(a) Basis of preparation

The financial statements have been prepared in accordance with generally accepted accounting practice in New Zealand and the requirements of the Companies Act 1993 and the Financial Reporting Act 1993. The financial statements have been prepared on a historical cost basis.

The financial statements are presented in New Zealand dollars and all values are rounded to the nearest thousand dollars (\$000) unless otherwise stated.

(b) Statement of Compliance

The financial statements have been prepared in accordance with New Zealand Generally Accepted Accounting Practice. They comply with New Zealand equivalents to International Financial Reporting Standards, and other applicable financial reporting standards, as appropriate for profit-oriented entities. The financial statements comply with International Financial Reporting Standards (IFRS).

(c) New accounting standards and interpretations

Standards and Interpretations that have recently been issued or amended but are not yet effective have not been adopted by the Group for the annual reporting period ending 31 March 2012. These are outlined in the table below.

| Reference | Title | Summary of requirements | Effective date – periods beginning on or after | Impact on Group financial report | Application date for Group* |
|---|---|---|--|---|-----------------------------|
| NZ IFRS 9 | Financial Instruments: Classification and Measurement | Requires all financial assets to be: (a) Classified on the basis of the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial asset. (b) Initially measured at fair value plus, in the case of a financial asset not at fair value through profit or loss, particular transaction costs (c) Subsequently measured at amortised cost or fair value. | 1 January 2013 | Application of a consistent approach to classifying financial assets, and the use of one impairment method. | 1 April 2013 |
| Amendments to NZ IAS 12 | Income Taxes | The amendment introduces an exception to current measurement principles based on the manner the manner of recovery in paragraph 52 of NZ IAS 12 for investment property measured using the fair value model in accordance with NZ IAS 40 Investment Property. | 1 January 2012 | Application of measurement principles based on the manner of recovery of the value of an investment property. | 1 April 2012 |
| Amendments to NZ IFRS 7 | Financial Instruments: Disclosures – Transfer of Financial Assets | The amendments require additional disclosures about transfer of financial assets to enable users of financial statements, <ul style="list-style-type: none"> to understand the relationship between transferred financial assets that are not derecognised in their entirety and the associated liabilities; and to evaluate the nature of and the risks associated with, the entity's continuing involvement in derecognised financial assets | 1 July 2011 | Additional disclosures about the transfer of financial assets to be made. | 1 April 2012 |
| Improvements to NZ IFRS 2010 – NZ IAS 1 | Presentation of Financial Statements | The amendments clarify the presentation of changes in equity arising from transactions recognised in other comprehensive income. | 1 January 2011 | Changes in equity arising from transactions recognised in other comprehensive income may be presented either in the statement of changes in equity or in the notes. | 1 April 2011 |

(d) Basis of consolidation

The consolidated financial statements (the group) of DSQ Holdings Limited comprise the financial statements and its subsidiaries (as outlined in note 5) as at 31 March each year.

Subsidiaries are all those entities over which the Group has the power to govern the financial and operating

policies so as to obtain benefits from their activities.

The financial statements of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies.

In preparing the consolidated financial statements, all intercompany balances and transactions, income and expenses and profit and losses resulting from intra-group transactions have been eliminated in full.

Subsidiaries are fully consolidated from the date on which control is obtained by the Group.

Investments in subsidiaries held by DSQ Holdings Limited are accounted for at cost in the separate financial statements of the parent entity.

(e) Segment reporting - refer note 5

A business segment is a distinguishable component of the entity that is engaged in providing products or services that are subject to risks and returns that are different to those of other operating business segments. A geographical segment is a distinguishable component of the entity that is engaged in providing products or services within a particular economic environment and is subject to risks and returns that are different than those of segments operating in other economic environments.

(f) Foreign currency translation

(i) Functional and presentation currency

Both the functional and presentation currency of DSQ Holdings Limited is New Zealand dollars (\$). The subsidiaries' functional currency is the local currency which is translated to presentation currency (see below).

