#### **About Goodman**

Goodman Group is a global industrial property specialist group with operations in key consumer markets across Australia, New Zealand, Asia, Europe, the United Kingdom, and the Americas. Goodman Group, comprised of the stapled entities Goodman Limited, Goodman Industrial Trust and Goodman Logistics (HK) Limited, is the largest property group on the Australian Securities Exchange (ASX: GMG), a top 20 entity by market capitalisation, and one of the largest listed specialist investment managers of industrial property globally.

Goodman provides essential infrastructure for the digital economy by owning, developing, and managing highquality sustainable properties that are close to consumers in key cities around the world. Our property portfolio includes logistics and distribution centres, warehouses, light industrial, multi-storey industrial, business parks and data centres. We take a long-term view, investing significantly alongside our capital partners in our investment management platform and concentrating our portfolio where we can create the most value for customers and investors.

28 September 2023

Dear Securityholder,

Goodman Group's success in FY23 is the result of our long-term vision and the consistent execution of our global strategy, which includes achievements across a range of ESG initiatives.

The enclosed documents provide you with an overview of the year, as well as an opportunity to join us either physically or virtually at our Annual General Meetings in November.

#### **FY23 Annual Report**

The enclosed Annual Report includes consolidated financial reports for Goodman Limited (being for the entire consolidated Goodman Group), Goodman Industrial Trust and Goodman Logistics (HK) Limited. It provides detailed information on our strong performance in FY23.

#### FY23 Sustainability Report

In our latest Sustainability Report we demonstrate:

- How we're building a resilient and sustainable business
- The holistic approach we take to sustainability with our performance linked to the long-term sustainability of our business
- The progress we're making against our ambitious and tangible ESG targets.

Our 2023 Sustainability Report is fully electronic and can be accessed at <a href="https://www.2023sustainabilityreport.goodman.com">www.2023sustainabilityreport.goodman.com</a>. Alternatively, you can also scan the QR code below which will take you directly to the report.

#### **Annual General Meetings**

The Annual General Meetings for the Goodman Group entities will be held at 10.00am on Tuesday, 14 November 2023 at the Times on the Park Room, Sheraton Grand Sydney Hyde Park, 161 Elizabeth Street, Sydney. The meeting will be a hybrid event giving you the option to attend in person or online. Details of how to participate can be found in the Notice of Meetings.

Thank you for your ongoing support.

Greg Goodman

**Group Chief Executive Officer** 

#### Here for good

A sustainable business is resilient, agile, flexible, and innovative. That's why, at Goodman, we're continuously optimising everything we do. Our properties are strategically located close to large consumer populations and designed for productivity and sustainability. We support our customers, our people, and our supply chain partners – who are all key to our long-term success. Goodman is financially stable and here to deliver sustainable returns for our investors. We contribute to our global cities as suppliers of essential infrastructure to the digital economy and support our local communities through the Goodman Foundation. At Goodman, we're here for good.

## FY23 PERFORMANCE HIGHLIGHTS

Goodman takes a holistic approach to sustainability across our value chain, with our financial and operational performance intrinsically linked to the long-term sustainability of our business for our customers, investors, people and communities.

FINANCIAL	OPERATIONAL	SUSTAINABILITY	
\$1.78BN OPERATING PROFIT <sup>1</sup>	\$81.0BN TOTAL ASSETS UNDER MANAGEMENT	SBTI SCIENCE-BASED TARGETS	Emissions reduction targets in place and validated by the SBTi <sup>7</sup>
\$94.30 OPERATING EARNINGS PER SHARE <sup>2</sup>	\$13.0BN  DEVELOPMENT WORK IN PROGRESS	306MW TOTAL SOLAR INSTALLATIONS & COMMITMENTS	Approximately 75% towards our 2025 400MW global solar PV target
\$1.56BN STATUTORY PROFIT®	99% occupancy <sup>6</sup>	AA MSCI ESG RATING	Achieved ESG rating of 'AA' from MSOI and a 'Negligible' risk rating from Sustainalytics
8.3% GEARING <sup>4</sup>	4.7% NPI GROWTH®	CARBON CARBON NEUTRAL OPERATIONS	On track to remain certified as a Carbon Neutral Organisation
\$17.6BN AVAILABLE LIQUIDITY <sup>5</sup>	\$0.8BN REVALUATION GAINS	\$10.8M CHARITY CONTRIBUTIONS	Contributions from the Goodman Foundation and Goodman team

- 1. Operating profit comprises profit attributable to Securityholders adjusted for property valuations, derivative and foreign currency mark to market and other non-cash or non-recurring items
- 2. Operating EPS is calculated using operating profit and weighted average diluted securities of 1,890.7 million which includes 12.1 million LTIP securities which have achieved the required performance hurdles and will vest in September 2023 and September 2024.
- 3. Statutory profit includes the Group's share of property valuations, derivative and foreign currency mark to market and other non-cash or non-recurring items.
- 4. Gearing is calculated as total interest bearing liabilities over total assets, both net of cash and the fair values of certain derivative financial instruments included in other financial assets of \$81.7 million (30 June 2022: \$133.3 million). Total interest bearing liabilities are grossed up for the fair values of certain derivative financial instruments included in other financial liabilities of \$34.2 million (30 June 2022: \$79.6 million).
- 5. Includes available liquidity across the Partnership platform, comprising equity commitments, cash and undrawn debt. Partnership investments are subject to Investment Committee approval
- 6. Partnership industrial and warehouse assets (excludes office properties which have been earmarked for redevelopment) and represents 95% of Partnership assets.
- 7. Science Based Targets initiative, https://sciencebasedtargets.org/.

Chairman, Stephen Johns

Goodman seeks to develop a resilient business that is Here for Good. The success of the Group in FY23 is the result of our long-term vision and the consistent execution of our global strategy which includes achievements across a range of Environmental, Social and Governance (ESG) initiatives.

Sustainability remains a critical component of our business strategy and goes beyond compliance – it is highly important for all our stakeholders. Our customers, capital partners and securityholders all have an expectation that our developments are designed to optimise energy and water use, generate their own renewable energy and, where possible, promote health and wellbeing. Likewise, our own people, both those who work for us today and employees we seek to attract in the future, share this expectation.

In addition to the strong financial performance, Goodman has made significant progress against our sustainability targets and remains focused on delivering on, or ahead of, our 2030 ESG targets. Throughout this report you will see a range of programs and initiatives that have been developed to make a tangible positive impact across all areas of Environmental, Social and Governance.

Goodman has made significant progress against our sustainability targets and remains focused on delivering on, or ahead of, our 2030 ESG targets.

This year's report covers key themes that continue to influence our business such as strategic resilience, asset quality, optimising operations, and connectivity to customers and investors. The Group takes a pragmatic approach and focuses on creating tangible solutions that are aligned to, and will contribute towards, our 2030 Sustainability Strategy.

Goodman's values of sustainability, innovation, integrity and determination are the guiding principles supporting our people and the execution of our strategy. We seek to build diverse teams with the appropriate mix of skills and gender that support the business requirements for who we are today and who we strive to be in the future. To assist in this, we have development and leadership programs to train and recruit for specialised skills, along with our Long Term Incentive Plan (LTIP) to incentivise our people and create alignment with the interests of Securityholders.

Goodman Alblasserdam Logistics Centre, Rotterdam, The Netherlands

#### Sustainability governance

To oversee the environmental aspect of the ESG function, in October 2022, the Board established a Sustainability and Innovation Committee which has been focused on initiatives and investments that support sustainable developments, including energy generation and storage solutions. It also assesses the impact and opportunities that emerging technologies such as artificial intelligence, are expected to have on Goodman, our customers, and more broadly, the way people will live, work and consume.

The social and governance areas are overseen by the Boards, Audit, Risk and Compliance Committee and the Remuneration and Nomination Committee.

Our sustainability-linked remuneration targets in the LTIP promote the integration of sustainability within the core business.

#### **Board appointments**

To meet the changing nature of our strategic drivers and match our geographic focus, we have continued to evolve and create a contemporary and diverse Board whose members bring together a broad global skill set. In line with the Board's diversity target of 40/40/20 for non-executive directors, Board appointments over the past 18 months have seen four out of five positions be filled by females and three out of five by Directors based outside of Australia, reflecting the global nature of Goodman's business.

Following the appointment of Hilary Spann and Vanessa Liu in 2022, both of whom are based in the US, during 2023 we have appointed three new Directors:

- + Belinda Robson, based in Australia, was appointed in March and brings over 30 years' experience in retail and commercial funds management
- + George Zoghbi, also based in Australia, was appointed in April. He is the CEO of Arnott's Group and brings extensive international consumer packaged goods and supply chain experience
- + Kitty Chung, based in Hong Kong SAR, was appointed in July and has over 35 years' audit and business advisory experience.

Phillip Pryke noted his intention to retire from the Goodman Board during his term at last year's Annual General Meeting and he has now confirmed he will step down in the first half of 2024. Since his appointment to the Board in 2010 he has served on various Board committees, including as Chair of the Remuneration Committee and more recently as a member of the Sustainability and Innovation Committee. On behalf of the Board, I would like to thank Phil for his significant contribution over the last 13 years. Australia, reflecting the global nature of Goodman's business.

ATL Logistics Centre, Hong Kong SAR, China.

#### Moving forward

As we move forward, we are determined to deliver on our 2030 Sustainability Strategy. Our objective is to create a lasting impact that not only improves our business but also leaves a positive and enduring legacy for our stakeholders and the broader communities where we operate.

Yours sincerely,

Stephen Johns Independent Chairman

Our objective is to create a lasting impact that not only improves our business but also leaves a positive and enduring legacy.

Group CEO, Greg Goodman

Guided by our 2030 Sustainability Strategy, ESG is integrated throughout Goodman as we continue building a resilient and sustainable business for the long-term. It's embedded in our values, investment strategy and key performance indicators for executive remuneration.

As a supplier of essential infrastructure to the digital economy – resilience is key. Resilience of our properties, our business and the communities we operate in means we can be here for the long term.

We acknowledge that as one of the world's largest owners, developers and managers of industrial property and data centres, with an \$81 billion portfolio and \$13 billion of developments underway, the way we operate has long-term impacts on the environment and communities. Especially given the close proximity of our properties to consumers as a result of our urban infill strategy.

Our strategy therefore includes practical measures to reduce this impact, and in FY23 we continued to take action across a range of ESG activities. We're making solid progress against our targets which you can read more about throughout this report.

As a supplier of essential infrastructure to the digital economy – resilience is key.

Goodman Joso, Greater Tokyo, Japan.

#### **Business resilience**

Despite the global macro-economic uncertainty, Goodman has focused on remaining resilient and the long-term structural drivers for our business remain sound. These are fuelled by the digital economy, the need for more productive and sustainable assets, and limited supply in our markets. This has contributed to the strong performance for the Group this year, and a positive outlook for the year ahead.

Goodman Logistics Center Fullerton, Los Angeles, US.

#### Climate resilience

Goodman is taking steps to improve our climate resilience by expanding our risk assessments program to cover New Zealand, Hong Kong SAR, Mainland China and Continental Europe – in addition to the work previously completed in Australia.

#### Sustainable properties

Axis Alexandria, Sydney, Australia.

Key to building resilience is developing sustainable properties. When we say sustainable properties, we are incorporating sustainable design features to optimise efficiency and minimise impact, throughout selection, property design, development, operation and redevelopment.

Our sites are selected to be close to consumers and key transport infrastructure, which can help reduce transport emissions for our customers' operations, and maximise value for our investors.

We then work to incorporate sustainable design features that prioritise efficiency, reduce carbon emissions, optimise energy and water, increase renewable electricity, and incorporate health and wellbeing features for our customers. These steps are moving us in the right direction to help minimise our impact, and create high-quality assets that are servicing our customers and the wider economy. Importantly our focus on infill locations means a significant proportion of our redevelopments occur on brownfield sites, reducing biodiversity impacts and generally increasing circularity.

#### Our focus on infill locations means a significant proportion of our redevelopments occur on brownfields sites.

Our commitment to sustainable properties extends to our stabilised portfolio, retrofitting with sustainability features. These investments not only make sense for the environment, but increase the long-term viability of the properties – making them more attractive to customers who have their own sustainability requirements and targets to meet.

Key highlights this year include reaching around 75% of our 2025 solar PV target, tracking our carbon emissions in line with our targets validated by the Science Based Targets initiative, and achieving key green building certifications around the world – including the first 6 Green Star Design ratings achieved for an industrial development in New Zealand.

Highbrook Business Park, Auckland, New Zealand.

#### Ambitious yet pragmatic

We have a pragmatic approach to achieving our ambitious targets. We're four years into our 2030 Sustainability Strategy, and we've made significant progress with more to come.

We continuously review our targets and update them where necessary. A key example of this was our community commitment through the Goodman Foundation. During the year, the Foundation contributed \$10 million in cash, plus another \$0.8 million in employee fundraising and in-kind contributions. This takes our total investment to \$42.4 million, close to reaching our 2030 target of \$50 million ahead of time. Given the growing need for community support since 2019, we will be increasing our 2030 target next year to \$100 million – more than doubling our investment in the communities where we operate.

Raise Foundation mentees at The Hayesbery, Sydney, Australia.

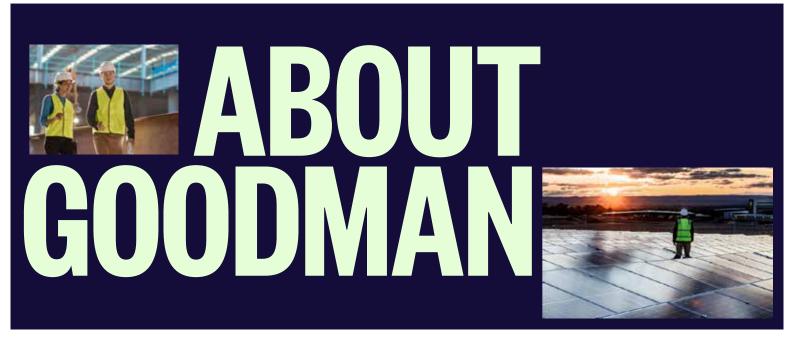

#### On the horizon

At Goodman we continually look for ways to optimise, innovate and create sustainable growth for our stakeholders. Our teams around the world stay on top of emerging issues and contribute to the future direction of the business. Right now, we're focusing on sourcing lower carbon materials, managing increasing power supply demand, increasing our use of renewable electricity and delivering assets that support human health and value natural capital. Mindful of incoming reporting standards, we're also working to align our disclosures with the changing requirements.

The challenging market environment is set to continue for the near term, however we have the strategy, capital and people in place to remain resilient. I'd like to thank our people, customers, investors, and all other stakeholders for their continued support and contribution.

