REVIEW AND RESULTS OF OPERATIONS

Overview

The Group has recorded a strong beginning to the financial year. Underlying profit after tax of was \$53.9 million, an increase of 18% on the previous corresponding half-year, driven by a lift in earnings across all retirement businesses. The strong performance of the core Aveo retirement business was assisted by additional earnings contributions from the Freedom and Retirement Villages Group (*RVG*) acquisitions.

Total retirement sales were a record 621 units, a result which was augmented by a strong lift in average deferred management fee & capital gain (*DMF/CG*) amount per transaction to \$97,800. Portfolio turnover, at 10.3%, was within the Group's target range of 10% to 12%. There were 58 new retirement units delivered during the half-year.

The RVG and Freedom portfolios are performing in line with the acquisition assumptions and have been successfully integrated. This allows management to focus on extracting value from the additional growth opportunities available in these two portfolios.

Financial results

Key financial headlines of the Group's 31 December 2016 results are:

- statutory profit after tax increased 82% from a profit of \$66.5 million to a profit of \$121.2 million;
- underlying profit after tax and non-controlling interest¹ was \$53.9 million, up 18%;
- earnings per stapled security (*EPS*) on underlying profit after tax and non-controlling interest increased 7% to 9.5 cents;
- funds from operations (*FFO*) was \$82.8 million compared to \$89.5 million for the previous period;
- FFO per security was 14.4 cents compared to 17.4 cents for the previous half-year; and
- net tangible assets per stapled security was \$3.23, up 8% from 30 June 2016.
- Underlying profit reflects statutory profit as adjusted to reflect the Directors' assessment of the result for the ongoing business activities of the Group, in accordance with AICD/Finsia principles of recording underlying profit. Underlying profit has not been audited.

Statutory profit after tax nearly doubled to \$121.2 million, whilst underlying profit increased by a smaller increment of 18% to \$53.9 million. Underlying EPS still increased by 7% despite the impact of the additional equity raised to fund the RVG and Freedom acquisitions. The NTA per security increase was driven by the statutory profit increase and the lack of any half year distribution. FFO has decreased by 7% largely driven by lower capitalised interest included in cost of goods sold.

Key reconciling items between the Group's statutory profit and underlying profit after tax are:

	For the half-year ended	
	31 Dec	31 Dec
	2016 \$m	2015 \$m
Underlying profit after tax and non-controlling interest	53.9	45.6
Change in fair value of retirement investment properties	22.9	2.5
Change in fair value of other investment properties	3.2	12.3
Gain on acquisition of RVG	52.6	-
Deferred tax asset derecognised	(8.9)	-
Share of non-operating loss of equity-accounted investments	-	(1.9)
Gain from sale of Non-Retirement asset	-	5.0
Other	(2.5)	3.0
Net profit after tax attributable to stapled securityholders of the Group	121.2	66.5

In the opinion of the Directors, the Group's underlying profit reflects the results generated from ongoing operating activities and is calculated in accordance with AICD/Finsia principles. The non-operating adjustments outlined above are considered to be non-cash or non-recurring in nature. These items are included in the Group's consolidated statutory result but excluded from the underlying result. Underlying profit has not been audited.

The Retirement asset valuation increase was in part the result of improved contract terms beginning to be recognised across the portfolio. The Gasworks (other investment properties) valuation increase was in line with a new external valuation.

Key divisional contributions to the underlying performance of the Group included:

- 1. Includes capitalised interest in cost of goods sold.
- 2. EBITDA is earnings before interest, income tax, depreciation and amortisation.
- 3. EBIT is earnings before interest and income tax.

The Group's underlying profit after tax and non-controlling interest for the half-year was \$53.9 million, up \$8.3 million (18%) on the previous corresponding half-year.

The increase in Retirement profit is supported by the increase in contributions across all segments. The Retirement contribution as a proportion of divisional contribution has increased by 16% compared to the previous corresponding half-year.

Having achieved its interim goal of a return on assets (*ROA*) of 6.0% to 6.5% in FY16, with an actual result of 6.3%, the Retirement business remains on track to achieve its FY18 ROA target of 7.5% to 8.0%.

^{1.} Development profits are accounted for in the change in fair value of retirement investment property.

Retirement EBITDA increased 57% to \$45.7 million, driven by increases across all businesses and supported by additional earnings from the Freedom and RVG portfolios.

There was a record level of sales volumes, with development sales increasing as a proportion of total sales in line with increased delivery volumes.