(ii) Transactions & balances

| Subsidiary | Local Currency | Presentation Currency |
|------------------------------------|----------------------------|--------------------------|
| Datasquirt (Australia) Pty Limited | Australian dollars (\$) | New Zealand dollars (\$) |
| Datasquirt UK Limited | British pounds (£) | New Zealand dollars (\$) |
| Datasquirt LLC | United States dollars (\$) | New Zealand dollars (\$) |
| Datasquirt AG | Euro (€) | New Zealand dollars (\$) |

Transactions in foreign currencies are initially recorded in the functional currency by applying the exchange rates ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the reporting date.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction.

(iii) Translation of Group Companies functional currency to presentation currency

The results of the subsidiaries are translated into New Zealand dollars as at the date of each transaction. Assets and liabilities are translated at exchange rates prevailing at reporting date. Exchange variations resulting from the translation are recognised in the foreign currency translation reserve in equity.

(g) Cash and cash equivalents - refer note 11

Cash and cash equivalents in the balance sheet comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

For the purposes of the Cash Flow Statement, cash and cash equivalents consist of cash and cash equivalents as defined above.

(h) Trade and other receivables - refer note 12

Trade receivables, which generally have 30-90 day terms, are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less an allowance for impairment.

Collectability of trade receivables is reviewed on an ongoing basis at an operating unit level. Individual debts that are known to be uncollectible are written off when identified. An impairment provision is recognised when there is objective evidence that the Company will not be able to collect the receivable. Financial difficulties of the debtor, default payments or debts more than 90 days overdue are considered objective evidence of impairment.

(i) Property, plant and equipment - refer note 14

Plant and equipment is stated at historical cost less accumulated depreciation and any accumulated impairment losses. Such costs include the cost of replacing parts that are eligible for capitalisation when the cost of replacing the parts is incurred. The cost is recognised in the carrying amount of the plant and equipment as a replacement only if it is eligible for capitalisation. All other repairs and maintenance are recognised in statement of comprehensive income as incurred.

Depreciation is calculated on a diminishing value basis over the estimated useful life of the specific assets:

Computer equipment - over 3 to 5 years
Furniture and fittings - over 5 to 10 years
Phones – over 2 to 5 years

The assets' residual values, useful lives and amortisation methods are reviewed, and adjusted if appropriate, at each financial year end.

Derecognition

An item of property, plant and equipment is derecognised upon disposal or when no further future economic benefits are expected from its use.

(j) Leases - refer note 24

The determination of whether an arrangement is or contains a lease is based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

Operating lease payments are recognised as an expense in the income statement on a straight-line basis over the lease term.

(k) Intangibles - refer note 15

Intangibles are initially measured at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. Intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment. See note 15.

Internally generated intangible assets are not capitalised and expenditure is recognised in profit or loss in the year in which the expenditure is incurred.

Research and development costs

Research costs are expensed as incurred.

(l) Trade and other payables - refer note 16

Trade and other payables are carried at amortised cost and due to their short term nature they are not discounted. They represent liabilities for goods and services provided to the Company prior to the end of the financial year that are unpaid and arise when the Company becomes obliged to make future payments in respect of the purchase of these goods and services. The amounts are unsecured and are usually paid within 30 days of recognition.

(m) Provisions and employee benefits - refer note 17

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the reporting date.

Employee leave benefits

Wages, salaries, annual leave and sick leave

Liabilities for wages and salaries, including non-monetary benefits, annual leave and accumulating sick leave expected to be settled within 12 months of the reporting date are recognised in respect of employees' services up to the reporting date. They are measured at the amounts expected to be paid when the liabilities are settled. Expenses for non-accumulating sick leave are recognised when the leave is taken and are measured at the rates paid or payable.

(n) Share-based payment transactions - refer note 23

Equity settled transactions

The Group provides benefits to its employees (including key management personnel) in the form of share-based payments, whereby employees render services in exchange for shares or rights over shares (equity-settled transactions).

The cost of these equity-settled transactions with employees is measured by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by an external valuer using the Black Scholes option pricing model, further details of which are given in note 23.

In valuing equity-settled transactions, no account is taken of any vesting conditions, other than conditions linked to the price of the shares of DSQ Holdings Limited if applicable.

The cost of equity-settled transactions is recognised, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled (the vesting period), ending on the date on which the relevant employees become fully entitled to the award (the vesting date).

