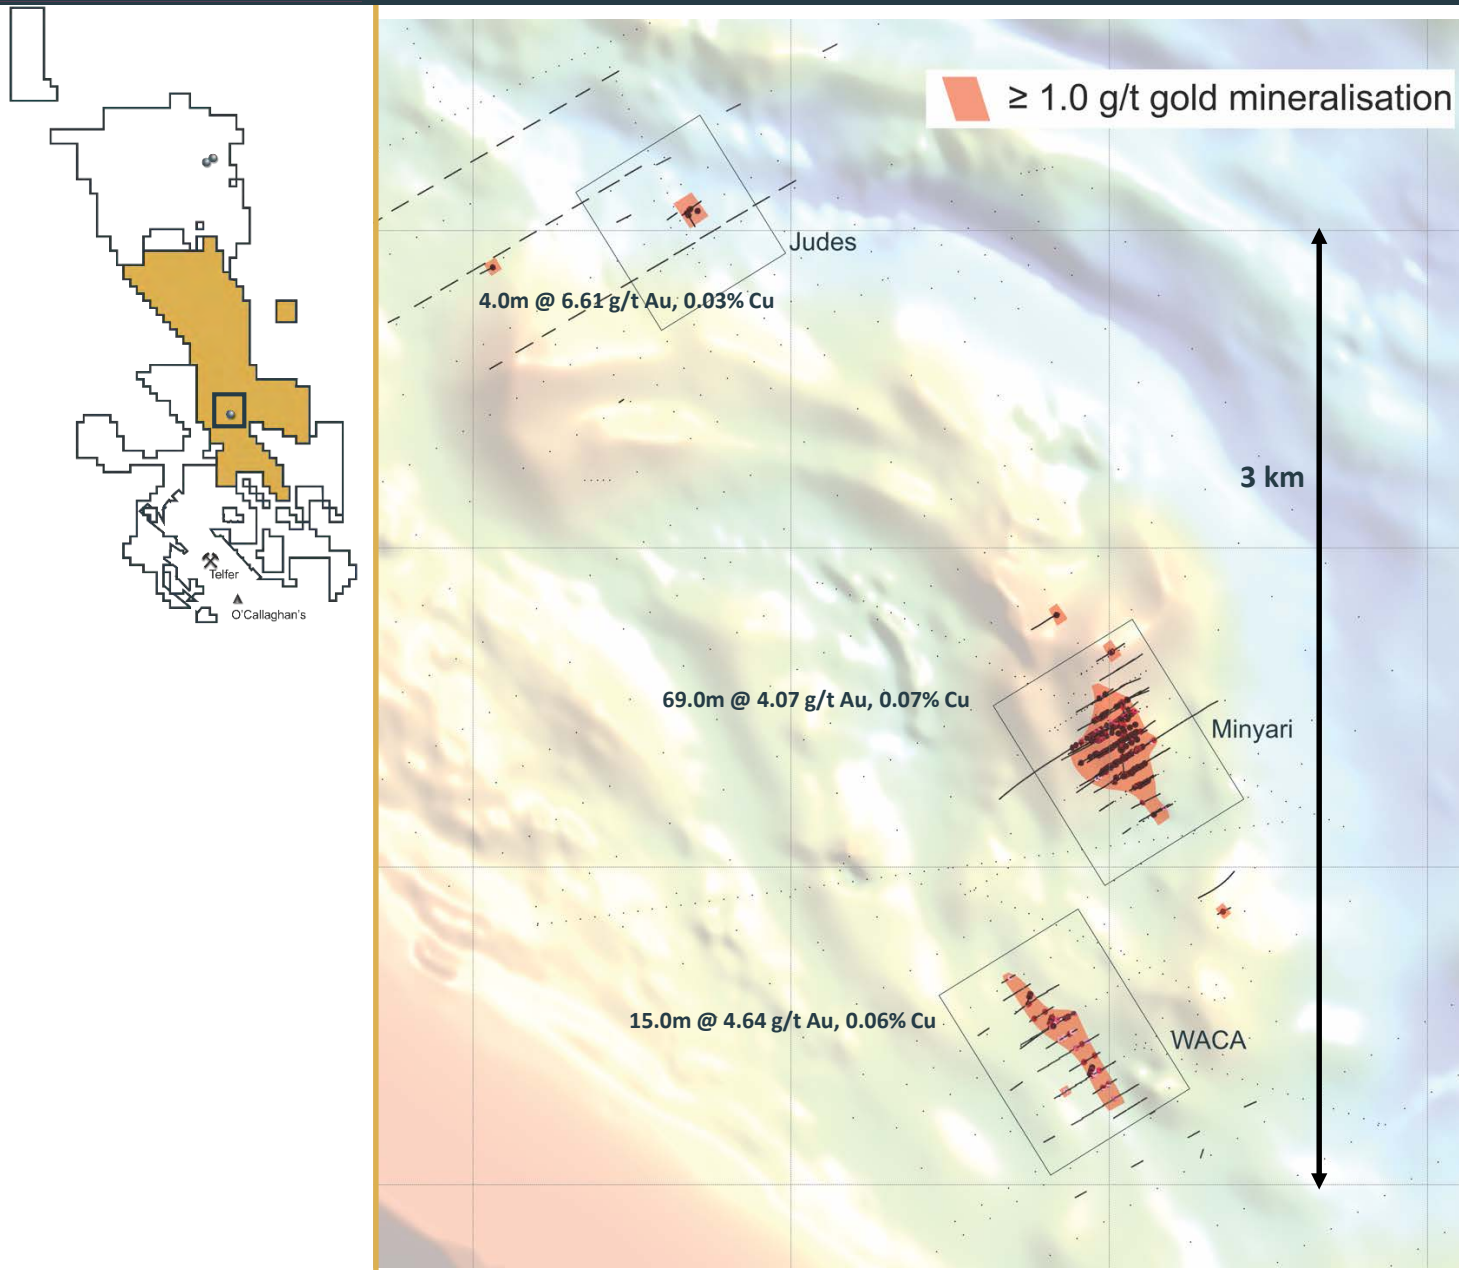

- Blue Steel = 500 to 1,000m long (and open) IP anomaly, stronger than Magnum and Calibre, approximately 3km from Calibre
- Meekus = 500 to 1,000m long (potentially open) IP anomaly, similar in intensity to Calibre, approximately 8km north of Calibre
- Magnum North = IP anomaly possible extensions to Magnum Mineral Resource 600 to 1,200m to the north
- Detection of known Calibre and Magnum mineralisation validation of IP survey method
- Additional IP anomalies across project region

Extensive Reverse Circulation (RC) Drilling RC Programme to test gold and copper IP and other targets

Drilling to commence in the second half of October 2016 and expected to be completed during December

- 30 to 40 hole RC drilling programme for approximately 6,000m
- Drilling programme to test up to 12 target areas commencing at the highest ranking IP targets, i.e. Blue Steel followed by Meekus
- Drill test other selected targets including some VTEM™ electromagnetic conductivity anomalies and/or magnetic high anomalies
- Extend the limits of known gold-copper-silver mineralisation in the vicinity of both the Calibre and Magnum deposits

North Telfer Project 100% Owned by Antipa

Minyari Deposit provides immediate exploration and short term development opportunities:

- Shallow / high-grade gold / copper with longer term upside
- Geologically similar to Telfer Dome
- Potentially open-pittable – mineralisation commences between 1 and 10m below the surface
- Limited effective drilling or geophysical surveys beyond the Minyari or WACA deposits, existing drilling only shallow
- Close to infrastructure – Just 40km from the Telfer Mine

Oxide Mineralisation

Minyari Deposit oxide gold-copper mineralisation commences from as little as 1 metre below the surface

Surface Costean sample results were:

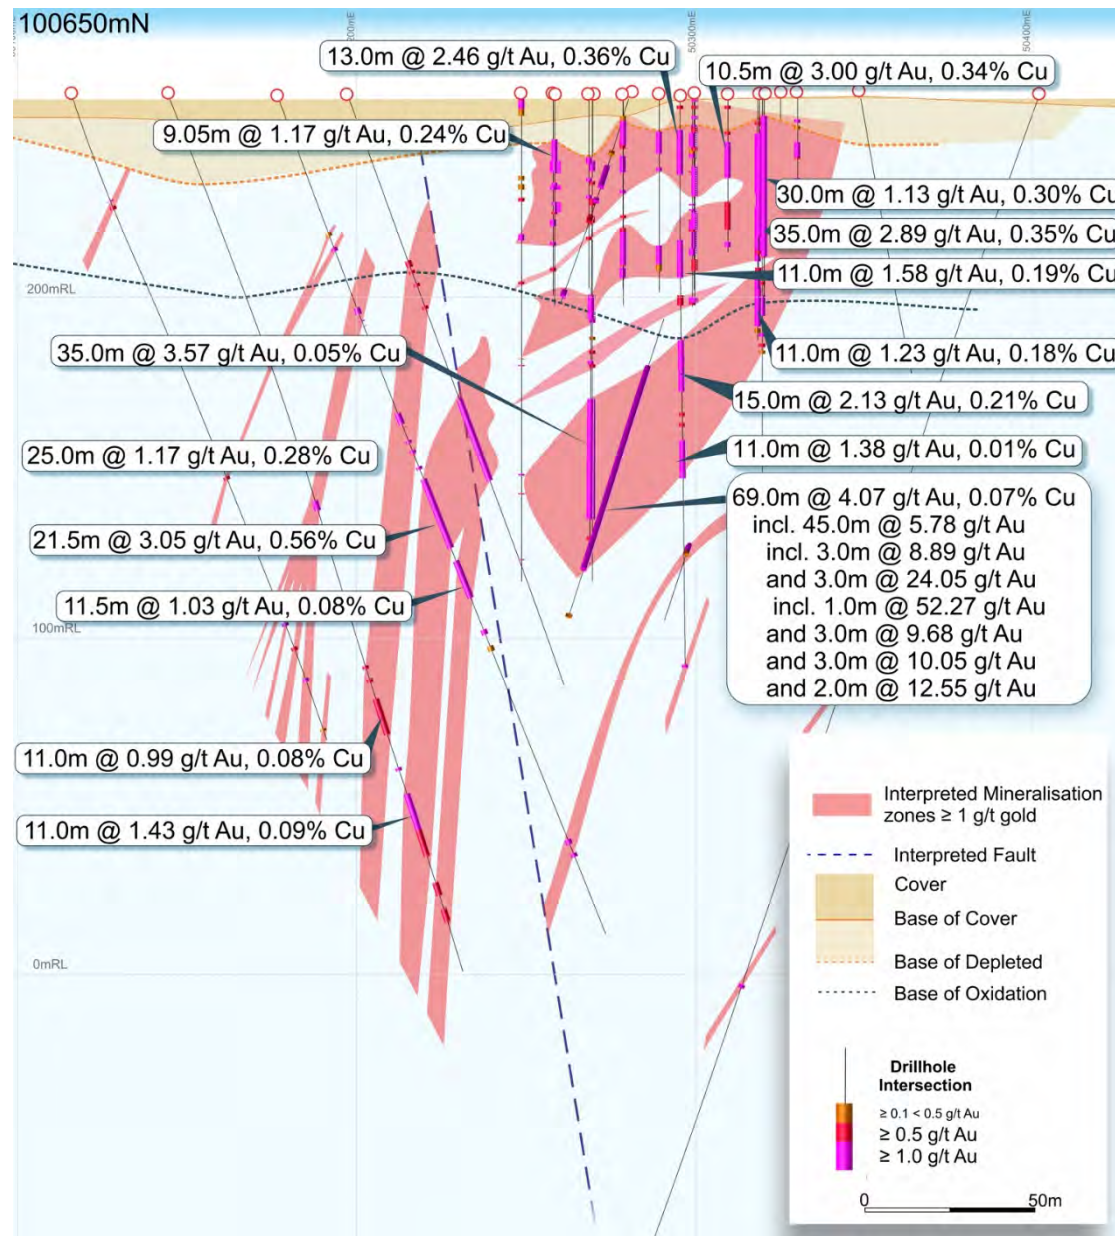

- 8.0 tonnes at 3.57 g/t gold
- 8.0 tonnes at 1.50 g/t gold

Primary Mineralisation

Minyari Deposit primary gold-copper-silver mineralisation open below 580 vertical metres below the surface (i.e. MHC20001 847.5m total hole depth)

MHC20001 Drill results included:

- 6.0m at 3.23 g/t gold and 0.23% copper from 540.0m;
- 16.0m at 2.50 g/t gold and 0.54% copper from 614.0m;
 - Incl. 1.55m at 15.21 g/t gold and 3.69% copper and 13.60 g/t silver from 615.5m

