1 PRESS RELEASE AND OUTLOOK

3 May 2007

WESTPAC REPORTS RECORD INTERIM PROFIT

Highlights (All comparisons are with 2006 interim result):

- Record net profit of \$1,641 million, up 12%;
- Cash earnings of \$1,678 million, up 11%;
- Cash earnings per share of 91 cents, up 11%;
- Economic profit of \$1,281 million, up 13%;
- Interim dividend of 63 cents, fully franked, up 13%;
- Return on equity (cash basis) 24%; and
- Expense to income (cash basis) ratio down 90 basis points, to 46%.

Interim Profit Result

Westpac Banking Corporation today announced a net profit of \$1,641 million for the six months ended 31 March 2007, up 12 per cent. Cash earnings were up 11 per cent to a record \$1,678 million and cash earnings per share was also up 11 per cent.

Westpac also announced an interim fully franked dividend of 63 cents, up 13 per cent on the prior corresponding period, reflecting confidence in the Group's outlook.

Westpac Chief Executive Officer David Morgan said Westpac had delivered a strong performance with solid earnings growth and a 24 per cent return on equity.

"This is a high quality result. We have once again achieved double digit earnings per share growth and excellent returns, which demonstrates the strength of Westpac's operating model and our ability to deliver over the long-term for shareholders.

"This record result was driven by a good performance across Australian banking and an outstanding performance in our wealth management business.

"Operating momentum was particularly evident in the latest half with cash earnings up seven per cent on the second half 2006, built on loan growth of eight per cent for the six months.

"Revenue compared to the first half of last year was up seven per cent, comfortably above expense growth of four per cent, taking almost one percentage point off our cost to income ratio. This was despite employing nearly 400 new front-line employees over the half in Australia and launching a new brand advertising campaign.

"Balance sheet growth was strong with loans up 17 per cent and deposits up 15 per cent on the first half 2006, accompanied by a decline in margins consistent with Westpac's expectations."

Dr Morgan said that credit quality remained sound with loan losses moving towards more normal long-term levels. Reflecting strong loan growth and higher delinquencies, impairment losses increased 25 per cent from a low base.

"We have maintained our risk disciplines and remain well provisioned," he said.

While performances were strong across the Australian banking and wealth management businesses, the New Zealand and Pacific businesses continued to face difficult trading environments.

"We are in the early stages of turning around our New Zealand business," Dr Morgan said.

"The Australian financial services sector remains a high growth sector. Westpac's consistently solid earnings growth and high returns, together with the improved momentum in our banking business and the first class performance of BT, leaves us well placed to continue on our growth path," Dr Morgan added.

Business Unit Performance

Cash earnings (AUD millions)	Half Year 2007	Half Year 2006	% Change
Business and Consumer Banking	\$932m	\$835m	12
Institutional Banking	\$281m	\$251m	12
BT Financial Group	\$201m	\$165m	22
New Zealand (NZD)	\$221m	\$227m	(3)
Pacific Banking	\$34m	\$36m	(6)

- Business and Consumer Banking delivered a 12 per cent increase in cash earnings, profitably growing its balance sheet broadly in line with system. Strong volume growth was recorded in business lending (14 per cent), mortgages (12 per cent), cards (16 per cent) and deposits (13 per cent). Volume growth was accompanied by an 11 basis point margin decline and increased impairment losses.
- Westpac Institutional Bank (WIB) delivered a solid 12 per cent growth in cash earnings, with a lift in customer activity driving returns. Excluding structured finance, cash earnings increased 17 per cent. WIB has been particularly successful in assisting customers to meet short-term financing requirements and then satisfying their longer term needs with capital markets solutions. Specialised Capital Group continued to build momentum with total funds under management up 21 per cent to \$6.4 billion.
- BT Financial Group continues to be a major driver of growth, increasing its share in a fast growing market and delivering an outstanding 22 per cent increase in cash earnings. Funds under administration grew 23 per cent, driven by a 34 per cent increase in Wrap and a 14 per cent increase in Corporate Super. The group's insurance operations also delivered a much stronger performance, with earnings up 23 per cent.
- Despite a six per cent growth in core earnings, New Zealand recorded a three per cent decline in cash earnings. Sectors of the NZ economy experienced increased stress and this is showing up in increased delinquencies and higher loan impairment losses.
- Pacific Banking recorded a six per cent decline in cash earnings reflecting the economic and political instability in the region that has led to an increase in provisioning.

Outlook

The first half of the 2007 year has started solidly, with good operational momentum across all our businesses.

For the remainder of 2007, the Australian operating environment is expected to remain positive with credit growth broadly remaining at around current levels.

Westpac's Australian consumer and business banking operations are expected to continue to perform well, particularly given the momentum achieved in the first half of the year.

In the Institutional Bank, momentum is also good and existing lending growth is expected to translate into solid capital markets activity. Transactions already in the pipeline within the Specialised Capital Group should also add to revenue growth in the second half of the year.

Wealth management will continue to be a key growth driver, particularly as the recent superannuation tax changes lead to increased activity and solid fund growth.

New Zealand remains a turnaround challenge. High interest rates and a strong currency are expected to flow into some slowing in growth through the remainder of 2007. Additionally, a lower rate at which NZD earnings are being translated back to AUD will detract at least one percentage point in growth from 2007 full year group earnings.

The credit cycles in Australia and New Zealand are returning to more normal levels as we see the anticipated effects of the recent interest rate increases. In light of this, it is anticipated impairment losses will increase at a rate above loan growth.

However, there are no signs of any systemic credit issues. Overall, risk across the portfolio is expected to remain relatively low and will be supported by appropriate provisioning.

Strategically, Westpac's focus will remain on sustainable revenue growth and high returns while maintaining a prudent approach to risk combined with continued expense discipline.

Westpac remains confident it can continue to deliver strong results for shareholders. Solid earnings growth, combined with high returns on equity, will continue to underpin a high quality and sustainable performance.

2.1.1 Cash Earnings

Statutory reported results are adjusted for material items to ensure they appropriately reflect cash flows normally available to ordinary shareholders.

The impact of these cash earnings adjustments¹ and some accounting classifications² are significant when analysing the composition of the reported financial results. Our approach is to adjust for these items when evaluating inter-period movements of the components of the results.

Throughout this profit announcement, reporting of financial performance will refer to "cash earnings" unless otherwise noted.

Notes explained on page 8.

Notes to sections 2.1, 2.2 and 2.3

- 1 We consider cash earnings a more appropriate measure of financial performance than net profit after tax. It adjusts the reported results for material items to ensure they appropriately reflect cash flows normally available to ordinary shareholders. These include:
- Treasury Shares – Earnings on Westpac shares held by Westpac (Treasury shares), which are not permitted to be recognised as income under A-IFRS accounting standards but are reversed in deriving cash earnings to ensure there is no impact on cash flows available to ordinary shareholders;
 - TPS Revaluations – The impacts of fair value changes on hedges associated with the 2003 Trust Preferred Securities (TPS 2003), together with associated tax effects impacting the Foreign Currency Translation Reserve, are reversed in deriving cash earnings so they do not affect profits available for shareholders;
 - Unrealised NZ Retail Earnings Hedges – Effective from 1 October 2006, fair value gains/losses on outstanding hedges on New Zealand retail earnings are added back in deriving cash earnings as they may potentially create a material timing difference on reported earnings but do not affect profits available for shareholders; and
 - Significant items – In addition, cash earnings adjusts for significant items. These items have been detailed in this announcement as individually significant due to their size and non-recurring nature. In the six months ended 30 September 2006, this involved adjustments for the sale of the sub-custody business and deferred tax asset write-off.
- 2 Policyholder tax recoveries – the Life Insurance standard AASB 1038 requires the grossing up of tax expense and non-interest income for the tax on earnings applicable to holders of our life policies (policyholder tax recoveries). We reverse the impact of this gross up to provide comparability across reporting periods.
- 3 Economic profit for the six months ended 30 September 2006 has been restated from \$1,174 million to \$1,185 million to reflect an updated estimate of the franking benefit associated with dividends paid to shareholders.
- 4 Weighted Average Ordinary Shares – adjusts for the impact of shares held by Westpac (Treasury shares). The “weighted average ordinary shares – cash earnings”, which is used to calculate cash earnings per share, reverses the impact of Treasury shares, consistent with our basis for determining cash earnings, which also reverses this impact.
- 5 Net interest spreads and margins are calculated on net interest income adjusted for tax equivalent gross up of \$54 million in the six months ended 31 March 2007, \$54 million in the six months ended 30 September 2006, and \$57 million in the six months to 31 March 2006. We have entered into various tax effective financing transactions that derive income subject to a reduced rate of income tax. To provide comparability, this income is presented on a tax equivalent basis for margin calculations. In the presentation of the average balance sheet, net interest spread and net interest margin are also presented on a tax equivalent basis. Refer section 5.5, Note 3 Average Balance Sheet and Interest Rates, for a reconciliation of net interest income used in the calculation of net interest spread and net interest margins.
- 6 Trading liabilities & other financial liabilities and debt issues on the balance sheet as at 30 September 2006 and 31 March 2006 have been restated to reflect a reclassification of commercial paper issues for one of our special purpose vehicles. Trading liabilities & other financial liabilities was restated from \$7,497 million to \$2,893 million at 30 September 2006, and from \$9,036 million to \$3,817 million at 31 March 2006. Debt issues was restated from \$61,476 million to \$66,080 million at 30 September 2006, and \$63,153 million to \$68,372 million at 31 March 2006.
- 7 Includes the Australian Prudential Regulation Authority (APRA) required capital deduction of \$124 million (pre-tax) above A-IFRS provisioning levels at 31 March 2007, \$117 million (pre-tax) at 30 September 2006, and \$112 million (pre-tax) at 31 March 2006, which forms part of the APRA termed General Reserve for Credit Losses (GRCL).
- 8 Year to 30 September, Australian indicator unless otherwise stated. The latest available information contained within the Extended Performance Scorecard has not been subject to audit or assurance.
- 9 As at 31 March 2007.
- 10 As at February 2007.
- 11 Average based on figures year to date.
- 12 Figures from annual Staff Perspectives Survey (SPS) conducted in June of each year.
- 13 Half year to 31 March 2007, annualised.
- 14 Year to 31 December unless otherwise stated. Customer satisfaction figures examine the proportion of Westpac's customers (who consider the bank as their main financial institution) that are either 'very satisfied' or 'fairly satisfied' with their overall relationship. Customer satisfaction scores are reported on a 12 month moving average basis. Data is collected by independent providers being Taylor Nelson Sofres (TNS) for Business results and Roy Morgan Research (RMR) for Consumer results. Customer satisfaction for Consumer results for New Zealand is collected by AC Nielsen.

Income tax expense	3	(10)	1	(16)	(8)	(18)
Net Profit	11	20	13	7	17	8
Net profit attributable to outside equity interests	(36)	-	(36)	(17)	-	(17)
Cash earnings	11	20	12	7	17	8

Movements in exchange rates impacted both individual line items and reported cash earnings. Movements in exchange rates have reduced cash earnings by \$20 million or 1% compared to the six months ended 31 March 2006 and by \$17 million or 1% compared to the six months ended 30 September 2006. This was due to the hedge rate for translating NZD retail earnings in the six months ended 31 March 2007 being significantly lower than the hedge rate for the previous periods. The impact of the hedges is reflected in non-interest income and were based on hedge rates of 1.20 for the six months ended 31 March 2007 and 1.10 for the six months ended 30 September 2006 and 31 March 2006.

The movements in average exchange rates impacts individual line items as each line is translated at the actual average exchange rate. The average rate for the six months ended 31 March 2007 was 1.14 compared to 1.09 for the six months ended 31 March 2006 and 1.20 for the six months ended 30 September 2006.

¹ We have removed the impact of exchange rates movements to provide readers with a better indication of the Group's performance in local currency terms. Retranslation is net of future earnings hedge gains/losses.

² Non-interest income included the impact of future earnings hedges, which decreased non-interest income by \$42 million on the six months ended 30 September 2006 and \$15 million from the six months ended 31 March 2006.

Earnings Growth

First Half 2007 – First Half 2006

Cash earnings increased 11% to \$1,678 million, representing a 23.6% return on equity. Cash earnings per ordinary share at 90.9 cents was also up 11%. Income growth at 7% maintained a healthy margin (jaws) over the 4% growth in expenses.

Income growth reflected strong volume growth in both Australia and New Zealand consumer and business lending and deposits, partly offset by lower margins.

Income growth also benefited from 23% growth in Funds Under Administration (FUA) and increased sales of insurance products in our wealth management business. Trading income was down \$68 million from the exceptionally strong levels in the six months to 31 March 2006, reducing income growth by 1 percentage point. Movements in the NZD/AUD exchange rate and realised foreign exchange hedges reduced income by \$44 million or 1%. Expense growth was contained to 4% as operating efficiencies offset higher personnel costs. Impairment expense of \$232 million increased 25% in line with the very strong loan growth and a moderate deterioration in credit conditions.

Income tax expense of \$687 million was down 3%, with the effective tax rate also down 290 basis points, retracing from the higher tax rate in the six months to 31 March 2006, which included a one-off \$61 million tax provision.

Core earnings growth was recorded in all customer business units with growth in BTFG and BCB particularly strong.

¹ Cash earnings Return on Ordinary Equity (ROE) is the return delivered to ordinary shareholders. This is calculated by dividing cash earnings by average ordinary equity.

² Reported cash earnings adjusted for non-recurring significant items.

First Half 2007 – Second Half 2006

Cash earnings increased 7% with operating income growth of 7% and operating expense growth of 3%. Strong volume growth in loans was partly offset by lower lending spreads (down 5 basis points). Wealth management and insurance income increased 7% and Financial Markets trading and Treasury income were also significantly higher. Income in Specialised Capital Group was \$53 million lower than the very strong result in the six months to 30 September 2006.

Fee income in New Zealand was flat following product repricing initiatives to improve competitive positioning.