At each subsequent reporting date until vesting, the cumulative charge to the income statement is the product of:

- i. the grant date fair value of the award;
- ii. the current best estimate of the number of awards that will vest, taking into account such factors as the likelihood of employee turnover during the vesting period and the likelihood of non-market performance conditions being met; and
- iii. the expired portion of the vesting period.

The charge to the income statement for the period is the cumulative amount as calculated above less the amounts already charged in previous periods. There is a corresponding entry to equity.

Until an award has vested, any amounts recorded are contingent and will be adjusted if more or fewer awards vest than were originally anticipated to do so. Any award subject to a market condition is considered to vest irrespective of whether or not that market condition is fulfilled, provided that all other conditions are satisfied.

If the terms of an equity-settled award are modified, as a minimum an expense is recognised as if the terms had not been modified. An additional expense is recognised for any modification that increases the total fair value of the share-based payment arrangement, or is otherwise beneficial to the employee, as measured at the date of modification.

If an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognised for the award is recognised immediately. However, if a new award is substituted for the cancelled award and designated as a replacement award on the date that it is granted, the cancelled and new award are treated as if they were a modification of the original award, as described in the previous paragraph.

The dilutive effect, if any, of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share (see note 10).

(o) Revenue recognition - refer note 6

Revenue is recognised and measured at the fair value of the consideration received or receivable to the extent it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised:

(i) Rendering of services

Contract income, which includes license fees, hosting fees and transaction fees, is recognised in the income statement in the accounting period in which the service is rendered, by reference to completion of the specific transaction assessed on the basis of the actual service provided.

When the contract outcome cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

(ii) Interest revenue

Interest income is accrued on a time basis, by reference to the principal outstanding and at the interest rate applicable.

(iii) Licence Fees and Royalties

Fees and royalties paid for the use of an entity's assets, such as software, are recognised in accordance with the substance of the agreement. An assignment of rights for a non-refundable fee under a non-cancellable contract which permits the licensee to exploit those rights freely and where DSQ Holdings Limited has no obligations subsequent to delivery of software under the licensing agreement, is recognised as a sale.

(p) Income tax and other taxes - refer note 8

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the current period's taxable income. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date.

On the basis that deferred income tax assets are recognised to the extent that it is probable that taxable profit will be available against which the carry-forward of unused tax credits and unused tax losses can be utilised, DSQ Holdings Limited has taken the conservative position that there is not sufficient certainty to justify the recognition of a deferred income tax asset at this time.

Temporary differences are not material, and have not been recognised as a deferred tax asset.

Other taxes

Revenues, expenses and assets are recognised net of the amount of GST except:

- i. when the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- ii. receivables and payables, which are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

Cash flows are included in the Cash Flow Statement on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority is classified as part of operating cash flows.

(q) Government grants

When the grant relates to an expense item, it is recognised as income over the periods necessary to match the grant on a systematic basis to the costs that it is intended to compensate. Grants are awarded on a 50% cost sharing basis between NZTE and The Group, and are only reimbursed on costs actually already incurred by the Group.

The grants recognised have no outstanding terms and conditions and are not credited directly to shareholders' equity.

(r) Earnings per share - refer note 10

Basic earnings per share is calculated as net profit attributable to members of the parent, divided by the weighted average number of ordinary shares.

Diluted earnings per share is calculated as net profit attributable to members of the parent, divided by the weighted number of ordinary shares and dilutive potential ordinary shares.

(s) Impairment of non-financial assets

Intangible assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

DSQ Holdings Limited conducts an annual internal review of asset values, which is used as a source of information to assess for any indicators of impairment. External factors, such as changes in expected future processes, technology and economic conditions, are also monitored to assess for indicators of impairment. If any indication of impairment exists, an estimate of the asset's recoverable amount is calculated.

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount.

(t) Contributed equity - refer note 18

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

3 Financial risk management objectives and policies

The Group's principal financial instruments comprise receivables, payables, and cash and short-term deposits.

