Gwalia: Record production driven by productivity gains

8% year on year improvement, 3 key innovations

Ore passes

Allows bogger to work constantly, independent of ore trucks, removes ore from fired stopes more rapidly, allowing paste-filling and adjacent stopes to be fired earlier

Continuous Remote Tele-bogging (CY16) At critical times bogger operates 24 hours a day

Underground Storage At critical times shorter waste removal turnaround time gives greater availability of trucks for taking ore to surface

FY17F AISC is midpoint of guidance, per Q2 December 2016 Quarterly Report released 18 Jan 2017. June 2016 Reserve grade 8.3 g/t Au, refer ASX announcement released 23 August 2016 titled 'Ore Reserves and Mineral Resources Statements 30 June 2016'.

Exploration Results

The information in this presentation that relates to Exploration Results for Simberi and Pinjin is based on information compiled by Dr Roger Mustard, who is a Member of The Australasian Institute of Mining and Metallurgy. Dr Mustard is a full-time employee of St Barbara and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Mustard consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this presentation that relates to Exploration Results for Gwalia and the Leonora region is based on information compiled by Mr Robert Love, who is a Fellow of The Australasian Institute of Mining and Metallurgy. Mr Love is a full-time employee of St Barbara and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Love consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Mineral Resource and Ore Reserve Estimates

The information in this presentation that relates to Mineral Resources or Ore Reserves is extracted from the report titled 'Ore Reserves and Mineral Resources Statements 30 June 2016' released to the Australian Securities Exchange (ASX) on 23 August 2016 and available to view at <u>www.stbarbara.com.au</u> and for which Competent Persons' consents were obtained. Each Competent Person's consent remain in place for subsequent releases by the Company of the same information in the same form and context, until the consent is withdrawn or replaced by a subsequent report and accompanying consent.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original ASX announcement released on 23 August 2016 and, in the case of estimates of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the original ASX announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original ASX announcement.

Competent Person Tim Richards is entitled to participate in St Barbara's long term incentive plan, details of which are included in the 2016 Directors' and Financial Report released to the ASX on 23 August 2016

Full details are contained in the ASX release dated 23 August 2016 'Ore Reserves and Mineral Resources Statements 30 June 2016' available at <u>www.stbarbara.com.au</u>.

We supplement our financial information reporting determined under International Financial Reporting Standards (IFRS) with certain non-IFRS financial measures, including cash operating costs. We believe that these measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance.

Cash operating costs	 Calculated according to common mining industry practice using The Gold Institute (USA) Production Cost Standard (1999 revision).
All-In Sustaining Cost	 All-In Sustaining Cost is based on Cash Operating Costs, and adds items relevant to sustaining production. It includes some, but not all, of the components identified in World Gold Council's Guidance Note on Non-GAAP Metrics - All-In Sustaining Costs and All-In Costs (June 2013).
EBIT	 EBIT is earnings before interest revenue, finance costs and income tax expense. It includes revenues and expenses associated with discontinued operations.
EBITDA	 EBITDA is EBIT before depreciation and amortisation. It includes revenues and expenses associated with discontinued operations.
EBITDA margin	 EBITDA expressed as a % of revenue
Net-cash	 Net-cash equivalent to cash and cash equivalents less current and non-current interest bearing borrowings
Net-debt	 Net-debt equivalent to current and non-current interest bearing borrowings less cash and cash equivalents
Significant Items	 Items included in IFRS Net Profit After Tax that the Board and Management consider may not be indicative of, or are unrelated to, core operating results (such as profit or loss on gold options, or the sale of tenement rights) Refer 2016 Interim Financial Report (p4) for details, available at www.stbarbara.com.au
Underlying Net profit/(loss) after tax	 Net profit after tax excluding identified significant items Refer 2016 Interim Financial Report (p4) for details, available at <u>www.stbarbara.com.au</u>