Expense growth of 3% reflected higher personnel expenses and additional advertising. The translation of NZD earnings increased expense growth by 1 percentage point.

Higher impairment losses included a \$12 million increase in provisions to cover additional risks in the Pacific Banking business.

The effective tax rate lifted from 27.0% to 28.6% as the tax provision release of \$22 million in the six months to 30 September 2006 was not repeated.

Business Unit Cash Earnings Summary

Compared to the six months ended 31 March 2006:

Business and Consumer Banking

- Up \$97 million (12%) driven by balance sheet growth, with loans up 12% and deposits up 13%.

Westpac Institutional Bank

- Up \$30 million (12%) driven by customer income growth and lower impairment losses.

BT Financial Group

- Up \$36 million (22%) driven by flow and fee growth across investment and insurance product sets.

New Zealand

- Down NZ\$6 million (3%) with growth in core earnings offset by increased impairment losses.

Pacific Banking

- Down \$2 million (6%) as a result of higher impairment losses from economic and political events in the Pacific region.

Group Business Unit

- Up \$18 million (106%) due to lower tax provisions booked in the half.

¹ The Group Business Unit segment includes the results of Group Treasury and the Corporate Centre.

3.2 REVIEW OF EARNINGS

3.2.1 Net Interest Income

First Half 2007 – First Half 2006 (up \$229 million (8%))

Net interest income was up 8% compared to the six months ended 31 March 2006. The key driver for the growth was the 15% increase in average interest earning assets offset by a 15 basis point decrease in margins. The translation of the NZD earnings reduced growth by 1 percentage point.

First Half 2007 – Second Half 2006 (up \$307 million (11%))

Net interest income was up 11% compared to the six months ended 30 September 2006. Growth in average interest earning assets was 8%, while margins increased 6 basis points on the period ended 30 September 2006. Second half 2006 net interest income was impacted by a \$49 million charge for an over accrual of credit card income. The translation of the NZD earnings increased growth by 1 percentage point.

Loans and Acceptances

Group					
Net loans	253,238	234,484	215,701	8	17

First Half 2007 – First Half 2006

Net loans increased by 17% or \$37.5 billion from 31 March 2006.

In aggregate, growth in Australia was 17%³, compared with system credit growth of 15%⁴ during the period. In New Zealand, loan growth was 20%³ compared to system growth of 14%⁶. The increase was largely a result of:

- Consumer lending in BCB up 12% or \$13.5 billion, predominantly in mortgages (\$12.3 billion or 12%) at 0.9⁴ times system, as a result of increases in both first and third party sales, and unsecured lending (up 15% or \$1.2 billion) reflecting the growth in credit cards;
- Business lending in BCB up 15% or \$6 billion, with growth across most business segments, supported by the increases in front line employees from mid 2006;
- Corporate lending in WIB up 40% or \$10.7 billion, reflecting the increased utilisation of short-term underwriting and bridging finance to facilitate customer business; and

¹ New Zealand comprises our New Zealand retail banking operations and wealth management businesses.

² BT Financial Group includes margin lending of \$4,207 million (refer section 4.3) less unearned income of \$41 million, as at 31 March 2007.

³ Australian growth comprises Business and Consumer Banking, BT Financial Group and the Australian loans within WIB. New Zealand growth comprises New Zealand retail and the New Zealand loans within WIB.

⁴ Source: Reserve Bank of Australia (RBA) 12 months to March 2007.

⁵ Business and Consumer Banking net loans have been represented on a product view. This is different to the presentation of these results in Section 4.1 which is on a customer segment view.

⁶ Source: Reserve Bank of New Zealand (RBNZ) 12 months to March 2007.

- Lending in BTFG up 39%, with margin lending up \$1.2 billion, as strong demand for the product continues.

Growth in the New Zealand retail business included mortgage growth of 20% or NZ\$4.5 billion and business lending growth of 12% or NZ\$1.2 billion.

First Half 2007 – Second Half 2006

Net loans were up 8% or \$18.8 billion since 30 September 2006.

Growth in Australia was 8%¹, compared with system credit growth of 7%² during the period. The increase was largely a result of consumer lending in BCB up 6% or \$6.7 billion, predominantly in mortgages up \$6 billion or 5% at 1.0² times system; business lending in BCB up 6% or \$2.5 billion, with growth across most business segments; and institutional lending in WIB up 17% or \$5.5 billion, with increased lending for short-term customer financing.

In New Zealand, loan growth was 12%¹ mainly driven by mortgage growth of 12%.

Deposits

\$m	Half Year March 07	Half Year Sept 06	Half Year March 06	% Mov't Sept 06- Mar 07	% Mov't Mar 06- Mar 07

Group					
Total Deposits	177,715	167,741	153,891	6	15

First Half 2007 – First Half 2006

Deposits increased by 15% or \$23.8 billion since 31 March 2006. The increase was largely a result of:

- Australian Consumer deposit growth in BCB up 10% or \$4.3 billion, with continued growth in on-line savings accounts;
- Australian Business deposit growth in BCB up 13% or \$3.5 billion mainly driven through growth in higher interest deposit accounts;
- Australian working capital deposits up 26% or \$3.3 billion as a result of abnormally low balances at 31 March 2006 returning to more normal levels at 31 March 2007;
- Corporate deposit growth in WIB up 40% or \$2.4 billion;
- New Zealand deposit growth up 11% or NZ\$2.3 billion at 0.9⁶ times system; and
- Treasury short term wholesale funding growth of \$7.5 billion, funding the growth in assets.

¹ Australian growth comprises Business and Consumer Banking, BT Financial Group and the Australian loans within WIB. New Zealand growth comprises New Zealand retail and the New Zealand loans within WIB.

² Source: RBA 6 months to March 2007.

³ New Zealand comprises our New Zealand retail banking operations and wealth management businesses.

⁴ Includes Treasury short term wholesale funding.

⁵ Business and Consumer Banking deposits have been represented on a product view. This is different to the presentation of these results in Section 4.1 which is a segment view.

⁶ Source: RBNZ 12 months to March 2007.

First Half 2007 – Second Half 2006

Deposits increased by 6% or \$10 billion since September 2006. The increase was largely a result of continued growth in BCB deposits, particularly business and working capital.

Other growth included:

- Corporate deposit growth in WIB up 14% or \$1 billion;
- New Zealand deposit growth up 6% or NZ\$1.3 billion supported by the release of a new on-line savings account in December 2006; and
- Treasury short term wholesale funding growth of \$2.2 billion, which was lower than the previous six months due to a change in mix between deposits and debt issues.

Margins

\$m	Half Year March 07	Half Year Sept 06	Half Year March 06	% Mov't Sept 06- Mar 07	% Mov't Mar 06- Mar 07
Net Interest Income	3,089	2,782	2,860	11	8
Tax equivalent gross-up	54	54	57	-	(5)
Adjusted Net Interest Income	3,143	2,836	2,917	11	8
Average Interest Earning Assets	279,591	257,879	243,488	8	15
Interest margin (%)	2.25%	2.19%	2.40%	6bps	(15bps)

First Half 2007 – First Half 2006

The net interest margin for the six months ended 31 March 2007 was 2.25%, which is 15 basis points lower than the equivalent margin for the six months ended 31 March 2006.

Average interest earning assets were up \$36.1 billion, due to:

- An increase in average loans and other receivables of \$33.0 billion or 16%, with growth across most sectors; and
- Loans to other financial institutions up \$1.6 billion, mainly due to a decision to hold more liquid assets offshore in the form of cash, and trading securities up \$1.5 billion.

Components of the margin decrease were:

- A decrease in asset spread/mix of 8 basis points driven by:
 - 7 basis point decrease due to a combination of existing business re-pricing at lower spreads and competitive pricing on new business in BCB (mortgages and business lending) and New Zealand (mortgages); and
 - 1 basis point decrease due to mix impacts in BCB (mortgages, business lending and cards) and New Zealand (mortgages).
- Liability spread/mix impact was flat, with an 8 basis point increase in liability spread (BCB 7 basis points and New Zealand 1 basis point) offset by an 8 basis point decline in mix across both BCB and New Zealand due to increases in wholesale funding and growth in higher interest deposit accounts.

In addition to the underlying decline, other factors reducing margins were:

- The over-accrual of cards income that occurred in the period ended 31 March 2006 which had a 2 basis point impact;

- Other items including margin mix impacts of increases in lower yielding corporate assets (3.5 basis points), Structured Finance transactions and lower benefits from free funds contributed a total decline of 5 basis points; and
- Treasury net interest income had little impact.

First Half 2007 – Second Half 2006

The net interest margin increased by 6 basis points from the margin for the six months ended 30 September 2006, driven by an 11% increase in net interest income compared to an 8% increase in average interest earning assets.

Average interest earning assets were up \$21.7 billion due almost entirely to a \$20.4 billion (9%) increase in average loans and other receivables.

Components of the margin increase were:

- A decrease in asset spread/mix of 5 basis points driven by:
 - 4 basis point decrease due to the combination of book re-pricing at lower spreads and market competitive pricing on new business in Australia (mortgages and business lending) and New Zealand (mortgages); and
 - 1 basis point decrease due to mix impacts in Australia (mortgages, business lending and cards) and New Zealand (mortgages).
- Liability spread/mix flat, driven by a 3 basis point increase in liability spread (BCB 2 basis points and New Zealand 1 basis point) offset by a 3 basis point decline in mix in BCB and New Zealand due to increases in wholesale funding requirements and growth in higher rate deposit accounts in both businesses.

In addition to the underlying margin decline, other factors were:

- The correction of an overstatement in credit card income in the second half of 2006 which impacted the prior period contributed 4 basis points;
- Treasury net interest income contributed 7 basis points; and
- Other items were flat with hybrid benefit impacts, Structured Finance impacts and increased Financial Markets net interest income, offset by lower benefits from free funds.

3.2.2 Non-Interest Income¹

\$m	Half Year March 07	Half Year Sept 06	Half Year March 06	% Mov't Sept 06- Mar 07	% Mov't Mar 06- Mar 07
Fees & commissions	905	924	842	(2)	7
Wealth management and insurance income	579	539	496	7	17
Trading income	260	197	328	32	(21)
Other income	27	95	35	(72)	(23)
Non-interest income (cash earnings basis)	1,771	1,755	1,701	1	4

First Half 2007 - First Half 2006

Non-interest income was up \$70 million (4%) compared to the six months ended 31 March 2006. The impact of the translation of the New Zealand earnings and associated hedging reduced growth by 2 percentage points.

Fees and commissions were up \$63 million due to:

- BCB's fees and commissions up due to volume led increases in card fees and increases in transaction fees;
- Fees and commissions in New Zealand were up slightly with volume related increases partially offset by reductions in transaction fees during the half as we increased product competitiveness through fee changes;
- Fees and commissions in the Institutional Bank were up including higher Debt Markets origination fee income (up \$20 million) and, volume led increases in fees on Specialised Capital Group (SCG) funds (up \$8 million); and
- Broking income in BTFG up \$6 million, with volumes up 24%.

Wealth management and insurance income was up \$83 million (17%) led by:

- Growth in BTFG Funds Under Management of 6% and Funds Under Administration of 23%; and
- Growth in BTFG Insurance income with General Insurance up 32% from improved claims experience and Life Insurance up 14% with sales growth and in-force growth of 8%.

Trading income was down \$68 million (21%) from the exceptionally high levels experienced in the first half of 2006 with Financial Markets trading income down \$32 million and Treasury foreign exchange trading income down \$34 million. This reduced the growth of non-interest income by 4%.

Other income was down \$8 million, driven by:

- Hedging of overseas operations decreased by \$3 million. This included a \$15 million increase in the loss from hedging of New Zealand earnings offset by lower losses on hedging of offshore operations; and
- Net gain on financial assets at fair value down \$24 million primarily due to a \$28 million decrease in income from the portfolio of investment securities in the Institutional Bank.

Declines were offset by:

- Gain on disposal of assets up \$8 million, which included \$21² million profit from the sale of the remaining shareholding in MasterCard Inc.

¹ Refer Note 5, page 72 for statutory accounts breakdown and Section 8, page 100 for reconciliation between statutory accounts and cash earnings. As discussed in Section 2.1.1, commentary is reflected on a cash earnings basis and does not directly line up with Note 5.

² \$19 million profit in sale of MasterCard Inc. recognised in Business and Consumer Banking, and \$2 million recognised in New Zealand operations.

First Half 2007 – Second Half 2006

Non-interest income was up \$16 million (1%) compared to the six months ended 30 September 2006. The translation of the New Zealand dollar and associated hedges reduced growth rates by 2 percentage points.

Exceptionally strong growth in income from the SCG business in the Institutional Bank during the second half of 2006 was a major driver of the lower growth. Overall SCG non-interest income was down \$53 million although the business has a strong pipeline for the second half of the year.

Fees and commissions were down \$19 million. Key features were:

- Increase in BCB due to volume led growth;
- New Zealand was flat due to the impact of various fee changes designed to improve product competitiveness offsetting volume related increases; and
- Decrease in SCG deal origination income due to reduced deal execution during the period, offset by continued increase in fees from SCG funds activities.

Wealth management and insurance income was up \$40 million led by:

- Continued growth in BTFG Funds Under Management with FUM volumes up 9% and FUA up 18%; and
- BTFG Insurance income up \$17 million driven by Life Insurance sales growth of 25%.

Trading income increased by \$63 million (32%) with Financial Markets up \$69 million and Treasury down \$7 million. Growth in trading income was impacted by a \$30 million reclassification between Financial Markets trading income and gains on financial assets at fair value in the six months ended 30 September 2006. Adjusting for this, trading income was up 15% and other income was down 58%.

Other income was down by \$68 million led by:

- Income from hedging overseas operations down \$43 million mainly due to a \$42 million movement in the realised gains/losses on hedging New Zealand earnings (partially offset by exchange rate movements on other items in the income statement); and
- Gains on disposal of fixed assets down \$8 million largely due to \$5 million property sales in the six months ended 30 September 2006.