The Established business result was driven by a combination of higher volumes and higher sales prices, whilst the Development result resulted from the delivery of 58 new retirement units and a contribution from the Freedom minor development units.

The Care and support services result was driven by tight cost controls across the aged care facilities.

HY16 results include share of profit of, and fees charged to RVG. HY17 revenue excludes these items but includes 100% of RVG revenue from 1 July 2016. Profit contribution is after allowing for minority's share of RVG results until 24 August 2016, when RVG became a wholly owned subsidiary.

- 2. Includes resident commissions and village administration fees.
- 3. Relates to resales and operating buyback purchases.
- 4. Includes marketing and other management expenses.

The improvement in the Established Business result was driven by increased DMF/CG revenue, with an improved performance in the original business supplemented by additional contributions from the RVG and Freedom assets.

Buyback sales revenues increased substantially as the higher levels of buyback stock acquired in previous periods as part of the active asset improvement program were sold back into the market.

RVG earnings were equity accounted until acquisition in August and then consolidated. The increase in other expenses reflects the impact of RVG's consolidated costs without an offsetting property service fee that was paid before acquisition. It was offset by a corresponding consolidation of RVG's revenue after acquisition.

The increase in other expenses reflect increases due to Freedom and RVG costs.

- 3. Shown with a full six months contribution from RVG assets.

Sales volumes increased 58% to 513 units, whilst turnover remains within with the 10% to 12% target rate.

The significant increase in operating buyback purchases was to facilitate the planned introduction of the Freedom care model across ten Aveo villages.

The lift in average transaction price point was due to a combination of:

- continued price increases across the original Aveo portfolio; and
- the impact of the RVG villages which are located in higher value Sydney and Melbourne suburbs.

DMF margins were impacted by legacy RVG resident contracts that have inferior terms relative to the average Aveo contract. However, this will be improved over the longer term as the Aveo Way contracts are introduced into the RVG portfolio.

Retirement Development successfully delivered 58 new units, with the targeted delivery of 34 units at Durack supplemented by the delivery of additional units at a former RVG joint venture village that was fully acquired in October.

More new units were sold than delivered in the period, as stock delivered at the end of FY16 was sold down.

The sale of 33 higher margin minor developments (legacy company owned Freedom stock) supplemented the profit contribution from delivery of traditional development units. The Group remains on track to sell down this legacy stock over a three to four year period, at a rate of about 70 units per annum.

Redevelopment buyback purchases increased as plans continue to progress at several redevelopment villages.

Construction programs for the delivery of the remaining 208 new units in FY17 remain on track:

Planning is also significantly progressed for FY18, with the long stated target of 500 new retirement units by FY18 still on track for delivery. Construction has already commenced on the FY18 delivery projects at Newcastle (50 units), Newstead (199 units) and Southern Gateway (64 units). The remaining projects are in varying stages of progressing through the design finalisation and subsequent tender process.

Aged care facilities remain the main profit contributor. Tight cost controls across the facilities helped lift the profit contribution in the period.

While the allied health businesses continue to provide a positive contribution, their main value remains strategic. They provide discounts to residents on health services, which provides a point of competitive differentiation, that in turn supports results in the Established Business.

Delivery of the new Durack aged care facility remains on track for final quarter of FY17. Display apartments within the facility will be ready by the end of February, which will allow pre-sales to commence to prospective residents. Construction of the Newstead integrated retirement community development has now commenced, which incorporates the next aged care facility, scheduled for delivery in FY18.

The lower profit contribution relative to HY16 was impacted by the settlement of units in The Milton residential apartment project in HY16. Land lot sales were impacted by the timing of various approvals that impacted settlements, with a skew to the second half expected as a result.

Land sales contracts on hand still remain high.

The Gasworks, Newstead, office and retail complex was independently valued at \$166.8m as at 31 December 2016. The increase in value is not included in underlying profit but is included in statutory profit.

Capital management metrics

	31 December 2016	30 June 2016
Reported Gearing ¹	16.6%	17.4%
Net debt	\$469.0m	\$431.3m
Gross interest bearing liabilities	\$499.0m	\$461.5m
Undrawn committed lines	\$126.0m	\$163.0m
Weighted average borrowing cost	3.2%	3.4%
Weighted average debt maturity	1.2 years	1.7 years

1. Measured as net debt divided by total assets net of cash and resident loans.

Indicative terms have been agreed with the Group's existing syndicated facility lenders regarding:

- extension of the term of the facility to July 2020; and
- an increase in total facility limits by \$50.0 million to \$607.5 million.

Other terms remain largely the same as the existing facility.