The Group manages its exposure to key financial risks, including interest rate, liquidity risk and currency risk in accordance with the Group's financial risk management policy. The objective of the policy is to support the delivery of the Group's financial targets whilst protecting future financial security.

The Board reviews and agrees policies for managing each of the risks identified below, foreign currency and interest rate risk, credit allowances, and future cash flow forecast projections.

Risk exposures and responses

Interest rate risk

The Group's exposure to market interest rates relates primarily to the Group's cash deposited in interest-bearing call accounts. Interest rates are monitored although there is generally no significant variation in interest rates offered by the different major banks.

The local operational bank accounts do not earn interest.

At 31 March 2012, if interest rates had moved, as illustrated in the table below, with all other variables held constant, post tax profit and equity would have been affected as follows:

| Judgements of reasonably possible movements: | Post Tax Profit | | Equity | |
|--|-----------------|-------|----------------|-------|
| | Higher/(Lower) | | Higher/(Lower) | |
| | 2012 | 2011 | 2012 | 2011 |
| | \$000 | \$000 | \$000 | \$000 |
| Consolidated | | | | |
| +1% (100 basis points) | 7 | 13 | 7 | 13 |
| - 1% (100 basis points) | (7) | (13) | (7) | (13) |
| Parent | | | | |
| +1% (100 basis points) | 7 | 13 | 7 | 13 |
| - 1% (100 basis points) | (7) | (13) | (7) | (13) |

The sensitivity is lower in 2011 than in 2010 because of a decrease in the level of funds on deposit.

Credit risk

Credit risk arises from the financial assets of the Group, being trade and other receivables. The Group's exposure to credit risk arises from potential default of the counter party, with a maximum exposure equal to the carrying amount of these instruments. Exposure at balance date is addressed in each applicable note.

The Group does not hold any credit derivatives to offset its credit exposure.

The Group trades only with recognised, creditworthy third parties, and as such collateral is not requested nor is it the Group's policy to securitize its trade and other receivables.

It is the Group's policy that all customers who wish to trade on credit terms are subject to credit verification

procedures including an assessment of their independent credit rating, financial position, past experience and industry reputation. Risk limits are set for each individual customer in accordance with parameters set by the board. These risk limits are regularly monitored.

In addition, receivable balances are monitored on an ongoing basis with the result that the Group's exposure to bad debts is not significant.

The only significant concentration of credit risk within the Group exists in relation to cash and cash equivalents, the majority being held with two major trading banks.

Foreign currency risk

Each entity in the Group conducts the majority of its transactions in its functional currency.

The currency exposure of the Group arises from the effect of any substantial movements in currency rates on the transfer of funds (the large proportion being in Australian dollars) to the local currency of the subsidiary to fund operations.

The net exposure is not significant due to the size of the foreign operations, and is mitigated by the regular transfer of small advances to spread the currency risk over time. Although each subsidiary or geographic segment is subject to variations in foreign currency rates, each segment is not material. Refer to note 5 on segment reporting.

Liquidity risk

The Group manages liquidity risk by closely monitoring working capital commitments, primarily trade receivables and trade payables. All payables are payable within 30 days.

Financial assets

The Group classifies its investments in the following categories: financial assets at fair value through profit or loss, loans and receivables, and held to maturity investments. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at the initial recognition and re-evaluates this designation at every reporting date.

Income is recognised on an effective interest basis for debt instruments other than those financial assets designated as at fair value through the profit and loss.

Financial assets at fair value through profit and loss

Assets in this category are classified as current assets if they are expected to be realised within 12 months of the reporting date.

Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods or services directly to a debtor with no intention of selling the receivable. They are included in current assets, except for those with maturities greater than 12 months after the reporting date which are classified as non-current assets.

The Group's loans and receivables comprise receivables and cash and cash equivalents. Interest income is recognised by applying the effective interest rate.

Held to maturity investments

Held to maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group's management has the positive intention and ability to hold to maturity.

Other

Subsequent to initial recognition, other non-derivative financial instruments are measured at amortised cost using the effective interest method, less any impairment losses.

Financial assets measurement

Loans and receivables and held to maturity investments are carried at amortised cost using the effective interest method.