Sincerely,

Greg Goodman
Group Chief Executive Officer

Goodman Group is a global industrial property specialist, founded in Australia by Greg Goodman over 30 years ago. We provide essential infrastructure for the digital economy that is adapting to digital innovation and Environmental, Social and Governance (ESG) developments. We do this by owning, developing and managing high-quality sustainable properties that are close to consumers in key cities around the world.

We have 432 properties located in key consumer markets in 14 countries across Asia Pacific, Continental Europe, the UK and the Americas. With \$81 billion of assets under management, we are the largest property group on the Australian Securities Exchange, a top 20 entity by market capitalisation, and one of the largest listed specialist investment managers of industrial property globally. We invest significantly alongside our capital partners in our investment Partnerships, and work to provide sustainable long-term returns for our investors.

Our property portfolio includes logistics and distribution centres, warehouses, light industrial, multi-level industrial, business parks and data centres. But we're not just about real estate. We're about making a difference. We're a passionate team who work together to create a better future for our customers, our people, and the communities we operate in. We believe in innovation, determination, integrity, and sustainability, and are continually looking where we can optimise, increase resilience and make space for greatness in everything we do.

ESG matters are integral to Goodman's long-term business strategy. We make investment decisions based on strategic long-term thinking and operate with clear sustainability goals.

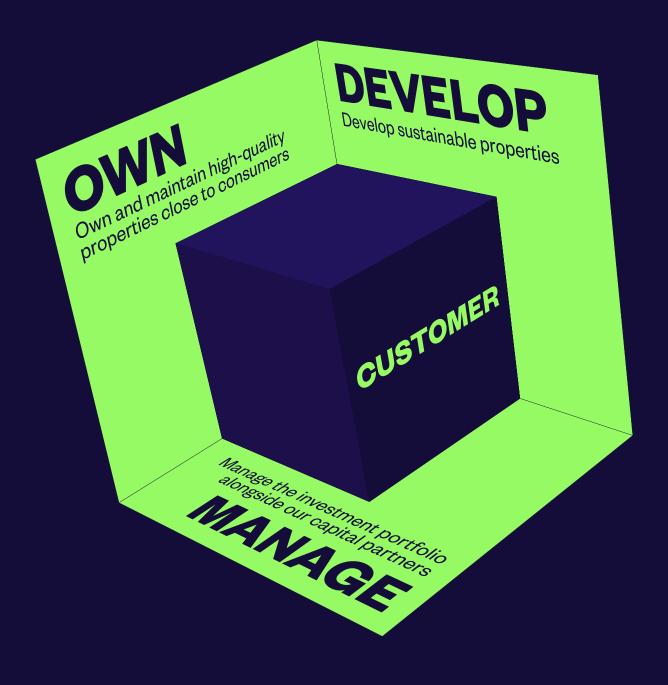

ASSETS UNDER MANAGEMENT	COUNTRIES	PEOPLE
\$81.0BN	14	~1,000

#### Our integrated business model

Goodman's Own Develop Manage model focuses our business on our customers' current and future needs.

We own and maintain high-quality properties close to consumers, we develop sustainable properties, and we manage our global investment portfolio to high standards. We work alongside our capital partners, which include sovereign wealth, pension and large multi-manager funds.

In each market, our dedicated local teams take care of all aspects of property, asset and investment management, enabling a high level of customer service.

## **OUR STRATEGY**

### Providing essential infrastructure for the digital economy

The way we live, work and consume is evolving. Urbanisation and population growth are changing our cities. There's a greater expectation that organisations act sustainably and prioritise health and wellbeing. Consumers are demanding faster delivery but they also want to know that the environmental and social factors are being considered. In addition, the need for data is growing exponentially.

Customer demand for our properties is driven by the growth of e-commerce, supply chain optimisation, and ongoing growth in data storage and processing requirements. Customers want faster speed to market along with greater resilience in their supply chain and efficient properties that help optimise their operations. We acknowledge our role in the global economy, which drives us to act responsibly to reduce our environmental impact and support the long-term viability of the communities we operate in, and our business.

#### Productivity, efficiency, sustainability

Within a highly competitive market, Goodman's long-term strategy is built on supporting our customers to operate in the most productive, efficient and sustainable way possible.

Our customers are looking to optimise their supply chain efficiency and this is impacting the design of our properties.

Our building specifications need to accommodate greater automation, resilience, efficiency and where possible – the ability to generate power. Goodman's approach to sustainable buildings takes into account a combination of these factors and more.

Oakdale Industrial Estate, Sydney, Australia.

#### Strategic locations

Goodman takes a long-term view. Our strategy is to own assets close to consumers in key global markets where barriers to entry are high, supply is limited, and demand is strong. We concentrate our portfolio where we can create the most value for customers and investors. This includes development in urban infill locations, regenerating brownfield sites where possible, optimising the use of existing transport and digital infrastructure, supporting our customers to meet rising consumer expectations, and helping to reduce transport costs and related carbon emissions. It can also make access to labour and commuting easier for our customers' workforce.

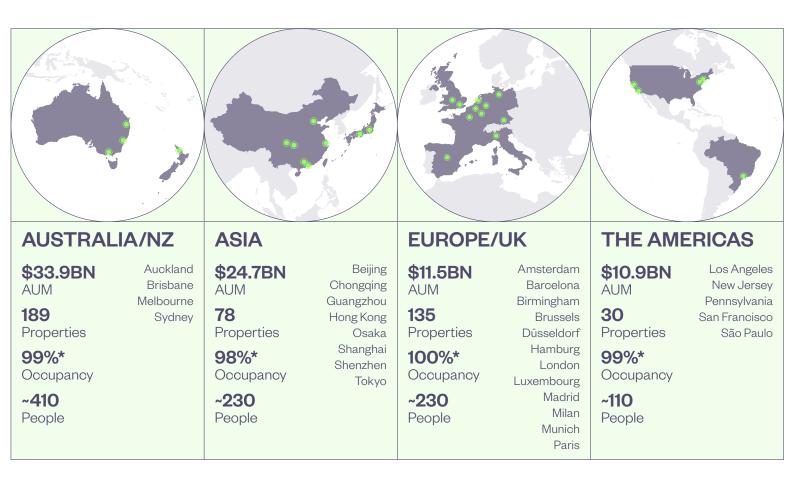

## WELL PLACED

#### Our global network

29 OFFICE LOCATIONS 432 PROPERTIES 99%

\$13.0BN

Our sustainably designed and well-managed properties are strategically located in major consumer markets around the world, to meet the business needs of our customers.

<sup>\*</sup>Partnership industrial and warehouse assets (excludes office properties which have been earmarked for redevelopment) and represents 95% of Partnership assets

## **OUR VALUES**

Goodman's values reflect who we are today and who we want to be long into the future.

#### Innovation

New ideas push our business forward. We focus on the future, proactively looking for new opportunities and improved solutions for our stakeholders that will make the world a better place for all of us.

#### Determination

Determination gets things done. We are motivated by excellence and work hard to achieve it, actively pursuing the very best outcomes for our stakeholders.

#### Integrity

We have integrity, always. We work inclusively and transparently, balancing the needs of our business and our people, with the needs of the community and those we do business with.

#### Sustainability

We're building our business for the long-term. That's why we consider the planet and the people on it in what we do. Our initiatives demonstrate our ongoing commitment to having a positive economic, environmental and social impact on the world.

## **OUR PURPOSE**

Goodman's purpose of making space for greatness recognises our stakeholders' needs and drives us to help them reach their full potential.

Here's how we make space for greatness for each of our stakeholders.

#### Customers

Our customers come from a wide range of industries including e-commerce, data centres, logistics, retail, consumer goods, automotive, food production, pharmaceutical, life sciences, healthcare and technology. Regardless of their sector, they need the right properties in the right locations. Proximity to their end consumer is key in order to increase speed to market, and reduce transport costs and related emissions. Our customers are increasingly taking a strategic approach to their infrastructure decisions. They're boosting their investment in our buildings to maximise both supply chain efficiency and overall capacity as the digital economy grows.

We include sustainable design features in our developments, and work with our customers to see how we can incorporate more to meet their current and future requirements.

Goodman Interlink, Hong Kong SAR, China.

#### Securityholders and investment partners

At Goodman, we invest in and manage the investment portfolio alongside our investment partners – some of the world's largest pension and sovereign wealth funds. We take a patient and long-term approach to managing capital and focus on growing a sustainable and resilient business over time.

This long-term approach guides our decision making. By owning, developing and managing high-quality sustainable properties in key locations, we provide both short-term and long-term benefits for our customers while simultaneously working to deliver sustainable returns for our Securityholders and investors.

#### Our people

Our team of around 1,000 people in 29 offices around the world are key to our long-term success. Skilled and diverse, our team members use their expertise across the range of locations and cultures we operate in to deliver strong results. There are many opportunities for our people to get involved, to learn and to build rewarding careers. Our sustainability strategy and actions help attract new talent and retain our people.

Goodman encourages innovation. We look for people who want to realise their ambitions, challenge our thinking, drive change and develop new ideas that deliver a sustainable business – making a tangible difference today and long into the future. Through Goodman's Long Term Incentive Program, our team have a stake in our business, which motivates them to have a positive impact and take a long-term strategic approach to decision making.

#### Supply chains

We acknowledge that providing a high-quality offering to our customers is a team effort, requiring relationships built on integrity. Our network of suppliers extends from our general contractors who we work with closely to build facilities for our customers, to the providers of our office supplies.

In each case, we respect the needs of our suppliers and practise good business ethics across our operations and global supply chains. This ranges from implementing strategies against modern slavery to treating our general contractors as part of our team, prioritising safety and paying them fairly and on time. In return, we expect our suppliers to abide by our high standards and communicate these requirements within their own supply chains.

#### **Our communities**

As a long-term owner of properties, Goodman understands the importance of contributing to the local community. We build long-term relationships, engaging and collaborating with landowners, cities and municipalities, charity partners, and the community at large, to provide developments that meet our customers' needs and benefit the wider community.

Our properties add value to local communities and the wider economy by generating jobs, creating infrastructure, and enabling people to have the goods they need. They are developed in line with the local planning authorities' ambitions to build sustainable and resilient communities. Our urban infill developments, often on brownfield sites, optimise scarce land resources and support regeneration and circularity efforts. Our projects can add social value too, and in some cases include cafes, fitness, and recreation facilities.

We add social value in other ways too – by working with local charities and community partners in all our markets to make a positive difference. Whether it's working with organisations on emergency response, community and community health, children and youth, or food rescue and the environment, the Goodman Foundation provides tangible assistance that translates to real support where it's needed most.

Highbrook Business Park, Auckland, New Zealand.

## HOW WE'RE STRUCTURED

Goodman works as one integrated team, executing our global strategy on a local level.

Our specialist property, development and investment management teams within countries work alongside our corporate services. By everyone focusing their skills we can provide a quality industrial property offering that best serves our customers and investors alike.

The Boards and Committees

Goodman Group is a triple stapled entity comprised of the Australian company, Goodman Limited (GL), the Australian trust, Goodman Industrial Trust (GIT), and the Hong Kong company, Goodman Logistics (HK) Limited (GLHK). The Boards of GL and Goodman Funds Management Limited, as the responsible entity of GIT, comprise the same Directors while GLHK has a distinct Board with some overlap. Together they are referred to as the Boards.

The Goodman Boards and management team are committed to the highest standards of governance and recognise that an effective corporate governance culture is critical to the long-term performance of the business.

Goodman's corporate governance framework underpins our commitment to maximise long-term sustainable value for Securityholders through:

- + Effective controls, risk management, transparency and corporate responsibility
- + Strategic planning and alignment of the interests of our people with those of Securityholders and other stakeholders
- + Being an organisation that acts ethically and in accordance with its corporate values.

In October 2022 the Boards established the Sustainability and Innovation Committee to focus on sustainability matters and the impact of emerging technologies. In addition, in March 2023, the Boards merged the Audit Committee and the Risk and Compliance Committee into the Audit, Risk and Compliance Committee, and the Remuneration Committee and Nomination Committee into the Remuneration and Nomination Committee.

## SUSTAINABILITY APPROACH

#### **Embedding ESG into our business**

Goodman's 2030 Sustainability Strategy guides our ESG targets and initiatives, designed to help us continue to build a truly sustainable business.

We regularly review our ESG targets so we can respond to global trends, emerging disclosure and reporting standards, and customer and investor expectations. Our priority is to shift our business to one that is low-carbon and resilient, while continuing to generate sustainable returns, strengthen our ethical and responsible practices, and deliver positive stakeholder outcomes.

We encourage our workforce of close to 1,000 people to work together as a global team to meet our ESG targets. Our sustainability-linked remuneration targets promote the integration of sustainability within our core business. Learnings are shared between regions, with a view to implementing promising new initiatives and pilots elsewhere in the business.

Rochedale Motorway Estate, Brisbane, Australia.

### The material issues that shape our sustainability strategy

Goodman's material issues help us prioritise what matters most, especially in the current economic landscape. We consider ESG issues to be material if they have the potential to impact our financial performance or reputation, or the expectations of our stakeholders.

The following eight material ESG priorities inform our 2030 Sustainability Strategy and targets:

- + Actively contributing to the net zero transition
- + Owning strategically located properties close to consumers in key global markets
- + Developing and adapting innovative, efficient, and flexible properties with a future focus
- + Demonstrating Goodman's values and promoting diversity, inclusiveness, and social equity
- + Investing responsibly with defined governance and sustainable capital structures
- + Promoting workplace safety and wellbeing
- + Delivering resilient assets that support human health and value natural capital
- + Influencing the sustainability practices of our value chain.

Each of these issues is critical to how Goodman's business, can make a positive impact in the world. We review them regularly, so they remain dynamic and current. This review is a constant process of evaluating emerging trends, seeking feedback from customers, investors, and investment Partners, and considering the economic context, both globally and by region.

Feedback received from a group of key Goodman investors in February 2023 indicated that they were broadly supportive of our material issues and disclosure approach. Other feedback received suggested we increase our use of metric-based targets, in addition to our qualitative ESG disclosures within the Taskforce on Climate-related Financial Disclosures (TCFD) program, as well as increase efforts to reduce embodied carbon.

 $High brook \, Business \, Park, \, Auckland, \, New \, Zealand.$ 

#### Responding to emerging concerns

Emerging ESG concerns will continue to influence our business strategy. These include biodiversity, the upcoming Taskforce for Nature-related Financial Disclosures (TNFD) and First Nations engagement.

Climate and sustainability standards from the International Sustainability Standards Board (ISSB), as well as TNFD, will drive more reporting on sustainability, climate, and biodiversity-related risks and opportunities over the next few years. Goodman's annual sustainability and TCFD reporting to date is a solid foundation for the incoming ISSB disclosures, including how we respond to physical and transition risks, and our capacity to adapt our business strategy over the short to long term.

#### Designed to optimise

Goodman's business model is focused on developing, owning, and managing high-quality properties in strategic locations close to large consumer populations.