Upon completion of this refinancing:

- weighted average debt maturity will increase to approximately 3 years;
- undrawn committed lines will increase by \$57.5 million; and
- there will be no debt maturity until March 2019.

The Group's debt remains unhedged. Recent falls in interest rates have reduced the weighted average cost of debt to 3.2% per annum.

Gearing at 16.6% remains within target range of 10% to 20%.

Since FY14, a net \$267 million has been invested in the development of new retirement units. This has been primarily funded by a sell down in residential inventory stock, which has released \$217 million in capital over the same period.

An investment of approximately \$500 million is required to fund the development and sell down of 500 retirement units per annum. This requires a further \$150 million of net capital investment from now through to FY18. The ongoing sell down of the remaining \$227 million in residential inventory will provide a ready source of funding for this required capital.

Risk

There are a number of risks that could affect the Group's ability to achieve its staged goals of returns on retirement assets of 7.5% - 8.0% by FY18. These include:

- A downturn in the Australian property market could reduce growth in average transaction price
 points and consequently average DMF/CGs. This risk is partly mitigated by the Group's
 introduction of the improved Aveo Way contract terms.
- Such a downturn could also reduce the Groups' ability to sell its retirement and non-retirement developments. This risk could be partly mitigated by the Group reducing the rate of development.
- Development margins could be affected by construction delays and cost increases. Wherever
 possible, the Group controls this risk through fixed price contracts and by including early
 completion bonuses and/or late completion penalties in its construction contracts. The Group
 also carefully monitors development progress through regular management review.
- The Group may experience difficulties in executing its strategy to improve revenue from the Established Business by expanding the Freedom product offering to existing Aveo villages.

Outlook

Established Business

Sales remain in line with the long term 10% to 12% turnover target, which now equates to approximately 1,000 –1,200 units per annum. These strong sales results and low vacancy levels across the independent living unit portfolio provides further opportunities to continue lifting unit pricing.

This performance is allowing an increased focus on asset optimisation and improvement, which will assist to drive profit growth and value into the medium term.

The introduction of the Freedom care offering across ten selected Aveo communities, and the rollout of the Aveo Way contract across the RVG communities, are the first steps in implementing the growth opportunities available from the acquisition of the Freedom and RVG portfolios.

Development

The delivery of 208 new units is on track for second half of FY17, which will then complete the targeted 266 deliveries in FY17. Construction has already commenced on a number of development projects with FY18 delivery timelines.

Care and Support Services

The new Durack 123 bed aged care facility is on track to be delivered in the final quarter of FY17. This will be the first new co-located aged care facility developed and allow a full continuum of care for residents at Durack.

Financial

The Group is maintaining its FY17 guidance:

- underlying EPS of 18.3 cents per stapled security (*cps*), an increase of 7.6% on FY16 EPS of 17.0 cps; and
- targeting a full year distribution of 9 cps, up 13% from 8 cps in FY16.

The Group is targeting further EPS growth of 7.5% from FY17 to FY18.

It remains on track to achieve FY18 its Retirement return on asset target of 7.5% to 8.0%.

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

Aveo Group (the 'Group') is domiciled and incorporated in Australia. Aveo Group's registered office and its principal place of business is Level 5, 99 Macquarie Street, Sydney, New South Wales. The financial report of Aveo Group consists of the financial statements of the Group comprising Aveo Group Limited ('Parent') and its controlled entities and Aveo Group Trust ('Trust') and its controlled entities ('Trust Group'). The financial report has been drawn up in accordance with ASIC Corporations (Stapled Group Reports) Instrument 2015/838 relating to combining accounts under stapling. The financial report is presented in Australian dollars.

The significant accounting policies adopted in the preparation of the financial report are set out below. These policies have been consistently applied to all periods presented, unless otherwise stated.

(a) Basis of preparation

This interim financial report has been prepared in accordance with the requirements of the Corporations Act 2001 and AASB134 Interim Financial Reporting.

This interim financial report does not include all the notes of the type normally included in an annual financial report. Accordingly, this report is to be read in conjunction with the annual report for the year ended 30 June 2016 and any public announcements made by Aveo Group during the half-year in accordance with any continuous disclosure obligations arising under the *Corporations Act 2001*.

Stapling

On 12 November 2004, Aveo Group Trust units were stapled to Aveo Group Limited shares. The Group is a stapled entity that comprises Aveo Group Limited and its subsidiaries and Aveo Group Trust and its subsidiaries. The stapled securities cannot be traded or dealt with separately.