Financial Markets

\$m	Half Year March 07	Half Year Sept 06	Half Year March 06	% Mov't Sept 06- Mar 07	% Mov't Mar 06- Mar 07

Income classification					
Net interest income	(1)	(10)	(5)	90	80
Non-interest income	245	194	261	26	(6)
<i>Trading income</i>	233	164	265	42	(12)
<i>Dividend income</i>	7	7	5	0	40
<i>Other non-interest income</i>	5	23	(9)	(78)	156
Total financial markets product income	244	184	256	33	(5)

First Half 2007 – First Half 2006

Financial Markets product income was down \$12 million compared to the very strong levels for the six months ended 31 March 2006. Increases in Capital Markets were driven by a higher demand for interest rate hedging products, which offset reduced Foreign Exchange income as trading income returned to more normal levels. Other product income was down primarily due to lower trading income in the Energy and Equities businesses.

Average value at risk (VaR) was at lower levels during the period.

First Half 2007 – Second Half 2006

Income was stronger compared to the six months ended 30 September 2006 driven by the strong growth in Capital Markets trading.

Higher volatility in interest rate markets increased demand for hedging products. Income from Foreign Exchange was up \$8 million.

¹ Includes corporate client income.

² Other comprises structured equities, energy and other international income.

3.2.3 Operating Expenses¹

\$m	Half Year March 07	Half Year Sept 06	Half Year March 06	% Mov't Sept 06- Mar 07	% Mov't Mar 06- Mar 07
Salaries & other staff expenses	(1,223)	(1,159)	(1,165)	(6)	(5)
Equipment & occupancy expenses	(309)	(310)	(304)	-	(2)
Other expenses	(697)	(691)	(666)	(1)	(5)
Total expenses	(2,229)	(2,160)	(2,135)	(3)	(4)

First Half 2007 – First Half 2006

Operating expenses were up 4% or \$94 million compared to the six months ended 31 March 2006. The Group's expense to income ratio on a cash earnings basis has improved by 90 basis points to 45.9%. The translation of NZD earnings reduced expense growth by 1 percentage point.

Salaries & other staff expenses

Salaries and employee expenses increased 5% due to fixed pay increases of 4% in October 2006 and other market related increases in January 2007. FTE levels increased, with a focus on investing heavily in relatively higher cost customer serving employees whilst reducing support employee levels, which contributed to the overall increase in salaries and staff expenses. Offsetting these increases, restructuring costs were down \$6 million.

Equipment and Occupancy Expenses

Equipment and occupancy costs were up \$5 million on the six months ended 31 March 2006.

- Operating lease rentals were up \$11 million due to market related rent increases on renewal of existing premises; and
- Software amortisation increases were due to the prior year investment in significant technology infrastructure. However these were offset by a reduction in non-capitalised technology costs incurred in "other" costs in the prior period.

Other Expenses

Total other expenses increased by \$31 million (5%) largely due to:

- Increase in purchased services (\$13 million), largely driven by an increase in legal and other professional services costs (up \$15 million);
- Advertising up \$9 million due to the new campaign launch;

¹ Refer Section 5, Note 6, page 73 for detailed breakdown.

Offset by:

- \$9 million reduction in outsourcing costs driven by savings and efficiencies built into our outsourcing contracts.

Compliance

Expenditure on major compliance programs increased in the first half of 2007, with total spend at \$17 million, an increase of \$2 million over the six months ended 31 March 2006. Major compliance expenses included Basel II (\$12 million) and Anti-Money Laundering (\$5 million).

First Half 2007 – Second Half 2006

Operating expenses have increased by 3% or \$69 million compared to the six months ended 30 September 2006. The Group's expense to income ratio on a cash earnings basis has improved by 170 basis points to 45.9% over this period. The translation of NZD earnings increased expense growth by 1%.

Salaries and other staff expenses

Salaries and other staff expenses were up \$64 million (6%) due to fixed pay increases of 4% in October 2006, combined with the full impact of the increases in customer serving employees in the second half of 2006 and the changing mix of our workforce.

Equipment and Occupancy expenses

Equipment and occupancy expenses were down \$1 million due to a reduction in "other" equipment costs largely related to the investment in technology infrastructure projects in 2006 where costs were expensed. This was offset by increases in operating lease rentals and depreciation on leasehold improvements, which increased due to the new fit-out in Westpac Place as well as new and refreshes of other retail property spaces.

Other Expenses

Other expenses increased by \$6 million, driven by an increase in advertising costs as a result of the launch of the new advertising campaign. Technology costs also increased during the period due to increased technology costs in BTFG.

Compliance

Compliance spend was up \$2 million on the six months ended 30 September 2006 with increased spending on Basel II (up \$5 million) offsetting reduced costs associated with IFRS and Sarbanes-Oxley, as these projects moved to business as usual status.

Capitalised Software

First Half 2007 – First Half 2006

Capitalised software balances increased \$46 million to \$485 million compared to the first half of 2006. The key investments include:

- One Bank Platform, the Bank's PC technology platform, carrying value up \$5 million to \$88 million;
- Connect@Westpac, the new online payroll and personnel management system, carrying value of \$32 million, up \$8 million; and
- \$34 million increase driven by significant projects relating to:
 - Improving credit card origination capabilities in the Consumer bank;
 - FX replacement project aimed at improving pricing, risk management, settlement and accounting for the global foreign exchange business and product set in the Institutional Bank; and
 - An Enterprise information gateway project, which will create new capabilities for data management.

First Half 2007 – Second Half 2006

Capitalised software balances increased \$5 million including \$97 million of additional capitalisation. It is anticipated that spend will increase in the second half of the year as project investment increases.

Full Time Equivalent Employees (FTE)

	Half Year March 07	Half Year Sept 06	Half Year March 06	Mov't Sept 06- Mar 07	Mov't Mar 06- Mar 07
Analysis of movement in FTE					
Permanent employees	25,636	25,363	25,595	273	41
Temporary employees	1,676	1,861	1,337	(185)	339
Total FTE employees	27,312	27,224	26,932	88	380

First Half 2007 – First Half 2006

Group FTE has increased by 380 compared to 31 March 2006. This has been largely driven by increases in customer serving employees across a number of businesses. In particular:

- An additional 366 customer serving employees in BCB, including 193 customer serving employees within the business banking segment, as we have implemented our strategy of investment in frontline business bankers over the year;
- 110 new customer serving employees in BTFG, primarily in the Advice business;
- FTE in New Zealand has decreased over the period; this is a product of continued investment in business banking employees which was more than offset by productivity savings elsewhere in the business; and
- 16 additional customer serving employees in the Institutional Bank, primarily in growth business portfolios.

First Half 2007 – Second Half 2006

Group FTE has increased by 88 compared to 30 September 2006. This has been primarily driven by our continued investment in customer serving employees offset by productivity and efficiency savings in the support areas.

In particular:

- An additional 297 customer serving employees in BCB;
- 74 additional customer serving employees in BTFG, including 41 planners and investment representatives;
- A decrease in New Zealand due to improved productivity savings across the business in the first half of 2007; and
- An additional 23 customer serving employees in growth business portfolios in the Institutional Bank.

3.2.4 Impairment Losses

\$m	Half Year March 07	Half Year Sept 06	Half Year March 06	% Mov't Sept 06- Mar 07	% Mov't Mar 06- Mar 07
New individually assessed provisions (IAP)	(42)	(66)	(78)	36	46
Write-backs	22	76	37	(71)	(41)
Recoveries	8	11	14	(27)	(43)
Total IAP, write-backs and recoveries	(12)	21	(27)	(157)	56
Write-offs	(131)	(123)	(100)	(7)	(31)
Other changes in collectively assessed provisions	(89)	(88)	(58)	(1)	(53)
Total new collectively assessed provisions	(220)	(211)	(158)	(4)	(39)
Total impairment losses	(232)	(190)	(185)	(22)	(25)

First Half 2007 – First Half 2006

Total impairment losses of \$232 million were \$47 million (25%) higher than 31 March 2006 representing 19 basis points of average gross loans and acceptances, up 2 basis points on the six months ended 31 March 2006.

Key movements were:

- New collectively assessed provisions raised were up \$62 million due to:
 - \$51 million increase driven by balance sheet growth predominantly in the Consumer segment; and
 - \$11 million change in risk profile associated with higher delinquencies, additional provisioning set aside in Pacific Banking for adverse economic and political events in the region and some deterioration in the business segment in New Zealand. This was partially offset by reduced impairment losses in the Institutional Bank.
- Individually assessed provisions were lower, predominantly in the Institutional Bank.

First Half 2007 – Second Half 2006

Impairment losses were \$42 million higher over the six months to 31 March 2007. Key movements were:

- New collectively assessed provisions raised up \$9 million predominantly due to asset growth, with changes in risk profile largely netting off across the portfolio.
- Write-backs decreased due to lower write-backs in the Institutional Bank compared to the second half of 2006 where provisioning on a number of loans was written back; and
- Lower individually assessed provisions in the Institutional Bank during the six months to 31 March 2007.

3.2.5 Tax Expense

First Half 2007 – First Half 2006 (down \$18 million)

The effective tax rate decreased 290 basis points to 28.6% to more normal levels, as the half was not impacted by tax provisioning (\$61 million raised in the first half of 2006) to cover for an increase in the assessed level of tax risk across the Group.

First Half 2007 – Second Half 2006 (up \$97 million)

The effective tax rate for the six months to 31 March 2007 increased by 160 basis points compared to the six months ended 30 September 2006 with the major driver being the \$22 million reduction in assessed levels of tax provisioning in the second half of 2006.

NZIRD Review

The New Zealand Inland Revenue Department (NZIRD) is reviewing a number of structured finance transactions undertaken in New Zealand and has issued amended reassessments in respect of nine transactions, three undertaken in the 1999 tax year, two undertaken in the 2000 tax year, two undertaken in the 2001 tax year and two undertaken in the 2002 tax year. The maximum potential liability reassessed for the 1999 year is NZ\$18 million (A\$16 million) (NZ\$25 million (A\$22 million) with interest), for the 2000 year is NZ\$61 million (A\$54 million) (NZ\$85 million (A\$75 million) with interest), for the 2001 year is NZ\$90 million (A\$80 million) (NZ\$127 million (A\$112 million) with interest) and for the 2002 year is NZ\$110 million (A\$97 million) (NZ\$155 million (A\$137 million) with interest to 31 March 2007).

The NZIRD is also investigating other transactions undertaken by the New Zealand Branch (NZ Branch), which have materially similar features to those for which assessments have been received. Should the NZIRD take the same position across all of these transactions, for the periods up to and including 31 March 2007, the overall primary tax in dispute will be approximately NZ\$599 million (A\$530 million) (this includes the amounts noted above). With interest this increases to approximately NZ\$798 million (A\$706 million) (calculated to 31 March 2007).

Proceedings disputing the reassessments with respect to the 1999 and 2000 and 2001 tax years have been commenced. Westpac is confident that the tax treatment applied in all cases is correct. A ruling was sought from the NZIRD on an initial transaction in 1999 which, following extensive review by the NZIRD, was confirmed in early 2001. The principles underlying that ruling are applicable to, and have been followed in, all subsequent transactions.

3.2.6 Outside Equity Interests¹

The expense for outside equity interests (OEI) increased by \$9 million on 31 March 2006 and was up \$5 million compared to the six months ended 30 September 2006. The OEI represents distributions of our hybrid equity instruments TPS 2003¹ and TPS 2006¹, as well as minority interests. The increase reflects distributions on TPS 2006, which were issued in June 2006 and commenced paying distributions in September 2006.

¹ Outside equity interests reflects distributions on TPS 2003 and TPS 2006.

- There were 750,000 TPS 2003 issued in the United States of America at US\$1,000 each on 13 August 2003, with non-cumulative semi-annual distributions (31 March and 30 September) in arrears at the annual rate of 5.819% up to but excluding 30 September 2013. From, and including, 30 September 2013 the 2003 TPS will pay non-cumulative quarterly distributions (31 December, 31 March, 30 June and 30 September) in arrears at a floating rate of LIBOR plus 2.05% per year.
- A Westpac controlled entity, Westpac TPS Trust, issued 7,627,375 2006 TPS in Australia at \$100 each on 21 June 2006. The 2006 TPS are preferred units in the Westpac TPS Trust, with non-cumulative floating rate distributions which are expected to be fully franked. Westpac TPS Trust also issued one ordinary unit with an issue price of \$100 to Westpac. Westpac, as holder of the ordinary unit, is entitled to any residual income or assets of the Westpac TPS Trust not distributed to holders of 2006 TPS. The 2006 TPS are scheduled to pay quarterly distributions (30 September, 31 December, 31 March and 30 June) in arrears, subject to certain conditions being satisfied. The distribution rate on 2006 TPS, until 30 June 2016 (the step-up date) is calculated as the Australian bank bill rate plus 1% per annum (the initial margin) multiplied by one minus the Australian corporate tax rate (30% at the time of issue). After the step-up date, the initial margin will increase by a one time step-up of 1% per annum.

3.3 CREDIT QUALITY

The business credit environment in Australia remains stable while New Zealand's business environment is weakening due to a combination of interest rate rises and the higher New Zealand dollar impacting exporters and import competing companies.

In the consumer credit environment in both Australia and New Zealand, we continue to see delinquency levels trend higher from a historically low base driven principally by the impact of higher interest rates.

In response to the credit trends and as a result of asset growth, Westpac lifted overall provisioning levels during the half. Despite strong asset growth, provisioning coverage levels were maintained, with both collectively assessed provisions and total provisions to risk weighted asset ratios in line with 30 September 2006 levels. Provisioning coverage across the consumer credit card and business lending portfolios, captured in the collectively assessed provisions to non-housing loans and acceptances ratio, was up 1 basis point from 30 September 2006, and 5 basis points from 31 March 2006.

