Fair value hierarchy

The fair value of financial assets and financial liabilities approximates their carrying amounts at the reporting date.

The note below provides information about how the Company determines fair values of various financial assets measured at fair value through profit or loss.

The Company measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices)

Level 3: Inputs for the asset or liabilities that are not based on observable market data (unobservable inputs).

Financial asset	Fair value hierarchy	Valuation approach	Fair value
Convertible preference shares	Level 1	Quoted bid prices in an active market	\$5,075,000 (30 June 2016: \$4,885,675)

Level 1 fair values for listed convertible preference shares are based on quoted bid prices on the Australian Stock Exchange which is an active market. There were no key observable inputs or relations of unobservable inputs to fair value.

The Company recognises transfers between levels of the fair value hierarchy as at the end of the reporting period during which the transfer has occurred. There were no transfers between fair value hierarchy levels during the half-year ended 31 December 2016.
