EXTENSION OF PLUTO LNG TURNAROUND

The Pluto LNG turnaround was completed as planned but the mixed refrigerant compressor has experienced vibration on restart. As a result, further activities extending the turnaround have commenced to achieve the restart of production, targeted for the end of June 2019.

Woodside has made arrangements to meet obligations to our customers, including the purchase of third party cargoes. Woodside appreciates the support of our foundation customers and joint venturers.

Due to the turnaround extension, Woodside's 2019 production is expected to be at the lower end of the 88 – 94 MMboe guidance range.