Key credit indicators and trends include:

- Stressed exposures as a percentage of total commitments increased modestly by 8 basis points from 31 March 2006 to 0.83%, up 2 basis points from 30 September 2006. The increase since 31 March 2006 was largely driven by business customers in the Australian (BCB) and New Zealand divisions, due to a more challenging economic environment (interest rate increases, higher Australian and New Zealand dollar impacting exporters and higher input costs such as fuel). We track these exposures closely and have benefited in the past by early identification and monitoring of potential problem exposures together with prompt remediation steps to avoid / minimise losses;
- Australian business products 90 days past due, as a proportion of business lending outstandings, remained stable at 0.61% from 30 September 2006 (4 basis points up from 31 March 2006) indicating that the Australian business portfolio outlook has been more stable following a moderate increase in stress ratios during 2006;
- The proportion of other consumer loans, which includes cards and personal loans, 90 days past due as a proportion of other consumer outstandings, increased 13 basis points from 31 March 2006 and 17 basis points from 30 September 2006 to 1.02%. This increase was expected, being driven by a combination of the impact of higher interest rates, with increases since September 2006 also impacted by seasonal trends;
- The proportion of mortgage loans accruing but 90 days past due increased 5 basis points from 31 March 2006 (4 basis points up from 30 September 2006) but still remains below external benchmark indices. The upward trend since 30 September 2005 is driven by a slowdown in mortgage and property price growth and the impact of higher interest rates;
- Impaired assets to gross loans and acceptances continue to remain at low levels, at 0.22% at 31 March 2007. Only two impaired exposures were greater than \$50 million, accounting for 21% of total impaired assets. A further 10 impaired exposures were between \$5 million and \$50 million; and
- Total impaired provisions to total impaired assets coverage remained stable at 49% from 30 September 2006 and decreased from 56% at 31 March 2006. The decrease since 31 March 2006 was driven by the write-back of provisions on one impaired exposure following its upgrade and the partial write-off of an individually assessed exposure.

3.3.1 Credit Quality Key Metrics

Stressed Loans - Exposure by Credit Grade as a % of Total Commitments	1H07	2H06	1H06	2H05
Impaired	0.15%	0.14%	0.16%	0.18%
90 days past due, well secured	0.15%	0.14%	0.15%	0.09%
Watchlist and substandard	0.53%	0.53%	0.44%	0.47%
Total Stressed Loans	0.83%	0.81%	0.75%	0.74%

Australian business products	1H07	2H06	1H06	2H05
90 days past due (3 month moving average)	0.61%	0.61%	0.57%	0.48%
<i>5 year historic average = 0.59%</i>				
<i>8 year historic average = 0.89%</i>				

Other consumer loans	1H07	2H06	1H06	2H05
90 days past due	1.02%	0.85%	0.89%	0.71%
<i>5 year historic average = 0.91%</i>				
<i>10 year historic average = 0.91%</i>				

Mortgage Loans	1H07	2H06	1H06	2H05
90 days past due	0.29%	0.25%	0.24%	0.20%
<i>5 year historic average = 0.21%</i>				
<i>10 year historic average = 0.23%</i>				

Other	1H07	2H06	1H06	2H05
Total impaired assets /Gross loans and acceptances	0.22%	0.22%	0.26%	0.27%
Total impairment provisions to total impaired assets	49.2%	49.3%	56.1%	36.0%
Collectively assessed provisions to risk weighted assets (basis points) ¹	68	68	64	90
Impairment losses on loans to average loans and acceptances annualised (basis points)	19	17	17	18

¹ Includes the APRA required capital deduction of \$124 million (pre-tax) above A-IFRS provisioning levels at 31 March 2007, \$117 million (pre-tax) at 30 September 2006, and \$112 million (pre-tax) at 31 March 2006, which forms part of the APRA termed General Reserve for Credit Losses (GRCL).

3.4 CAPITAL AND DIVIDENDS

Capital

Key capital ratios are as follows:

	31 March 2007	Target Range
Tier 1 / Risk weighted assets	6.5%	6.0% - 6.75%
ACE / Risk weighted assets	4.3%	4.0% - 4.75%

A 69% dividend payout ratio combined with stronger asset growth has resulted in a modest decrease in the capital ratios, however our ratios remain well within our target ranges.

The Tier 1 ratio includes \$664 million of A-IFRS related transitional relief agreed with APRA in 2006, which extends until 31 December 2007. The ACE calculation does not include transition relief.

ACE Movement

The ACE ratio declined by 21 basis points since 30 September 2006. Key contributors to movements in ACE ratio over the prior half were:

- Cash earnings growth of 7%;
- Dividend per share up 5%;
- Risk Weighted Asset growth up 10% over the period, additional capital deductions for our wealth business and cessation of deductions for our SCG business¹;
- Issuance of shares to satisfy the Dividend Reinvestment Plan (DRP) for the interim dividend; and
- Other movements include increase in foreign currency translation reserves and deferred tax assets.

Dividends

The Directors have declared a fully franked dividend of 63 cents per share, an increase of 7 cents or 13% over the six months ended 31 March 2006.

As outlined to the market in 2006, Westpac believes that a dividend payout ratio of around 70% of cash earnings is generally sustainable. This interim dividend represents a payout ratio of 69.3%.

Our ability to continue to frank dividends remains strong, with our adjusted franking account balance at \$555 million as at 31 March 2007 (30 September 2006: \$417 million), after allowing for the impact of the interim dividend.

¹ Following discussions with Standard & Poor's, equity investments held in our Specialised Capital Group (SCG) should not be deducted from ACE Capital. This change has been applied for 31 March 2007, and prior periods have not been restated.

Dividend Reinvestment Plan (DRP)

Westpac announced changes to the terms of our DRP in December 2006. These changes give Westpac additional capital management flexibility, including the ability to determine whether to satisfy the DRP for each dividend via the issuance of shares or via acquisition of the shares on market. Consistent with prior periods the Board has determined to satisfy the interim 2007 dividend via the issuance of shares.

Hybrid Tier 1 Capital

As at 31 March 2007 Westpac had \$3.2 billion of innovative Tier 1 capital instruments on issue, representing 23% of fundamental Tier 1 capital and below the current hybrid capital limit of 25% of fundamental Tier 1 capital.

Exchange Rate Risk on Future NZD Earnings

Westpac's policy in relation to the hedging of the future earnings of our New Zealand retail business is to manage the economic risk where the bank believes there is a strong likelihood of significant adverse moves in the AUD/NZD exchange rate. Westpac manages these flows over a time horizon under which up to 100% of the expected earnings for the following twelve months and 50% of the expected earnings for the subsequent twelve months can be hedged. Hedges are executed on a pre-tax basis.

The average rate of realised hedges for the six months ended 31 March 2007 was 1.20 compared to a hedged rate of 1.10 for the six months ended 31 March 2006 and the six months ended 30 September 2006.

At 31 March 2007, outstanding hedges relating to 2007 earnings had an average rate of 1.19.

3.5 REGULATORY AND OTHER DEVELOPMENTS

Basel II

The regulatory limits applied to our capital ratios are consistent with the Bank of International Settlements capital accord, which was first released in 1988. In June 2004 the Basel Committee on Banking Supervision released the 'International Convergence of Capital Management and Capital Standards: A Revised Framework' also known as Basel II. This framework reflects the advances in risk management practices since the introduction of the 1988 Basel Accord, improving the sensitivity of capital calculation through a broader array of risk classes and enhanced measurement processes.

We are targeting compliance with the most sophisticated methods for both credit and operational risk. We believe that using the advanced approaches for risk monitoring and measurement is in the interests of all our stakeholders. Effective risk management is regarded as a key activity performed at all levels of the Group.

In September 2005 we submitted an application to the Australian Prudential Regulation Authority (APRA) to be accredited to use the Advanced Internal Ratings Based (AIRB) approach for credit risk and the Advanced Measurement Approach (AMA) for operational risk. That submission was in the form of a self assessment against criteria outlined by APRA and the requirements of Basel II. Subsequent to that submission we have maintained a consistent dialogue with APRA. A broad array of changes to risk management practices have been implemented across all risk classes. We continue with this work in addition to addressing issues identified by APRA as they arise.

APRA have commenced the release of draft Australian Prudential Standards based on Basel II. The timeframes for release of all relevant standards is unknown. APRA has considerable discretion over the application of Basel II to the banks it regulates and has announced that Australian banks using the most sophisticated models for credit and operational risk will also be required to hold regulatory capital for the interest rate risk taken in the banking book. The models used to quantify this risk are similar to the models used today for traded market risk.

Following accreditation, any reduction in the level of regulatory capital required is subject to transitional arrangements in the first two years of operation. At present the extent of any reduction in regulatory capital is unclear.

US Sarbanes-Oxley

The US Congress passed the Public Company Accounting Reform and Investor Protection Act (SOX) in July 2002. SOX is commonly known as the Sarbanes-Oxley Act. SOX is a wide ranging piece of US legislation concerned largely with financial reporting and corporate governance. We are obligated to comply with SOX by virtue of being a foreign registrant with the US Securities and Exchange Commission (SEC).

Section 404 of SOX requires us to maintain an effective system of internal control over financial reporting. We and our external auditors reported on its effectiveness for the first time at 30 September 2006.

We have established procedures to ensure ongoing compliance with all applicable requirements of SOX.

NZ Incorporation

Westpac agreed to incorporate the systemically important operations in New Zealand in December 2004. The legislative process required to implement local incorporation, the Westpac New Zealand Act 2006 was enacted on 13 September 2006, and the transition to dual registration was completed on 1 November 2006.

The incorporation model involves Westpac operating as a branch and an incorporated entity concurrently (dual registration). This model principally sees:

- Retail and business operations part of the locally incorporated entity; and
- Institutional business remaining in the New Zealand Branch.

3.6 CORPORATE RESPONSIBILITY AND SUSTAINABILITY

Enhancing Westpac's Total Value

Westpac's corporate responsibility and sustainability program continues to deliver material value to the company as an integral part of the Group's core strategy as detailed in Westpac's 2006 Stakeholder Impact Report released in December 2006.

In the half year, the program continued to deliver direct financial value by lowering operational and other risks, delivering greater efficiency, enhancing reputation and contributing to innovative product offering. Examples include:

- Maintaining high levels of employee attraction, retention and commitment:
 - Employee commitment remains at the high levels achieved since 2004;
 - Westpac remains a preferred employer, with an 82.5% acceptance rate for first round graduate offers;
 - Maintained its workplace childcare centres, providing 453 childcare places;
 - Launched Westpac's 3rd Disability Discrimination Action Plan; and
 - Introduced performance pay for non-packaged employees.
- Reduced costs for the Group:
 - The Lost Time Injury Frequency Rate has been cut 29% since 2003, resulting in over \$3 million in savings from reduced claims costs over the past two years;
 - Complaints resolution rates (% complaints resolved within 5 days) at 82% remains above our target of 80% having improved from 75% in 2002;
 - Electricity consumption reduced 12% since 2002, delivering over \$1 million of estimated cost savings;
 - Overall, Westpac's greenhouse gas emissions have been cut by 45% in since 1996, equating to \$1.8 million of implicit annual value based on current EU emission trading prices.
- Value creating initiatives:
 - Expanding the e-statements initiative, including secure branch based recycling bins to assist customers with disposal of old statements, with 310,000 customers now participating, delivering \$1.5 million of ongoing savings so far;
 - Launch of an initiative in March to assist Altitude Credit Card customers to partner with the private sector organisation Easy Being Green to assist our credit card customers to use their rewards points to purchase energy and water saving devices to help the environment;
 - Partner in Landcare's new innovative CarbonSMART carbon trading pool and brokering service for Australia, which will enable landholders to take advantage of emerging carbon trading opportunities;
 - Formed the Australian Business and Climate Group (ABCG), in October 2006 with 10 other companies to examine what investment conditions are necessary to support the rapid development and deployment of low-emission technology;
 - Launch of new brand advertising promoting the Equator Principles and responsible business; and
 - Continued trading of EU Emission Trading Scheme (EU ETS) credits.

External Governance and Sustainability Ratings

Westpac's governance and sustainability performance continues to be benchmarked through a range of external assessments in 2006. Current key external ratings include:

- The global banking sector leader in the Dow Jones Sustainability Index, for the fifth year in a row;
- Global 100 Most Sustainable Corporations, 2007 World Economic Forum;
- Number one in the Australian Corporate Responsibility Index (third consecutive year) - rating of 99.8%; and
- One of only 38 companies worldwide (some 3,800 companies rated) to receive the maximum rating of 10.0 by GovernanceMetrics International.

Details of Westpac's Corporate Responsibility and Sustainability policies, performance and ratings can be found at <http://www.westpac.com.au/corporateresponsibility>.

4.0 BUSINESS UNIT RESULTS

Business unit results are presented on a management reporting basis. Internal charges and transfer pricing adjustments are included in the performance of each business reflecting the management, rather than the legal structure (these results cannot be compared to results for individual legal entities). Where management reporting structures or accounting classifications have changed, comparatives have been restated and may differ from results previously reported. Results below are on a cash earnings basis.

Our internal transfer-pricing framework attributes value between business units. Its primary attributes are:

- Treasury funding: product balances are fully transfer-priced at inter-bank rates according to the tenor of the underlying transactions; and
- All overhead costs are allocated to revenue generating businesses, and capital is allocated to business groups using designated risk factors.

⁵ Reported and cash earnings basis.

4.1 BUSINESS AND CONSUMER BANKING

Business and Consumer Banking (BCB) is responsible for product development, sales and servicing for all retail banking customers and small to medium sized businesses. Activities are conducted through a nationwide network of branches, business banking and call centres, ATMs, internet banking and mobile sales forces. BCB's front line employees are responsible for the delivery of sales and service related functions for a broad range of financial products including home, personal and business finance lending, savings and investment accounts, credit cards and wealth products.

Financial Performance

First Half 2007 - First Half 2006

Features:

- Loan growth up 12% and deposit growth up 13%.
- Margin compression / fee management.
- Impairment losses increasing, consistent with growth in lending volumes.
- Investment in frontline sales employees.