For our existing properties, we optimise energy and water efficiency and install sub-metering to manage, track and improve performance and we're increasing the installation of solar PV. For our new developments, we incorporate measures to improve the sustainability and resilience in our specifications. Solar PV installations and EV charging stations are increasing in number as well as battery storage in regions where it is feasible.

Purfleet Commercial Park, Greater London, UK.

We have a building lifecycle approach in most regions too, to see where we can reduce upfront and operational carbon emissions. This lifecycle approach also supports our customers to meet their sustainability targets and our investors' net-zero portfolio targets.

In land-constrained markets, Goodman is optimising land through its multi-level developments. Our extensive experience in developing multi-level buildings includes nearly 50 properties in Japan, Hong Kong SAR, Mainland China, Australia and Continental Europe.

Our preference for urban infill development sites places our customers close to transport hubs and consumers, which can reduce transportation-related emissions, as well as costs.

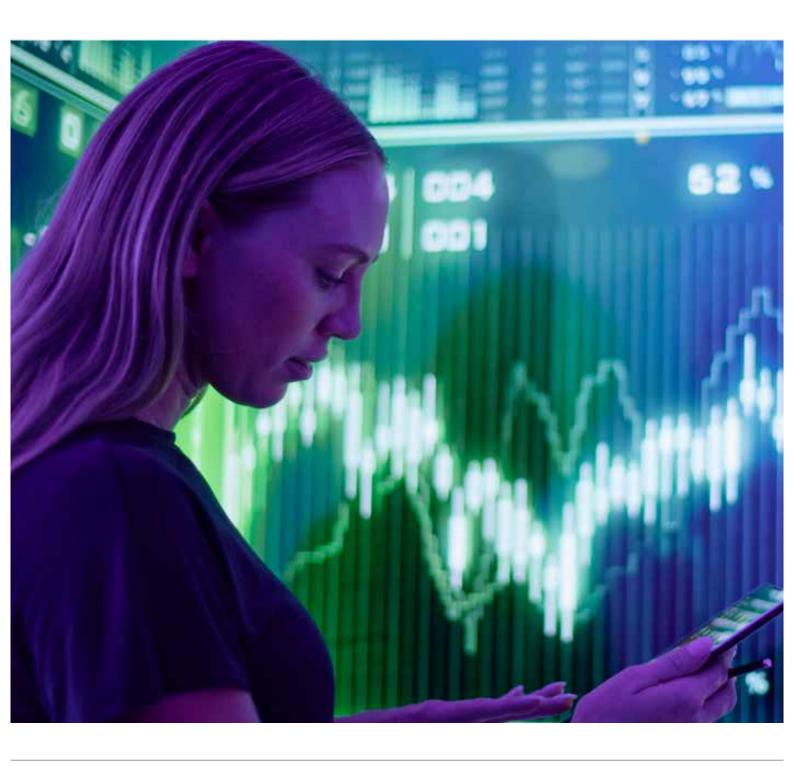

Repurposing brownfield sites and existing under-utilised buildings into highly appealing and modern business properties and places, can lead to positive environmental, social and community outcomes. In particular, our teams in Continental Europe and New Zealand have improved circularity benefits at these sites to the point where they are reusing and recycling around 90 percent of existing site materials onsite or locally.

#### Navigating Climate Risk: Building Resilience

Delivering on the proactive response to climate risk that investors and investment partners are seeking, remains a priority for Goodman. As a global leader in the industrial and logistics real estate sector, we are taking steps to evaluate, mitigate and monitor physical and transition risks in our operating regions.

True to our strategy, we are developing properties close to consumers that prioritise efficiency and climate-resilience. We've been measuring the upfront embodied emissions of our developments since 2021, and engaging with our supply chains, either directly or through industry groups, on low-carbon solutions and materials.

Goodman's Board and Sustainability and Innovation Committee oversee our climate risk management approach. The Committee oversees our climate disclosures and progress with our efforts to reduce emissions, aligned with our validated science-based targets. The Board and the Committee oversee our other climate-related targets, including onsite renewable electricity solutions for customers, and maintaining Goodman's own carbon neutral operations. Our approach to managing risk across Goodman's operations is captured in our risk management framework, risk register and Group Investment Committee process.

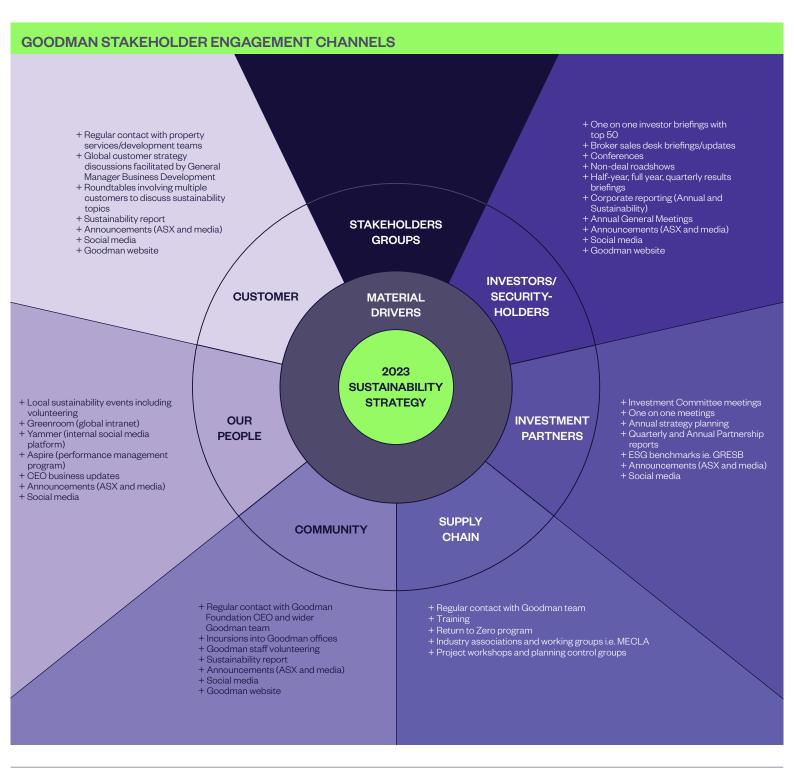

## STAKEHOLDER ENGAGEMENT

Goodman regularly engages with our various stakeholder groups to understand their priorities, anticipate their needs and build strong relationships for the long term.

We prioritise effective and timely dialogue with our stakeholders including our customers, investment partners, Securityholders, debt investors, our people, suppliers and local communities. Further information on how Goodman engages with its industry peers is covered in the Corporate Governance and Performance section.

We disclose our ESG performance through multiple channels and provide regular updates via Goodman's website, our Sustainability and Annual Reports, and ESG reporting benchmarks, in addition to the channels outlined below.

**PROJECT** 

Engaging our European team with Sustainability Week

#### Internal stakeholder engagement

#### **INFORMATION**

Our commitment to sustainability at Goodman is embedded in our operations. And we know that engaging our whole team, not just those employed in sustainability, is a key factor in achieving and hopefully, exceeding, our sustainability goals.

Three years ago, our Continental Europe (CE) team began Sustainability Week to raise awareness and inspire action in the region's team of around 200 employees. This year, the week started with an exclusive keynote by British architect, Michael Pawlyn, known for his work in biomimetic architecture or 'designing with nature'. Given the synergy with Goodman's own steps into biodiversity projects, biophilia and innovative landscaping, it's not surprising that feedback from the CE team on his presentation was positive.

Sustainability Week continued with biodiversity facts shared on Goodman's internal social media platform Yammer, and with employees contributing ideas, photos and videos. By provoking interest and awareness, the annual event will continue to prime all Goodman people in CE to see how they can make a meaningful difference in our sustainability efforts too.

## SUSTAINABILITY STRATEGY

Our 2030 Sustainability Strategy

Goodman's sustainability strategy shapes our global business. It's embedded in our operations to strengthen our business and enhance our social value, while reducing our environmental impact.

Our 2030 Sustainability Strategy is helping to shift our business into a resilient and low-carbon company. We're focusing on the areas where we have the greatest control and potential impact, and where we can collaborate with our stakeholders for combined influence. By developing and managing a global portfolio of modern, high-quality and efficient industrial properties and places, we will continue to use our influence to make a meaningful difference to our people, customers, investors, community, and our planet.

Our sustainability pillars

Three pillars make up our 2030 Sustainability Strategy: sustainable properties and places; people, culture and community; and corporate governance and performance. We track, measure and report against specific ESG targets under each pillar which shape our ESG priorities. These include commitments to reducing carbon emissions, managing climate risk, improving safety and people's health and wellbeing, contributing to community, strong governance and Board oversight, and maintaining ESG disclosures.

Through these ESG targets, Goodman contributes to nine of the seventeen United Nations Sustainable Development Goals (UNSDGs).

#### **UNSDGs**

SUSTAINABLE PROPERTIES & PLACES

PEOPLE, CULTURE & COMMUNITY

CORPORATE
GOVERNANCE &
PERFORMANCE

#### Sustainable properties and places

Our high-quality and professionally managed properties are strategically located and designed to meet our customers' business needs and remain adaptable to tomorrow's global challenges. We collaborate with our stakeholders to provide properties that can accommodate greater automation and efficiency, and support the wellbeing of our customers.

Goodman Business Park, Greater Tokyo, Japan.

#### People, culture, and community

Our people are recruited and rewarded based on their commitment to our values, their local expertise, performance, and long-term strategic and ethical thinking. Our workplaces support the health, safety and wellbeing of our people, contractors and customers. We engage with our supply chain to help us meet our sustainability goals and we make a positive difference to people's lives through the Goodman Foundation.

#### Corporate governance and performance

Our capital structure remains agile and we regularly disclose our financial, community and environmental performance. We promote strong leadership and governance, with the Goodman Boards and the Sustainability and Innovation Committee overseeing how we implement our sustainability strategy and meet our targets – aspects that are built into our remuneration structure.

Supporting the UNSDGs

The UNSDGs are a call to action on 17 major global challenges such as climate change, poverty, gender equality, and the promotion of good health and wellbeing for all.

The three pillars of Goodman's 2030 Sustainability Strategy, and our ESG targets, align with the nine UNSDGs most relevant to our operations. As such, our progress on our sustainability strategy actively contributes to addressing some of the world's biggest challenges.

# SUSTAINABLE PROPERTIES AND PLACES

Goodman's business is centred on owning, developing, and optimising sustainable and resilient properties and places. They are in strategic locations that are close to transport hubs and consumers for our customers.

Front of mind in our design approach is optimising energy and water consumption, integrating onsite renewable electricity, resilience and incorporating health and wellbeing features where practical. We focus on supporting our customers' sustainability ambitions and consider flexibility within the building design to meet changing customer needs over time.

We consider how we can minimise our vulnerability to major weather events and transition risks within our global property portfolio. We also focus on addressing other sustainability risks and opportunities that can support our business and the communities we operate in.

To mitigate risks, our designs prioritise efficiency, renewable electricity and piloting lower carbon materials to reduce emissions. And we aim to manage and retrofit our properties to enhance asset resilience, repurpose brownfield sites and improve biodiversity, while strengthening collaboration with our customers.

PROGRESS AGAINST TARGETS				
Target	FY23 activity	Progress		
400MW of solar PV capacity in operation by 2025	An additional 103MW of solar PV installed or committed to during FY23.	Solar PV capacity 2019 2023	2025	
13 ==	Taking Goodman's global PV capacity to approximately 306MW.	OMW 306MW	400MW On track	
100% renewable electricity use within our operations by 2025	Using certified GreenPower electricity in our Australian operations and using renewable energy certificates in other regions.	Renewable electricity use 2019 2023	2025	
	Continued investing in solar to increase renewable electricity use across our portfolio.	0 >80%	0 100% On track

## SUSTAINABLE DESIGN AND DEVELOPMENT

Goodman Joso, Greater Tokyo, Japan.

#### Sustainable and resilient design approach

Goodman's developments are strategically located and designed to optimise energy and water use. Where possible, they generate renewable electricity, incorporate practical health and wellbeing features, and remain adaptable to customer needs. We continuously improve our sustainable design approach to help achieve our sustainability targets, and to help our customers and investment partners realise their own ambitions.

Our approach is influenced by years of experience developing industrial and data centre properties and places, and our drive to innovate with smarter materials and designs. Some of the innovations we implemented in FY23 included specifying lower global warming potential concrete in New Zealand and piloting: battery storage in Australia and Japan; energy, water, and waste smart metering in Hong Kong SAR, and carpark solar PV structures in Australia.

The continued growth of cloud computing, data storage and artificial intelligence is fuelling the digital economy and the demand for data centres, which now account for approximately 30 percent of Goodman's global development workbook! We incorporate sustainable design features in the design of our data centres and specify higher-performance thermal building envelopes in some regions to optimise energy performance. As data centres are major consumers of energy, this approach is one way we can support our data centre customers reduce their energy demand. Ideally, our customers use renewable energy to minimise carbon emissions, sourced partially from solar PV we provide where possible.

1. As at 30 June 2023.

Engaging our customers is key to our success

Goodman implements sustainable design features in its developments. We build on those by actively engaging with our customers to understand their current and potential future design requirements and sustainability priorities.

Among our top 20 global customers (by rent), 85 percent have public operational emissions reduction and net zero targets, and 70 percent have renewable electricity commitments. We have pragmatic discussions with our customers on design to help them achieve their sustainability targets. We typically focus on energy efficiency, renewable energy and reducing embodied carbon in areas we can control and where we can have influence across our value chain.

This approach, combined with our strategic and accessible locations, are reflected in our consistently high occupancy rates.

## Customer collaboration – designing our first WELL Core Platinum building

Our Australian business collaborated with Daikin to target a 6 star Green Star Design and As Built v1.3 and WELL Core rating for Daikin's new facility at our Gateway@Murarrie industrial development in Brisbane.

As Daikin's global business designs, manufacturers, and maintains air conditioners, air filters and purification systems, they were eager to demonstrate how they can 'enhance people's lives...by creating ideal air' at its showroom, office, and distribution facility, at the new development.