Realised and unrealised gains and losses arising from changes in the fair value of the 'financial assets at fair value through profit or loss' category are included in the profit or loss in the period in which they arise.

The Group assesses at each reporting date whether there is objective evidence that a financial asset or a group of financial assets is impaired.

4 Significant accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements and estimates on historical experience and on other various factors it believes to be reasonable under the circumstances, the results of which form the bases of the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions and conditions.

Recovery of deferred tax assets

Deferred tax assets, including those arising from unrecouped tax losses, capital losses and temporary differences, are recognised only where it is considered more likely than not that they will be recovered, which is dependent on the generation of sufficient future taxable profits.

Impairment of non-financial assets other than goodwill

The Group assesses impairment of all assets at each reporting date by evaluating conditions specific to the Group and to the particular asset that may lead to impairment. These include a subsidiary's financial performance, as well as the technology, economic and political environments and future market expectations. If an impairment trigger exists the recoverable amount of the asset is determined. Management have considered whether assets have in fact been impaired, and have determined that all assets are fully recoverable.

Share-based payment transactions

The Group measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by an external valuer using the Black Scholes model, with the assumptions detailed in note 23. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact expenses and equity.

5 Segment information

As the Group is focused on the development, distribution and sales of the core software product CONTACT along with associated services, there is effectively one business segment. The Group's risks and returns are affected predominantly by differences in the economic environment each subsidiary operates in, so the Group's primary segment reporting format is geographic segments.

The geographic segments are described in the table below:

| Legal Entity | Location | Geographic region |
|---|---------------|-------------------------------|
| DSQ Holdings Limited (<i>Head Office</i>) | New Zealand | New Zealand |
| Datasquirt (Australia) Pty Limited | Australia | Australia and South-East Asia |

10 Earnings per share

The following reflects the income used in the basic and diluted earnings per share computations:

| | Consolidated | |

| | 2012 \$000 | 2011 \$000 |
| (a) Earnings used in calculating earnings per share | | |
| <i>For basic earnings per share:</i> | | |

| Effect of dilution: | | |
| Share options | - | - |
| Weighted average number of ordinary shares (excluding reserved shares) adjusted for the effect of dilution | 32,032 | 28,829 |

There are no instruments (e.g. share options) excluded from the calculation of diluted earnings per share that could potentially dilute basic earnings per share in the future because they are antidilutive for either of the periods presented.

There have been no transactions involving ordinary shares or potential ordinary shares that would significantly change the number of ordinary shares or potential ordinary shares outstanding between the reporting date and the date of completion of these financial statements.

(c) Information on the classification of securities

(i) Options

Options granted to employees (including key management personnel) as described in note 23 are considered to be potential ordinary shares and have been included in the determination of diluted earnings per share to the extent they are dilutive. These options have not been included in the determination of basic earnings per share.

(a) Allowance for impairment loss

Trade receivables are non-interest bearing and are generally on 30-90 day terms. A provision for bad debts is recognised when there is objective evidence that an individual trade receivable is impaired.

Bad debts of \$nil (2011: nil) have been recognised by the Group and bad debts recovery of nil (2011: nil) by the Company in the current year. These amounts have been included in other operating expenses item.

Movements in the provision for impairment loss were as follows:

| | Consolidated | | Parent | |

(b) Related Party Receivables

For terms and conditions of related party receivables refer to note 21.

(c) Fair value and credit risk

Due to the short term nature of these receivables, their carrying value is assumed to approximate their fair value.

The maximum exposure to credit risk is the fair value of receivables. Collateral is not held as security, nor is it the Group's policy to transfer (on-sell) receivables to special purpose entities.

(d) Foreign exchange and interest risk

For further information on the management of foreign exchange and interest risk refer to Note 3.

As all European sales were being administered by our subsidiary Datasquirt UK Limited, the investment in the subsidiary Datasquirt AG has been fully written down.

(a) Description of the Group's intangible assets

(i) Software Licences

Software license costs are carried at cost less accumulated amortisation and accumulated impairment losses. This intangible asset has been assessed as having a finite life and is amortised using the diminishing value method over a period of 3 years. The amortisation has been recognised in the statement of comprehensive income in the line item depreciation and impairment. If an impairment indication arises, the recoverable amount is estimated and an impairment loss is recognised to the extent that the recoverable amount is lower than the carrying amount.

