DECEMBER 2016 QUARTERLY ACTIVITIES & CASHFLOW REPORT

During the December 2016 Quarter corporate issues and funding constraints continued to limit project activity to work sufficient only to support maintenance of the most prospective parts of the tenement portfolio and planning for future work programs. An updated review of current projects is provided in the following pages.

Corporate

HQ Mining Resources Holding Pty Ltd ("HQ Mining") and associates currently hold 76.46% of the Company's shares.

Up to September 2016 HQ Mining provided loans to fund the Company's activities. However, no further funding has been received from HQ Mining since then and accordingly the Company has undertaken the sale of assets to provide funding for its ongoing activities.

During the Quarter, the Company entered a sale and leaseback of its Coppervale field base, north of Molong, for \$368,000 (GCR ASX 30 September 2016) and a sale agreement for its 100%-owned Cargo project for \$500,000 in staged payments commencing 31 October 2016 (GCR ASX 1 November 2016).

The Company is currently examining capital raising options to fund its planned work programs, and an announcement will be made to ASX immediately a funding proposal has been accepted by the Board.

REVIEW OF PROJECTS

GCR has a portfolio of projects (Figure 1) diversified by commodity and by geological province, with prospectivity demonstrated in each case by regional operating mines and significant deposits. These include:

- Central NSW Porphyry Province Copper/Gold – Copper Hill
- South Australian Gawler Craton - Iron Oxide/Copper/Gold (IOCG)
- Cobar Region NSW – Base Metals/Gold
- Lachlan VMS Belt NSW – Zinc/Copper/Gold
- Northwest Queensland – Phosphate/Uranium

The portfolio of projects has been reduced by divestments, and discussions continue with several parties interested in acquiring or farming-in to some of the remainder.

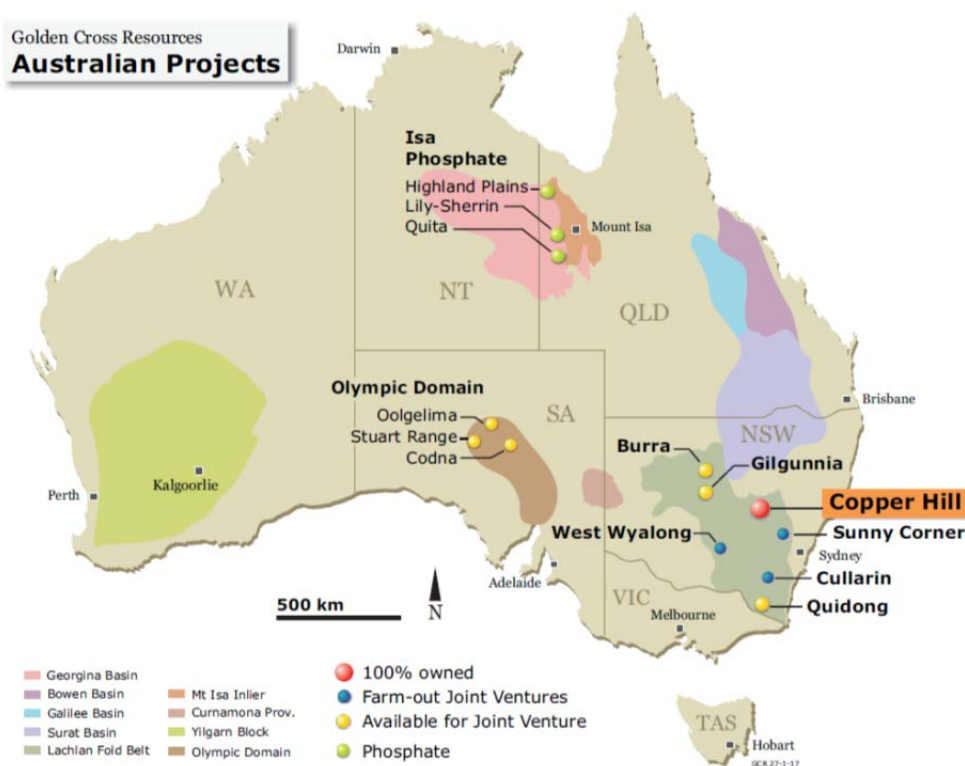

Figure 1: GCR Projects Status Map
[details of current projects are included in the Mineral Tenements Table at end of this report]

Copper Hill GCR 100%

Copper Hill is approximately 50 kilometres north of the Cadia Valley Project, one of Australia's largest producing goldmines. Porphyry copper-gold deposits of the Copper Hill area occur within the same Ordovician-age volcanic belt that hosts Cadia-Ridgeway and on the northern edge of a corridor formed by the interpreted WNW-trending Lachlan Transverse Zone (Figure 2).