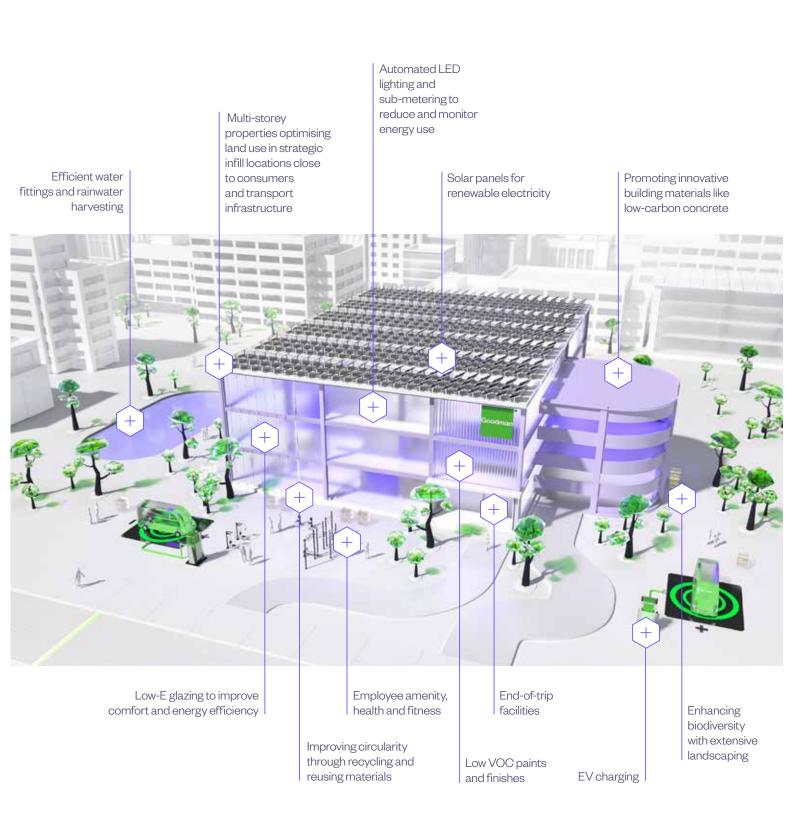

WELL Core complements Green Star and allows Daikin to showcase how its equipment, such as air quality sensors, and HVAC systems, installed in the development, can enhance the health, wellbeing and comfort of its employees and visitors to its showroom. Goodman targeted all 11 WELL Core concepts, with a stronger focus on Air, Light, Movement and Materials.

This is Goodman's first project to target a WELL Core Platinum rating for an industrial development globally and will be one of the first facilities in Australia to achieve the Certification. The development is complete, and the certification by the International WELL Building Institute is expected in 2024.

- + Daikin building is ~ 13,500 sqm GFA
- + Gateway@Murarrie's GFA is ~ 38,500 sqm across two buildings
- + Strategically located 12 kms from Brisbane's CBD.
- 1. The Ideal Air by Daikin | Daikin Global

# SUSTAINABLE PROPERTY DESIGN FEATURES

Common sustainability design features in Goodman's industrial properties

**PROJECT** 

**INFORMATION** 

## Setting a new benchmark for sustainable multi-storey development in Hong Kong SAR

A new benchmark for sustainable industrial development in Hong Kong SAR has been set by Goodman Westlink's LEED Gold pre-certification – with more LEED certifications in the pipeline.

The Hong Kong SAR team considered resilience, energy and water efficiency, solar PV, circularity, biodiversity, and health and wellbeing features in the four-storey Westlink building, which spans nearly 140,000 sqm of gross lettable area.

Westlink's rooftop includes mostly drought-resilient native plants from the local area, irrigated by a rainwater harvesting system. A rooftop jogging trail, outdoor gym and a seating area encourage the health and wellbeing of our customers' employees. The 458 solar panels (0.25 MW) on the remaining roof space contribute to Goodman's targets, as well as the Hong Kong Government's Climate Action Plan 2050. Meanwhile, the building's design and operations minimise light pollution to support a special ecological site north of the building.

Westlink's design includes enhanced drainage, typhoon posts to support internal shutters, water leakage sensors and double-glazed windows. The re-use of construction materials in the interiors has added to circularity, such as site ground rock incorporated into wall plaster, and trees used as decorative features and seating. Westlink also has smart meters to help customers measure and respond to their own sustainability targets.

- + Strategic location at the new Government-designated logistics hub supporting the Greater Bay Area
- + Direct vehicle ramp access to every floor, a rare customer efficiency feature in a multi-storey building
- + LEED final certification due in December 2023.

## MANAGING OUR CLIMATE RISKS

Goodman is committed to taking action to identify, evaluate, mitigate, and monitor physical and transition risks across our global portfolio.

This year we completed physical climate risk assessments in four regions – New Zealand, Hong Kong SAR, Mainland China, Continental Europe. Our Australian business is leveraging its previous risk assessments and has begun progressing an asset level assessment.

As Goodman operates in 14 countries, portfolio-based climate risk assessments enable a more granular consideration of local impacts. For example, local risks of wildfires in Continental Europe, and the potential of landslides in Hong Kong SAR and New Zealand were included.

These physical risks build on the following five key risks identified as material in our first detailed scenario-based climate-risk assessment in 2020:

- + Increasing temperatures and heatwaves
- + Extreme precipitation events
- + Windstorms (tropical and extra tropical)
- + Severity of hailstorms
- + Sea level rise.

#### VIEW OUR 2023 TOFD STATEMENT

To help manage our climate risks, we are continuously improving our risk management assessment and adaptation approach towards our new developments and stabilised portfolios. In Continental Europe, the UK, and Australia, a physical climate risk assessment is completed at the early stage of a development to identify risks and mitigation strategies early in the design process.

Goodman's Board and Sustainability and Innovation Committee oversee our climate risk management as part of Goodman's Sustainability Strategy. Our approach is captured under our Global Risk Management Framework, including the Group Investment Committee process which provides a structured operational decision-making and investment approval process.

## CARBON EMISSIONS

Goodman acknowledges the climate-related risks that can impact our business and the communities we operate in. We are committed to decreasing our carbon emissions and building sustainably designed, efficient, and resilient properties.

Through material selection and optimising our use of materials during the design and construction process, we can reduce our upfront embodied emissions and enhance the energy efficiency of our buildings. We anticipate opportunities to use lower carbon materials will increase in coming years. While onsite solar PV opportunities will help reduce our whole-building emissions.

#### TRACK OUR PROGRESS IN ESG METRICS

#### Science-based approach

Goodman's emissions reduction targets and initiatives align with our Science Based Targets initiative (SBTi) commitment. Our targets have been validated by the SBTi as being aligned with the objectives of the UN Paris Agreement.

Our commitments include:

- + A 42% reduction in absolute Scope 1 and 2 greenhouse gas (GHG) emissions by 2030 from a 2021 baseline. These include our direct emissions, primarily resulting from the use of fossil-fuels and electricity across our operations
- + A 50% reduction in square-metre intensity of Scope 3 GHG emissions by 2030 from a 2021 baseline covering the use of our buildings by our customers and the use of our buildings which we have sold.

Our customers' GHG emissions at our properties are a large part of our SBTi scope 3 emissions reduction commitment. While our control over these emissions is limited and challenging, we recognise that sustainable design, retrofitting our existing assets, and installing solar PV systems are where we can increase collaboration with our customers to reduce carbon emissions.

**PROJECT** 

**INFORMATION** 

## Targeting LEED Gold for developments in Mainland China

Our Wujiang Industrial Park in Greater Shanghai is the first LEED Gold pre-certified development delivered by our Mainland China business under the new LEED Volume Building Design+Construction (BD+C) specification. The Park sets the tone for continuous progress in sustainable development by Goodman in Mainland China.

Given the number of upcoming developments, our Goodman China team worked with the US Green Building Council (USGBC) to develop a prototype to 'pre-certify' LEED Gold for new developments, and to streamline the certification process.

The LEED Volume prototype standardises the design and construction specifications for a green building as well as how to work with stakeholders and the auditing process. It also enables Goodman to consistently apply health and wellbeing measures and indoor air quality standards across all Mainland China developments, including those underway.

The LEED green building certification approach encourages the reduction of operational emissions and the use of solar PV, helping with Goodman's global emissions reduction and solar PV capacity targets.

- + Wujiang Industrial Park is the first LEED Gold pre-certified development, under LEED Volume BD+C
- + 10 Mainland China developments targeting LEED Gold.

#### Carbon neutral operations

Goodman continues to maintain its global carbon neutral operations certification through the Climate Active Carbon Neutral Standard. Our carbon inventory includes Scope 1 and 2 emissions, as well as some upstream and downstream Scope 3 emissions from our operations within areas under our operational control across our portfolio.

Our carbon neutral certification boundary is based on operational emissions and does not include embodied emissions from our developments, customer emissions, or emissions from buildings we have sold. We still track these emission sources as required under our science-based targets commitment.

Achieving and maintaining our carbon neutral status relies on ongoing efforts to reduce our operational emissions, increase the use of renewable electricity, and invest in 100 percent Australian carbon credits units (ACCUs).

To date, the ACCUs we have purchased and retired to achieve our Carbon Neutral Organisation certification under the Climate Active program, were sourced from Arnhem Land Fire Abatement (ALFA). ALFA is an organisation created by First Nations landowners to support their engagement in the carbon industry. The offsets purchased are of vintages no older than 2020 and have been retired on the Australian National Registry of Emissions Units (ANREU).

#### Investing in carbon offsetting

While reducing our emissions remains our first priority, Goodman actively invests in carbon offsets to fulfill our Climate Active certification for our carbon neutral operations. We also invest in offsets for upfront embodied emissions for flagship developments, responding to customer priorities and green building certification requirements.

We continue to refine our procurement process and monitor the carbon markets to mitigate risks and procure high-quality offsets. We invest in nature-based projects preferably located in regions where Goodman operates. We partner with leading carbon offset suppliers who conduct additional due diligence on carbon offset projects, considering the social and biodiversity benefits associated with each project.

As part of our efforts to obtain quality carbon offsets, Goodman has made a strategic investment alongside Australia's Clean Energy Finance Corporation in Wyuna Regenerative Agriculture. This Australian carbon credit project utilises the 'Human Induced Regeneration' methodology to generate credits. Activities centre around land regeneration, sustainable, low-intensive livestock grazing and land management practices that promote vegetation growth and sequester carbon.

#### Reducing our upfront embodied carbon

As a property developer, we recognise the significant contribution buildings make towards global carbon emissions, with building materials and operations accounting for approximately 37 percent<sup>1</sup> of global carbon emissions.

We've been calculating the upfront embodied carbon of our developments globally since 2021 using Life Cycle Assessments (LCAs). This process establishes carbon baselines for our developments which we use to monitor embodied emissions and identify the key material sources between varying building types and regions, and importantly, the ability to forecast and explore opportunities to reduce carbon.

Building on our work to date, our regional teams are evaluating ways to reduce our upfront emissions. We're engaging with our suppliers, architects, builders, consultants and industry groups, such as Circular Australia and the Materials and Embodied Carbon Leaders Alliance (MECLA), on low embodied carbon solutions and materials. Our development teams in some regions are also using their regional carbon baselines and green building rating tools to meet embodied carbon reduction targets over the next few years.

Currently, the availability of low-carbon solutions and materials, like low-carbon concrete, is a challenge that will impact our rate of decarbonisation and varies greatly across our regions. Over time, we expect the availability of cost-effective low-carbon materials and solutions will increase, helping to reduce our embodied emissions.

1. Source: 2022 Global Status Report for Buildings and Construction | UNEP - UN Environment Programme

**PROJECT** 

**INFORMATION** 

#### Goodman's largest solar installation globally

Thanks to a partnership with renewable energy provider, BayWa r.e, and our customer, METRO LOGISTICS, the Marl Logistics Centre in Germany is setting records – the largest rooftop solar PV system across Goodman properties globally and the largest operational rooftop system in Germany. The system consists of two installations with a total 18 MWp capacity across the site.

While solar PV installations are typically aligned with the capacity that customers require, the Marl project team chose a different strategy: to maximise the roof surface and install as many panels as possible. Perseverance was needed to overcome the technical challenges inherent in such a large installation, however the building is now better placed to help meet tomorrow's energy needs.

## RENEWABLE ENERGY

We have some ambitious targets to cut our global emissions, expand our solar PV capacity to 400MW and shift to 100 percent renewable electricity sources in our operations by 2025.

During the last year we have installed or committed to an additional 103MW of new solar capacity taking us approximately 75 percent of the way to our target with a total of 306MW installed or committed to. Solar PV is a practical way we can encourage the take up of renewable electricity, particularly with our new developments. It's one reason why we have added to our existing target, with an additional 100MW of solar PV commitments out to 2030.

In properties with less opportunity for rooftop solar, we are seeking renewable electricity from accredited suppliers or using international renewable energy certificates (I-RECs) including those produced from our large-scale solar PV installations. For example, Goodman in Mainland China has commenced generating I-RECs from its solar PV installations, which once issued and retired under the IREC standard, can be used to offset Goodman's electricity consumption across Mainland China and Hong Kong SAR and reduce the respective Scope 2 emissions. And our Australian business is also planning to generate Large-scale Generation Certificates (LGCs) from its large-scale solar installations which will be used to offset future electricity consumption.

## BROWNFIELD DEVELOPMENTS

At Goodman, we prioritise urban infill or brownfield development sites, which make up over half of our global development pipeline. These sites give us the opportunity to design with circularity in mind right from the start, revitalising under-utilised properties and sites into modern, and efficient properties and places. This approach enables us to recycle and reuse finite materials, reducing waste to landfill and upfront embodied carbon during construction.

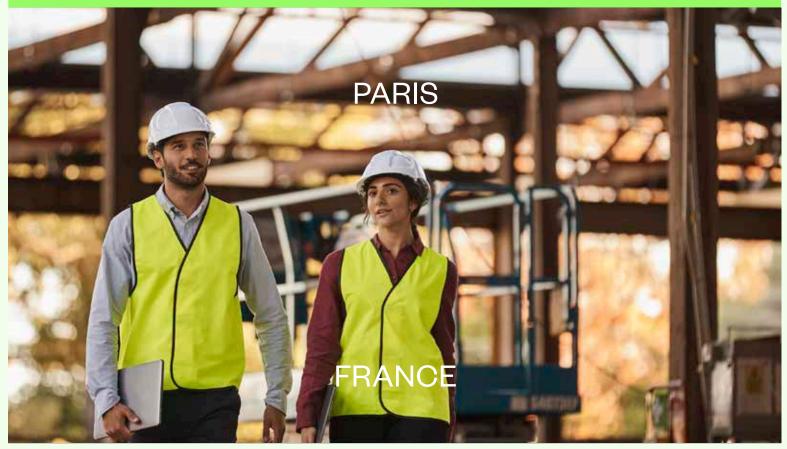

Our teams in Europe and New Zealand have been capitalising on the circularity benefits of reusing and recycling for a few years now, with around 90-95 percent of the existing site materials reused and recycled onsite or locally on some developments. The US has also been employing circular techniques including crushing and reusing concrete on site. Our other regions also started to design for circularity on their brownfield sites in FY23 with Southend Lane in Australia, and Taicang New-tech Park in Mainland China being two examples.

Our brownfield sites offer multiple benefits beyond circularity. Brownfield developments offer Goodman opportunities to use our expertise to regenerate existing sites, build new healthy habitats to improve biodiversity, and contribute to a more vibrant urban landscape. Brownfield sites are often close to existing transport infrastructure and large populations, providing our customers with opportunities to find efficiencies within their logistics operations, and to reduce transportation-related emissions and costs. These regenerated properties and places often include cafes, restaurants and health and wellbeing facilities, helping our customers attract and retain employees – and in some cases also serving the local community.