(ii) Patents and licences

Patents and licences are carried at cost less accumulated impairment losses or accumulated amortisation. These intangible assets have been determined to have finite useful lives. Patents and licences are subject to impairment testing on an annual basis or whenever there is an indication of impairment.

(a) Related party payables

For terms and conditions relating to related party payables refer to note 21.

(b) Fair value

Due to the short term nature of these payables, their carrying value is assumed to approximate their fair value.

(c) Foreign exchange and liquidity risk

For further information on the management of foreign exchange and liquidity risk refer to note 3.

(b) Option scheme

The Company has a share option scheme under which options to subscribe for the Company's shares have been granted to certain executives and senior employees (refer note 23).

(c) Capital management

DSQ Holdings Limited was an early stage technology company which listed on the Australian Securities Exchange in September 2007 for the express purpose of funding its international expansion program. The Board oversees the implementation of the global strategy, monitoring the capital available and how it is deployed to achieve the goals of the Group. DSQ Holdings Limited is currently a "cash box" and is investigating business opportunities.

Management has no immediate plans to issue further shares on the market.

The Group is not subject to any externally imposed capital requirements.

19 Retained earnings and reserves

Foreign currency translation reserve

The foreign currency translation reserve is used to record exchange differences arising from the translation of the financial statements of foreign subsidiaries.

Employee equity benefits reserve

The employee equity benefits reserve is used to record the value of share based payments provided to employees, including key management personnel, as part of their remuneration. Given the current share price is well below the option exercise prices, the Directors have concluded that the share options may not be exercised. Therefore the fair value of the employee equity benefits reserve has been determined to be nil. (2010: \$nil). Refer to note 23 for further details of these plans.

21 Related party disclosure

(a) Subsidiaries

The consolidated financial statements include the financial statements of DSQ Holdings Limited and the subsidiaries, as listed in the following table:

| Subsidiary name | Country of incorporation | Principal Activity | % of equity interest | | Investment (\$000) | |
|------------------------------------|--------------------------|--------------------|----------------------|------|--------------------|----------|
| | | | 2012 | 2011 | 2012 | 2011 |
| Datasquirt (Australia) Pty Limited | Australia | Software sales | 100 | 100 | - | - |
| Datasquirt UK Limited | United Kingdom | Software sales | 100 | 100 | - | - |

| Datasquirt AG | Germany | Software sales | 100 | 100 | - | - |
| | | | | | 3 | 3 |

Local minimum equity requirements determined that DSQ Holdings Limited made an investment in setting up the subsidiary Datasquirt AG in 2007. However, the European market is currently being serviced by the UK subsidiary. As a result of the impairment review of the investment in the subsidiary Datasquirt AG, and due to fact that no cash flow is currently generated from this subsidiary, the investment has been written down to a nil value (2010: nil)

(b) Ultimate parent

DSQ Holdings Limited is the ultimate New Zealand parent entity and the ultimate parent of the Group.

(c) Key management personnel

Details relating to key management personnel, including remuneration paid, are included in note 22.

(d) Transactions with related parties

The following table provides the total amount of transactions that were entered into with related parties for the relevant financial year (for information regarding outstanding balances on related party trade receivables and payables at year-end, refer to notes 12 and 16 respectively):

Terms and conditions of transactions with related parties:

(i) Shareholders and other related parties

Sales to and purchases from related parties are made in arms length transactions both at normal market prices and on normal commercial terms.

Outstanding balances at year-end are unsecured, interest free and settlement occurs in cash.

First Mobile was an entity with which DSQ Holdings Limited transacted and was owned by a Director of the Group.

(ii) Subsidiaries

The transactions between the parent, DSQ Holdings Limited, and its subsidiaries, are comprised of cash advances from the parent to the subsidiaries, purchases made on behalf of one entity by another and transfer pricing transactions. The transfer pricing transactions include a management fee charged by the parent to each subsidiary, interest charged on intercompany balances during the year, and market support payments made by the parent to the subsidiary.