Following completion of a resource update in March 2015 (GCR ASX 25 March 2015), the Company completed a Scoping Study based around the higher grade core of the Copper Hill deposit containing 160,000 tonnes copper and 480,000 ounces gold in 28 million tonnes grading 0.56% copper, 0.53 g/t gold, calculated at a 0.4% copper cut-off (GCR ASX 15 April 2015).

The goal is to implement components of the 2015 Scoping Study that are required to progress towards a mining project.

During the Quarter, the freehold property covering most of the Copper Hill Project was sold and revised access arrangements are being negotiated with the new landowner.

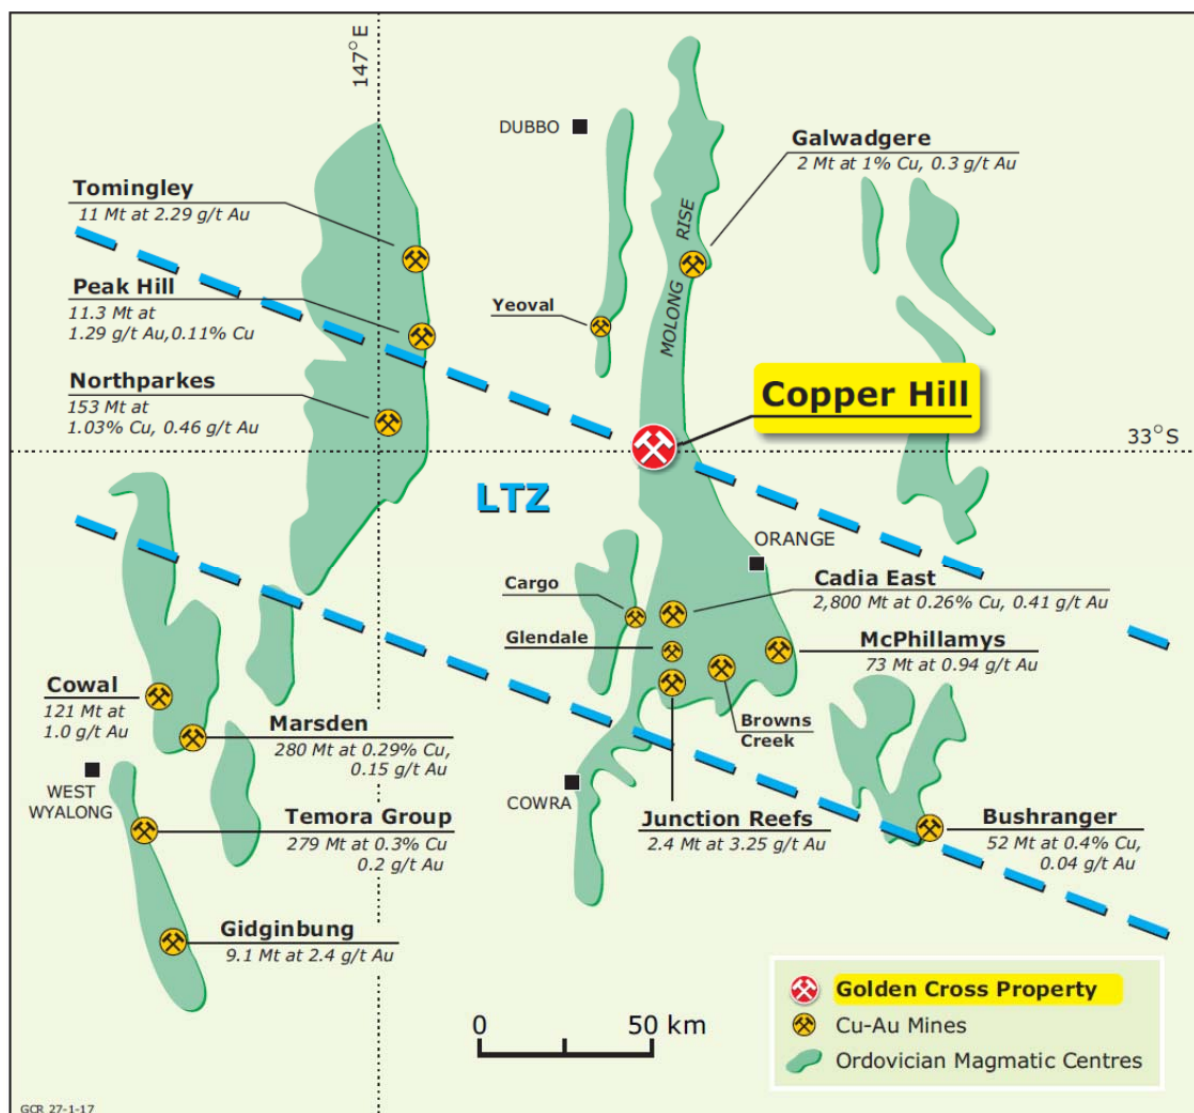

Figure 2: Copper Hill & Cargo on NSW Porphyry Provinces

Cargo

During the Quarter, offers to acquire the project were sought received from several parties, and on 31 October 2015, an agreement was finalised to divest the project to Agricultural Equity Investments Pty Ltd for \$500,000 (GCR ASX 1 November 2016). Final payment is due on 31 January 2017.

SOUTH AUSTRALIA Iron Ore Copper-Gold (IOCG) GCR 100%