BCB delivered cash earnings of \$932 million, up \$97 million or 12% on the six months ended 31 March 2006. At or above system balance sheet growth in cards, business lending and deposits and near system in housing drove this result. Overall business unit margin compression of 11 basis points was partially offset by growth in fee income from deposits and credit cards. Operating costs increased 7% from continued investment in front line sales employees in both consumer and business and higher marketing spend.

Significant factors affecting the result were:

- Net interest income increased 8%. Growth in net loans (12%) and deposits (13%) drove this result with margin compression across the lending portfolios partially offset by improved deposit spreads;
- The non-recurring impact of the credit cards over-accrual (\$22 million in the six months ended 31 March 2006), had the effect of reducing net interest income growth by 2%;
- Non-interest income increased 16%. Proceeds from the sale of MasterCard shares in the six months ended 31 March 2007 (\$19 million) was offset by reduced income following the sale of the Custody business in the prior period (\$6 million). Pricing changes on transactional deposit accounts to manage the continuing migration to high rate, lower margin accounts were major contributors to non-interest income growth;

- Credit card balances increased 16%, representing a system multiple of 1.2. We are actively managing our portfolio risk position on the cards portfolio via our ongoing investment in credit, analytical and collections capability. Spreads are down 76 basis points primarily due to changes in mix towards low rate products and increased funding costs;
 - Total deposits increased by 13%, business deposits driving the increase with growth of 17%. Portfolio mix continues to experience composition change driven by industry trends and continued competition;
 - Mortgage lending increased 12%, with good productivity across our branch and housing finance manager teams. The proportion of loans via brokers was up marginally from 38% to 39%. Spreads are down 10 basis points largely reflecting the impact of competition and portfolio mix;
 - Business lending increased 14%. This growth was driven by a greater number of customer serving employees, improved sales force effectiveness and a small increase in third party referrals. Spreads were down 13 basis points mainly from portfolio mix and continued competitive pressures;
 - Expenses increased 7%. Investment in expanding the footprint drove this increase, with the addition of 366 customer serving employees since 31 March 2006 including the impact of prior period increases in business bankers and property investment in new branches and business banking centres. Operating costs also increased due to higher marketing spend relating to the new advertising campaign and costs associated with processing the growth in sales activity; and
 - Impairment losses increased \$42 million or 34% on the six months ended 31 March 2006. The major movements were:
 - \$36 million increase in write-offs direct, net of recoveries reflecting larger book size and some minor increases in write-off proportions on delinquencies;
 - \$11 million increase in collectively assessed provisioning due almost entirely to asset growth;
- offset by:
- \$7 million lower individually assessed provisions.

First Half 2007 – Second Half 2006

Features:

- Cash earnings up 12%.
- Annualised loan growth of 11%, deposit growth of 11%.
- Operating expenses contained at 2% (continued focus on expense management).

BCB delivered cash earnings of \$932 million, up \$100 million (12%) on the six months ended 30 September 2006, driven by balance sheet growth at or above system.

Significant factors affecting the result include:

- Net interest income increased 6%, due to:
 - Net loans up 5% and deposits up 6% on 30 September 2006;
 - Spread compression in lending continued to be partially offset by improved deposit spreads; and
 - The non-recurring impact of the correction for the credit cards over-accrual in the prior period (\$42 million in the second half of 2006), contributed 2% to interest income growth.
- Non-interest income increased 6%. Growth in cards volume related fees and fee pricing changes on deposit accounts to offset the impact of margin compression supported the overall result. The net impact of lower income following the sale of the Custody business in the prior period reduced non-interest income growth by 1%;
- Credit card spread decline of 71 basis points, reflecting increased funding costs and changes to portfolio mix;
- Mortgage lending increased at an annualised rate of 11%, reflecting 1.0 multiple of system although below the 12% growth in the second half of 2006. The rate of spread decline was consistent with the compression on the first half of 2006 (5 basis points);
- Business lending increased at an annualised rate of 11%. This growth was driven by improved sales force effectiveness and a small increase in third party referrals. Spreads were down 5 basis points as the mix impacts and competitive pressures continued;

- Expenses increased 2% on the six months ended 30 September 2006. The investment in customer serving employees drove this increase, with the impact on expense growth partially offset by lower operating costs and a continued focus on expense containment; and
 - Impairment losses increased \$1 million or 1% on the six months ended 30 September 2006. The major movements were:
 - \$6 million increase in write-offs direct, net of recoveries, driven largely by continued growth in cards;
- offset by:
- \$1 million decrease in individually assessed provisions net of write-backs; and
 - \$5 million decrease in collectively assessed provisions.

³ Includes securitised loans.

⁴ Source: Total Business Credit for Westpac Australia.

⁵ Total Retail Deposits for Westpac Australia.

⁶ Source: Australian Prudential Regulation Authority/Reserve Bank of Australia (RBA) data. First half 2007 is based off data to March 2007, except for retail business credit which is to December 2006, and cards which is to February 2007.

⁷ Our estimates of retail system are derived from reported RBA data based on size of loan facility. We calculate a weighted average growth rate based on system lending growth for loans < \$2 million and loans above \$2 million. The < \$2 million market has a larger weighting in our estimate of retail business credit than the > \$2 million. The weights we have used are based on BCB's book split by size of loan facility. 1H07 multiple is for the quarter to December 2006.

⁸ Reported product spreads for the periods ending 1H07, 2H06 and 1H06 include the impacts of AASB 132/139 (effective yield). The product spreads for 2H05 have not been impacted as these accounting standards were applicable effective from 1 October 2005.

⁹ Adjusted for the over accrual of interest income in 2H06, 1H06 and 2H05.

¹⁰ Source: Roy Morgan Research (February 2007). 12 month rolling average. Satisfaction defined as "very" or "fairly" satisfied among those that regard each bank as their main financial institution.

4.1.3 Consumer Segment

The Consumer segment is responsible for sales, servicing and product development for our consumer customers in Australia. Activities are conducted via our nationwide network of branches, Home Finance Managers (HFMs), specialised consumer relationship managers, call centres, automatic teller machines (ATMs) and internet banking services. The Consumer segment includes the management of our third party consumer product relationships and also includes our retail branch operations in Hong Kong and Singapore.

Total assets	128.2	121.0	114.7	6	12

Financial Performance

First Half 2007 - First Half 2006

Features:

- Cash earnings up 12%.
- Mortgages system growth restored, margin decline managed within expectations.
- Growth in cards market share, spread decline reflecting cost of funds and portfolio mix.
- Investment in 173 customer serving employees and new branches.

Cash earnings for Consumer were up \$47 million or 12% compared to the six months ended 31 March 2006.

Operating income increased 9%. The impact of the credit cards over accrual in the six months ended 31 March 2006 (\$20 million) had the effect of reducing operating income growth by 2%. The net impact of the sale of MasterCard shares contributed 5% to non-interest income growth.

Factors contributing to income growth were:

- Loan growth of 12%, primarily driven by mortgages (up 12%, 0.9 times system). New lending volumes strengthened through consistent proprietary channel productivity and a small increase in the proportion of origination from brokers. The revenue growth was partially reduced by spread compression driven by consumer migration towards lower spread, fixed rate lending with the proportion of the portfolio that was fixed increasing by 4%, combined with the impact of pricing competitiveness.
- Cards outstandings were up 16% (1.2 times system), offset by cards spread compression reflecting the impact of growth in low rate cards and increased funding costs associated with the recent interest rate increases.
- Deposit growth of 9% was primarily driven by the growth in the Max-i direct product, Westpac One transaction account and the Westpac One Save product. The portfolio mix continues to reflect composition change towards lower margin online savings products, and 'unlimited transaction account' style products, the impact on profitability effectively managed in the current period.

Expenses increased 5% largely driven by a 173 increase in customer serving employees, increased costs associated with higher sales activity and the investment in 6 new branches across NSW, Queensland, Victoria and ACT. The growth in personnel costs reflects the investment in frontline sales employees and 4% salary increases processed in October 2006.

Impairment losses increased \$40 million or 48% on the six months ended 31 March 2006. The major movements were:

- \$33 million increase in write-offs direct, net of recoveries primarily in the cards book reflecting larger book size;
- \$3 million increase in collectively assessed provisioning due to asset growth and some deterioration in mortgage delinquency; and
- \$5 million increase in individually assessed provisions net of write-backs in the mortgage portfolio.

First Half 2007 - Second Half 2006

Features:

- Cash earnings up 19%.
- Mortgages growth 1.0 times system, rate of mortgage margin compression consistent with first half 2006.
- Investment in 262 customer serving employees and new branches.

Consumer cash earnings were up \$72 million or 19% compared to the six months ended 31 September 2006.

Operating income increased 6% driven by an 11% annualised increase in loans and an 8% annualised increase in deposits partially offset by spread compression across mortgages and cards. Significant factors affecting the result included:

- Mortgage annualised growth of 11%. The rate of spread decline maintained at levels consistent with compression on the first half of 2006;
- The non-recurring impact of the correction for the credit cards over-accrual in the six months ended 30 September 2006 (\$38 million) contributing 2% income growth; and
- Credit card spread decline of 71 basis points, reflecting growth in low rate credit cards combined with increased funding costs and higher acquisition of introductory rate based balance transfers.

Operating expenses increased 1%; increased investment in 262 frontline employees and investment in 6 new branches drove the result with the full impact reduced following higher operating costs in the period ended 30 September 2006 and continued focus on expense containment.

Impairment losses was \$12 million or 9% lower compared to the six months ended 30 September 2006, largely due to a reduction in individually assessed provisions.

4.1.4 Business Segment

The Business segment is responsible for sales, servicing and product development for our Small to Medium Enterprise (SME) customers within Australia. Activities are conducted via our specialised Commercial Banking and SME relationship managers supported by Debt, Financial Markets and Wealth specialists. The Business segment also includes our working capital and specialised trade solutions operations for corporate and SME customers and the management of our third party business product relationships.

\$m	Half Year March 07	Half Year Sept 06	Half Year March 06	% Mov't Sept 06- Mar 07	% Mov't Mar 06- Mar 07

	\$bn	\$bn	\$bn		
Deposits	48.1	44.8	41.0	7	17
Net loans	48.1	45.7	42.2	5	14
Total assets	49.5	47.6	43.3	4	14

Financial Performance

First Half 2007 - First Half 2006

Features:

- Cash earnings up 12%.
- Loan growth up 14%, deposits up 17%.
- Investment in 193 customer serving employees.

Cash earnings for the Business segment were up \$50 million or 12% compared to the six months ended 31 March 2006.

Net interest income grew 12%, driven by business lending growth of 14% and deposit growth of 17%. Business lending margin compression was partially offset by improved deposit spreads.

Non-interest income grew by 6% primarily driven by deposit fee growth. Growth in non-interest income has been adversely impacted by 3% due to the sale of the Custody business in the six months ended 30 September 2006.

Business new lending up 20% (27% excluding the Regional and Agri sector which has been adversely impacted by the drought). The significant uplift in new lending, together with a continued shift towards bank bill priced products and larger deal sizes, has contributed to the 13 basis points spread decline on the six months ended 31 March 2006.

Operating expenses increased 12% on the six months ended 31 March 2006. Key factors contributing to the increase were:

- Investment in 193 additional customer serving employees brought on since March 2006 continuing our strategic investment of 440 bankers recruited over the 2006 financial year;
- Market driven salary increases and higher incentive costs driven by improved performance and increased banker numbers;
- Property costs associated with new Business Banking Centres; and
- Operational support costs driven by increased sales activity partially offset by productivity initiatives.

Impairment losses increased \$2 million or 5% on the six months ended 31 March 2006. The major movements were:

- \$3 million increase in write-offs direct net of recoveries; and
- \$8 million increase in collectively assessed provisioning due to asset growth;

offset by

- \$9 million reduction in individually assessed provisions net of write backs.

Impaired assets remain below long run averages and have increased from 0.17% of Total Committed Exposure to 0.19% on 31 March 2006 levels.

First Half 2007 – Second Half 2006

Features:

- Cash earnings up 6%.
- Loan growth up 11% and deposit growth up 15% (annualised).

Business cash earnings were up \$28 million or 6% compared to the six months ended 30 September 2006.

Operating income increased 6% driven by an 11% annualised increase in loans and a 15% annualised increase in deposits. The impact of business lending spread compression was partially offset by increased deposit spreads. Significant factors affecting the result include:

- Net interest income for the business segment grew 7% driven by Business lending balance sheet growth of 5% and deposit growth of 7%. Business lending spread compression of 5 basis points was driven by a portfolio mix towards growth in bank bill priced products and competitive pressures. Spreads on deposits increased by 4 basis points offsetting the mix impact of growth in higher cost Max-i and term deposits.
- Non-interest income grew by 4% primarily driven by volume growth.

Operating expenses increased 3% on the six months ended 30 September 2006. The increase was primarily driven by the full period impact of the frontline bankers recruited in the second half of 2006, and market driven salary increases. Improved performance and increased banker numbers have also driven bonus and incentive costs higher. There have been additional property costs from new Business Banking Centres and the redesign of corporate property for improved customer interaction, especially in Sydney CBD.

Impairment losses increased \$13 million, largely as a result of lower levels of write-backs of individually assessed provisions. Business Delinquencies > 90 Days were flat at 0.61% of Total Committed Exposure.

4.2 WESTPAC INSTITUTIONAL BANK

Westpac Institutional Bank delivers a broad range of financial services to corporate, institutional and government customers either based in, or with interests in Australia and New Zealand. WIB operates through dedicated industry teams, supported by specialist knowledge in financial and debt capital markets, transactional banking, specialised capital and alternative investment solutions. Customers are supported through branches and subsidiaries located in Australia, New Zealand, New York, London and Asia.

Total assets	60.6	50.5	50.2	20	21

Financial Performance

First Half 2007 - First Half 2006

Features:

- Cash earnings up 17% driven by customer income growth and reduced impairment losses.
- Revenue up 5% despite non-continuing income streams.