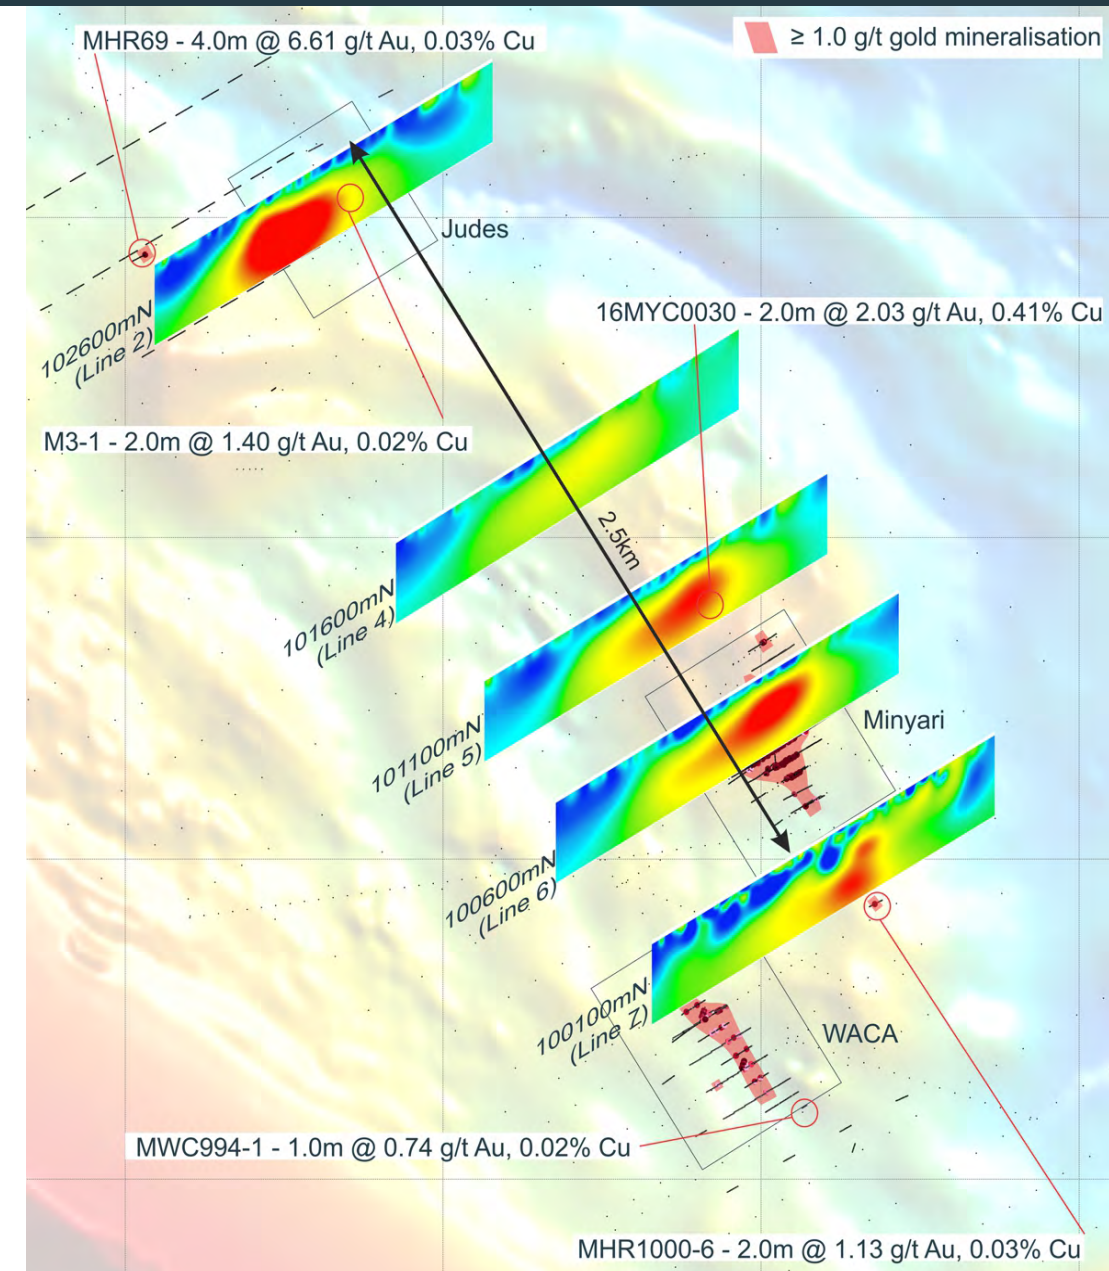

Minyari Deposit high-grade gold \pm copper

- + 300m strike length
- up to 160m in width
- up to 60m in thickness
- open down dip (from below 100 to 580 vertical metres), and potentially along strike

Highlights of 2016 Phase 1 RC Drilling programme of 46 holes (8,029m)

- 69.0m at 4.07 g/t gold and 0.07% copper from 92.0m (16MYC0006)
 - Incl. 3.0m at 24.05 g/t gold and 0.41% copper
 - Incl. 3.0m at 10.05 g/t gold and 0.03% copper
- 35.0m at 3.57 g/t gold and 0.05% copper from 87.0m (16MYC0006)
 - Incl. 21.0m at 4.8 g/t gold and 0.04% copper
 - Incl. 4.0m at 11.34 g/t gold and 0.03% copper
- 30.0m at 2.55 g/t gold and 0.31% copper from 14.0m (16MYC0008)
 - Incl. 9.0m at 5.52 g/t gold and 0.34% copper
 - Incl. 1.0m at 18.6 g/t gold and 0.23% copper
- 23.0m at 3.16 g/t gold and 0.32% copper from 7.0m (16MYC0015)
 - Incl. 1.0m at 7.68 g/t gold and 0.62% copper
 - And 2.0m at 6.77 g/t gold and 0.66% copper

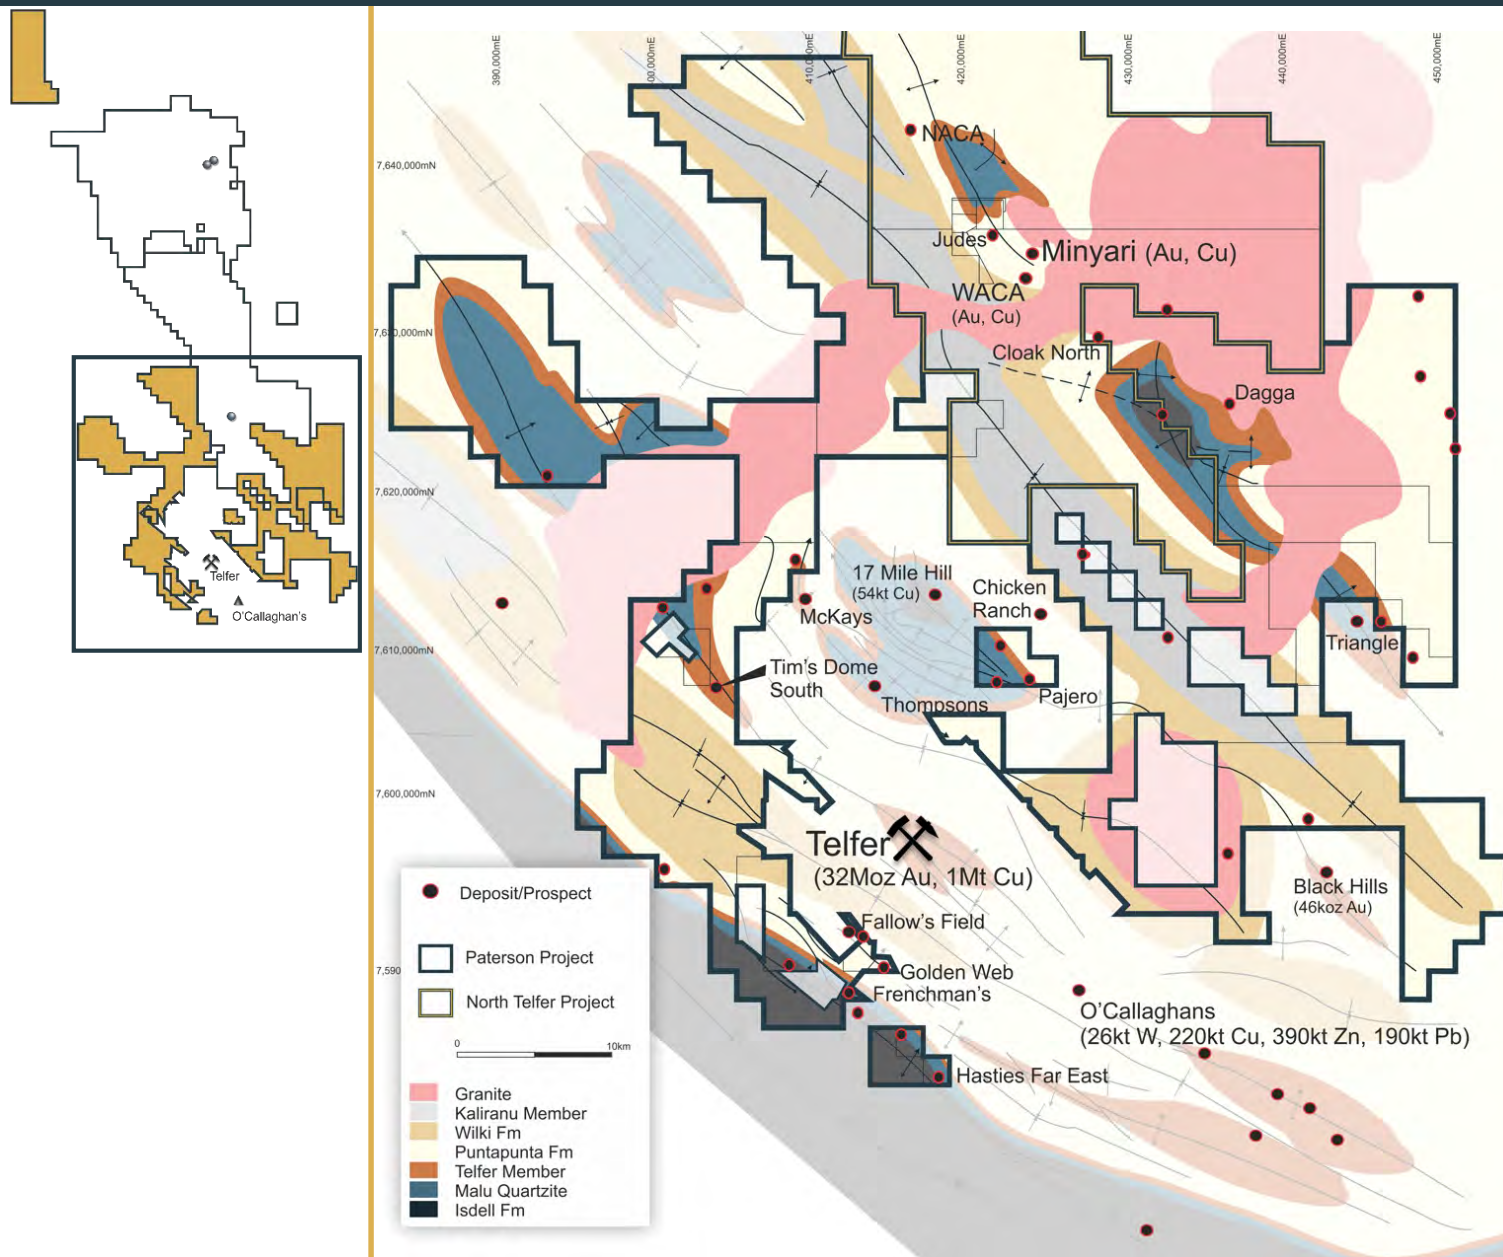

Reprocessed 2008 IP Survey identified

- Four IP chargeability anomalies across the Minyari Dome along 2.5km strike extent
- All either untested or only partially tested with encouraging drill results
- Anomaly beneath the known Minyari high-grade gold-copper mineralisation which remains untested
- Strong IP anomaly 350m north of Minyari deposit ineffectively tested by drillhole 16MYC0030 which intersected 2.0m at 2.03 g/t gold and 0.41% copper from 313.0m on the western edge of the IP target
- Single IP line at Judes identifies very large and strong IP anomaly which remains untested

Minyari Dome Phase 2 Exploration Programme Objectives

- Extend and evaluate the Minyari deposit high-grade gold-copper mineralisation zones remain open along strike, down dip and/or down plunge via drilling
- Evaluate the high-grade WACA gold-copper mineralisation via drilling
- Detailed infill IP within the 3.5 to 4.5km corridor from south of the Minyari deposit to the Judes prospect area to the north and also at WACA
- Drill testing of detailed IP new mineralisation targets

1,711 km² of highly prospective ground comes to within 3km of the Telfer Mine

Shallow cover to sub cropping

Limited to no exploration for 20 years

- Predominantly shallow drilling ± surface geochemistry
- Limited to no ground based geophysics (i.e. IP or EM)

All the key elements for hosting massive gold, base metal and tungsten deposits within Project

- Fertile granites (heat ± metal sources)
- Formations which host both the Telfer and O'Callaghans deposits
- Including reactive carbonate bearing rocks
- Domal features and favourable fault architecture

Antipa's combined +3,000km² North Telfer and Paterson Projects provide a very substantial pipeline of exploration opportunities from Greenfield to Brownfield including advanced mineral assets