In South Australia several magnetic / gravity targets have been identified by GCR geophysicists. Three targets have been prioritised for drilling, subject to the availability of funding, after encouraging results from the 2013 drill program. The targets are located at the north-western end of the interpreted structural corridor that contains significant copper-gold deposits at Carrapateena, Olympic Dam, Prominent Hill and Cairn Hill (Figure 3).

Planning and approval processes are underway for the next stage of drilling. Approaches continue to be received from parties interested in farming in to these properties

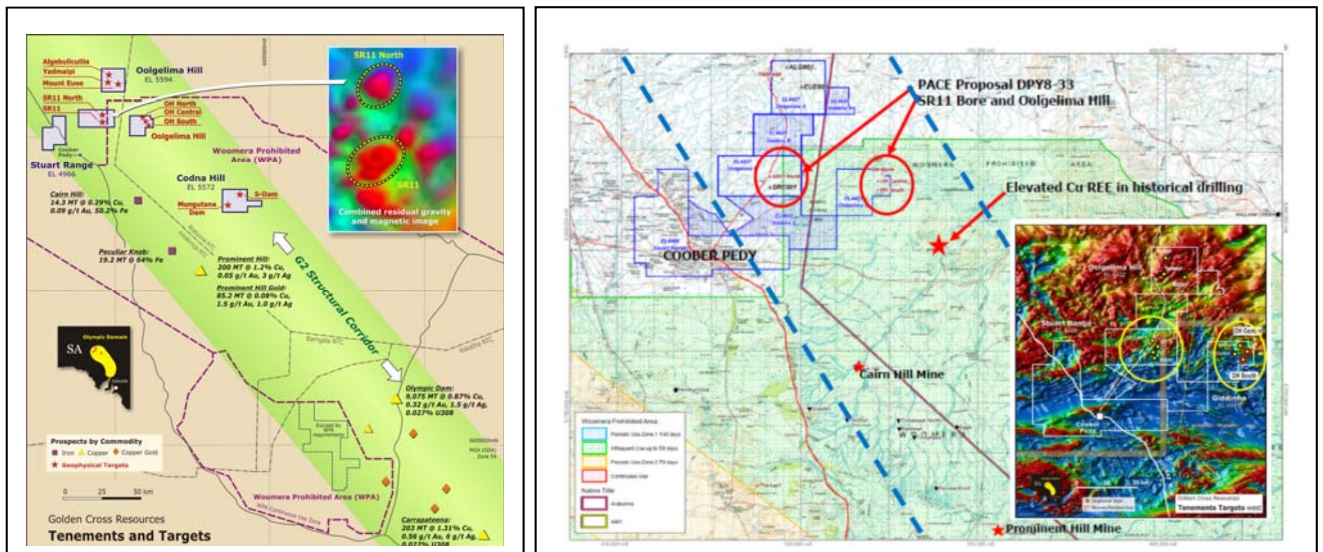

Figure 3: Gawler Craton Projects: Location & Drill Targets (inset shows targets on magnetic image)

COBAR REGION

Canbelego & Gilgunnia Groups GCR 100%

The Cobar region is well endowed with high grade polymetallic deposits supporting long life mining operations. GCR has a small holding of strategically located tenements remaining in two areas of the region after divestments during 2015-16.

- **Burra** – along strike from Mt Boppy Goldmine
- **Gilgunnia** – along strike from Aurelia Metals Limited's Hera gold/base metal deposit and surrounding Peel Mining's high grade copper discovery at Mallee Bull.

The Burra and Gilgunnia tenements are available for farm-in.