The constitutions of the Parent and the Trust ensure that, for as long as the two entities remain jointly quoted on the Australian Securities Exchange, the number of units in the Trust and the number of shares in the Parent shall be equal and that unitholders and shareholders will be identical.

Aveo Group Limited has been identified as the acquirer and the parent for the purposes of preparing the Group's financial statements. The Trust has been consolidated under the stapling arrangement and is identified as the acquiree.

The net assets of the acquiree have been identified as non-controlling interests and presented in the balance sheet within equity, separately from the Parent's equity. The profit of the acquiree has also been separately disclosed in the income statement.

Although the interests of the equity holders of the acquiree are treated as non-controlling interests, the equity holders of the acquiree are also the equity holders in the acquirer by virtue of the stapling arrangement.

(b) New accounting standards and interpretations

The Group has adopted as of 1 July 2016 all of the new and revised Standards and Interpretations issued by the AASB. The adoption of the new and revised Standards and Interpretations had no material impact on the financial position or performance of the Group.

2. FINANCE COSTS

The Group's gross borrowing costs for the half year-ended 31 December 2016 were \$9.7 million (31 December 2015: \$6.5 million).

During the half-year ended 31 December 2016, all of the Group's borrowing costs related to the acquisition and construction of qualifying assets. As required by AASB 123 – Borrowing Costs, borrowing costs of \$9.6 million (31 December 2015: \$6.5 million) were capitalised to inventory and investment property.

10. SEGMENT INFORMATION

Operating segments are identified based on internal reports that are regularly reviewed by the chief decision maker in order to allocate resources to the segment and assess its performance.

(a) Reportable segments

The Group is organised into two segments:

- Retirement, which develops and operates retirement villages and aged care facilities to produce rental and other income; and
- Non-Retirement, which develops residential, commercial and retail property. Developed residential property is sold, whilst developed commercial and retail property may be sold or held to produce rental income and capital appreciation.

Segment earnings before interest, tax, depreciation and amortisation (EBITDA), measured on an underlying profit basis, is the primary measure used to assess segment performance. Underlying profit is defined in the Directors' Report.

10. **SEGMENT INFORMATION (continued)**

(b) Segment revenues and results

The following is an analysis of the Group's revenue and results by reportable operating segment for the periods under review:

- Segment revenue represents an aggregation of sale of goods and construction contract revenue, revenue from rendering of services and other revenue. Each of these represents a separate line item on the face of the income statement.
- 2. Includes unallocated Corporate Services.
- 3. EBITDA is earnings before interest, income tax expense, depreciation and amortisation.

11. FAIR VALUES OF FINANCIAL INSTRUMENTS

All financial instruments for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 the fair value is calculated using quoted prices in active markets.
- Level 2 the fair value is estimated using inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).
- Level 3 the fair value is estimated using inputs for the asset or liability that are not based on observable market data.

As at reporting date, the Group's only material financial instruments measured at fair value were its resident loan obligations. These are classified as being in level 3 of this hierarchy, and are measured as the estimated liability at reporting date, as if the resident were to require repayment at that date. The inputs to this valuation process were:

- the original amount of each loan;
- the current market value of the retirement unit to which each obligation relates;
- the tenure to date of the resident; and
- the contractual obligations of the Group and the resident relating to sharing of capital gains and payment of deferred management fees.

11. FAIR VALUES OF FINANCIAL INSTRUMENTS (continued)

The following table presents the changes in this liability for the half-year.

	Group for the half-year ended	
	31 Dec	31 Dec
	2016	2015
	\$m	\$m
Opening balance	1,519.4	1,290.5
Items recognised in profit or loss:		
Deferred management fees	(29.1)	(27.4)
Change in fair value of resident loans	124.1	12.0
Increase on business combination (note 13)	1,150.5	-
Net cash receipts on resident departures and arrivals	116.4	36.5
Closing balance	2,881.3	1,311.6

Resident loans are classified as level 3 in the fair value hierarchy. This means that a key assumption used in their valuation is not directly observable. This key assumption is the aggregate current market value of the occupied retirement units of \$3,889.4 million (30 June 2016: \$2,212.3 million). This was determined on the same basis as the market value of both occupied and unoccupied units used as an input to the fair value of retirement villages. If the value used for this input was 5% higher, the fair value of these loans would be \$111.7 million higher (30 June 2016: \$51.1 million higher), and the input was 5% lower, the fair value of these loans would be \$116.4 million lower (30 June 2016: \$55.6 million lower). The effect of changing that current market value on the fair value of the related investment properties would be greater.

