Dear Sir,

**COOPER'S OPERATIONS DISRUPTED BY WEATHER**

Cooper Energy NL advises that due to unusually inclement weather in Central Australia, rain has shut in roads around Moomba and further afield.

As a result, production from Christies, Sellicks and Worrior is currently shut-in awaiting the roads to reopen.

This will result in production from our three producing assets being deferred but it will not impact the overall recovery from the three fields. This temporary shut-in is evaluated to have a minimal impact on Cooper's budgeted cash flow for the year due to the current buoyant oil prices.

In addition, seismic operations (Sellicks, PEL88 and PEL100) have been suspended and the crews demobilised for at least a week as the crews cannot move freely in the region.

We will advise when operations recommence.

For further advice on this release, please contact either Michael Scott, Chief Executive Officer (08-9368-5833 or 0409-299-812) or Greg Hancock, Chairman (08-9368-5833 or 0418-263-388).

Yours faithfully  
**COOPER ENERGY NL**

Mr Michael Scott  
**CHIEF EXECUTIVE OFFICER**