LACHLAN VMS PROVINCE

Silurian formations prospective for volcanic associated massive sulphide deposits extend over 300km from the Orange-Bathurst region in the north through Woodlawn and Captain's Flat and southwards into eastern Victoria. GCR has three projects in this region:

- **Quidong**
GCR 100%

Quidong has extensive occurrences of carbonate-hosted zinc/lead and gold mineralisation, and potential intrusive related gold mineralisation, which occurs elsewhere in the region. Previous data and GCR field reconnaissance have identified high grade zinc-lead-gold drill targets which remain to be tested. This project is available for farm-in.

During the Quarter, a Moving Loop EM survey was planned over two of the main target areas. Operational limitations restricted the survey to only part the planned area. Final data are awaited, however initial geophysical evaluation indicates the data is ambiguous, possibly because of the large amount of sulphidic rock in the area. Further evaluation is planned ahead of selection of alternate geophysical techniques for the remaining area.

- **Sunny Corner**
JV with Argent Resources Ltd. GCR 30%
No field activity reported by JV partner.
- **Cullarin**
JV with Heron Resources Ltd. GCR 20%
An offer to acquire GCR's residual 20% interest was received from Heron Resources Ltd during the Quarter and accepted on 23 December 2016. A payment of \$12,500, completing the transaction, was received on 19 January 2017.

ISA PHOSPHATE

GCR subsidiary, King Eagle Resources Pty Ltd holds 100% of three deposits, Highland Plains, Lily & Sherrin Creek and Quita Creek (Figure 4) that account for a third of the historical phosphate resources being evaluated for the Paradise Phosphate Project.

The continuation of Highland Plains westwards into Northern Territory is held by Phosphate Australia Ltd, where a maiden JORC 2004 resource was announced on 31 March 2009.

Following cessation of the joint venture with Paradise Phosphate Ltd, King Eagle has moved to restore the tenements to good standing, ahead of work to convert the historical resources to JORC 2012 compliance.

OTHER JOINT VENTURES

West Wyalong

Argent Minerals Ltd 51%, GCR 49%

Argent continued to define exploration targets using IP surveys and announced plans for a 6 hole, 2,150 metre drilling program to test the Theia and Narragudgil targets before 30 June 2017 (Argent ASX 26 October 2016).

Notes

E/EL/ELA = Exploration Permit/Licence/Application; EPM = Exploration Permit for Metals

Full names for abbreviations are as follows:

GCO	Golden Cross Operations Pty Ltd, a wholly owned subsidiary of GCR
KER	King Eagle Resources Pty Limited, a wholly owned subsidiary of GCR
ARD	Argent Minerals Limited (ASX: ARD)
TRO	TriAusMin Minerals Limited, a wholly-owned subsidiary of Heron Resources Ltd (ASX:HRR)
GCRP	GCR Panama, Inc, a wholly owned subsidiary of GCR
MTI	MapIntec Technologies Inc.

- (1) TriAusMin earned an initial 62.5% interest by spending \$200,000 to 13 September 2010. Further expenditure by TRO of \$170,000 to July 2014 increased TRO's interest to 80% and diluted GCO's interest to 20%. TriAusMin has offered to acquire GCO's residual 20% interest.
- (2) Argent Minerals earned 51% in the Sunny Corner Joint Venture by spending \$500,000 by 1 June 2011 in Stage 1. It earned 70% by additional expenditure of \$186,000 (for a total expenditure of \$686,000) by July 2013.
- (3) Argent Minerals earned 51% in the West Wyalong Joint Venture by spending \$750,000 by 1 June 2011. ARG may earn a further 19% to total 70% by additional expenditure of \$600,000 (for a total expenditure of \$1,350,000) by 30 June 2017. Barrick Gold Corp holds a 2.5% net smelter return.
- (4) MapIntec Technologies Inc., a Panamanian company, has a 10% interest free-carried to a decision to mine.

Compliance Statement: *The information in this report that relates to Exploration Results is based on information compiled by Mr Bret Ferris, who is a Member of the Australasian Institute of Geoscientists. (AIG). Mr Ferris a consultant to Golden Cross Resources Limited, and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Mr Ferris consents to the inclusion in this report of the matters based on that information in the form and context in which it appears.*

The Production Target and the Mineral Resources on which it is based are extracted from reports released to the market by GCR on 24 March 2015 and 15 April 2015. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the production target in the report dated 15 April 2015 continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original market announcements.

Forward-Looking Statements: *This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning planned exploration program and other statements that are not historical facts. When used in this document, the words such as “could,” “plan,” “estimate,” “expect,” “intend,” “may,” “potential,” “should,” and similar expressions are forward-looking statements. Although Golden Cross Resources Limited believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.*

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

+ See chapter 19 for defined terms.