Before - Tsuen Wan West, Hong Kong SAR, China

After - Tsuen Wan West, Hong Kong SAR, China

**PROJECT** 

**INFORMATION** 

#### Setting the bar high on circularity

By aiming for 100 percent, Goodman's team in France is on track to achieve an overall industrial waste recovery rate of 99.2 percent in the deconstruction of a former lighting warehouse near Paris. The exceptional result at the Villeneuve St Georges site is nearly 30 percent higher than France's regulated recovery rate of 70 percent, and includes both recycled and reused materials.

The deconstruction took nine months and a lot of patience and persistence. Like-minded partners were crucial to our success. To increase the reuse of materials recovered, Goodman used an online waste marketplace to match supply from the site. For example, a local farmer received a motor pump, while the transformer was decommissioned for future reuse. Two generators, 17 pieces of sanitary equipment and 1,289 lights were also recovered for reuse. Meanwhile, the site's recycled waste included 20 kilometres of electrical cable, 136 radiators, 1,190 sqm of windows, 2,700 sqm of ceiling tiles, 55,000 sqm of metal roofing and 44,400 tonnes of concrete.

The knowledge and networks gained during the deconstruction in the Villeneuve St Georges project can be shared among Goodman's global teams and supply chains. The process is labour and time-intensive – electrical cabling, for example, must be stripped to its component parts of copper and plastic – yet the benefits of closed loop practices are become clearer, and have become a standard for Goodman's team in France.

## **BIODIVERSITY**

This year, nature is attracting greater interest driven by the incoming Taskforce for Nature-related Financial Disclosures (TNFD) risk management and disclosure framework.

We have commenced planning and defining our approach for TNFD, considering practical biodiversity baselines, commonality among our global development teams, and flora and fauna assessments required for developments. We're also assessing how the green building certification tools, such as LEED, Green Star and BREEAM, address biodiversity. Lastly, we're considering tools that could help us measure our biodiversity baselines and improvement over time.

In addition to TNFD, we continue to progress biodiversity projects and explore biodiversity opportunities. Our preference for re-developing brownfield sites gives us the opportunity to build a new healthy habitat, promote and improve biodiversity and create biodiversity corridors.

More than half of our development workbook is on brownfield sites. Where we develop, we strive to balance the priorities of our customers and planning authorities with preserving the natural environment. Removing vegetation is sometimes necessary, but where we can, we replace trees and restore vegetation elsewhere on the property, or nearby, to mitigate the impact.

**PROJECT** 

**INFORMATION** 

No small feat – building a ngahere to support biodiversity in New Zealand

In New Zealand, ngahere (native forests) support a diverse array of Indigenous plants, trees, and wildlife. To contribute to its preservation, Goodman's New Zealand business planted around 10,700 native plants across 11,000 sqm at its Highbrook Business Park and Roma Road Estates. Species include Manuka, Koromiko, flax and cabbage trees, with about 37 percent able to grow to five metres or more, helping with canopy cover.

The ngahere is supporting native birds such as Pied Stilts and Kotare, as well as bees and other insects. And natural materials recovered from the Roma Road development have been repurposed to support a lizard habitat. The 7,000 plants at Roma Road Estate, that is built on a slope, help to stabilise the soil and prevent erosion while also providing a buffer to a neighbouring residential building.

Goodman New Zealand is planning future biodiversity projects.

- + Planted two urban ngahere projects in Auckland totalling 11,000 sqm
- + Around 10,700 native trees and shrubs planted, comprising 70 different species
- + Highbrook Business Park consists of around 490,000 sqm NLA over 109 ha of land and Roma Road Estate upon completion will consist of around 45,000 sqm NLA over 9.2 ha of land.

**PROJECT** 

**INFORMATION** 

#### Helping the habitat of the Spadefoot Toad in Spain

Known as Barcelona's "great green lung", the 8,000-hectare Collserola National Park is just 15 minutes from the city centre and one kilometre from Goodman's Molins de Rei facility. Yet with open spaces surrounding the park in decline – as well as pools and wetlands – amphibian species were in perilous decline too, the Spadefoot Toad especially.

In response, Goodman funded 'the Spadefoot Toad project' managed by the Catalan Society of Herpetology in collaboration with the Collserola Natural Park Consortium. Water quality and vegetation were analysed and 17 ponds were dug to create perfect breeding conditions, before 1,317 larvae and 18 tadpoles were released.

While more time is needed to re-establish the habitat and health of the slow-breeding toad, the Catalan Society of Herpetology described the first year's results as "a remarkable success". It noted that seven of the 10 targeted amphibian species – including the common toad and the spotted toad – have colonised the rehabilitated wetland area. Goodman's support of the project will continue, allowing the society's experts to keep improving the biodiversity of the land around Barcelona's most important green space.

## GREEN CERTIFICATION

Certifying our sustainable property credentials

We continue to make great strides with development specifications, combining sustainable design principles with innovative materials to deliver highly functional, efficient and comfortable buildings around the world.

Our customers are at the core of our developments. Efficient energy and water usage lead to operational savings, and our workplaces also provide health, wellbeing, and social benefits with a range of amenities. To steer our advancements in improving our buildings' operational performance, and verify our sustainability credentials, we often use certification schemes.

In FY23, nearly 50 percent of our total portfolio was covered by a green building certification. This includes both developments and existing assets.

Our achievements this year include:

- + Two 6 Green Star Design ratings achieved in New Zealand the first industrial developments to achieve a 6 Star rating in the country
- + 99.5% of the Goodman Japan Core Partnership portfolio has a green certification
- + The development of a Volume tool for LEED certification by our Mainland China team, with the US Green Building Council
- + Goodman Huiyang Industrial Park P3 and Beijing Southgate Industrial Park P2 developments awarded LEED Gold certification, in Mainland China
- + LEED Gold certification achieved for Goodman Tsuen Wan West Building 3, and LEED Gold pre-certifications achieved for the remaining buildings at Tsuen Wan West and Westlink in Hong Kong SAR. We also received an 'Excellent' rating under BEAM Plus for seven existing buildings and 'Platinum' for Goodman Interlink, demonstrating outstanding performance in building energy usage for older stabilised assets
- + About 50 development projects in Australia have been registered for Green Star Buildings, as well as the former rating, Green Star Design & As Built v1.3.
- + Our UK developments at Brentwood, Dartford and Purfleet achieved the BREEAM Excellent certification
- + In Continental Europe all new developments must meet the minimum BREEAM Excellent certification target. In addition, 29% of the stabilised portfolio is certified under the BREEAM In-Use performance standard
- + Two logistics developments in Itaquera, São Paulo, Brazil achieved LEED Gold
- + Four industrial developments in the US are set to achieve LEED Silver. Six Energy Star certifications on stabilised assets with three buildings scoring above 95 and the rest above 80.

**PROJECT** 

INFORMATION

## First New Zealand 6 Green Star design ratings for industrial developments

A milestone for New Zealand was achieved in early 2023 when the country received its first 6 Green Star Design ratings from the New Zealand Green Building Council for two Goodman developments at Highbrook Business Park in Auckland.

While the New Zealand business targets 5 Green Star Built for all its developments, the team saw an opportunity to push and achieve a 6 Green Star Design rating. We're awaiting the Green Star Built ratings later in 2023.

Efforts were made during the design phase to reduce embodied carbon in both developments – Tāwharau Lane and New Zealand Blood Service. Where possible, lower global warming potential concrete and cement substitutes were specified.

Approximately 90 percent of construction waste was diverted from landfill at the Tāwharau Lane development, including over eight tonnes of hardfill and timber. 108kL of rainwater harvesting storage capacity was installed and water efficient fixtures to improve water efficiency for our customers.

We also planted around 3,000 sqm of drought-resilient native plants and shrubs to support biodiversity.

A total of 119kWp of solar PV is installed across the two developments. The power generated is forecast to cover about 15 percent of the baseload for the New Zealand Blood Service development and over 50 percent of the baseload for the Tāwharau Lane development. Submetering has also been installed to assist our customers monitor and analyse their energy use, helping them to reduce their own carbon emissions.

- + Tāwharau Lane development is ~ 8,100 sqm NLA
- + New Zealand Blood Service development is ~ 3,300 sqm NLA
- + Highbrook Business Park consists of a working population of over 5,500 people across 76 buildings.

**PROJECT** 

**INFORMATION** 

#### Nearly 100% green certified buildings in Japan

After Goodman Sakai achieved the first overall LEED Gold certification for an industrial building in Western Japan in 2014, the Japan business ramped up its efforts to secure more green certifications. That dedication led to 99.5 percent of the Goodman Japan Core Partnership (GJCP) portfolio having a green certification as of June 2023.

GJCP has expanded its green building certification scope over time. Initially, the focus was on developments using the Comprehensive Assessment System for Built Environment Efficiency (CASBEE) and LEED. Since then, the Japan business has implemented green leases and collaborated with customers to focus on reducing operational carbon emissions. This has accelerated the operational energy certification achievements through the Building Housing Energy Efficiency Labelling System (BELS) and DBJ Green Building Certification.

Customers are receptive to Goodman Japan's sustainable design approach and green building certifications. The measures are helping the Japan business to achieve 99 percent customer occupancy – exceeding the Goodman corporate target – while also helping customers meet their own sustainability ambitions and cut costs. Goodman Japan's goal is for all future industrial developments to achieve the minimum standard of CASBEE rank A.

- + 99.5% of GJCP's portfolio (1.3 million sqm of net lettable area) has a development or operational green building certification as of June 2023
- + GJCP's portfolio is in Greater Tokyo, Greater Osaka, and Nagoya.

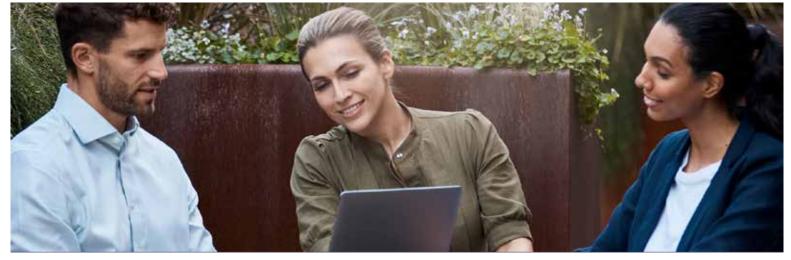

# PEOPLE CULTURE AND COMMUNITY

By investing in our people, our culture and in positive community outcomes through the Goodman Foundation, Goodman can help to create a more sustainable business. One that aligns our business outcomes with the interests of our stakeholders, and helps build trust with our customers, investment partners and the wider community.

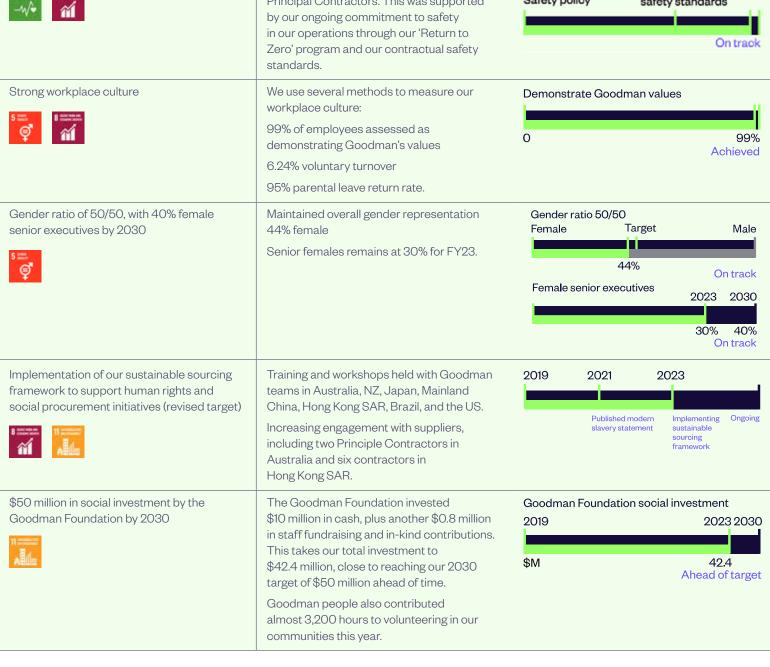

#### Positive workplace culture

Within our workplaces, we're building a culture that values and inspires our people. We recognise that effective employee engagement and rewarding productivity inspires our people to perform. It helps us attract and retain talented people, whose determination, innovation, and ability to build strong relationships with our customers and investment partners are fundamental to our business growth.

To support our workplace culture, we focus on the physical and mental wellbeing of our people and provide skills development and challenging opportunities to advance their careers. We provide health, wellbeing and social initiatives tailored to each region, and incorporate health and wellbeing features into our workplaces where possible. These include recreational and fitness facilities, break-out spaces, and garden areas. In addition, Goodman's long term incentive scheme helps to build collective responsibility in our people and alignment with the interests of our stakeholders.

#### Goodman Group Sustainability Report 2023 People, culture and community **Material drivers** + Promoting workplace safety and wellbeing for all + Demonstrating Goodman's values and promoting diversity, inclusiveness, and social equity + Group and regional leadership + Influencing the sustainability practices of our value chain + Protecting human rights and sourcing sustainably Supporting the community through the Goodman Foundation PROGRESS AGAINST TARGETS **Target Progress** In FY23, there were no reported fatalities Safe working environment Safe working environment on construction projects overseen by our Safety training and monitoring Safety policy Principal Contractors. ## LIVING OUR VALUES

Goodman's long-term success is underpinned by our dedicated local teams who are aligned to the Group's values – innovation, determination, integrity and sustainability. These values shape our culture and provide direction on how our people should behave in delivering high-quality service and innovative property and investment solutions. Our people are assessed on their demonstration of the Goodman values during the annual performance review process.

- + Innovation New ideas push our business forward. We focus on the future, proactively looking for new opportunities and improved solutions for our stakeholders that will make the world a better place for all of us.
- + Determination Determination gets things done. We are motivated by excellence and work hard to achieve it, actively pursuing the very best outcomes for our stakeholders.
- + Integrity We have integrity, always. We work inclusively and transparently, balancing the needs of our business and our people, with the needs of the community and those we do business with.
- + Sustainability We're building our business for the long-term. That's why we consider the planet and the people on it in what we do. Our initiatives demonstrate our ongoing commitment to having a positive economic, environmental and social impact on the world.

## SUPPORTING OUR PEOPLE

We support our people to be physically and mentally healthy and connected to their colleagues, by offering region-specific health, wellbeing, and social initiatives. We offer counselling for our people and their families if required, as well as tailored training delivered by external specialists on a range of health and wellbeing topics. Meanwhile our offices are designed to maximise health, wellbeing, and connection for our people.