Institutional bank cash earnings were up \$36 million or 17% compared to the six months ended 31 March 2006.

Operating income was up \$28 million or 5% on the six months ended 31 March 2006. Operating income growth was impacted by:

- Lower product income from Foreign Exchange (FX) (down \$20 million), reflecting the normalisation of a very strong trading result in the first half of 2006. WIB continues to be ranked number one in a number of key FX strategic market indicators including market share, relationship and sales strength indices¹;
- Reduction in revenue from the portfolio of investment securities of \$28 million compared to the first half of 2006. This reflects the run down and liquidation of the portfolio, which was largely completed in 2006; and
- No further contribution from the Custody business following the sale of the business in 2006. This business contributed revenue of \$7 million during the first half of 2006.

These impacts were offset by:

- Capital Markets' sales and trading income up \$37 million (60%) to \$99 million, reflecting the increased volatility in the interest rate markets generating higher customer demand for associated hedging products;
- Debt Capital Markets origination income increased to \$40 million driven by an increase in the volume of syndicated lending transactions (up 45% from the six months ended 31 March 2006) to \$7 billion;

¹ Foreign Exchange - Australia Survey - Peter Lee Associates 2007

- Net loans increased by 41% to \$37 billion, primarily driven by growth in corporate financing loans. The growth was largely driven by the increased usage of short-term underwriting and bridging facilities. This has assisted the growth in Debt Capital Markets origination income and continued strong issuance and placement volumes;
- Operating income generated by the Specialised Capital Group (SCG) increased by 69% or \$11 million driven by SCG's funds management business. At 31 March 2007, total funds under management for SCG (including Hastings Funds Management Limited) was \$6.4 billion, up 21% compared to 31 March 2006; and
- Income contribution from the Transactional Banking business lifted by 12% to \$93 million from the six months to 31 March 2006.

Operating expenses increased by 4% to \$278 million from the first half of 2006, reflecting continued tight expense discipline and investment in the growth business portfolios, including Debt Markets, Energy and SCG. Operating expenses of \$3 million in the first half of 2006 related to the Custody business, which was sold during the 2006 year.

Impairment losses reduced by \$27 million to \$11 million. No significant individually assessed provisions or write backs were recognised during the first half of 2007, which largely reflects a continuing benign credit environment.

First Half 2007 - Second Half 2006

Features:

- Cash earnings up 1% due to reduced origination income from SCG offset by increased Financial Markets income.

Cash earnings were up \$2 million or 1% compared to the six months ended 30 September 2006.

Operating income was up \$23 million or 4% on the six months ended 30 September 2006.

Operating income growth was impacted by:

- Income from SCG was down by \$53 million (66%). This reflects reduced origination income due to the timing of several key transactions scheduled to be completed in the second half of 2007. In addition, the SCG result for the second half of 2006 reflects the closure of several major transactions including the redemption of FIELDS securities following the acquisition of the Delhi Group. SCG has a strong pipeline for the remainder of the 2007 year; and
- Non-interest income was also lower due to non-recurring income from the Custody business of \$6 million, and a reduction of \$9 million income on the portfolio of investment securities.

Operating income growth was supported by:

- Income from the Capital Markets' sales and trading business up \$65 million driven by increased hedging activities within the interest rates market;
- Higher FX product income (up 7%), despite lower market volatility driving moderate levels of corporate demand for FX products; and
- Net loans increased by 18% as a result of growth in financing loans and the continuing increase in customer demand for short term bridging facilities.

Operating expenses increased by 3% to \$278 million in the first half of 2007, reflecting tight expense discipline and management and investment in growth businesses. In the second half of 2006, \$3 million of operating expenses related to the Custody business.

Impairment losses increased by \$10 million, which reflects the growth in the Financing loan book during the previous six months and lower write-backs on previously provisioned loans which were significant in the second half of 2006.

Financial Performance

Features:

- Restructuring of portfolio continues.

First Half 2007 - First Half 2006

Structured Finance (SF) cash earnings decreased by 15% or \$6 million in the first half of 2007, as the portfolio continued to be restructured. The business continues to progress within a tight risk framework.

First Half 2007 - Second Half 2006

Cash earnings grew 17% as the restructure process continued and the business moved to a more sustainable medium term earnings profile.

The tax expense in the first and second half of 2006 was impacted by the timing of tax recognition.

¹ Net interest income includes a tax equivalent gross up relating to tax benefits on structured finance transactions of \$54 million for the six months ended 31 March 2007, \$54 million for the six months ended 30 September 2006 and \$57 million in the six months ended 31 March 2006, which are reversed in the tax expense line.

4.3 BT FINANCIAL GROUP (AUSTRALIA)

BT Financial Group Australia (BTFG) is Westpac's wealth management business. BTFG designs, manufactures and distributes financial products that enable our customers to achieve their financial goals by accumulating, managing and protecting their wealth. These products include retail investments, personal and business superannuation (pensions), life and general insurance, discount securities broking, margin lending, client portfolio administration (Wrap platforms) and portfolio management. BTFG also provides financial planning advice.

Financial Performance

First Half 2007 - First Half 2006

Features:

- Operating Income growth of 14% driving cash earnings growth of 22%.
- Funds Under Administration (FUA) up, insurance sales up.

BTFG delivered cash earnings of \$201 million, up 22% compared to the six months ended 31 March 2006.

The result was driven by a 14% increase in net operating income achieved through continued growth in our core businesses including:

- Growth in FUA of 23% including continued growth in Wrap business - ranked first for new business for the December quarter;
- Corporate Super growth including 10% market share of new business in the December quarter;
- Growth in margin lending and broking with share of new business broadly in line with existing market share;
- Growth in insurance sales - overall life insurance in-force premium growth of 8%;
- Sales revenue in the Advice channel up 20%;
- Partly offset by margin compression of 3 basis points; and
- The Australian Equities Market has been strong, however the balanced nature of the portfolio and the strong growth in the first half of 2006 has reduced the relative impact on earnings in this half.

Net interest income was down \$7 million due to changes in our Capital Investment Strategy which have led to investment earnings on some of our invested capital now being classified as non-interest income.

Expense growth of 9% driven by:

- Increased customer serving employees up 12%;
- Increased investment in strategic and growth initiatives directed at:
 - Leveraging the current opportunities and legislative changes in Superannuation;
 - Improved functionality and lowering fees for investors on our Wrap platform; and
 - Further operational efficiency including offshoring and straight through processing whilst improving the quality of services offered.

First Half 2007 - Second Half 2006

Features:

- Cash earnings growth of 16%.
- Insurance cash earnings growth of 17%.
- Improving share of new business flow.

Cash earnings growth of 16% driven by an increase in net operating income of 8%. Key drivers were:

- Growth in FUA of 18%;
- Funds Under Management (FUM) growth of 9% led by growth in institutional and wholesale with share of new business for the December quarter above current market share;
- Margin Lending growth of 14% broadly in line with market share; and
- Growth in insurance sales. Overall life insurance in-force premium growth of 5%.

Momentum was strong, and in addition was assisted by:

- A lower Life Insurance performance in the second half of 2006; and
- Relatively flat Australian Equities Markets in the second half of 2006 compared to the strong growth in this half.

Expense growth of 2% driven by an 8% increase in customer serving employees.

4.3.1 Funds Management Business

Funds management includes product management, product administration, product and platform intermediary distribution, client servicing, investment management, margin lending and discount broking.

\$m	Half Year	Half Year	Half Year	% Mov't	% Mov't
	March 07	Sept 06	March 06	Sept 06- Mar 07	Mar 06- Mar 07

Net profit after tax/cash earnings	115	100	95	15	21
Expense to income ratio	60.5%	63.6%	63.2%	310bps	270bps

First Half 2007 – First Half 2006

Features:

- Income growth of 12% driven by growth in FUA of 23%.
- Growth in Wrap platform of 34%.
- Investment in strategic initiatives up 58%.

Cash earnings increased by 21% or \$20 million. This was achieved through a 12% growth in operating income to \$415 million. Underpinning this growth was:

- FUA growth of 23%, to \$47.8 billion;
- Continued growth in our Wrap business, with flows up 34% to \$31.8 billion, supported by a 31% uplift in sales;
- Growth in Corporate Super of 14% to \$5.7 billion;
- Growth in Margin Lending of 40% to \$4.2 billion; and
- Westpac broking income up 40%, to \$20.6 million, driven by a volume increase of 24%; and
- Funds Under Management grew 6% with 33% growth in Wholesale, offset by low retail and institutional growth. Institutional FUM grew 6% despite the redemption of a \$1 billion domestic fixed income mandate during the second half of 2006.

Expenses growth of 7% was driven by:

- Increased investment in strategic and growth initiatives (up 58%) including a \$7 million investment in compliance led changes (i.e. superannuation legislative changes);
- Increase in customer serving employees of 11%, driven by additional planners and investment representatives in the Advice business; and
- Offset by delivery of efficiencies in underlying operations, including offshoring and straight through processing, while improving the quality of service.

First Half 2007 – Second Half 2006

Features:

- Cash earnings growth of 15%.
- Growth in Wrap platforms 20%.

Cash earnings increased 15% to \$115 million driven by a 6% uplift in operating income. The core business drivers underpinning this were:

- FUA growth of 18% driven by 20% increase in Wrap and 10% increase in Corporate Super;
- Margin Lending growth of \$0.5 billion; and
- Westpac broking revenue increased 22%, on the back of a 17% increase in volumes.

Expense growth of 1% included:

- An increase in customer serving employees of 6%, driven by additional planners and investment representatives in the Advice business; and
- A \$7 million investment in compliance led changes.

Relative expense growth was low despite additional investment, due to increased seasonal activity in the second half of 2006.

First Half 2007 - First Half 2006

Features:

- Sales growth across key products.
- Diversified number of distribution channels delivering additional sales growth.
- Significant investment in strategic growth initiatives.

Cash earnings of \$69 million was an increase of 23% on the six months ended 31 March 2006.

- Life Insurance cash earnings of \$33 million was up 18%. Operating income of \$70 million was 14% higher driven by an 8% growth in in-force premiums and strong risk sales;
- General Insurance cash earnings of \$36 million, up 29%. Operating income of \$65 million rose 32% and includes an improved claims experience (down 13%). The six months ended March 2006 was impacted by Cyclone Larry; and
- Insurance expenses grew by 19% driven by additional FTE to support new distribution initiatives and customer service plus investment in technology infrastructure to facilitate new distribution channels.

First Half 2007 - Second Half 2006

Features:

- Life insurance sales growth of 25%.

Cash earnings increase of 17% driven by:

- Life Insurance cash earnings growth of 50% driven by sales growth of 25%. The second half 2006 revenue result was impacted by the changes in our premium calculation processes; and
- General Insurance cash earnings decreased by 3% (\$1 million) as a result of an increase in support costs.

Financial Performance (NZ\$)

First Half 2007 - First Half 2006

Features:

- Core earnings growth up 6%, driven by operating income growth of 5%.
- Cash earnings down 3% due to increase in impairment losses.

Cash earnings was down 3% compared to the six months ended 31 March 2006.

Operating income growth of 5% was driven by volume growth offset by declines in margin. Key features of volume growth included:

- Mortgage volumes were up 20%. Drivers of the growth included:
 - A sales focus in Auckland, which saw our share of mortgage registrations in the region grow from 14% for the six months ended 31 March 2006 to 19% for the six months ended 31 March 2007; and
 - A number of policy and product changes to better align our product offering with the market.
- Business lending growth up 12%, with our leading market position¹ maintained; and
- Deposit growth up 11%.

Improved volume has been offset by declines in margin, with the overall business unit margin for NZ down from 2.44% for the six months ended 31 March 2006 to 2.20% for the six months ended 31 March 2007. Key drivers of the decline were:

- 13 basis point decline in lending spread/mix, comprising:
 - 7 basis points due to credit card spreads impacted by increased funding costs;
 - 4 basis points associated with the repricing of fixed home loans written in the last two years at lower spreads and continued switching from floating to fixed rate mortgages; and
 - 2 basis point decline in business lending spreads due to price competition.

¹ TNS 1st Quarter 2007 Marketshare by Balances, Middle Business (\$5 million - \$100 million t/o) March 2007

- 9 basis point decline in deposit spread/mix, due to increased customer switching to the lower spread on-line saver products; and
- 2 basis point decline largely due to an increase in wholesale funding costs as asset growth was greater than deposit growth.

Non-interest income growth was up 4%, supported by volume growth.

Expense growth was up 4% on the six months ended 31 March 2006. Key drivers of the increase were:

- Personnel expenses up \$4 million including \$2 million restructuring payments as part of a productivity program that has seen overall FTE levels decline 400 to 4,655, with the majority of the reductions in the second quarter of 2007; and
- Other cost increases including advertising costs following the relaunch of the brand advertising campaign this year, and an increase in project amortisation costs associated with the prior investment in a number of technology projects.

Impairment losses were up \$31 million on the six months ended 31 March 2006. The increase, while significant, is off historic lows. The major movements were:

- \$14 million increase in provisioning in the business segment, reflecting some downward migration in credit ratings. This migration is in response to the weakening economic conditions due to a combination of interest rate rises and the higher New Zealand dollar impacting exporters. Total stressed loans¹ as a percentage of total commitments were 1.31% up from 1.17% at 31 March 2006, but below the five year average of 1.35%;
- \$5 million increase in collective provisioning driven by balance sheet growth in consumer lending \$4 million and business lending \$1 million;
- \$7 million increase in collective provisioning due to some deterioration in consumer products. Housing delinquencies greater than 90 days as a proportion of outstandings, have increased from historic lows to 20 basis points at March 2007. This is broadly in line with the 5 year historic average of 19 basis points; and
- \$3 million due to increased consumer individually assessed provisions.

First Half 2007 – Second Half 2006

Features:

- Core earnings growth up 3%.
- Cash earnings down 4% due to increase in impairment losses.

