Transurban Releases FY17 Sustainability Report

Transurban today released its FY17 Sustainability Report which details progress and performance under our sustainability strategy.

The strategy comprises three focus areas:

1. Be good neighbours
2. Use less
3. Think long term

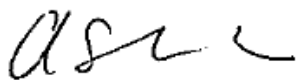

The principles inherent in these focus areas enhance Transurban's ability to deliver efficient and integrated transport networks that support productivity and community wellbeing.

Transurban's Chief Executive Officer Scott Charlton said that it was pleasing to see Transurban's FY17 sustainability performance acknowledged globally.

"We maintained a world leadership position in the Dow Jones Sustainability Index and were recognised as the second highest rated company in the transport sector internationally for sustainability," Mr Charlton said.

"We were also recognised as the leader in transportation infrastructure by the Global Real Estate Sustainability Benchmark."

The FY17 Sustainability Report is available online at sr17.transurban.com.