**PROJECT** 

**INFORMATION** 

#### Mental health training in the UK

Our Goodman workplaces support the health, safety and wellbeing of our people, and a crucial part of that is good mental health. Yet more can always be done. Recent Deloitte figures estimate that poor mental health cost UK employers up to £56 billion a year but, conversely, for every £1 spent on interventions, £5.30 is returned in retention.

During the year, the whole Goodman UK team participated in mental health awareness training with specialist organisation Work Well Being. Later, recognising managers' special role in positive day-to-day practices, an additional full-day training was arranged. Led by a psychiatric doctor, managers were taught how to spot warning signs, have productive conversations, manage challenges and support people returning to work. Practical tips on nutrition, exercise, environment, breaks and sleep were reiterated, plus strategies for when stress hits – such as breathing techniques.

Post-training, 44 percent of managers rated their knowledge of mental health as high or very high, compared to 18 percent before, while confidence in dealing with related challenges had improved too. Importantly, given how effective it is to role-model healthy behaviour, a majority of managers felt more able to take care of their own mental wellbeing after the training too.

"I learnt the importance of listening and that there is no expectation to fix the problem," said a participant. For team members in need of further help, Goodman's employee assistance program offers 24/7 access to trained mental health counsellors.

## HUMAN CAPITAL MANAGEMENT

#### The value of diversity

As a global company, Goodman values diversity and encourages inclusion. It brings together diverse knowledge, backgrounds and thinking, which can result in better decision making and business performance.

A key area of focus is gender diversity. We are actively working towards increasing our female senior management representation to reach our target of 40 percent by 2030, which involves succession planning, recruitment and career development.

Our Inclusion and Diversity Policy supports:

- + Workplaces free of harassment or unlawful discrimination
- + Recruitment and promotion based on merit
- + Equal access to personal development, management skills and career opportunities
- + Cultural differences
- + The needs of individuals with family and carer responsibilities
- + Customers' diversity and their expectations
- + An inclusive work environment where ideas and opinions are shared
- + A range of philanthropic channels for community contributions
- + Increased career advancement opportunities for women.

Supporting the Group's efforts to increase female representation at senior levels, several regions reported encouraging female recruitment rates during FY23. 60 percent of recruits in Japan were female, while 75 percent of new starters in New Zealand were female. Increasing the number of females in roles that have been traditionally filled by males in our sector is an area of focus.

#### The value of diversity

Goodman continued with several diversity and inclusion training programs and initiatives in FY23, supporting activities already underway. Some of these included:

- + A standalone <u>Sexual Harassment Policy</u> introduced globally in March 2023 to reinforce our commitment to providing a safe, respectful and diverse workplace
- + Respect at Work training conducted for all Group Australia-based employees in early 2023 which included anti-harassment, discrimination and workplace behaviour expectations
- + Unconscious bias training delivered to our New Zealand team
- + Held pilot training workshops run by the Our Watch Institute for the Australia team in May 2023 on the role gender equality plays in preventing violence against women. For more information, see the Goodman Foundation section of this report
- + Our Japan business reinforced Government messaging to encourage fathers to take parental leave
- + The Circle In and Enboarder online tools are used in New Zealand and Australia to help support our working parents and our people taking parental leave. Our New Zealand team also offered independent coaching through a Works for Everyone partnership to support our parents returning from leave, transition back to work. We saw about 95% of our people return from leave, while people who had taken parental leave earlier, have returned and remained with us for at least 12 months
- + We continued to support the Property Council of Australia's 500 Women in Property Mentoring Program in FY23, with 10 participants selected from Goodman.

  The program aims to promote women into leadership positions in the property industry.

#### Getting to 40% by 2030

Building an inclusive workplace at Goodman starts with leadership. Encouraging leadership styles that recognise the importance of inclusion supports our aim of creating a more diverse workplace.

We are committed to reaching 40 percent of females in the senior executive category globally by 2030. In FY23, the number of senior females remained stable at 30 percent, even though we continued to focus on targeted recruitment, talent reviews and career development.

Our global workforce remains just under 1,000 people across a relatively flat organisational structure. So, when evaluating if an employee should be categorised as a senior executive, we consider:

- + Proximity of the employee on the Group's organisational chart to the Group CEO or Regional CEOs
- + Scope of the role
- + Potential commercial impact
- + Accountability for risk factors
- + Total remuneration level.

Increasing the number of females in senior positions is a priority ambition for Goodman. We are making progress – with our teams in Australia, Mainland China, Continental Europe and Brazil now exceeding our global 40 percent target, and actively supporting promotion and leadership opportunities for females. In regions where we saw a material number of promotions, 37–57 percent of the total promotions were female team members.

While we're achieving progress, low voluntary turnover and high retention impacts the numbers of females reaching senior roles. As do cultural and historical barriers which hinder the availability of females in the recruitment pool in some regions where Goodman operates. In Japan, for example, recruiting females within an industrial real estate company is challenging, which is why achieving an 60 percent female recruitment rate in FY23 is noteworthy.

#### Prioritising our people's wellbeing

We want our people to be happy, healthy and productive.

To achieve this, we offer tailored physical, mental, and social connection activities in different regions.

Here's some of our wellbeing initiatives provided to our team:

- + Health screenings in Hong Kong SAR, UK, Japan, New Zealand, Australia, US and Mainland China
- + Encouraging healthy food choices in our offices in Continental Europe, UK, US, New Zealand, Japan, Hong Kong, Mainland China and Australia
- + Social activities to support connections with colleagues, a sense of belonging, and effective teamwork
- + Onsite gyms or discounted gym memberships in Australia, UK, US, Japan and Hong Kong SAR
- + Mental health training in the UK, Japan, US, Australia, and New Zealand
- + Employee Assistance Program for employees and eligible family members that offers a range of personal and professional support in the UK, US, Japan, Hong Kong SAR, Mainland China, New Zealand, and Australia
- + Wellbeing apps, such as Groov in New Zealand and the Be-Me App in the UK to enhance and support employee wellbeing and performance
- + Encouraging cycling to work with incentives in the UK, and Continental Europe
- + Flu vaccinations in Australia, New Zealand, UK, Continental Europe, Japan, Hong Kong SAR, and US.

#### Flexible working

We maintain a hybrid working model, supporting our employees while meeting customer and investor needs. Our approach combines remote and in-office work successfully managed through effective collaboration tools, IT systems, and policies.

#### Human centred design

Goodman's newest offices aim to provide modern and sustainable surroundings, with a blend of quiet spaces and areas where our people can connect and collaborate. Where possible, our workplaces prioritise natural light and fresh air and include break-out spaces, and access to garden areas. Many of our offices have yoga rooms, end-of-trip facilities, gyms and multi-faith rooms, with fit-outs that incorporate non-toxic materials and integrated plants and trees, which can help lower stress and enhance mental clarity.

#### People resources and skills

Goodman is proactive about identifying and managing human capital risks. As our business evolves, this risk management approach includes identifying potential gaps in available human resources.

Goodman's Group Head of HR reports to the Remuneration and Nomination Committee on remuneration, succession planning, gender equity and related matters. This Committee also oversees the Group's succession plan at senior levels. A detailed succession plan was developed and discussed with the Committee during FY23.

#### **Building capacity**

Attracting and retaining the right people is crucial to Goodman's ongoing success. We prioritise attracting new talent, as well as rewarding our existing team and advancing their careers through skills development and providing challenging work opportunities.

We have graduate programs in Australia, Mainland China and Hong Kong SAR to identify and attract emerging talent to Goodman. In FY23, we recruited nine graduates in Australia, five in Mainland China and two in Hong Kong SAR.

A key step to building capacity and expertise across Goodman's global teams is to identify potential skills gaps. While Goodman is a specialist global industrial property group, we acknowledge that our customers' requirements and priorities of our investment partners evolve. In addition, regulatory, corporate governance and disclosure obligations mean our teams require ongoing training.

#### **Building capacity (continued)**

Goodman invests in training its people to help develop the skills they need. We provide training in a number of ways, including both internal and external training resources, in-person sessions and through the online learning platform, LinkedIn Learning, which provides a catalogue of content via the Group's global learning system, Aspire. Aspire is Goodman's gateway to a range of professional development and self-paced skills training relating to compliance, technical and management skills.

Other types of training provided to our teams in FY23 include:

- + General management and leadership
- + Corporate governance, bribery, corruption and harassment
- + Legal compliance
- + Resource management
- + Effective communication
- + IT systems and platforms
- + Health and safety including height safety and hazardous substances
- + Diversity, modern slavery, respect and inclusion
- + Wellbeing and mental health.

During the year, 72 percent of Goodman's global workforce accessed LinkedIn Learning to view 9,773 hours of training across both internal and external courses. To help our people keep their skills current and encourage greater access, this was expanded to incorporate more AI in the design of learning pathways, plus the inclusion of Japanese language content for our team in Japan.

Initiatives like Goodman's In-Focus program, where team members present on an area of technical expertise, are highly valued and help to create a culture of learning through peer-to-peer knowledge sharing. And this year we continued with the global communications training program, facilitated by an external writing expert. The program has been rolled out in Australia, New Zealand, Continental Europe, Hong Kong SAR and the US to date, with plans for in-language training in Japan underway.

Goodman's Greater China team previously developed its own competency framework designed to assist employees identify what skills and experiences they require to progress their development and learning pathways. Different training formats are also being utilised to cater for various learning preferences and contexts, with sessions customised to accommodate both individual needs and collaborative learning.

#### Managing our team

Our human resources team is responsible for managing our human capital including performance management, skills development, and remuneration.

Our team looks at human capital metrics such as gender representation, gender pay equity, remuneration, diversity, learning, turnover and absenteeism. Some of which are included in the <u>ESG metrics section</u> of this report. Voluntary turnover in FY23 across Goodman Group remains low around 6 percent since FY21 (FY23: 6.24%, FY22: 6.4%, FY21: just under 6%).

We do background checks on new employees where relevant and ongoing checks on employees where required by regulatory bodies. Our <u>Code of Conduct</u> covers all employees, and regular governance compliance training takes place to boost awareness of employees obligations.

#### Measuring workplace culture

We use several methods to promote and measure our corporate culture.

Promoting our teams' achievements via Goodman internal communication tools is one way we motivate and inspire our team. And our In-Focus program enables our people to showcase their area of expertise and highlight achievements in the business. It also supports our values by helping to encourage innovation and determination.

We measure our culture by assessing how our people adhere to our corporate values as part of Goodman's performance management program.

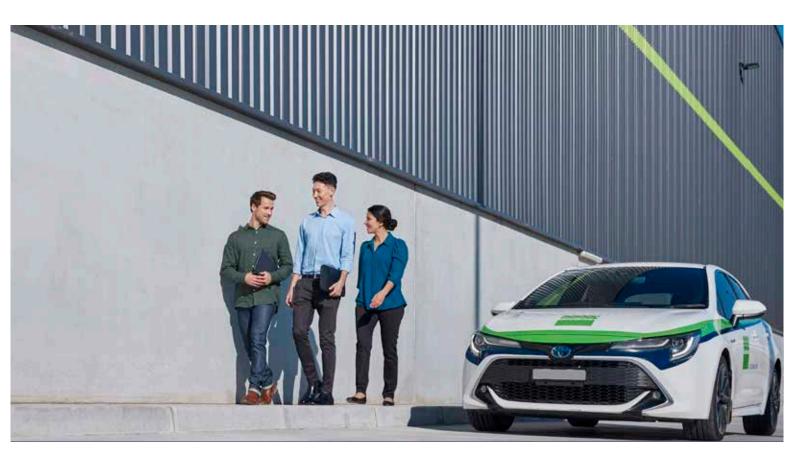

Employee surveys are another we understand employee attitudes and specific viewpoints. In FY23, surveys were completed in the UK, Greater China and New Zealand, which indicated high satisfaction with employee engagement. Within these surveys, 91 percent of responders in Greater China reported that their employment experience exceeded their expectations, 90 percent of responders in New Zealand favourably reported an inclusive culture.

#### Aligning remuneration

Across the Group, we prioritise equal fixed remuneration for employees who do similar work within the same region. Differences in total remuneration, including incentives, are based on performance. Long-term incentives where staff are awarded performance rights to Goodman securities, comprise a large portion of our remuneration. All employees globally participate in our Long Term Incentive Program, which is a critical element of the Group's remuneration philosophy, generating the type of culture that we want for long-term success. It creates significant long-term alignment between the financial and operational outcomes of the business and the returns to Securityholders.

In Australia, our parental leave benefits extend beyond the 16 weeks of paid parental leave. We maintain superannuation contributions to parents in Australia throughout their entire leave period, not just while they are being paid. In addition, Goodman's parental leave policy for Australian-based employees was extended to now include time on parental leave in long-service entitlement calculations. The US team also updated its parental leave policy to provide a 40 percent salary subsidy to reduce the parental leave pay gap.

#### Career direction

It's essential that we recruit, engage, develop and retain the right people.

We induct new employees with face-to-face and e-learning modules during their early months at Goodman, and provide development opportunities for our people throughout their career with us. We offer learning and development opportunities that help build new and existing skills, and use succession planning to respond to the skills we need, helping to build a strong workforce and leadership team for the future.

Crucial to the development of our people is monitoring performance and providing competitive remuneration and benefits. The annual performance review and development process helps focus on career aspirations, goals, and potential training. It helps plan for role progression, identifying any specialised management training that is required. This training includes peer-to-peer engagement with Goodman's senior leadership team and management committees, further assisting with succession planning and leadership for the longer term.

Our people are offered incentives to study during their career at Goodman. This includes study support schemes, which in some regions includes an allowance of up to AU\$8,000. For example, during FY23, 13 people from the Australian business participated in post-graduate study partially sponsored by Goodman – nine of which were female.

# PRACTICAL AND PROACTIVE SAFETY

As a global business, Goodman is committed to creating a safe working environment for our people and contractors. We focus on our operations where serious incidents can occur and which pose the greatest risk, most notably our development projects under the control of our Principal Contractors.

Our safety strategy during FY23 was to continue proactive and practical implementation of Goodman's Minimum Construction Safety Standards. This is particularly important in regions where the industry standards are below our expectations – and for the second year running, we're pleased to report there were zero fatal accidents on Principal Contractor controlled sites.

We adapt and adjust our proactive approach to safety. We find the most effective way to implement Goodman's safety standards is directly with our contractors on our projects. In some regions, Goodman contracts full-time safety representatives to work directly with our Principal Contractors and help implement our standards. If required, we issue contractual penalties and stop-work orders to contractors deemed to be non-compliant with Goodman expectations, helping influence contractor safety standards overall.

We actively monitor our safety standards and track incidents. It helps with promoting a hands-on culture and positively influencing high safety standards on our sites. It supports our contractors' safety personnel identify and mitigate safety risks, and address underlying hazards. These insights help Goodman identify where it can adjust contractual safety standards and control measures for high-risk activities, to help us create and maintain a safe working environment.

