Unsecured Term Loan

Atlantic Gold (ATV) is pleased to announce that it has obtained an unsecured term loan amounting to \$2 million from a private investment group on normal commercial terms. The proceeds of the loan will be applied to advance the Touquoy Gold Project including finalisation of the Feasibility Study.

The period of the loan is 2 years unless the loan is repaid earlier. At the end of 2 years any loan amount outstanding will be repaid in cash or ATV shares at ATV's election. Under the terms of the loan ATV pays a facility fee (payable in cash or ATV shares) and issues 5 million options to the lender. Each option converts into an ATV share on payment of 15 cents. The options expire on the earlier of repayment of all loans outstanding or 2 years.

About Atlantic Gold NL

Atlantic Gold is applying its skills in identifying, developing and eventually responsibly mining gold reserves in Nova Scotia, the Touquoy Gold Project being the starting point. ATV's exploration approach is innovative and has not previously been systematically applied to the extensive goldfields of Nova Scotia. ATV's skills are derived from 15 years of such work in Western Australia, where the Company principals, as executives and directors of the highly successful Plutonic Resources Limited, discovered over 11 million ounces of gold, operated up to five gold mines (three of which are still in production, and now owned by Canada's Barrick Gold Corporation) and annually drilled up to 500,000m in exploration and resource development. The Company principals have considerable previous experience in exploration in Atlantic Canada.

The target at Touquoy is a production scenario incorporating an on-site gold treatment plant with a minimum 1.5 million tonne per annum throughput and a 7 year minimum mine life to produce approximately 90,000 ounces gold per year. Results from the in-progress Feasibility Study confirm that the Touquoy deposit has a low stripping ratio, excellent ore metallurgy and favourable ore grindability characteristics. The property is located in an old gold mining area about 110 km by sealed roads from Halifax, the capital of Nova Scotia. A Feasibility Study and permitting are in progress.

In addition to developing the Touquoy Gold Project Atlantic Gold is undertaking extensive exploration, both regional and near-mine, to build its resource base. The Company believes the area is highly prospective for additional Touquoy style deposits.

Atlantic Gold has earned a 60% interest in the Touquoy Gold Project. An additional 15% interest can be acquired in the property outside the general area of the known resource by securing project financing.

Yours sincerely,
