Appointment of Non-Executive Director & Chairman

Investigator Resources Limited (ASX: IVR) is pleased to announce the appointment of Dr David Ransom as non-executive director and Chairman of the board effective as of 23 January 2016.

Dr Ransom has over 45 years of experience within the mining industry in Australia and abroad. Dr Ransom is a graduate of the University of Sydney (BSc Geology) (Hons) and Australian National University (PhD 1968 Structural Geology). His earlier experience included roles as a project geologist with the Aberfoyle Group in Australia and Cominco Ltd in Canada. Dr Ransom also worked as a specialist consultant for 20 years with a clientele including majors such as CRA, BHP, Newmont and numerous companies in the microcap sector, specialising in structural geology.

More recently over the past 17 years, Dr Ransom was employed by Acorn Capital Ltd being an early investor with the role of resource analyst/portfolio manager focusing on the microcap materials and energy sectors. He is well known and highly regarded in the fund management industry. He retired from Acorn Capital Ltd in September 2017 but remains as a consultant.

Dr Ransom has extensive board experience gained over the past 25 years in small mining and exploration companies.

Dr Ransom will receive a total cash remuneration of \$65,000 pa., and will also receive, subject to Shareholder approval at the next Annual General Meeting, a once-off incentive issue of 2,500,000 options exercisable at 4.8 cents, escrowed for two years and expiring after three years.

Investigator Resources overview

Investigator Resources Limited (ASX code: IVR) is a metals explorer with a focus on the opportunities for greenfields silver-lead, copper-gold and nickel discoveries offered by the resurging minerals frontier of the southern Gawler Craton on South Australia's northern Eyre and Yorke Peninsulas.

The Company announced a revised upward estimation for the Paris Silver Project Inferred Mineral Resource for its 2011 Paris silver discovery to 8.8Mt at 116g/t silver, containing 33Moz silver (at a 50g/t silver cut-off) in November 2015.

The Company has applied a consistent and innovative strategy that has developed multiple ideas and quality targets that has given Investigator first-mover status. These include the Paris silver discovery, the recognition of other epithermal fields and the associated potential for porphyry copper-gold of Olympic Dam age, along with the possibility of Archaean nickel in the underlying basement.