## HUMAN RIGHTS AND MODERN SLAVERY

In our operations and supply chain, Goodman supports the protection of human rights, equity, and fairness. We recognise that modern slavery poses a global and widespread risk, and we take ongoing responsibility for managing this risk.

Modern slavery is a serious form of worker exploitation, referring to a range of serious human rights violations, including forced, bonded, trafficked, and child labour. It arises in circumstances where coercion, threats, or deception deprive people of their freedoms and right to select their own work.

Modern slavery impacts many industries. We are conscious that some elements of the property and construction sector have an elevated modern slavery risk and have designed our modern slavery strategy in response to that risk. Our focus on the protection of the human rights of our people and workers in our supply chain is aligned with our values and our commitment to safety and sustainability.

We recognise that identifying actual or potential instances of modern slavery demonstrates the effectiveness of our modern slavery approach. It also facilitates remediation for affected workers, including addressing root causes. Globally, in FY23, we did not identify any instances of modern slavery in our direct supply chain. We are committed to understanding our modern slavery risks, beyond our tier one suppliers in FY24, and combatting modern slavery through effective partnerships and collaboration.

Our modern slavery strategy continues to mature each year. Our continuous improvement approach has resulted in the adoption of a range of targeted initiatives and measures in FY23, so that our processes and actions remain effective in preventing and addressing modern slavery.

VIEW OUR MODERN SLAVERY STATEMENT

#### Our FY23 actions:

- + Targeted risk management actions in high-risk sourcing categories and geographies to mitigate modern slavery risk
- + Global integration of our modern slavery commitments and regional consultation
- + Building internal capacity through global operational and supplier standards and training
- + Enhancing supplier capacity building through awareness and collaboration.

## SUSTAINABLE SOURCING

Our Sustainable Sourcing Framework helps us make procurement decisions that create a more responsible and sustainable supply chain.

Our Framework considers both social and environmental impacts. It encourages engagement with suppliers to support fairness and equality in their workforce and broader supply chain. It also promotes consideration of the environmental impacts of the materials we use, like embodied carbon, and opportunities where we can re-purpose existing products and reduce waste.

Implementing our Framework

 $\label{teams} Our focus is to raise awareness of opportunities where our local teams can embed our sustainable sourcing goals within our procurement processes.$ 

### IDENTIFYING SUPPLIERS

who align with our sustainable sourcing goals

## IMPROVING OUR CONTRACTS

to embed Goodman's supplier expectations and Statement of Business Ethics

## MANAGING OUR SUPPLIER RELATIONSHIPS

to explore sustainable sourcing opportunities and share knowledge

As a global company operating in 14 countries, there are challenges implementing a consistent framework. Cultural, socio-economic differences, varying policy and maturity of sustainable procurement practices require a tailored approach in each region. Our Framework also allows us to share knowledge and best practices across our global teams.

Sustainable sourcing workshops were held across Australia, New Zealand, Japan, Mainland China, Hong Kong SAR, Brazil, and the US, to increase awareness within our teams. And we're increasing sustainable sourcing engagement with contractors, including two Principal Contractors in Australia and six suppliers in Hong Kong SAR which provide cleaning, security and property management services.

## GOODMAN'S FIRST NATIONS ENGAGEMENT

The Clontarf Foundation.

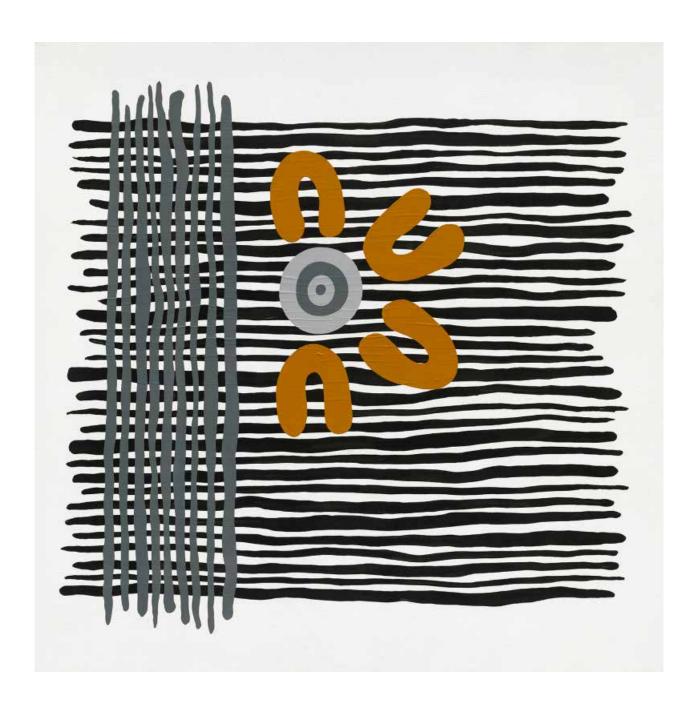

Our Reconciliation Action Plan (RAP) vision seeks to make space for greatness by educating and influencing our employees, customers and stakeholders on the important role First Nations communities and peoples play in Australia.

Goodman is working to provide tangible and substantive benefits for Aboriginal and Torres Strait Islander peoples, through both our community and business activities as we move along the path of our RAP.

This includes \$3.2 million invested by the Goodman Foundation in community partnerships since 2012 that provide opportunities for First Nations peoples. We're working with the Clontarf Foundation, St Kilda Football Club and FareShare, on education and employment pathways, health and sport, housing, food security, and access to nutritious food.

Goodman employed a Head of First Nations Engagement to lead our strategy, and introduced a sustainable sourcing framework that includes supporting First Nations employment and businesses. We've introduced cultural protocols and cultural immersion opportunities for our people, and we're exploring the incorporation of Country and First Nations design principles into our property portfolio. We will continue to invest in initiatives to close the gap in First Nations outcomes.

In FY23, Goodman received formal endorsement of our inaugural Reflect RAP and we have clear commitments that will see us deliver on the next phase of our RAP. We appreciate we have a distance to travel yet, and recognise that there is still much to learn but as we move through the RAP process, we will create a framework to guide us as we continue to build meaningful and lasting relationships with First Nations peoples.

Goodman's RAP artwork created by Danielle Mate.

#### Artist statement

This bespoke piece of art has been created recognising the history that connects a place and people; raw materials like timber, grass and ochre; and layers signalling the story of past, present and future. Using lines, the artwork demonstrates the traditional craft of weaving and use of natural materials. When something is woven it becomes stronger; it brings in an element of strength and growth. The horizontal lines represent the earth, Mother Earth, layers of earth, time, and history. The vertical lines are adding a new layer of history. These lines are not complete – a nod to Goodman's RAP journey – which is still a work in progress.

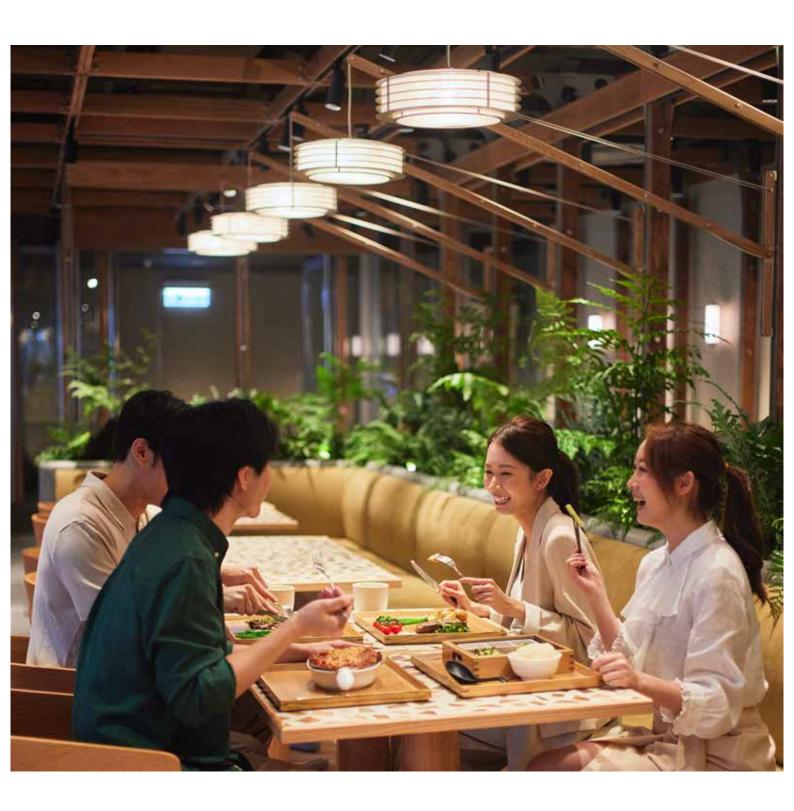

The U shapes are a traditional symbol for people. Represented facing opposite directions denotes male and female.

The centre circles are a traditional symbol.

They represent a meeting place, Goodman.

## **CUSTOMER WELLBEING**

Globally, our developments increasingly incorporate designs that prioritise customer wellbeing, including recreational facilities, breakout spaces, green areas, and healthy dining options. We believe building appealing spaces enhances our customers' ability to attract their workforce to our properties, ultimately supporting high occupancy rates and sustained rental growth for our business.

**PROJECT** 

**INFORMATION** 

#### Building wellness into our business parks - Japan

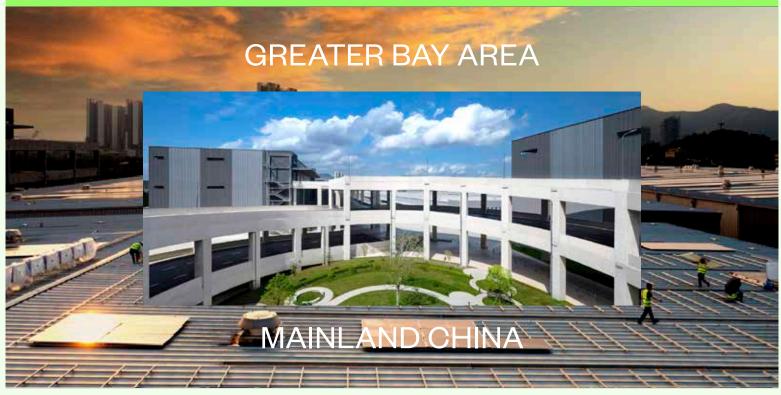

Since development got underway in 2014, Goodman Japan's first master-planned project at Goodman Business Park in Chiba was designed with customer health and wellness front of mind. The business park contains five logistics facilities and is serviced by a fast train from Tokyo and shared e-bikes onsite.

Goodman completed a wellness zone in FY23 featuring two running tracks that are nearly four kilometres long, and an outdoor gym catering to all fitness levels. The wellness zone builds on the existing health and wellbeing facilities at Goodman Business Park, which include a rest space for long-haul truck drivers that looks and feels more like a high-end airport lounge. It includes showers, Japanese 'tatami' sleep mats, a convenience store, a laundry, a kitchenette, and tables to eat and relax.

The business park also has a childcare centre to help our customers attract and retain employees, particularly women, in Japan's tight labour market. And it's more than a workplace – it also draws the neighbouring community to its restaurants and cafes, indoor gym, spa, hair salon, pet-grooming, soccer field and playground.

- + Located in Inzai City, Chiba, Greater Tokyo
- + 500,000 sqm of land master-planned by Goodman Japan
- + Five completed logistics facilities, each about 120,000 sqm of net lettable area.

#### **CASE STUDY:**

**PROJECT** 

Building wellness into our industrial parks – Mainland China

#### **INFORMATION**

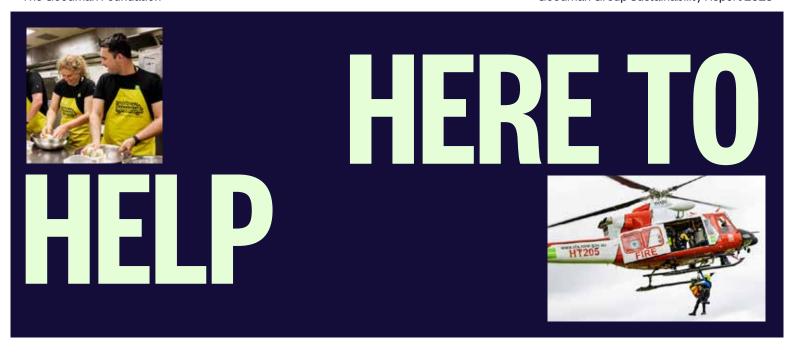

Usually, the space under a vehicle ramp at a busy logistics facility is used for storage. But what if it could be designed to support health and wellbeing instead? At Goodman's largest development in Mainland China, Goodman Huiyang Industrial Park, more than 2,000 employees from 11 of our customers are discovering the answer – more movement, exercise, and team bonding can lead to better physical and mental health.

At Huiyang Industrial Park, we designed two dedicated shared social, health and wellbeing spaces for customers as part of the 424,706 sqm gross floor area. The 1,600 sqm wellness park is protected from the weather and has basketball, table tennis and badminton courts as well as exercise equipment for individual use. Team sports are organised by customers and by Goodman's onsite Property Services team.

A separate building houses a 1,000 sqm customer amenity hub, exclusively designed for social, health and wellbeing activities. It features an auditorium, a gym, conference facilities and a spacious kitchen area with tables that are perfect for team lunches.

Facilities at workplaces that promote social interaction, health and wellbeing can help attract and retain employees. The customer amenity also contributes to our +95 percent occupancy rate at Goodman Huiyang Industrial Park. Encouraged by these positive results, Goodman China will explore the inclusion of similar spaces in future flagship developments.

- + Located in Huiyang district, Huizhou City, Guangdong Province, China
- + 2,600 sqm dedicated to shared customer social interaction and health and wellbeing spaces.

The Goodman Foundation brings together our people, properties and resources to address disadvantage in the world and make a tangible and sustainable difference. We partner with like-minded organisations and fund projects with clearly defined outcomes, to provide support where, and when, it's needed most. We are proud of how enthusiastically our people engage with the Foundation's partners across the world.

In FY23, the Goodman Foundation contributed \$10 million in cash, with another \$0.8 million in employee fundraising and in-kind contributions during the year. This takes our total investment to \$42.4 million since 2019, close to reaching our 2030 target of \$50 million ahead of time. Given the growing need for community support since 2019 when the 2030 Sustainability Strategy was launched, we will be increasing our 2030 target next year to \$100 million – more than doubling our investment in the communities where we operate.

READ MORE ABOUT THE FOUNDATION'S GOVERNANCE

## STRATEGY

Our global strategy focuses on three key areas, supplemented by our work in disaster relief and humanitarian aid.