Cash earnings growth was down 4% compared to the second half of 2006.

Operating income growth of 3% was supported by net interest income growth of 4% with non-interest income flat compared to the six months ended 30 September 2006.

Net interest income growth was volume led, with housing volumes up 23%, business lending up 11% and personal lending up 16% annualised. Personal lending benefited from improved origination processes and quicker in-branch decision making.

Deposit growth was up 12% (annualised), supported by the successful launch of the new Online Bonus Saver product in December 2006.

Improved volumes have been offset by declines in margin, with the overall business margin for NZ down from 2.32% for the six months ended 30 September 2006 to 2.20% for the six months ended 31 March 2007. Key drivers of the decline were:

- 10 basis point decline in lending spread/mix, comprising:
 - 4 basis points due to reduced credit card spreads;
 - 3 basis points associated with the repricing of fixed rate home loans;
 - 2 basis point decline in business lending spreads which were impacted by the roll off of some higher spread property transactions; and

¹ Comprises impaired assets, business 90 day past due but well secured and watchlist and sub-standard loans as a percentage of total committed exposure for business lending.

- 1 basis point mix impact as customers continued to switch from floating to fixed rate mortgages (fixed rate up from 81% of the housing portfolio to 83%).
- 1 basis point decline in deposit spread/mix; and
- 1 basis point decline largely due to increased funding costs, including wholesale funding as asset growth continues to outstrip deposit growth.

Non-interest income growth was flat, as the impact of various fee repricing initiatives designed to bring the business back in line with market were completed.

Expense growth was up 3% or \$10 million on the six months ended 30 September 2006. Salary increases effective 1 January 2007 drove personnel expenses up 1%, together with the \$2 million restructuring costs. These were offset by a reduction of 298 FTE during the period. Project amortisation costs increased by \$2 million.

Impairment losses up \$22 million on the six months ended 30 September 2006. The major movements were:

- \$17 million increase in provisioning including business lending downgrades (\$5 million), balance sheet growth (\$5 million), comprising business (\$2 million) and consumer (\$3 million) and an increase in collective provisioning in consumer products (\$7 million); and
- \$5 million due to additional individually assessed provisions within consumer products.

4.5 PACIFIC BANKING

Pacific Banking provides banking services for retail and business customers throughout the South Pacific Island Nations. Branches, ATM's, telephone banking and Internet banking channels are used to deliver our core business activities in Fiji, Papua New Guinea (PNG), Vanuatu, Cook Islands, Tonga, Solomon Islands and Samoa. Pacific Banking's financial products include home, personal and business lending and savings and investment accounts.

Financial Performance

First Half 2007 - First Half 2006

Features:

- Core earnings up 3%.
- Cash earnings down due to increased impairment provisioning.

Cash earnings for Pacific Banking were down \$2 million or 6% compared to 31 March 2006. While asset growth was up 21%, the economic and political instability recently experienced in the Pacific region has led us to increase provisions for impairment losses in the region and this has caused a reduction in earnings.

Income growth was 6%. Income growth did not match asset growth due to margin compression from increased competitive pressures and tightened liquidity. Expenses were up 11%, due to continued investment in risk management capability and a refresh of our technology infrastructure. This has resulted in a deterioration in the expense to income ratio of 160 basis points compared to 31 March 2006.

Although no significant losses have been reported, impairment losses increased by \$9 million as we increased provisioning to reflect the economic and political instability in the region.

First Half 2007 - Second Half 2006

Features:

- Cash earnings down due to increased impairment provisioning.

Compared to 30 September 2006, cash earnings for Pacific Banking were down 15% or \$6 million. These results were impacted by higher provisioning in the first half of 2007 to cover increased levels of risk associated with the instability in the region.

4.6 GROUP BUSINESS UNIT

This segment comprises:

- Group items, including earnings on surplus capital, accounting entries for certain intra-group transactions that facilitate the presentation of the performance of our operating segments, (such as hedge results associated with hedging our New Zealand earnings), earnings from property sales and certain other head office items such as centrally raised provisions, reversals of tax equivalent gross ups on tax effective transactions within the Institutional Bank; and
- Group Treasury, which is primarily, focused on the management of the Group's interest rate risk and funding requirements by managing the mismatch between Group assets and liabilities. Treasury's earnings are primarily impacted by the hedging decisions taken on behalf of the Group to manage net interest income outcomes and assist net interest income growth.

Non-interest income	-	23	25	(100)	(100)
Cash Earnings	74	15	97	large	(24)

First Half 2007 - First Half 2006¹

Features:

- Cash earnings up due to lower tax provisions.

Cash earnings were up \$18 million compared to the six months ended 31 March 2006, largely driven by lower tax provisions in the first half of 2007, offset by a decrease in Treasury earnings, and losses on NZD earnings¹ hedges.

Treasury earnings were down \$23 million largely due to reduced FX income. Total hedge ineffectiveness for the Group was \$9 million (\$7 million net interest income, \$2 million non-interest income), which was \$7 million up on the six months ended 31 March 2006.

¹ In comparative periods, earnings on our New Zealand business were translated into AUD at the hedges rate for the period. Differences between the hedge rate and the average exchange rate for the period were included in the Group Business Unit on a line by line basis, along with gains/losses on the hedge. Following a change in our approach to hedging NZD earnings, our New Zealand business is now translated into AUD at the average exchange rate for the period. Gains/losses on the hedge continue to be captured in the Group Business Unit. Comparatives have not been restated.

First Half 2007 - Second Half 2006

Features:

- Increased earnings from Treasury.
- Lower tax in second half of 2006.

Cash earnings were down \$3 million compared to the six months ended 30 September 2006, due to reduced earnings on surplus capital, reduced tax in the second half of last year and losses on hedges of NZD earnings.

These results were offset by an increase in Treasury earnings.

5.5 NOTES TO 2007 FINANCIAL INFORMATION

Note 1. Basis of preparation of financial information

The accounting policies and methods of computation adopted in the preparation of the interim financial information are the same as those in the previous financial year and corresponding interim reporting period, except as follows:

As of 1 October 2006, Westpac adopted an amendment to AASB 139 Financial Instruments: Recognition and Measurement. As a result of this amendment cash flow hedging of intragroup revenue no longer qualifies for hedge accounting. This amendment has resulted in subsequent changes to the fair value of derivative instruments that previously hedged New Zealand dollar income being recognised in the income statement. Amounts deferred in the cash flow hedging reserve up to 30 September 2006 are being released to the income statement when the underlying hedged revenues are recognised in income. Westpac has applied the exemption available in AASB 139 and not restated the comparative reported information for the impact of this change in accounting policy. The effect of the change has resulted in a decrease in other income and accordingly profit before income tax of \$6 million, a decrease in income tax expense of \$2 million and a decrease in net profit for the year of \$4 million. This resulted in a corresponding increase in the cash flow hedge reserve of \$4 million.

Except for impact of the change to AASB 139 discussed above comparative information is restated where appropriate to enhance comparability.

¹ Capital benefit represents the notional revenue earned on capital allocated to business units under the Bank's economic capital framework.

² Westpac has entered into various tax effective financing transactions that derive income that is subject to a reduced rate of income tax. The impact of this is reflected in lower income tax expense and interest income. In order to provide improved comparability, this income is presented on a tax equivalent basis.

¹ Includes net impact of Treasury balance sheet management activities.

² Other interest bearing liabilities has been restated as at 30 September 2006 and 31 March 2006 to reflect a reclassification of commercial paper issues for one of our special purpose vehicles. The issues were previously classified as "Other financial liabilities designated at fair value" but have been reclassified to debt issues within "Other interest bearing liabilities". For the half year 31 March 2006 "Other interest bearing liabilities" has been restated from \$56,429 million to \$60,721 million and interest expense restated from \$1,732 million to \$1,862 million. For the half year 30 September 2006 "Other interest bearing liabilities" has been restated from \$61,861 million to \$66,851 million and interest expense restated from \$1,954 million to \$2,109 million.

³ Total net interest income presented in the average balance sheet includes a tax equivalent gross up of \$54 million for the six months to 31 March 2007 (\$34 million benefit in interest income and \$20 million benefit in interest expense). 30 September 2006 half year comparatives include a tax equivalent gross up of \$54 million (\$40 million in interest income and \$14 million in interest expense). 31 March 2006 half year comparatives include a tax equivalent gross up of \$57 million (\$41 million in interest income and \$16 million in interest expense).

⁴ Includes provisions for current and deferred income tax and derivative financial instruments.

Impact of A-IFRS	-	-	(980)
Adjusted common equity restated for A-IFRS	9,171	8,757	8,304
Adjusted common equity to risk weighted assets restated for A-IFRS	4.3%	4.6%	4.6%

¹ Represents capital relating to non-banking subsidiaries. Following discussions with Standard & Poor's, equity investments held in our Specialised Capital Group (SCG) should not be deducted from ACE Capital. This change has been applied for 31 March 2007 and prior periods have not been restated.

² Commenced deductions for capitalised expenditure from ACE capital from 1 July 2006.

³ Risk weighted assets (RWA) used in the calculation of ACE differs from the RWA calculation used for APRA regulatory reporting. ACE RWA excludes APRA A-IFRS transition relief and includes the equity investments held by SCG.

Cash outflows (liabilities)	2.1%	7.8%	27.9%	26.1%	13.9%	8.5%	5.0%	8.7%

Daily value at risk

We use value at risk as the primary method for measuring and monitoring market risk exposure against Board approved limits. Value at risk is an estimate of the worst case loss in value of trading positions, to a 99% confidence level, assuming positions were held unchanged for one day. The main types of market risk arising from our trading activities are interest rate and foreign exchange risks. Other market risks include commodity, equity, prepayment, specific issuer and capital markets underwriting risks. The table below depicts the aggregate financial markets (including capital markets underwriting) value at risk for the last three half years.

\$m	High	Low	Average
Six months ended 31 March 2007	7.3	3.2	4.7
Six months ended 30 September 2006	8.3	4.2	5.9
Six months ended 31 March 2006	11.0	4.4	6.9

Average \$m	Half Year 31 March 2007	Half Year 30 Sept 2006	Half Year 31 March 2006
Interest rate risk	3.1	3.2	3.5
Foreign exchange risk	1.2	1.3	1.7
Volatility risk	1.1	0.8	0.5
Other market risks ¹	1.8	2.3	3.1
Diversification benefit	(2.5)	(1.7)	(2.0)
Net market risk	4.7	5.9	6.9

The table below depicts the aggregate value at risk for Group Treasury's non-traded interest rate risk for the last three half years:

\$m	High	Low	Average
Six months ended 31 March 2007	18.0	2.8	8.4
Six months ended 30 September 2006	32.8	8.1	16.0
Six months ended 31 March 2006	24.1	6.9	14.1

Note 25. Contingent liabilities

Litigation

Contingent liabilities exist in respect of actual and potential claims and proceedings. An assessment of the Group's likely loss has been made on a case-by-case basis and a provision has been made where appropriate within the credit litigation provision.

Bell Group

Westpac is one of 20 defendant banks named in proceedings concerning the Bell Group of companies. The proceedings have been brought by the liquidators of several Bell Group companies and seek to challenge the defendant banks' entitlement to receive the proceeds of realisation of Bell Group assets in the early 1990s. The proceedings are complex and the trial concluded recently and we are awaiting judgment. It is not possible to estimate the potential impact, however, we believe that we have good prospects of success.

New Zealand Inland Revenue Department

The New Zealand Inland Revenue Department (NZIRD) is reviewing a number of structured finance transactions undertaken in New Zealand and has issued reassessments in respect of nine transactions, three undertaken in the 1999 tax year, two undertaken in the 2000 tax year, two undertaken in the 2001 tax year and two undertaken in the 2002 tax year. The maximum potential tax liability reassessed for the 1999 year is NZ\$18 million (A\$16 million) (NZ\$25 million (A\$22 million) with interest), for the 2000 year is NZ\$61 million (A\$54 million) (NZ\$85 million (A\$75 million) with interest), for the 2001 year is NZ\$90 million (A\$80 million) (NZ\$127 million (A\$112 million) with interest) and for the 2002 year is NZ\$110 million (A\$97 million) (NZ\$155 million (A\$137 million) with interest).

The NZIRD is also investigating other transactions undertaken by the New Zealand Branch (NZ Branch), which have materially similar features to those for which assessments have been received. Should the NZIRD take the same position across all of these transactions, for the periods up to and including 31 March 2007, the overall primary tax in dispute will be approximately NZ\$599 million (A\$530 million) (this includes the amounts noted above). With interest this increases to approximately NZ\$798 million (A\$698 million) (calculated to 31 March 2007).

Proceedings disputing the reassessments with respect to the 1999, 2000 and 2001 tax years have been commenced. Westpac is confident that the tax treatment applied in all cases is correct. A ruling was sought from the NZIRD on an initial transaction in 1999 which, following extensive review by the NZIRD, was confirmed in early 2001. The principles underlying that ruling are applicable to, and have been followed in, all subsequent transactions.

New Zealand Commerce Commission

The New Zealand Commerce Commission issued proceedings on 9 November 2006 against the NZ Branch, Westpac New Zealand Limited and The Warehouse Financial Services Limited (members of Westpac's New Zealand Division (NZ Banking Group)), Visa International, Cards NZ Limited, MasterCard International and all New Zealand issuers of Visa and MasterCard credit cards alleging that the setting of interchange rates and rules (relating to honour all cards, no surcharge, access and no discrimination) amount to price fixing or alternatively have the effect of substantially lessening competition in the New Zealand market in breach of the Commerce Act 1986. The proceedings seek to declare the conduct illegal and impose unspecified monetary penalties. In addition, on 29 November 2006, a number of New Zealand retailers issued similar proceedings to the Commerce Commission (as described above) against the NZ Branch, Westpac New Zealand Limited, The Warehouse Financial Services Limited, Visa International, Cards NZ Limited, MasterCard International and New Zealand issuers of Visa and MasterCard credit cards. These proceedings also seek to declare the conduct illegal and an enquiry into damages. Any damages awarded, if any, would be in addition to any penalties imposed under the Commerce Act 1986 in the event the Commerce Commission is successful in the proceedings described above. The NZ Branch and NZ Banking Group are considering their position in relation to both proceedings. As at the date of this Profit Announcement, no provision has been made in the financial statements in relation to these proceedings.