The Trust Group has no financial instruments measured at fair value. The fair value of all other financial instruments approximates their carrying amount.

12. BORROWINGS

A syndicated bank facility drawn to \$400.0 million expires on 24 December 2017 and consequently has been classified as current. The Group is well advanced in renewing the facility, and expects to complete this before 30 June 2017.

13. BUSINESS COMBINATION

On 24 August 2016, the Group acquired all of the issued securities of Retirement Villages Group (RVG) that it did not previously own, making RVG a wholly owned subsidiary of Aveo. RVG owns and operates, through arrangements with the Group, 28 retirement communities mainly in Sydney and Melbourne.

Previously, the Group held 72.9% of RVG, which it accounted for as an equity-accounted associate. On RVG becoming a subsidiary, the Group remeasured the previous equity-accounted carrying amount to fair value as follows:

	\$m
Carrying amount	264.9
Fair value	305.3
Gain	40.4

The Group paid \$100.2 million in cash for the remaining 27.1% of RVG that it did not already own. Part of this remaining interest (10%) was acquired by the Trust for \$37.1m in cash. Transaction costs of \$0.9 million were recognised in the income statement.

13. BUSINESS COMBINATION (continued)

The assets and liabilities recognised as a result of the acquisition, and the resulting discount on acquisition, are as follows:

	\$m
Cash and cash equivalents	39.6
Trade and other receivables	10.9
Investment properties	1,580.6
Property, plant and equipment	0.9
Trade and other payables	(27.5)
Resident loans	(1,150.5)
Deferred revenue	(35.4)
Net identifiable assets	418.6
Less:	
Previously held equity interest (remeasured to fair value)	(305.3)
Purchase consideration	(100.2)
Discount on acquisition	13.1
The total net gain of \$52.6 million recognised in the income statement comprises:	
	\$m
Gain on remeasurement of prior equity-accounted investment to fair value	40.4
Discount on acquisition	13.1
Transaction costs	(0.9)
	52.6

RVG contributed revenues of \$18.0 million and net profit of \$38.4 million (including gain on change in fair value of investment properties and income tax expense totalling \$24.6 million) to the Group for the period from 24 August 2016 to 31 December 2016.

In the opinion of the Directors of Aveo Group Limited and Aveo Funds Management Limited as Responsible Entity for Aveo Group Trust (collectively referred to as 'the Directors'):

- (a) the financial statements and notes are in accordance with the Corporations Act 2001, including:
 - (i) giving a true and fair view of the Group's and the Trust Group's financial position as at 31 December 2016 and of their performance, for the half-year ended on that date; and
 - (ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Regulations 2001*;
- (b) there are reasonable grounds to believe that the Group and the Trust Group will be able to pay their debts as and when they become due and payable.

Independent review report to the security holders of Aveo Group

Aveo Group comprises Aveo Group Limited and the entities it controlled at the half-year end or from time to time during the half-year ("Aveo" or "the Group") and Aveo Group Trust and the entities it controlled at the half-year end or from time to time during the half-year ("Trust Group").

Report on the Half-Year Financial Report

We have reviewed the accompanying half-year financial report of Aveo Group, which comprises the consolidated balance sheets as at 31 December 2016, the consolidated income statements, the consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated cash flow statements for the half-year ended on that date, notes comprising a summary of significant accounting policies and other explanatory information, and the Directors' Declaration of the Group.

Directors' Responsibility for the Half-Year Financial Report

The directors of Aveo Group Limited and the directors of Aveo Funds Management Limited as Responsible Entity for the Aveo Group Trust (collectively referred to as "the Directors") are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal controls as the directors determine are necessary to enable the preparation of the half-year financial report that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 Review of a Financial Report Performed by the Independent Auditor of the Entity, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the financial report is not in accordance with the Corporations Act 2001 including: giving a true and fair view of the consolidated entity's financial position as at 31 December 2016 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 Interim Financial Reporting and the Corporations Regulations 2001. As the auditor of Aveo Group and the entities it controlled during the half-year, ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Independence

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*. We have given to the directors of the company a written Auditor's Independence Declaration, a copy of which is included in the Directors' Report.

Conclusion

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Aveo Group is not in accordance with the *Corporations Act 2001*, including:

- a) giving a true and fair view of the consolidated Group and Trust Group's financial position as at 31 December 2016 and of their performance for the half-year ended on that date; and
- b) complying with Accounting Standard AASB 134 Interim Financial Reporting and the Corporations Regulations 2001.
