

## European/US Analyst - Immuron Moving to Forefront in NASH

**18 January 2017, Melbourne, Australia:** Immuron Limited (ASX:IMC) wishes to advise investors that European and US-based Life Sciences Research and Analyst firm Van Leeuwenhoeck Institute (VLI), has released a Research Note Report on our Company and its R&D programs, which primarily focuses on the Company's NASH assets and comparing them to other recent NASH product acquisitions by large Pharma companies.

Van Leeuwenhoeck Institute provides institutional investors and other professional investors with independent, un-biased research on the real value of innovative Life Sciences companies.

A copy of the Research Note can be viewed on the Immuron Company website at:

**About Van Leeuwenhoeck Institute:**

Van Leeuwenhoeck Institute (VLI) provides institutional investors and other professional investors with independent, un-biased research on the real value of innovative Life Sciences companies. Many institutional and individual investors will not invest in companies lacking independent third-party research coverage, yet few investment banks cover this sector because it requires dedicated expertise.

In spite of the lack of quality knowledge on an industry-wide basis, there is increased demand for life science-specific market research as investors are seeking information about leading companies in the sector in order to make well-informed investment decisions.

**About Immuron:**

Immuron Ltd (ASX: IMC; OTCQB: IMROY) is a microbiome company focused on developing and commercialising oral immunotherapeutics for the treatment of a many gut mediated diseases. Immuron has a unique and safe technology platform that enables a shorter development therapeutic cycle. The Company currently markets and sells Travelan® for the prevention of Travellers' diarrhoea, whilst its lead product candidate IMM-124E is in Phase 2b clinical trials for NASH and ASH. These products together with the Company's other preclinical immunotherapy pipeline products targeting immune-related diseases currently under development, will meet a large unmet need in the market.