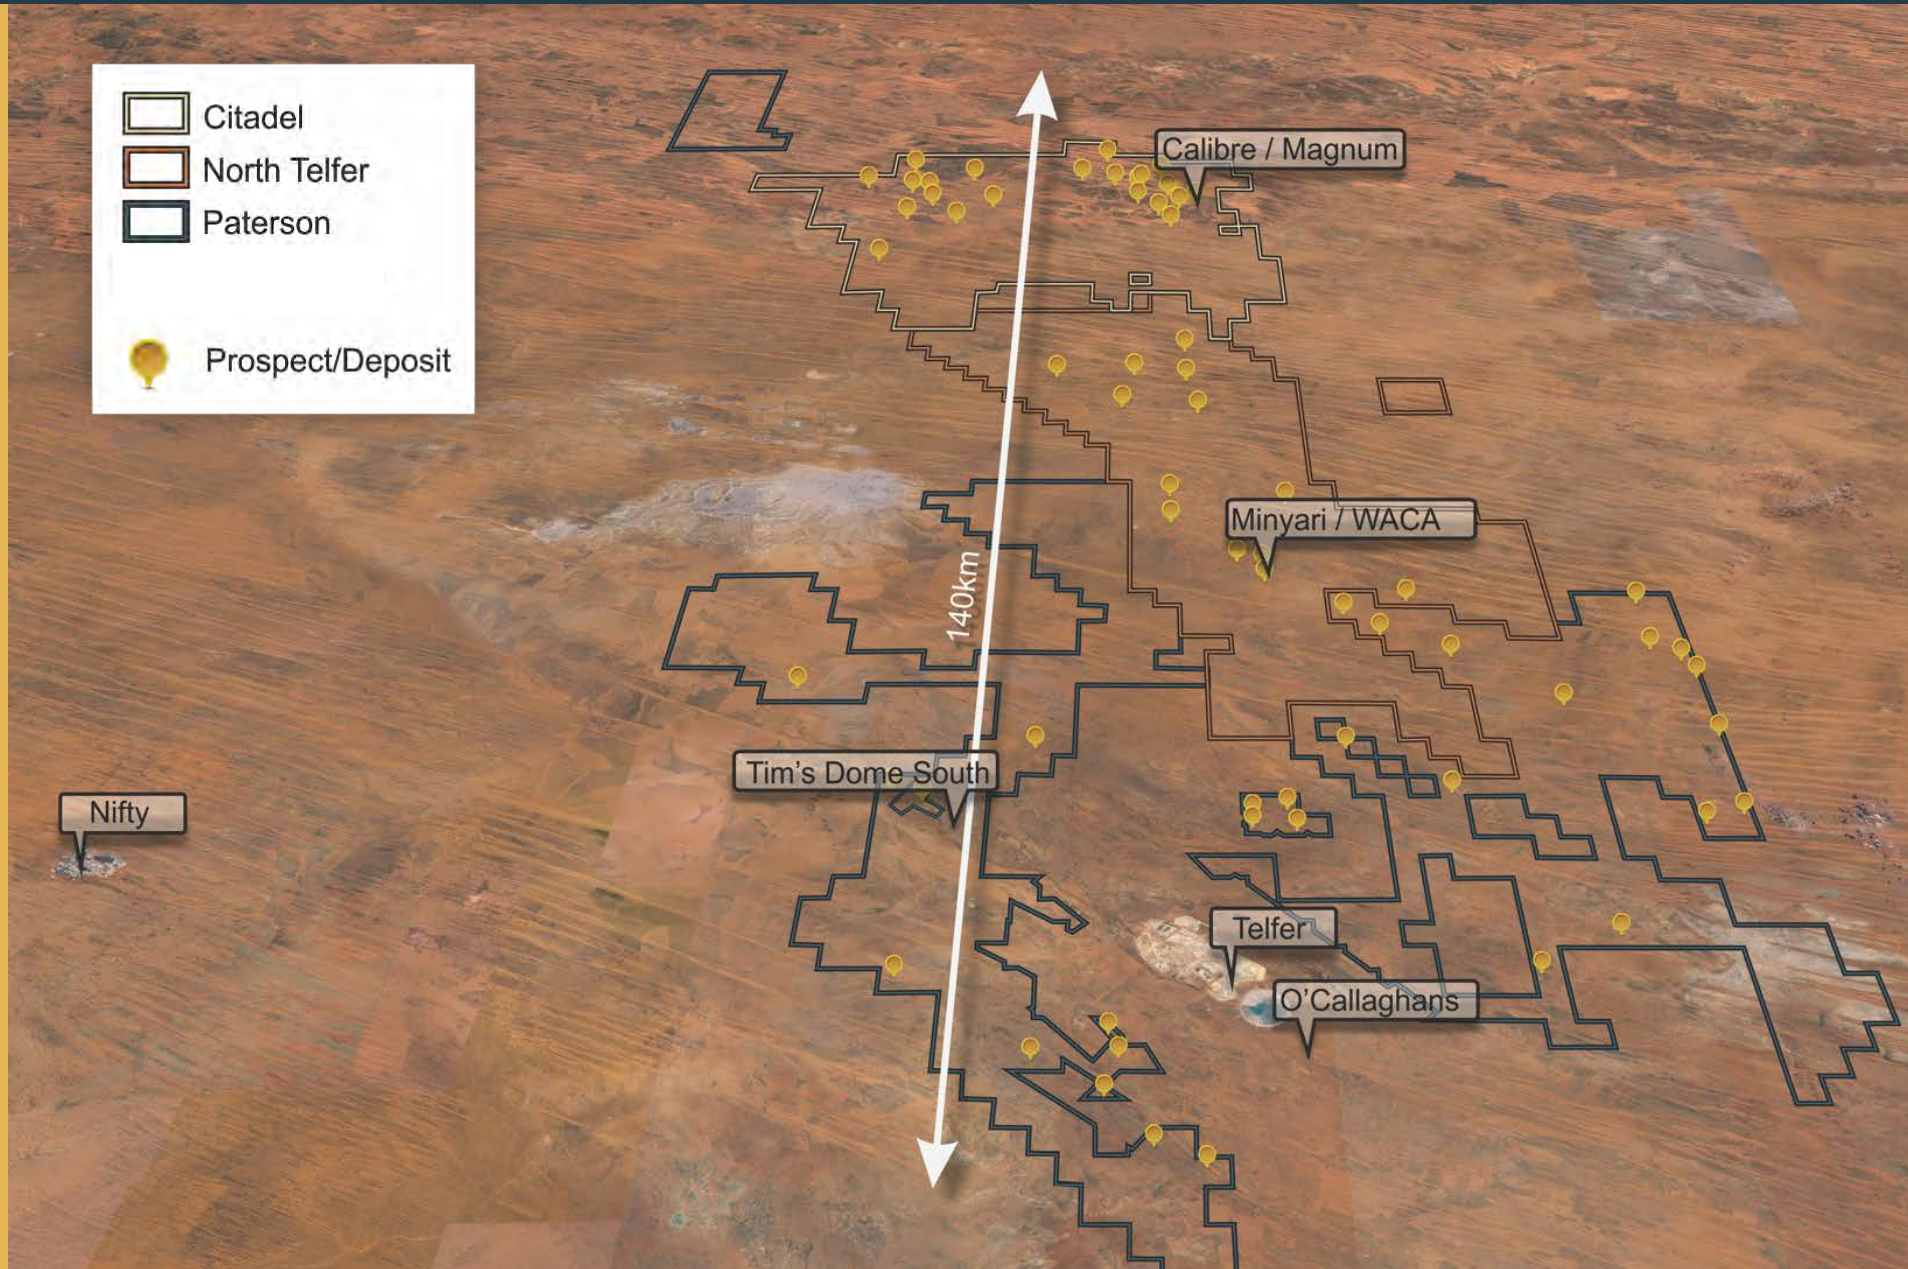

Citadel Exploration Objectives

- New mineral discoveries through testing IP anomalies
- Test potential extensions to known gold-copper deposits
- Identification of a mineral camp potentially capable of sustaining a large scale mining operation

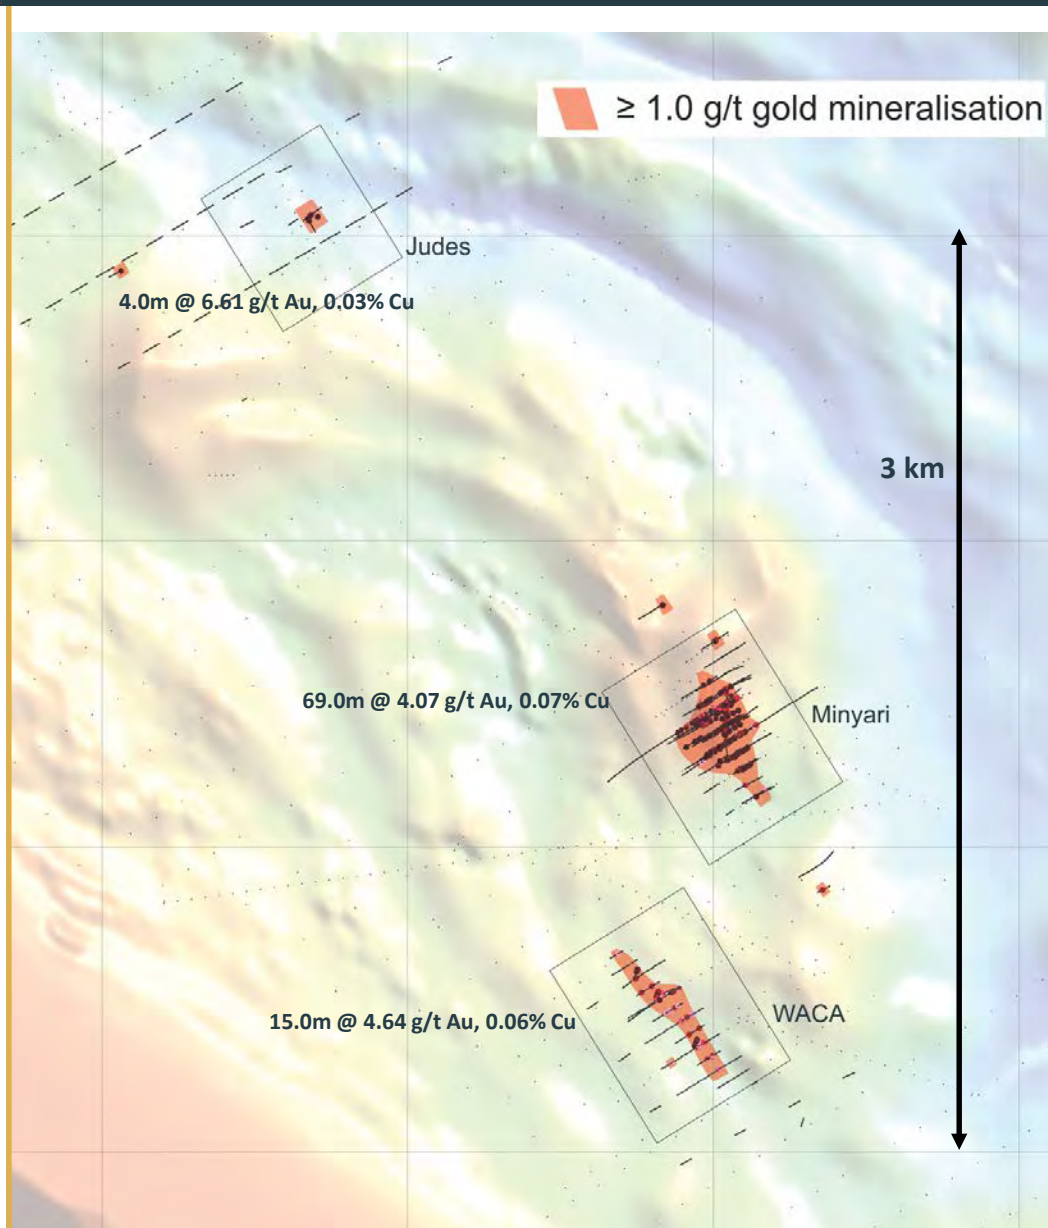

Minyari Exploration Objectives

- Extend limits of the Minyari and WACA gold-copper deposits
- New mineral discoveries through testing IP anomalies
- Mineral Resource estimation/s

| Announcement of Minyari Drilling and IP Survey Programme Results | | | | | | | | |
| Minyari Dome Phase 3 Drilling Programme | | | | | | | | |

Minyari Dome has geological similarities with the Telfer Dome

Limited effective drilling or geophysical surveys beyond the current limits of the Minyari and WACA deposits

Minyari deposit oxide mineralisation close to surface and primary mineralisation open at significant depth:

- 69.0m at 4.07 g/t gold and 0.07% copper from 92.0m (16MYC0045)
- 35.5m at 3.16 g/t gold and 0.56% copper from 9.0m (MHR065-7)

WACA deposit - limited drilling along 560m of strike and is open in several directions:

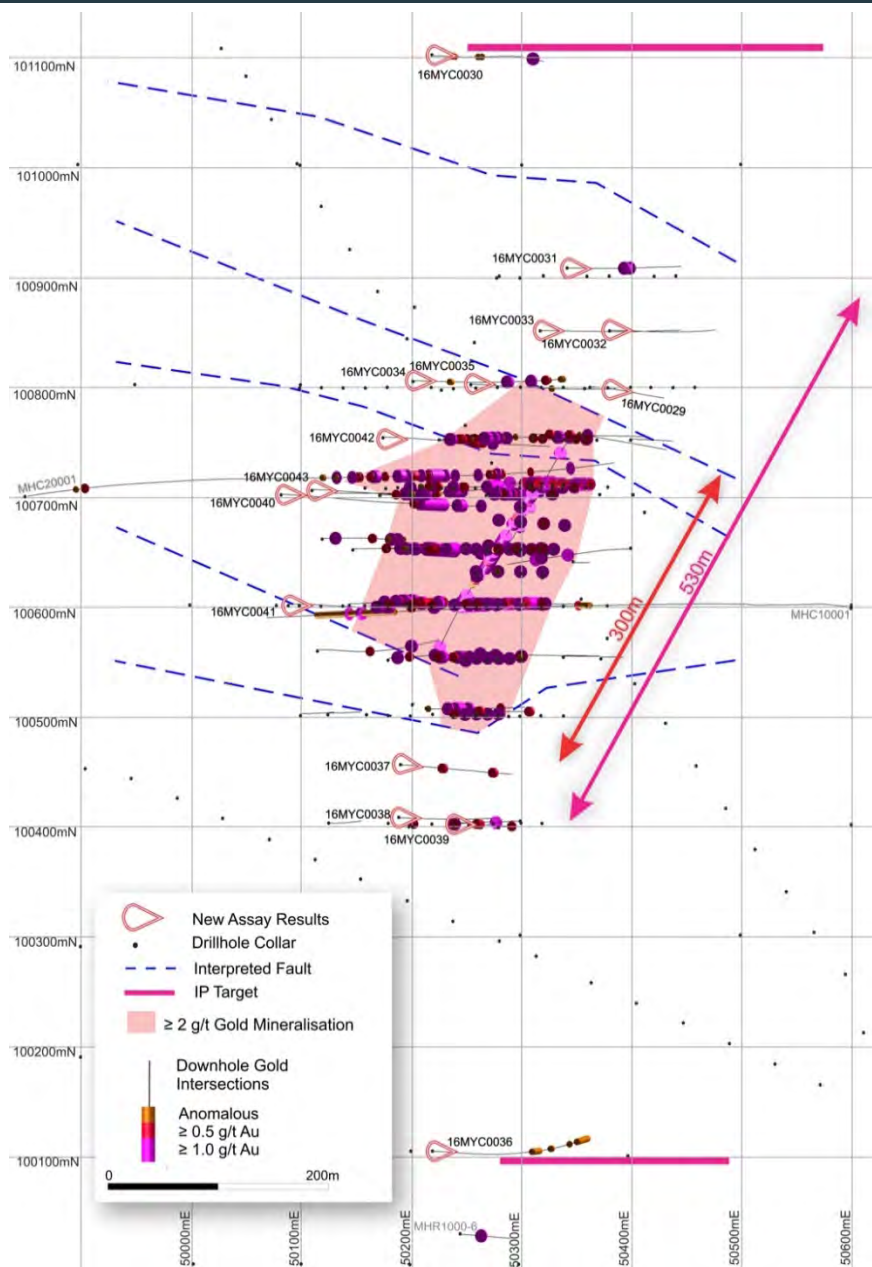

- 5.70m at 10.89 g/t gold and 0.06% copper from 48.7m (MWC988-1)
- Incl. 0.5m at 58.20 g/t gold and 0.11% copper
- And 0.6m at 28.20 g/t gold and 0.04% copper
- 15.0m at 4.64 g/t gold and 0.06% copper from 333.0m (MHC20002)
- Incl. 0.2m at 295.37 g/t gold and 2.28% copper
- 6.80m at 2.39 g/t gold and 0.07% copper from 28.6m (MWC1000-1)
- Incl. 0.6m at 17.5 g/t gold and 0.03% copper

Judes Prospect - limited drilling includes:

- 4.0m at 6.61 g/t gold and 0.03% copper from 88.0m (MHR69)
- 2.0m at 1.40 g/t gold and 0.02% copper from 58.0m (M3-1)
- 2.5m at 1.12 g/t gold and 0.02% copper from 66.8m (MJC1028-1)
- 5.6m at 0.53 g/t gold and 0.72% copper from 95.4m (MUC10275-1)

Close to infrastructure – Just 40km north of the Telfer Mine

Potential open pit ± underground development opportunities

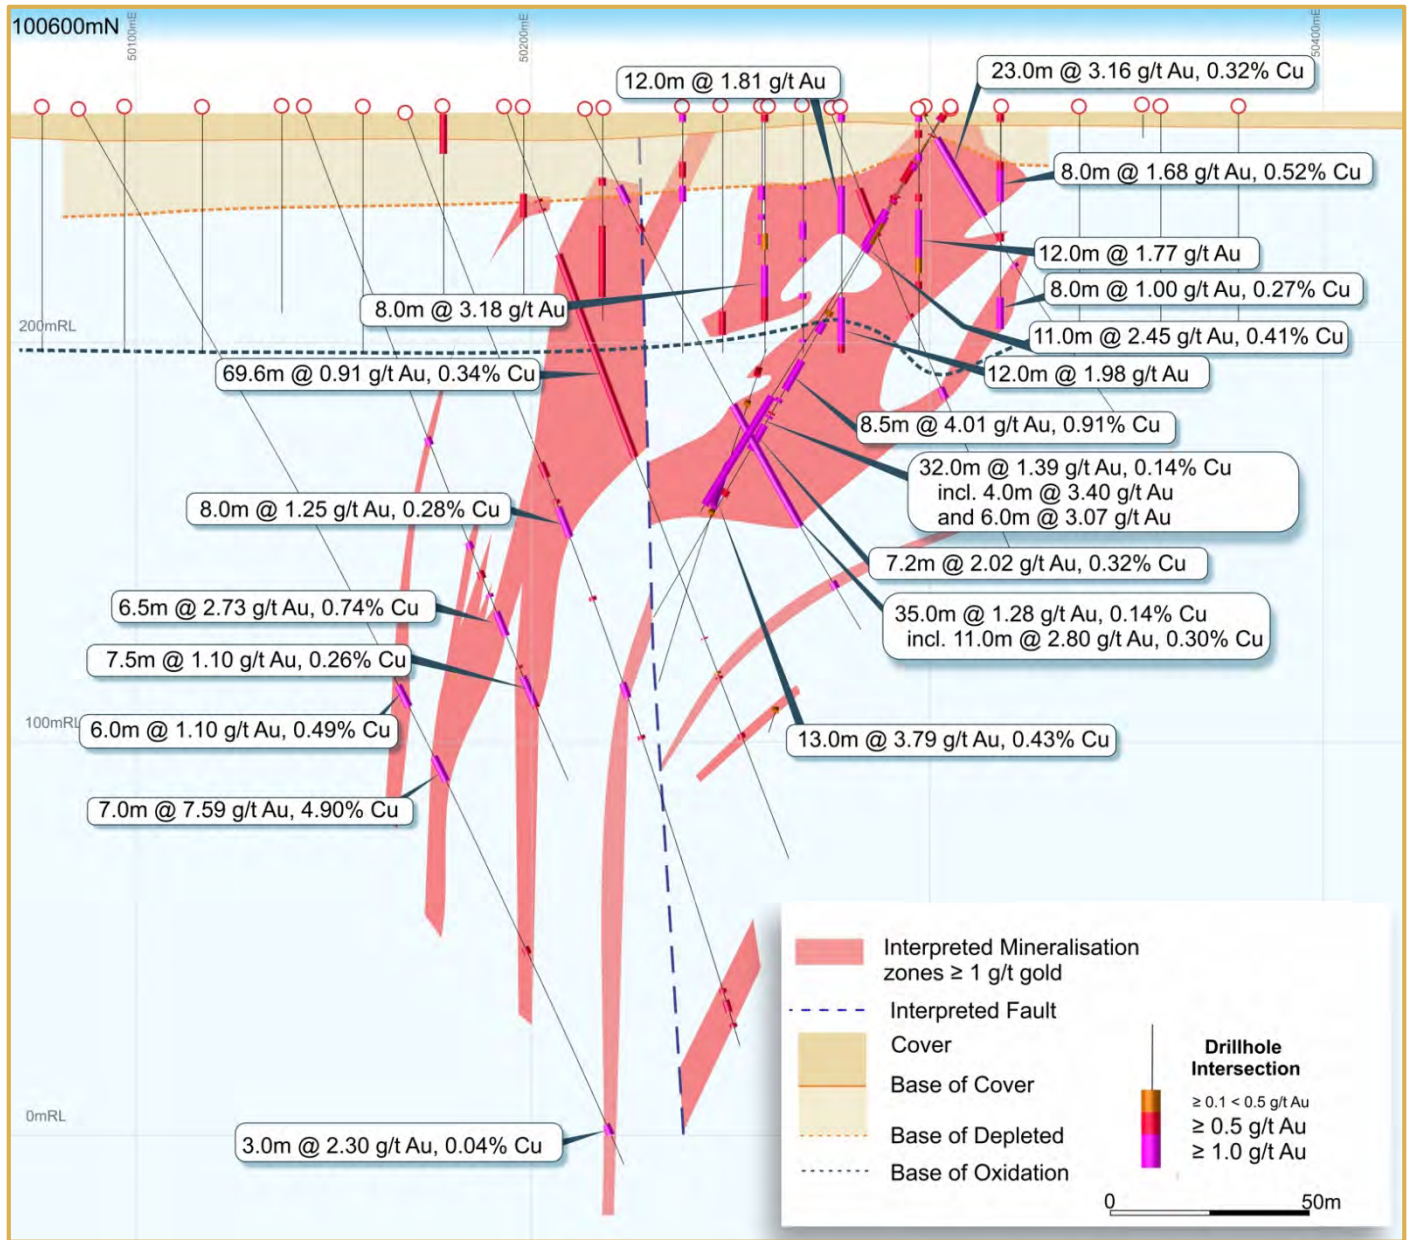

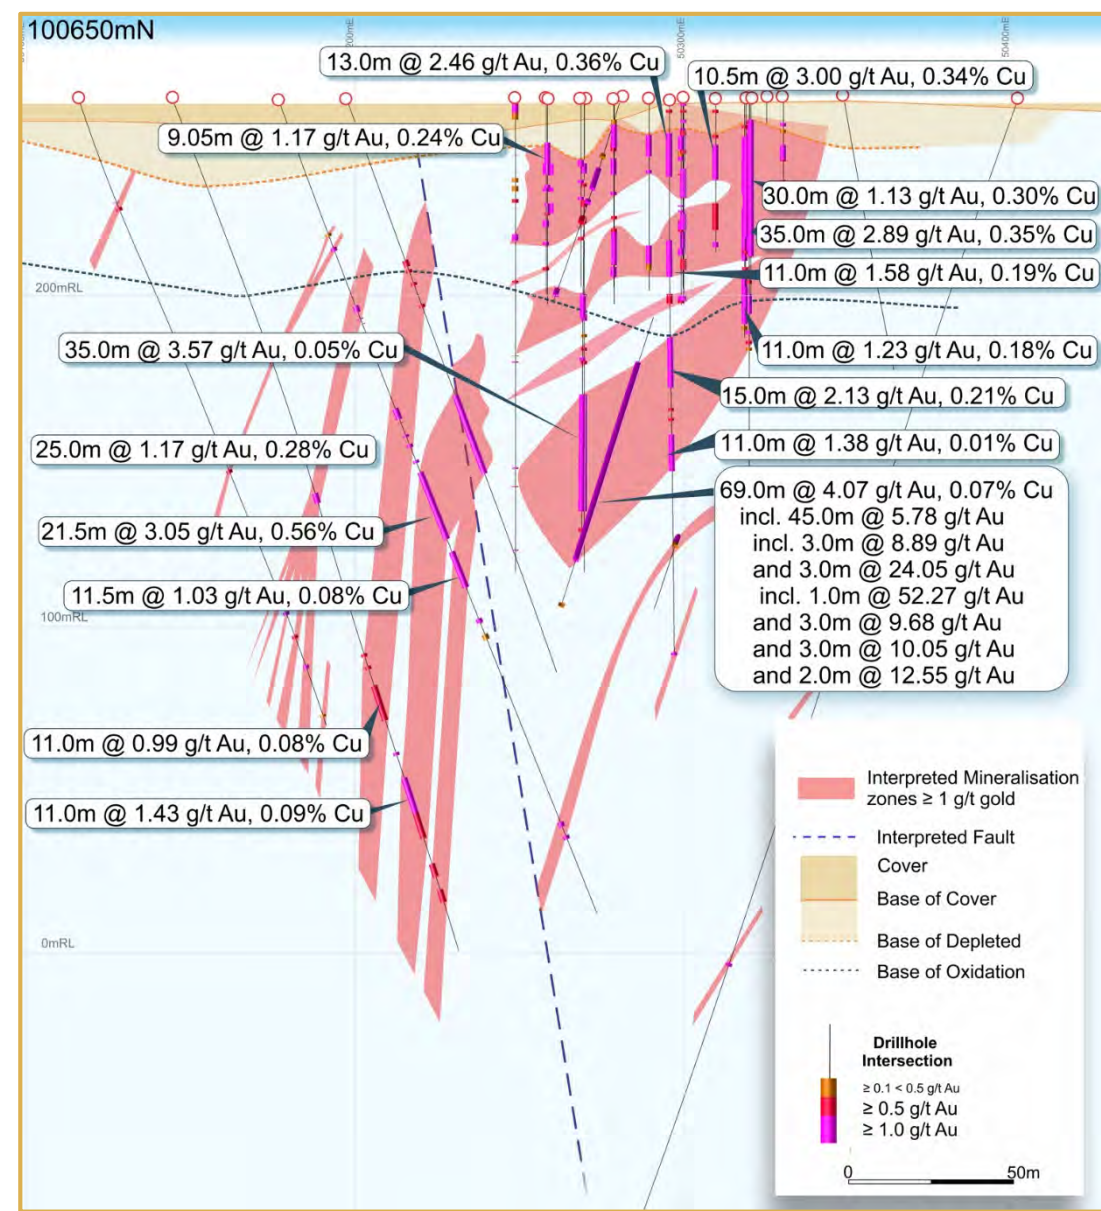

Minyari Deposit high-grade gold ± copper:

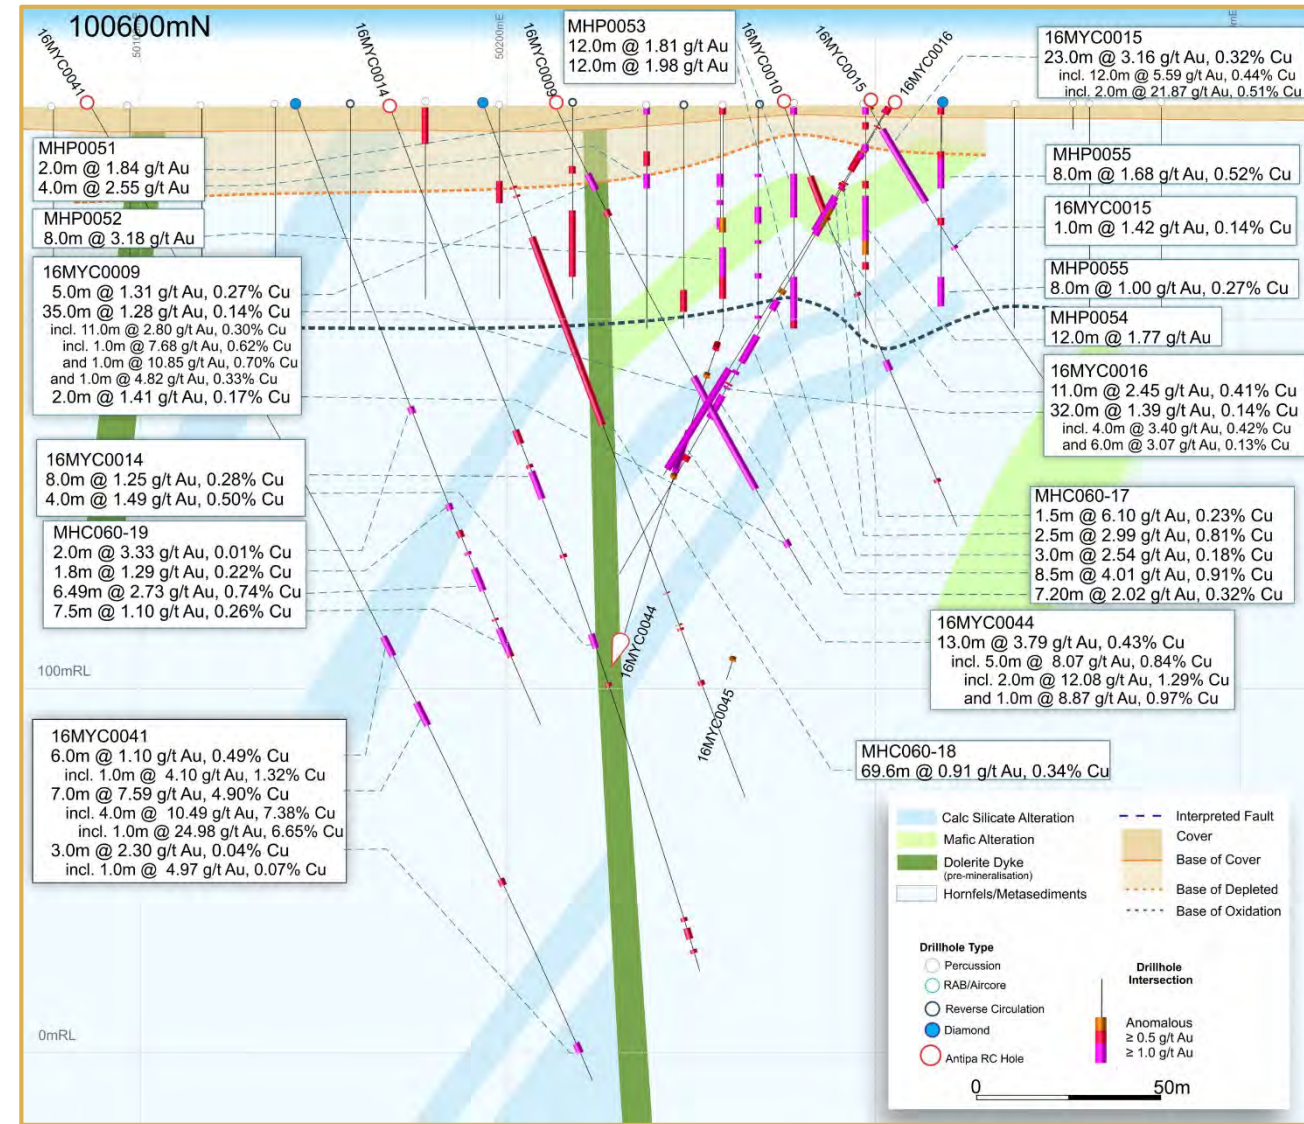

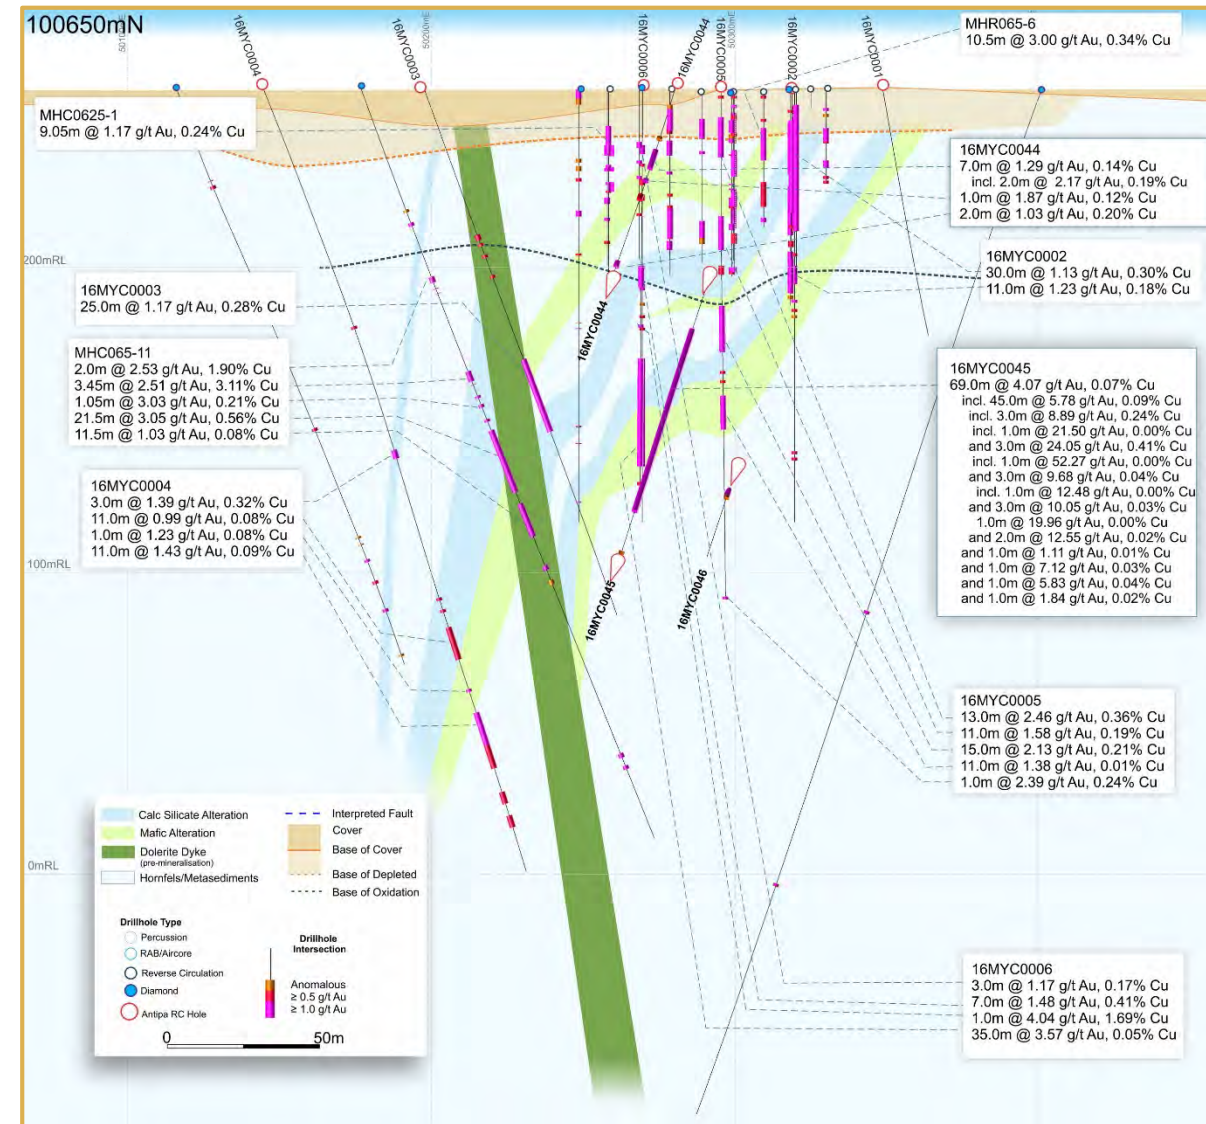

- + 300m strike length
- up to 160m in width
- up to 60m in thickness
- open down dip (from below 100 to 580 vertical metres), and
- potentially along strike

2016 Phase 1 RC Drilling programme of 46 holes (8,029m)

Phase 1 RC Intersection Highlights include:

- **69.0m at 4.07 g/t gold and 0.07% copper from 92.0m** (16MYC0006)
 - Incl. 3.0m at 24.05 g/t gold and 0.41% copper
 - Incl. 3.0m at 10.05 g/t gold and 0.03% copper
- **35.0m at 3.57 g/t gold and 0.05% copper from 87.0m** (16MYC0006)
 - Incl. 21.0m at 4.8 g/t gold and 0.04% copper
 - Incl. 4.0m at 11.34 g/t gold and 0.03% copper
- **30.0m at 2.55 g/t gold and 0.31% copper from 14.0m** (16MYC0008)
 - Incl. 9.0m at 5.52 g/t gold and 0.34% copper
 - Incl. 1.0m at 18.6 g/t gold and 0.23% copper
- **23.0m at 3.16 g/t gold and 0.32% copper from 7.0m** (16MYC0015)
 - Incl. 1.0m at 7.68 g/t gold and 0.62% copper
 - And 2.0m at 6.77 g/t gold and 0.66% copper