23 Share-based payment plans

(a) Recognised share-based payment expenses

The expense recognised for employee services received during the year is shown in the table below:

| | Consolidated | | Parent | |
|--|---------------|---------------|---------------|---------------|
| | 2012 \$000 | 2011 \$000 | 2012 \$000 | 2011 \$000 |
| Expense arising from equity-settled share-based payment transactions | - | - | - | - |
| Total expense arising from share-based payment transactions | - | - | - | - |

The share-based payment plans are described below:

(b) Types of share-based payment plans

Employee Share Scheme (ESS)

The Company has established an Employee Share Scheme under which the Company may offer shares to key employees.

There are currently 687,732 fully paid shares held by the Employee Share Trust for the benefit of two senior executives.

As a condition of these options, the shares would vest immediately in the event of an IPO or trade sale. Therefore when DSQ Holdings listed in September 2007, these shares were vested. These shares were cancelled on 27th January 2012.

Employee Share Options (ESOP)

Share options may be granted to senior executives at the discretion of the Board, to align participants' interests with those of shareholders by increasing the value of the Company's shares. The exercise price of the options is set at the listing price of the shares, vesting over a three year period.

(c) Summary of options granted under the share based payment plans

No options granted have been forfeited or exercised during the year ended 31 March 2012 (2011: nil).

The outstanding balance of exercisable options as at 31 March 2012 is represented by:

- 4,725 options over ordinary shares with an exercise price of \$37.85 issued prior to the share split (equivalent shares post share split 440,197 with an exercise price of A\$0.41 held by the Employee Share Trust);
- 2,656 options over ordinary shares with an exercise price of \$56.48 issued prior to the share split (equivalent shares post share split 247,535 with an exercise price of A\$0.41 held by the Employee Share Trust);
- 100,000 options over ordinary with an exercise price of A\$0.90 each.

(d) Weighted average remaining contractual life

The weighted average remaining contractual life for the share options outstanding as at 31 March 2012 is 2 years (2011: 2).

(e) Weighted average fair value

The weighted average fair value of options granted during the year was nil (2011: nil).

(f) Option pricing model

Equity-settled transactions

The fair value of the equity-settled share options is estimated as at the date of grant using the Black Scholes Model taking into account the terms and conditions upon which the options were granted. The value of the option is a function of possible future prices of the underlying share, taking into account factors of volatility, time to maturity and current risk free interest rates.

It has also been recognised that the option, and not the underlying shares, are being valued, and the options are not transferable. Therefore a discount rate has been applied to reflect their lack of marketability.

The following table lists the inputs to the models used for the year ended 31 March 2009:

| | ESS 2009 | ESS 2009 | ESOP 2009 |
|---|---------------|---------------|---------------|
| <i>Number of options</i> | 4725 | 2656 | 100,000 |
| Dividend yield (%) | 0.00 | 0.00 | 0.00 |
| Expected volatility (%) | 55.00 | 55.00 | 55.00 |
| Risk-free interest rate (%) | 6.15 | 6.58 | 7.15 |
| Expected life of option (years) | 5 | 5 | 5 |
| Option exercise price (\$NZ) | 37.85 | 56.48 | - |
| Option exercise price (\$AU) | - | - | .90 |
| Weighted average share price at measurement date (\$NZ) | 15.43 | 23.27 | - |
| Weighted average share price at measurement date (\$AU) | - | - | .375 |
| Model used | Black Scholes | Black Scholes | Black Scholes |

As DSQ Holdings listed with ASX in September 2007 as Datasquirt Limited, and does not have a long term trading history, volatility has been determined by reference to other listed Australian technology companies over the comparable periods of the grant of the options.

Given the current share price is well below the option exercise prices, the Directors have concluded that the share options may not be exercised. Therefore the fair value of the employee equity benefits reserve has been determined to be nil. (2011: nil).

24 Commitments

(i) Leasing commitments

Lease commitments

The Group has no lease commitments. In 2011 the group had entered into a commercial lease on the premises for Datasquirt New Zealand. The annual rent is \$45,000 inclusive of car parks.

The Group utilises hosting services with an annual contracted value of nil (2011: nil).