Liquidity support

Westpac is a participant to the Interbank Deposit Agreement along with three other Australian banks. In accordance with the Interbank Deposit Agreement, a deposit notice may be served upon the other participants by a bank which is experiencing liquidity problems. The other participants are then required to

deposit equal amounts of up to \$2 billion each for a period of 30 days. At the end of 30 days the deposit holder has the option to repay the deposit in cash or by way of assignment of mortgages to the value of the deposit.

Note 26. Events subsequent to balance date

As announced to the market on 16th April 2007, Westpac issued A\$1 billion unsecured, unsubordinated, redeemable convertible notes with an issue price of A\$100,000 per note on 19th April 2007.

5.6 STATEMENT IN RELATION TO THE REVIEW OF THE FINANCIAL STATEMENTS

The preceding financial information contained in section 5 “2007 interim financial information” is based on our Interim Financial Report:

- Section 5.1 Consolidated income statement;
- Section 5.2 Consolidated balance sheet;
- Section 5.3 Consolidated cash flow statement;
- Section 5.4 Consolidated statement of recognised income and expense; and
- The following notes included in section 5.5 “Notes to 2007 interim financial information”:
 - Note 1. Basis of preparation of interim financial information;
 - Note 9. Dividends;
 - Note 10. Earnings per ordinary share;
 - Note 21. Cash flow statement;
 - Note 23. Consolidated statement of changes in shareholders’ equity;
 - Note 24. Reconciliation of US generally accepted accounting principles;
 - Note 25. Contingent liabilities; and
 - Note 26. Events subsequent to balance date.

6.2 DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

This profit announcement contains statements that constitute 'forward-looking statements' within the meaning of section 21E of the US Securities Exchange Act of 1934. The US Private Securities Litigation Reform Act of 1995 provides a 'safe harbor' for forward-looking information to encourage companies to provide prospective information about themselves without fear of litigation so long as the information is identified as forward-looking and is accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those projected in the information.

Forward-looking statements appear in a number of places in this profit announcement and include statements regarding our intent, belief or current expectations with respect to our business and operations, market conditions and results of operations and financial condition, including, without limitation, future loan loss provisions and financial support to certain borrowers. We use words such as 'may', 'expect', 'intend', 'plan', 'estimate', 'anticipate', 'believe', 'probability', 'risk', or other similar words to identify forward-looking statements. These statements reflect our current views with respect to future events and are subject to certain risks, uncertainties and assumptions. Should one or more of the risks or uncertainties materialise, or should underlying assumptions prove incorrect, actual results may vary materially from the plans, objectives, expectations, estimates and intentions described in this Report as anticipated, believed, estimated, expected or intended.

The factors that may impact on forward-looking statements made by us include:

- Inflation, interest rate, exchange rate, market and monetary fluctuations;
- The effect of, and changes in, laws, regulations, taxation or accounting standards or practices and government policy;
- Changes in consumer spending, saving and borrowing habits in Australia, New Zealand and in other countries in which we conduct our operations;
- The effects of competition in the geographic and business areas in which we conduct operations;
- The ability to maintain or to increase market share and control expenses;
- The timely development of and acceptance of new products and services and the perceived overall value of these products and services by users;
- Technological changes;
- Demographic changes and changes in political, social and economic conditions in any of the major markets in which we operate; and
- Various other factors beyond our control.

The above list is not exhaustive. For certain other factors that may impact on forward-looking statements made by us, refer to the section on 'Risk factors' in our 2006 Annual Financial Report. When relying on forward-looking statements to make decisions with respect to us, investors and others should carefully consider the foregoing factors and other uncertainties and events.

We are under no obligation, and do not intend, to update any forward-looking statements contained in this profit announcement, whether as a result of new information, future events or otherwise, after the date of this profit announcement.

6.3 SHAREHOLDER CALENDAR

Westpac shares are listed on the Stock Exchanges in Australia, New Zealand, New York and Tokyo.

Important dates for shareholders to note over the following months are:

7.2 NEW ZEALAND BUSINESS UNIT PERFORMANCE (A\$ EQUIVALENTS TO SECTION 4.4)

New Zealand operations provide banking and wealth management products and services to New Zealand consumer and business customers. The New Zealand wealth business includes New Zealand Life Company and BTFG New Zealand. The results do not include the earnings of our New Zealand Institutional Bank. Results for the period ending 31 March 2007 have been converted into Australian dollars (A\$) at the actual average exchange rate for the period (1.1367). For the periods ending 30 September 2006 and 31 March 2006, the New Zealand results have been converted at the average hedge rate for the period (1.0959). This rate is not the same as the average rate (1.1959 for the six months to 30 September 2006 and 1.0917 for the six months to 31 March 2006).

Notes

Accounting Reclassifications

(1) *Policyholder tax recoveries*

The Life Insurance standard AASB 1038 requires the grossing up of tax expense and income for the tax on earnings applicable to holders of our life policies (policyholder tax recoveries). We reverse the impact of this gross up to provide comparability across reporting periods.

(2) *Hybrid revaluations*

(a) TPS 2003 hybrid revaluation

Westpac has adjusted cash earnings for the impacts of the revaluation of a derivative hedging our US\$750 million 2003 Trust Preferred Securities (TPS 2003) hybrid instrument. We have entered into an Interest rate swap as part of the structure which is measured at fair value, with changes in the fair value reported in non interest income. The underlying hybrid instrument is classified as equity under AASB 132 and measured at historic cost. The after tax amount of this revaluation is added back to derive cash earnings as it does not affect cash flows available to ordinary shareholders. We reverse the impact of these amounts in income and the cash earnings adjustment to provide comparability between reporting periods. In addition, we reverse the impacts of any mismatches in accounting treatment arising out of other economic hedges associated with the structure.

(3) *Treasury shares*

Under A-IFRS, shares in Westpac Banking Corporation held by the Group, including securities held in statutory life funds and consolidated managed investment vehicles, are reclassified as treasury shares and accounted for as a deduction from share capital. Any changes in the value of treasury shares held are recognised in equity at the time of disposal and dividends are not recognised as income or distributions. Recognition of income related to treasury shares is prohibited under A-IFRS. We reverse these amounts from income and cash earnings to provide comparability between reporting periods.

(4) *Unrealised NZ Retail Earnings Hedges*

Effective from 1 October 2006, fair value gains/losses on outstanding hedges on New Zealand retail earnings are added back in deriving cash earnings as they create a material timing difference on reported earnings but do not affect profits available for shareholders.

(5) *Significant items*

We also adjust cash earnings for significant items. These items have been detailed in this announcement as individually significant due to their size and non-recurring nature. In the six months ended 30 September 2006, this involved adjustments for the sale of the sub-custody business and deferred tax asset write-off.

9. ECONOMIC PROFIT

Interim Profit Announcement 2007

Economic profit is defined as cash earnings less a capital charge calculated at 10.5% of average ordinary equity plus 70% of the estimated value of franking credits paid to shareholders. Business unit economic profit is defined as cash earnings less a capital charge calculated at 10.5% on allocated capital plus 70% of the value of Australian tax paid. The measure of capital, the cost of capital and the franking benefit calculation differs between the Group and that used by business units. As a result the sum of business units' economic profit will not equal the Group's economic profit.

Economic profit is used as a key measure of our financial performance because it focuses on shareholder value by requiring a return in excess of a risk-adjusted cost of capital.

EARNINGS

Cash earnings	Net profit attributable to equity holders adjusted for the impact of the economic hedges related to TPS 2003, significant items that are one-off in nature, the impact of earnings from Treasury shares and the impact of unrealised New Zealand earnings hedges gains/losses.
----------------------	--

SHAREHOLDER VALUE

Earnings per ordinary share	Net profit attributable to equity holders divided by the weighted average ordinary shares (statutory basis).
Cash earnings per ordinary share	Cash earnings divided by the weighted average ordinary shares (cash earnings basis).
Weighted average ordinary shares (cash earnings)	Weighted average number of fully paid ordinary shares listed on the ASX for the relevant period.
Weighted average ordinary shares (statutory)	Weighted average number of fully paid ordinary shares listed on the ASX for the relevant period less Westpac shares held by the Group ('Treasury shares').
Fully franked dividends per ordinary share (cents)	Dividends paid out of retained profits which carries a credit for Australian company income tax paid by Westpac.
Dividend payout ratio - net profit	Ordinary dividend per share divided by net profit per share attributable to the equity holders of WBC.
Dividend payout ratio - cash earnings	Ordinary dividend per share divided by cash earnings per share.
Return on equity (ROE)	Net profit attributable to equity holders divided by average ordinary equity.
Cash ROE	Cash earnings divided by average ordinary equity.
Economic profit - Group	Cash earnings less a capital charge calculated at 10.5% of average ordinary equity plus 70% of the estimated value of franking credits paid to shareholders.
Economic profit - Business Units	Cash earnings less a capital charge calculated at 10.5% of allocated capital plus 70% of the value of Australian tax paid.
Average ordinary equity	Average total equity less average outside equity interests and average hybrid equity.

PRODUCTIVITY AND EFFICIENCY

Operating expenses	Operating expenses do not include impairment losses on loans.
Expense to income ratio	Operating expenses divided by net operating income.
Total banking group expense to income ratio	Total banking operating expenses divided by total banking operating revenue. Total banking business includes Business and Consumer Banking, Institutional Bank, New Zealand banking operations, Pacific Bank and the Group Business Unit.
Full-time equivalent employees (FTE)	A calculation based on the number of hours worked by full and part-time employees as part of their normal duties. For example, the full-time equivalent of one FTE is 76 hours paid work per fortnight.

BUSINESS PERFORMANCE

Net interest spread	The difference between the average yield on all interest bearing assets and the average rate paid on interest bearing liabilities.
Net interest margin	The net interest spread plus the benefit of net non-interest bearing liabilities and equity.
Average interest earning assets	The average balance of assets held by the Group that generate interest income. Where possible, daily balances are used to calculate the average balance for the period.
Average interest bearing liabilities	The average balance of liabilities owed by the Group that incur an interest expense. Where possible, daily balances are used to calculate the average balance for the period.
Business Unit Margin	Net interest income (excluding capital benefit) for a business unit as a percentage of the average interest earning assets for that business unit.

CAPITAL ADEQUACY

Total capital ratio	Tier 1 capital ratio plus Tier 2 capital ratio less deductions.
Tier 1 capital ratio	Total Tier 1 capital as defined by APRA divided by risk weighted assets.
Adjusted Common Equity (ACE) ratio	ACE is equal to shareholders' funds less hybrid equity, intangible assets, investments in insurance, funds management and securitisation entities and any other Tier 1 deductions. This is divided by risk adjusted assets.
Risk Weighted Assets (RWA)	Assets (both on and off-balance sheet) of the Bank are assigned within a certain category, amounts included in these categories are multiplied by a risk weighting, and with the resulting weighted values added together to arrive at total risk weighted assets ¹ .

¹ Australian banks are required to maintain a minimum ratio of capital to risk weighted assets of 8%. In determining risk weighted assets, assets (including off-balance sheet exposures) are weighted according to notional credit risk as specified by the local regulator. Classes of asset are assigned a risk weighting according to the amount of capital required to support that asset. An additional risk weighting is determined for market risk.

ASSET QUALITY

Individually assessed provisions

Provisions raised for losses that have already been incurred on loans that are known to be impaired and are individually significant. The estimated losses on these impaired loans will be based on expected future cash flows discounted to their present value and as this discount unwinds, interest will be recognised in the statement of financial performance.

Collectively assessed provisions

Loans not found to be individually impaired or significant will be collectively assessed in pools of similar assets with similar risk characteristics. The size of the provision is an estimate of the losses already incurred and will be estimated on the basis of historical loss experience for assets with credit characteristics similar to those in the collective pool. The historical loss experience will be adjusted based on current observable data.

Impaired assets

Impaired assets, as defined by APRA can be classified into the following categories:

Non-accrual assets: Loans with individually assessed impairment provisions held against them, excluding restructured loans.

Restructured assets: Assets where the original contractual terms have been formally modified to provide concessions of interest or principal for reasons related to the financial difficulties of the customer.

90 days past due: Consumer exposures where contractual payments are 90 days or more in arrears and not well secured.

90 days past due – well secured

A loan facility where payments of interest or principal are 90 or more days past due and the value of the security is sufficient to cover the repayment of all principal and interest amounts due, and an additional six months interest.

OTHER

Customer satisfaction

Refers to the proportion of people for whom Westpac is their main financial institution who rate their overall relationship with Westpac as Very or Fairly Satisfied.

Employee morale

Refers to an index (between 0 and 10) rating employee satisfaction across Westpac. The closer the number is to ten, the greater the number of positive responses from surveyed participants.

AASB 132 and AASB 139

AASB 132 *Financial Instruments: Disclosure and Presentation* and AASB 139 *Financial Instruments: Recognition and Measurement*. These standards are only applicable to Westpac's results from 1 October 2005.

References are made in the profit announcement for the impacts for AASB 132/139 on Westpac's results for 2006. Where such references are made, the impact also includes certain standards relating to insurance contracts, which were also only applicable to Westpac's results from 1 October 2005. These standards include AASB 4: *Insurance Contracts*, AASB 1023: *General Insurance Contracts* and AASB 1038: *Life Insurance Contracts*.

Accounting reclassifications

Adjustments made for accounting treatments that have the effect of grossing up the income statement (primarily between income and tax expense/profits attributable to outside equity interest). Key reclassifications include gross ups for policyholder tax recoveries and the impact of Treasury shares. These adjustments have no impact on cash earnings.