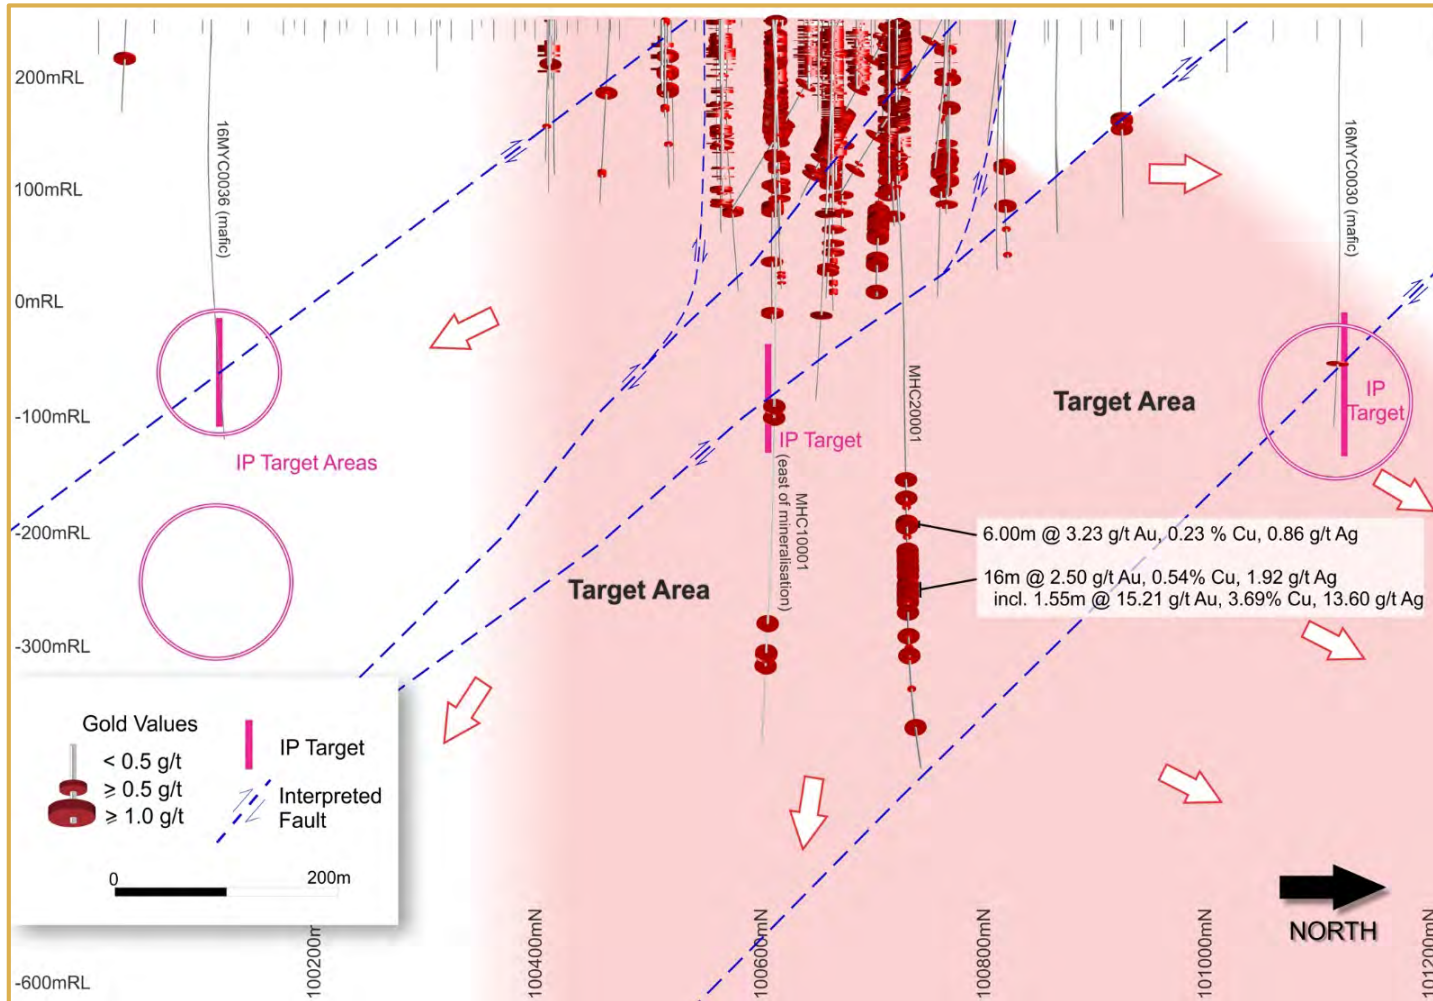

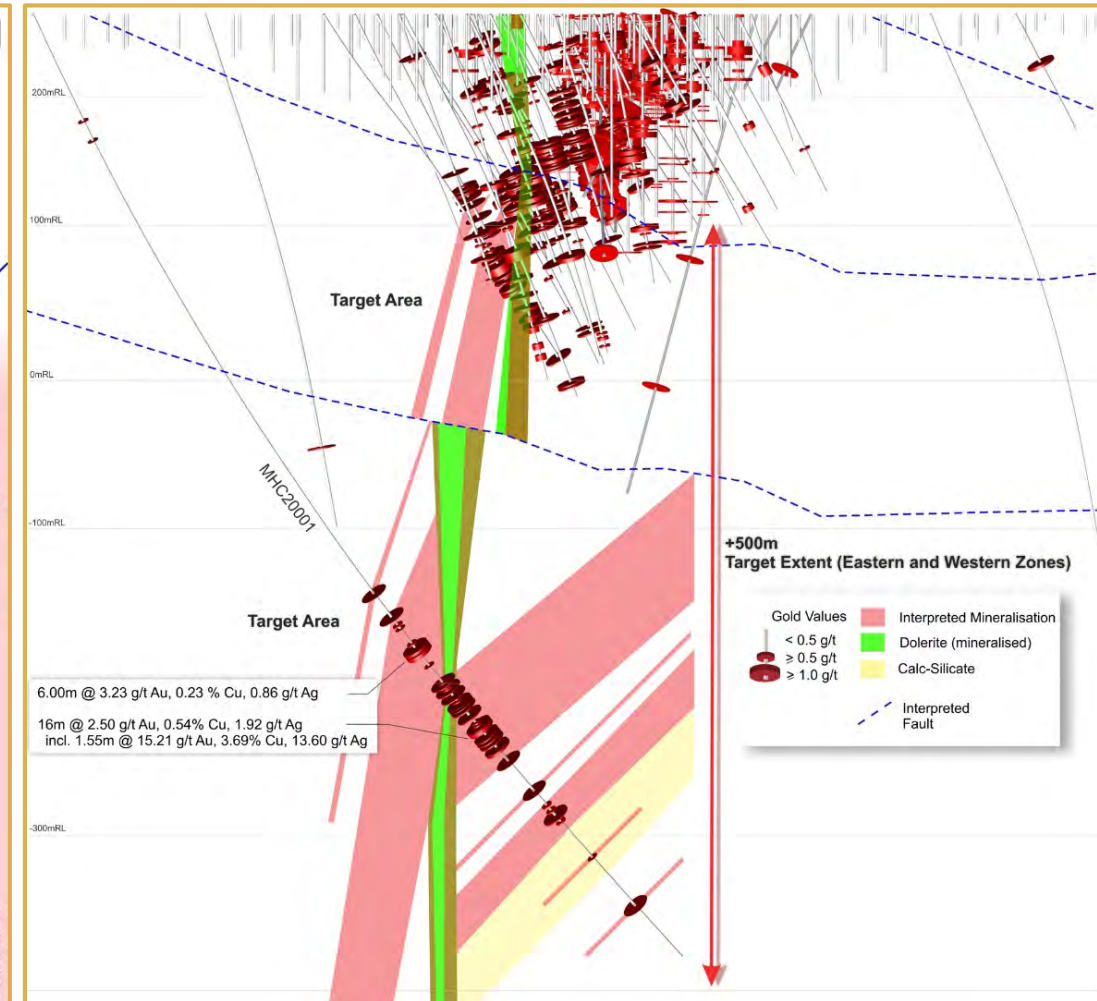

Minyari Deposit Phase 2 Drilling Targets

- Extend and evaluate the Minyari deposit high-grade gold-copper mineralisation zones remain open along strike, down dip and/or down plunge via drilling

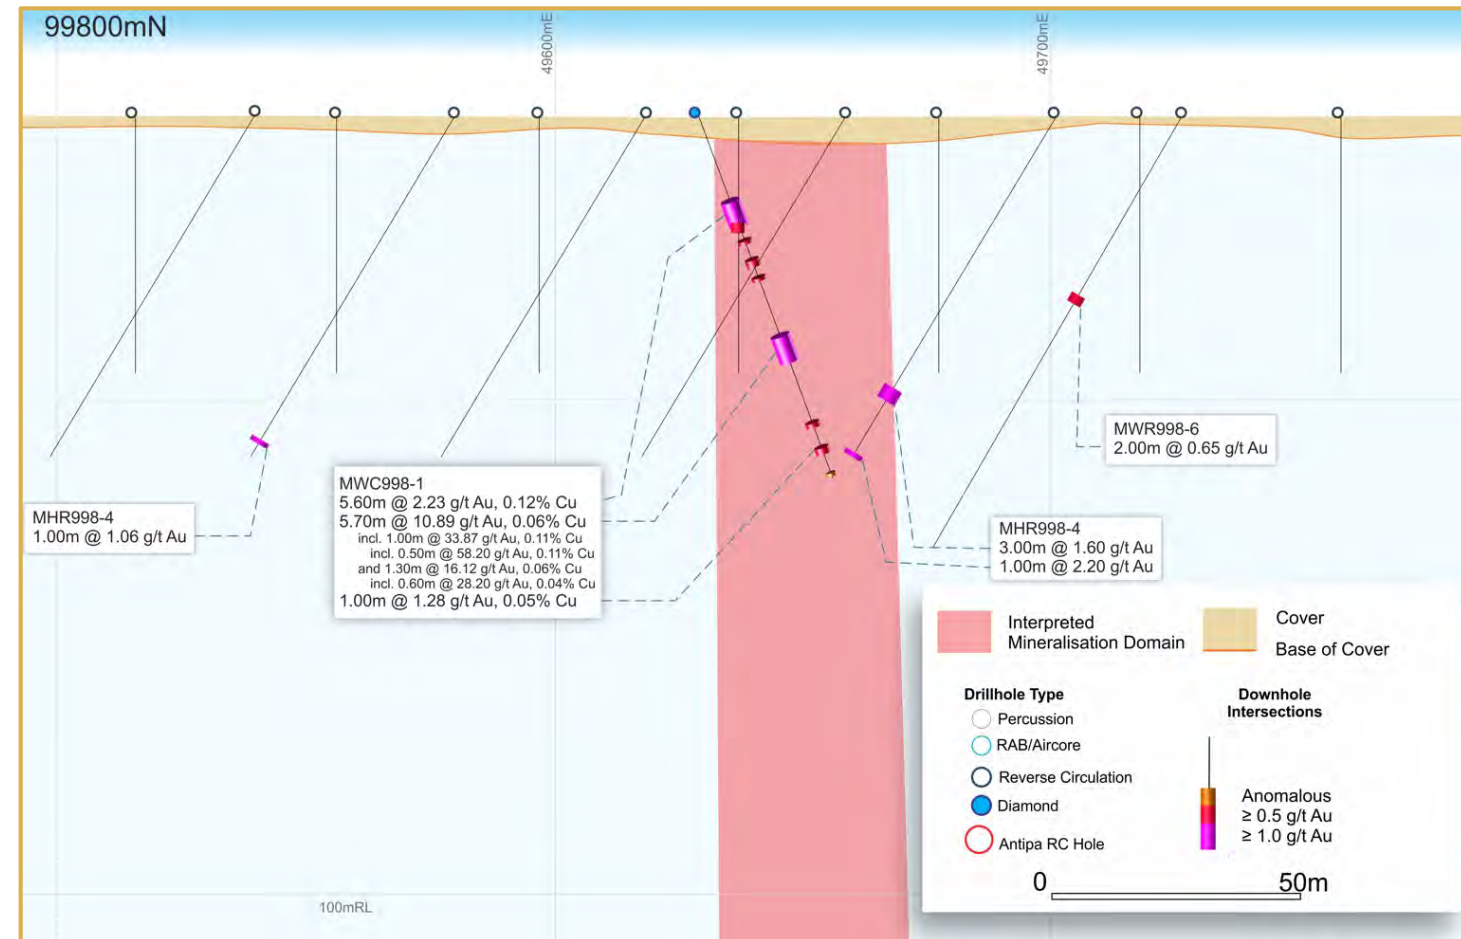

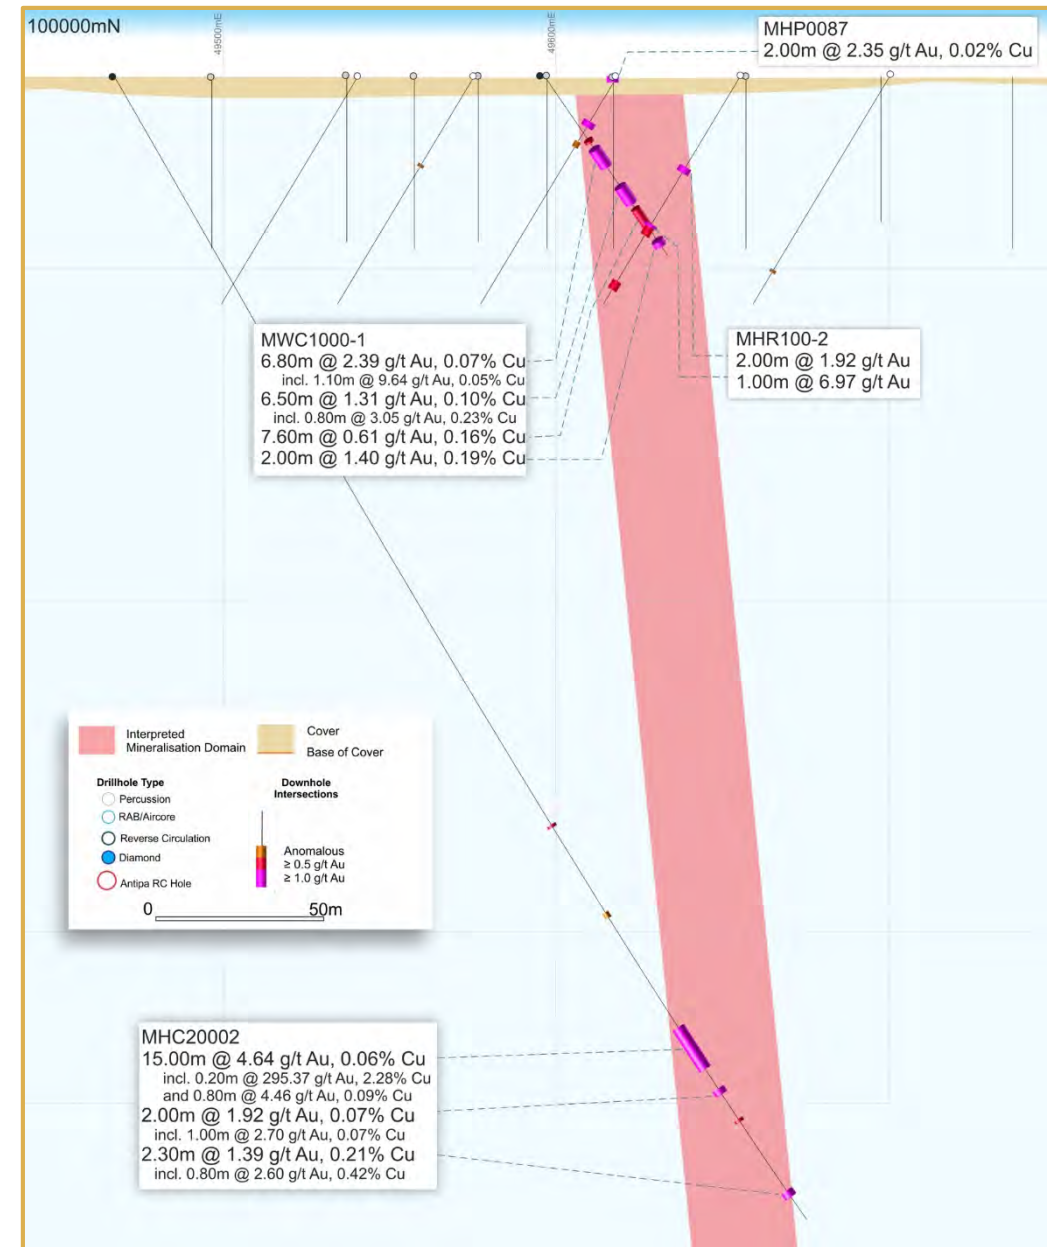

LONG SECTION

CROSS SECTION

- WACA deposit located just 800m southwest of the Minyari deposit
- Limited drilling along 560m of strike and open in several directions – isolated drill hits 280m south along strike (i.e. MWC994-1)
- Only one drillhole testing deeper than 90 vertical metres below the surface which intersected high-grade gold (i.e. MHC20002)
- Potential open pit ± underground development opportunities

Telfer's June 2000 U/G Mineral Resource was 3.5 Mt @ 13.8 g/t Au for 1.5Moz

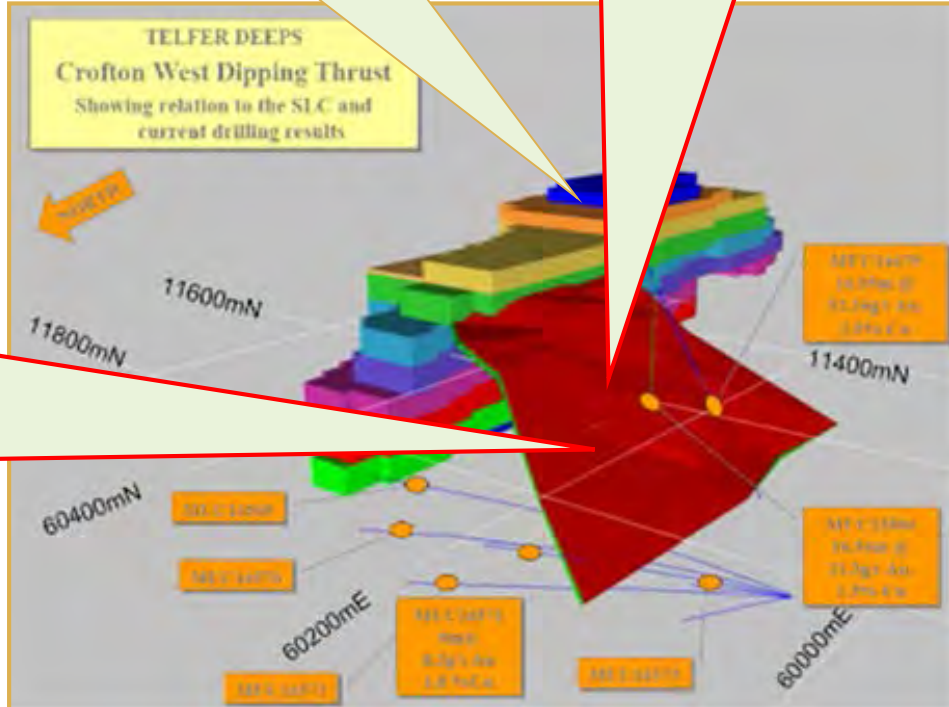

Very high-grade (e.g. 16.1m @ 52.2 g/t Au & 2.9% Cu) classic Telfer Reef Style stratabound (thrust related) mineralisation

VSC dominated by low-grade high tonnage mineralisation

Plus high-grade gold (e.g. 10.0m @ 10.0 g/t Au) extensional vein style mineralisation

Telfer's high-grade reef style ore zones were the bread and butter of Telfer's first 23 years of production:

- High-grade Reef Style ore zones mined from surface to in excess of 1 km below the surface
- Gold grades up to 160.0 g/t
- Copper grades up to 4.0%
- Ore thickness 0.1 to 16 metres (0.5m typical)
- Up to 800 metres strike length or greater, and
- Several hundred metres down dip

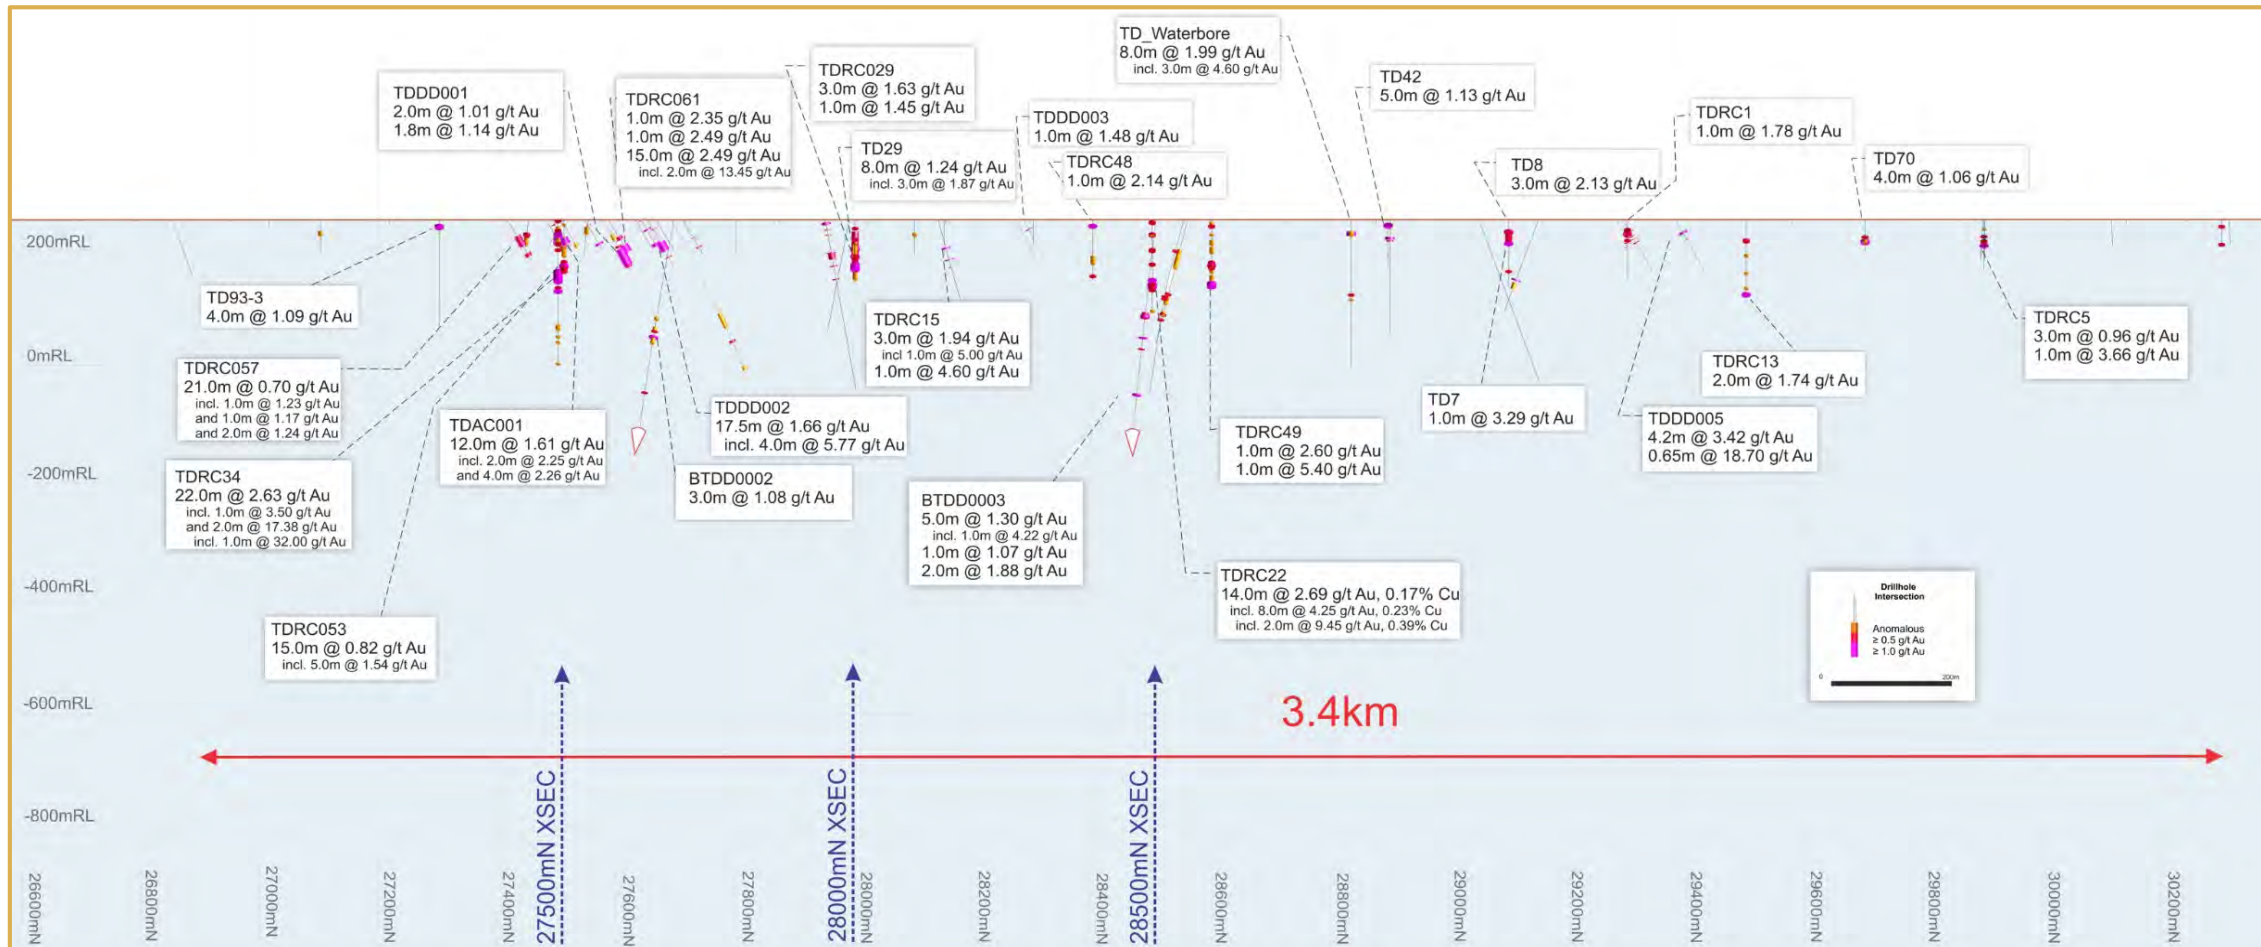

Source: Newcrest Exploration Seminar April 2003: ASX Lodged: <http://www.asx.com.au/asxpdf/20030409/pdf/00355204.pdf>

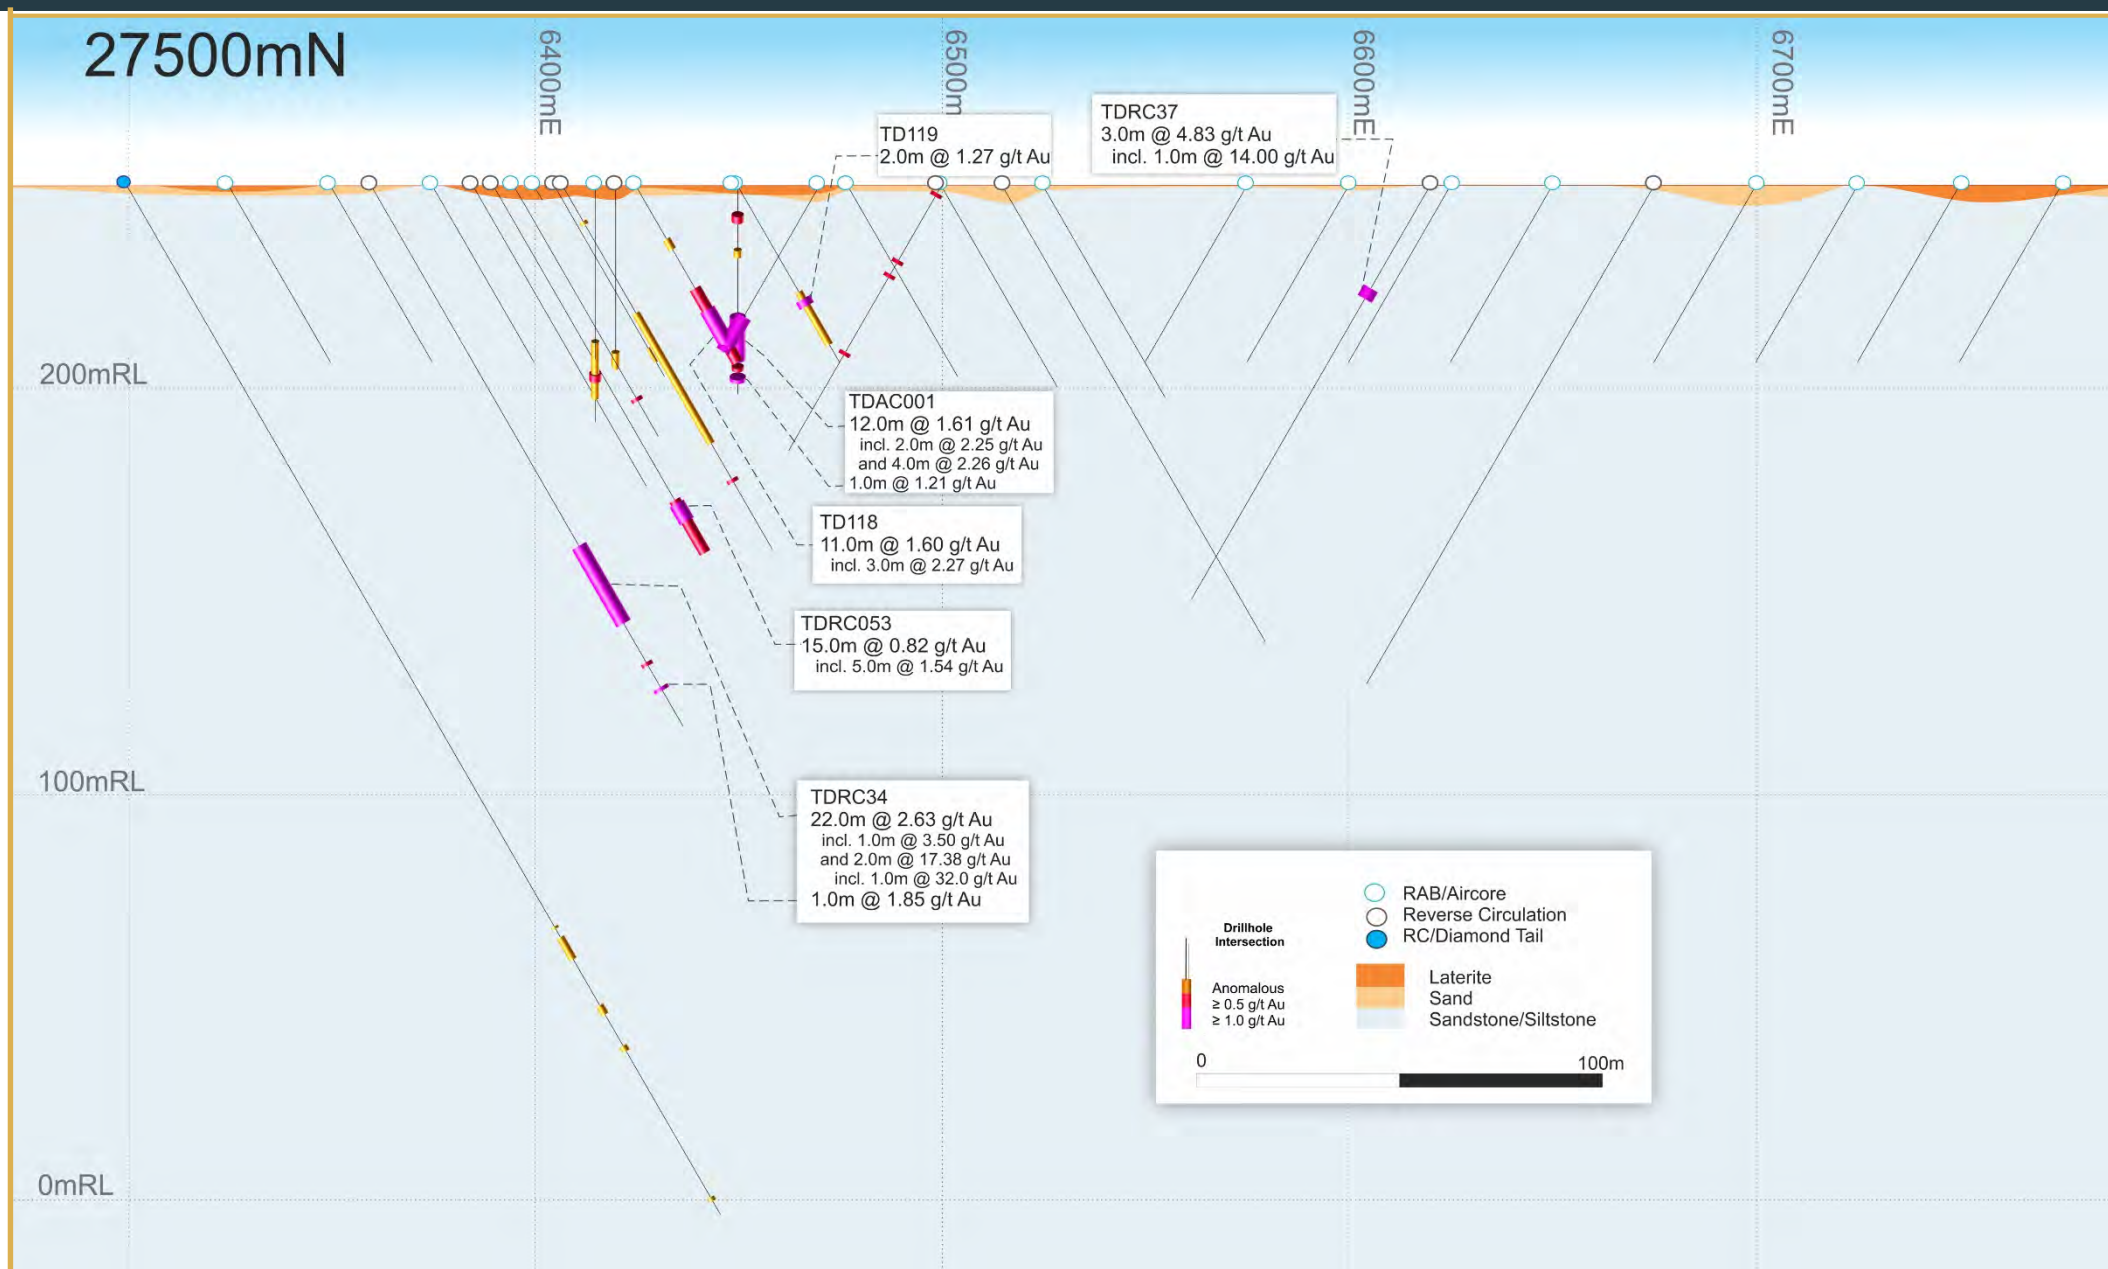

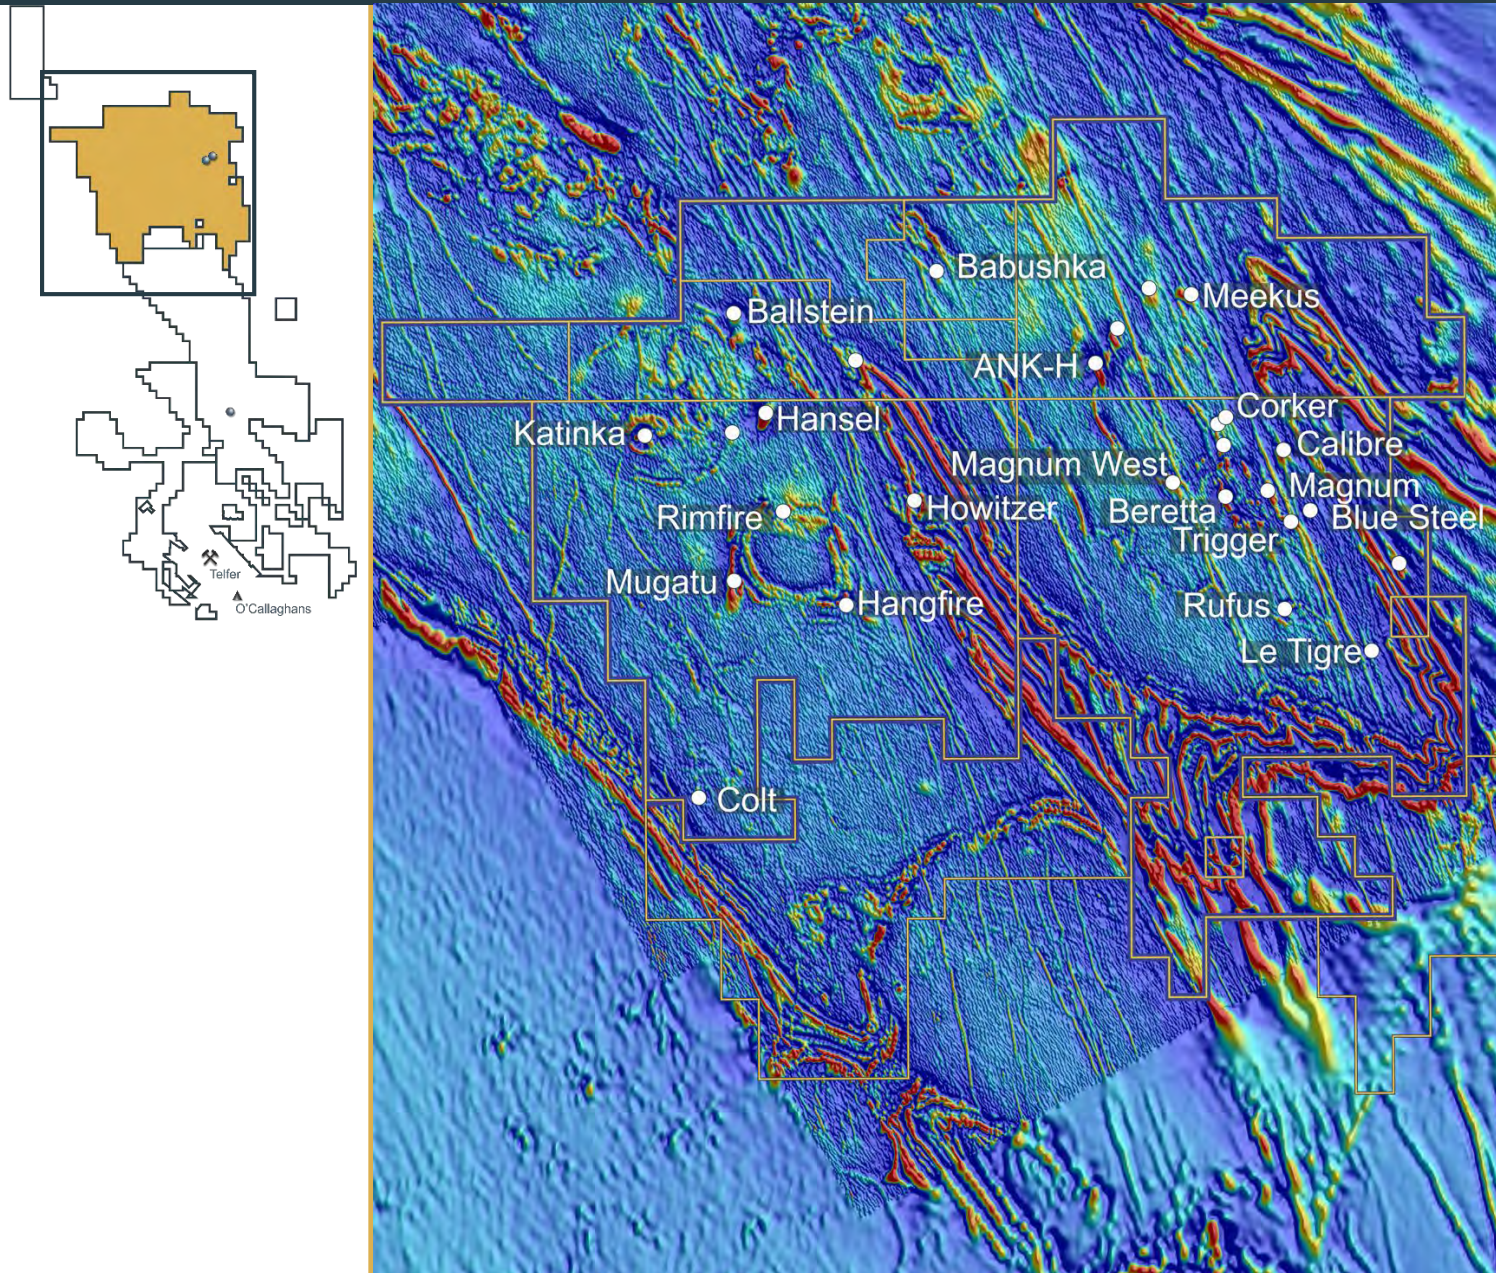

Source: Modified after Rowins et al (1998)

Tim’s Dome South deposit - Significant gold mineralisation

- Up to 200m wide gold vein bearing corridor over 4km in strike length
- Shallow – gold mineralisation commences from as shallow as 1m below the surface with variable surface outcrop
- Located just 12km northwest along strike from Newcrest’s giant Telfer gold-copper-silver mine
- Interpreted to be a re-emergence of the Telfer Dome structure
- Large Exploration upside – limited drill testing – average hole depth just 60m and only 17 holes deeper than 140m below the surface

Competent Persons Statement – Exploration Results

The information in this report that relates to the Exploration Results is extracted from the following:

Reports entitled various relating to Citadel Project and North Telfer Project created between 7 September 2011 and 11 October 2016, including:

- Report entitled “Citadel Project – VTEM Electromagnetic Survey Extends Existing Magnum Target Area and Defines New Generation of High Priority Targets” created on 2 September 2011;
- Report entitled “Citadel Project – Corker and Magnum Drilling Update” created on 13 June 2012;
- Report entitled “Citadel Project – Corker and Magnum Second Drilling Update” created on 2 July 2012;
- Report entitled “Citadel Project Drilling Update - Exploration Upside Expanded” created on 3 August 2012;
- Report entitled “Citadel Project Phase 2 Drilling Programme – Twin Success” created on 13 December 2012;
- Report entitled “Calibre and Magnum Mineral Resources JORC 2012 Updates” created on 23 February 2015;
- Report entitled “Calibre Deposit Drilling Update (No 1)” created on 18 June 2015;
- Report entitled “Calibre Deposit Drilling Update (No 2)” created on 02 July 2015;
- Report entitled “Calibre Deposit Drilling Update (No 3)” created on 10 July 2015;
- Report entitled “Calibre Deposit Drilling Update (No 4)” created on 28 July 2015;
- Report entitled “Calibre 2015 Phase 2 RC Drilling Update No. 3” created on 17 November 2015;
- Report entitled “Calibre 2015 Drilling Phase 2 Results” created on 16 December 2015;
- Report entitled “Rio Tinto – Antipa Citadel Project Joint Venture” created on 9 October 2015;
- Report entitled “High Grade Gold Mineralisation at Minyari Dome” created on 8 February 2016;
- Report entitled “Citadel Project Exploration Update” created on 15 March 2016;
- Report entitled “Citadel Project Commencement of IP Survey” created on 24 March 2016; and
- Report entitled “Minyari Drilling – May 2016 No.1” created on 2 May 2016;
- Report entitled “Minyari Phase – 2016 Phase 1 Drilling Programme Commences” created on 2 June 2016;
- Report entitled “Citadel Project IP Survey Identifies Multiple Chargeability Anomalies along 20km Calibre Trend” created on 24 June 2016;
- Report entitled “Minyari Reprocessed IP Survey Results” created on 5 July 2016;
- Report entitled “Minyari Drilling Update” created on 20 July 2016;
- Report entitled “Completion of Phase 1 Minyari Deposit RC Drilling Programme” created on 9 August 2016;
- Report entitled “Minyari Drilling Update No. 3” created on 17 August 2016;
- Report entitled “New Gold Opportunity – Tim’s Dome South” created on 22 September 2016;
- Report entitled “Minyari Drilling Update No. 4” created on 29 September 2016; and
- Report entitled “Citadel Project Rio JV - Exploration Update RC Drilling Programme” created on 10 October 2016.