Doing good in the world

Community and community health

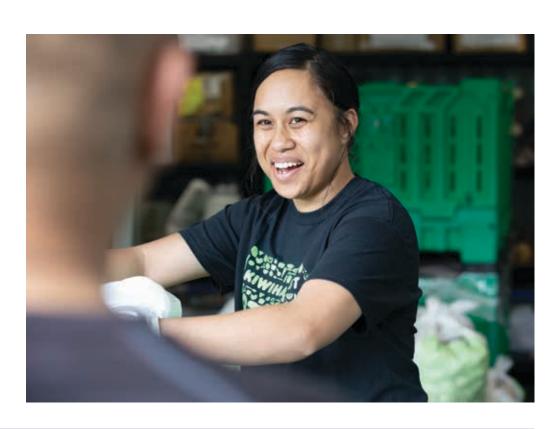

Goodman Foundation

Children and youth Food rescue and environment

LEARN MORE ABOUT OUR STRATEGY AND HOW WE HELP

KiwiHarvest, Auckland, New Zealand.

## **EMERGENCY RESPONSE**

Responding as swiftly as possible to fund disaster relief or humanitarian aid supports all three of the Goodman Foundation's focus areas. Where we can, we step up to help our community partners respond at speed or at scale to provide immediate assistance to impacted communities. Our support continues to help communities rebuild and recover, while we also contribute to disaster preparedness.

We continued to see serious disasters this year, such as the floods in Australia and New Zealand, the devastating earthquake in Türkiye and Syria, and the ongoing war in Ukraine. As such, disaster relief was a significant part of the Foundation's support for communities this year.

#### Supporting people affected by disasters around the world

The Foundation provided much-needed support to organisations responding to natural disasters around the world. When a massive earthquake hit Türkiye in February 2023, we supported Universitair Ziekenhuis Brussel (UZ Brussel) to purchase medical equipment, medication and other relief supplies for earthquake victims.

In New Zealand, the impacts of Cyclone Gabrielle and flooding in Auckland saw the Goodman Foundation provide additional funding for food rescue organisation KiwiHarvest, mobile laundry and shower service Orange Sky, and the Red Cross. In Australia, our funding has contributed to Good360 distributing over 1.8 million requested items to flood-affected communities with a total retail value of \$17.8 million.

Meanwhile, the state-of-the-art helicopter previously donated by the Foundation to the NSW Rural Fire Service, has assisted with rescue and recovery efforts for flooding, bushfires and other inclement weather events around the State. The helicopter also assisted police in searches for missing people and importantly, is a pivotal part of firefighting training in preparation for bushfire season.

LEARN ABOUT OUR ON-GOING WORK HELPING WOMEN AND CHILDREN TO SURVIVE THE CONFLICT IN UKRAINE

## CHILDREN AND YOUTH

The Goodman Foundation is working with communities around the world to give more children and young people the lifelong benefits of a high-quality education. Our focus is on education and employment pathways, mainly through targeted scholarship programs and mentoring.

### Supporting young people around the world through education

Education is the great enabler but, both globally and in Australia, not everyone has access. Poor educational outcomes affect a person's employment prospects, health and social connectedness.

In Australia, the school attendance rate of Aboriginal and Torres Strait Islander children is 14 percent lower than non-Indigenous students and as low as 63 percent, on average, in remote areas. To help address this, we have partnered with the Clontarf Foundation to help to close this gap and create multi-generational change, supporting at-risk First Nations boys to attend school, finish Year 12 and enter employment.

In Mainland China, New Zealand, Belgium and Brazil, we're working with community partners to provide scholarships, mentoring and education programs to enable people from low-socio-economic backgrounds complete school, undertake tertiary studies and develop skills for gaining employment and commencing meaningful careers.

# COMMUNITY AND COMMUNITY HEALTH

Our focus this year has been on addressing violence against women, mental health issues, particularly for young people, and supporting those living with a disability.

#### **CASE STUDY SUMMARY:**

Providing basic needs for woman escaping violence in the US and Australia

Developing technology to reduce depression in young people in Australia

Expanding mentoring programs to address mental health for school students in Australia

Moo Baulch, Chair, OurWatch, at the launch of the Our Watch Institute.

#### Driving long-term change

Violence against women and children is a serious global social and public health problem. The Goodman Foundation is investing heavily to lead prevention efforts in Australia by co-founding the Our Watch Institute to create a national movement to effect change led by Australian business. We're also working with organisations in Australia and the US to meet the immediate needs of women escaping violent situations with essential support such as shelter, financial assistance, clothing, psychosocial counselling and education for their children.

To help support those with mental health challenges, in Australia we've partnered with Black Dog Institute to develop a unique evidence-based digital therapy for young people experiencing depression. This year, we embarked on work to co-design a program with healthcare professionals to combine person-to-person therapy with the ClearlyMe® intervention. For the Raise Foundation, we increased our funding to support more than 800 young Australians to participate in their high school mentoring program, prioritising younger students who are at most risk of disengagement or poor mental health and wellbeing.

Community inclusion for those living with disability is an important part of this pillar and our work in this area supports babies born with cerebral palsy to receive early diagnosis and treatment, and meeting the needs of people with physical and/or intellectual disabilities in Japan and Spain.

# FOOD RESCUE AND ENVIRONMENT

The Foundation supports leading organisations in food and product rescue that redistribute items to people in need, while helping the planet by diverting waste from landfill. Food waste, food security and food relief are entwined issues – and with the cost-of-living escalating, they are growing global concerns.

#### Addressing food security as cost of living escalates

The Foundation has supported food rescue organisations around the world for years, often as a Founding Partner. With the rising cost of living and mental health issues in communities, there is a growing need to not only provide food relief but also additional services. When two major food rescue organisations, OzHarvest and UKHarvest, saw the need to broaden their services into community support hubs, they turned to the Goodman Foundation for support.

In Australia, with the Foundation's support, Refettorio OzHarvest in inner city Sydney not only provides nourishing meals but also provides people access to an OzHarvest-employed social worker who offers additional support for guests in a safe space.

UKHarvest is on a similar path, with community food hubs supporting people with nutritious food items, nutrition education, and service referrals and companionship. Goodman's funds are helping to create more community hubs in the UK, expanding to areas with a combined population of 30 million.

In the US, we're working with leading food rescue organisations to provide essential transport to help deliver meals to those in need. While in Japan, our support provides nutritious meal boxes to children under 12 in Fukushima, Kumamoto and Hiroshima prefectures. Back in Australia, we're focused on addressing food insecurity experienced by First Nations people through our work with FareShare.

#### **CASE STUDY SUMMARY:**

Companionship and community in food rescue hubs in the UK, NZ and Australia

Meeting food needs in the US

Expanding food relief to remote Australian communities

Providing nutritious food boxes to families in Japan

## EMPLOYEE VOLUNTEERING

Goodman supports our people to contribute positively to the communities we live and work in. Through our Give Back workplace giving and matching program, Goodman people globally donated and raised \$0.5 million including Foundation matching, for causes they feel strongly about.

Meanwhile, Goodman people volunteered almost 3,200 hours with our community partners, providing professional expertise, such as serving on the board of a not-for-profit, mentoring students and charity partners, as well as giving business advice or specialist skills to our partners. Hands-on volunteering, helping to get much needed food, clothes, equipment, and household goods to our partners, continued to be a feature for the teams volunteering this year.

#### **CASE STUDY SUMMARY:**

Magic Mile charity run breaks records in HK\$2.5M raised

Sleeping outdoors to raise money for homeless children and youth in Australia

# GORPORATE GOVERNANCE AND PERFORMANCE

Goodman's commitment to robust corporate governance helps maintain our reputation, workplace culture, operations, and strong financial and ESG results. We integrate these practices into our broader risk management approach, and comprehensive governance policies, helping us meet stakeholder expectations.

We operate under a risk management framework that is overseen by Goodman's Boards and the <u>Audit Risk and Compliance Committee</u>. Risk management is integral to our core operations and shapes Goodman's property investment approach, encouraging innovation and long-term decision making. It impacts how we fund our operations over the long-term, supporting financial resilience and sustainability-linked finance opportunities. Importantly, it helps set a culture where we can pursue opportunities, that not only manage our risks, but target positive sustainability outcomes. The Sustainability and Innovation Committee provides oversight specifically of Goodman's sustainability performance, as well Goodman's adoption of technology and innovation to support the broader business.

Our risk management framework extends to our workforce, who work under a <u>Code of Conduct</u> with clarity on our standards and the expectations that come with being part of the Goodman team. Our Code shapes how we operate responsibly and consistently across regions and supports efforts to manage risks within our global supply chains. It also helps to identify emerging risks, such as cybersecurity.

An effective corporate governance approach drives ESG accountability and regular performance disclosures. The effectiveness of our ESG disclosures is measured by our external ESG ratings and benchmarks.

Material drivers

- + Sustainable operations and results
- + Effective disclosures of ESG performance
- + Investing responsibly with defined governance and sustainable capital structure

#### **PROGRESS AGAINST TARGETS**

Target	Progress	
Retain investment grade credit rating	Continued to meet financial targets to underpin capital sources and retain credit rating. Maintained credit rating at BBB+ (S&P) and Baa1 (Moody's).	Maintain credit rating 2019 2023 BBB+ (S&P) and Baa1 (Moody's) Achieved
Retain strong ESG benchmark performance	Strong GRESB, MSCI and Sustainalytics ESG benchmark performance in FY23.	Strong ESG benchmarks 2023 2030 On track
Maintain effective annual climate risk disclosure aligned to the TCFD guidelines	Adopted Task Force on Climate-related Financial Disclosures (TCFD) guidelines in 2020 and updated in 2023.	Climate risk disclosure 2019 2020 2023  Achieved in 2020 Maintained in 2023

## RISK MANAGEMENT

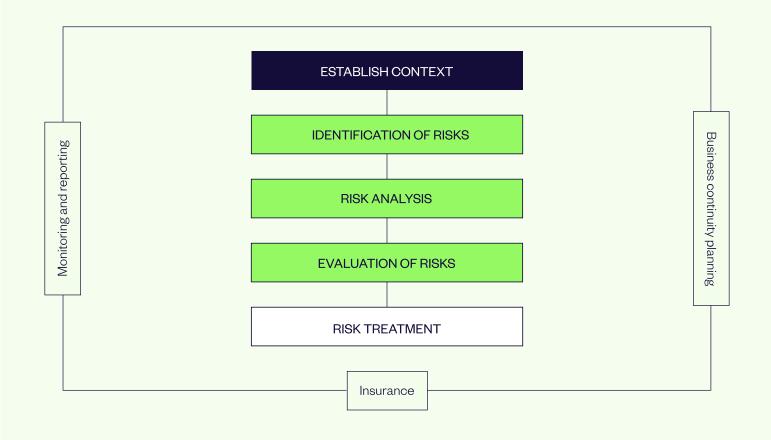

Goodman Itaquera, São Paulo. Brazil.

Developing, owning, and operating modern, efficient, and sustainable logistics properties in strategic city locations around the world, inevitably exposes Goodman to risks. These risks span short and long-term, financial, and non-financial aspects, including health, safety, reputation, operations, market, climate, and other factors.

Risk management is integral to Goodman and our ability to sustain our business, and safeguard our assets and investments. It helps maintain our financial stability, meet our ESG targets, and deliver on our overall business strategy. Our approach focuses on the identification, evaluation and controls to manage risk, as well as responding to opportunities that contribute to the delivery of our core business. The treatment of risks through this approach supports the development and delivery of world-class logistics properties for our customers.

Goodman's Risk Management Framework outlines our risk culture, governance, and management process. It's aligned to *Australia/New Zealand Risk Management Standard ISO31000:2018* and *ASIC's RG259 – Risk management systems of responsible entities*, which provide guidance on how to identify and manage sources of risk. We take a bottom-up / top-down approach to managing risk at Goodman. All employees are responsible for identifying and managing risk, while the Group's Risk team, Audit, Risk and Compliance Committee as well as Goodman's Boards oversee the global framework. The Sustainability and Innovation Committee oversees specific climate-related and ESG risks.

#### THE GOODMAN RISK MANAGEMENT PROCESS

#### VIEW GOODMAN'S RISK MANAGEMENT POLICY

#### Cybersecurity

Cybersecurity is an increasing corporate risk for companies, and Goodman is not exempt. We're actively managing our cybersecurity risks, safeguarding critical systems, networks, and Goodman's sensitive information from cyber-attacks.

Information and data security is part of Goodman's risk management framework and a priority for our Risk and Information Technology teams. Our security approach aligns with the principles of the globally recognised National Institute of Standards and Technology (NIST) Framework and involves:

- + Identifying key information systems and data
- + Applying controls to protect data and reduce business impact
- + Testing and detecting vulnerabilities
- + Being prepared to respond and recover systems and information in a cyber event.

Our overall program is assessed and measured annually, with quarterly updates provided to the Audit, Risk and Compliance Committee.

## GOVERNANCE OF ESG ISSUES

At Goodman, we are committed to the highest standards of corporate governance, recognising the role an effective governance framework plays in driving long-term business performance. This extends to governance concerning ESG matters, which is essential for maximising sustainable value for our Securityholders.

Goodman's Boards and Sustainability and Innovation Committee oversee our 2030 Sustainability Strategy, including our climate risk management response and progress against our sustainability targets. The Committee also reviews how we integrate innovation and technology, including investment and collaboration opportunities to support our business and sustainability outcomes.

The Boards, the Audit, Risk and Compliance Committee and Remuneration and Nomination Committee are responsible for overseeing performance relating to our social objectives and governance more broadly, including our commitments relating to our supply chain, human rights, and modern slavery.

We believe the sustainability of our business requires long-term strategic direction that prioritises ESG performance alongside financial outcomes. These measures are connected to our performance-linked remuneration strategy, which is integrated into the business to influence behaviour and incentivise outcomes.

All Goodman employees participate in the Long-Term Incentive Plan (LTIP). Goodman believes that ownership through the LTIP provides our team with a stake in the business, helping to embed a culture of inclusion in the organisation which is reflected in the Group's performance in recent years.

ESG performance forms part of all Goodman employees' performance reviews and remuneration, including adhering to the Group's Code of Conduct and values. This promotes integration of sustainability within our core business, and encourages working together as a global team to achieve our targets and sustainable financial results. Notably, vesting of awards under the LTIP are linked to specific financial and environmental targets.

The ESG performance targets approved by the Board in relation to the September 2023 award are linked to the remuneration structure and our 5-year and 10-year long term incentives and include:

- + 100% renewable electricity use within Goodman's operations by 2025
- + 400MW of solar PV installed or committed by 2025 with an additional 100MW installed or committed by 2030
- + Achieving and maintaining carbon neutral operations by 2025
- + Maintain and update our climate disclosures in line with the TCFD guidelines
- + Maintain a >95% occupancy rate
- + Embodied carbon emissions calculated and included in all Group Investment Committee development papers
- + 42% Scope 1 and 2 science-based emissions reductions by 2030 in line with 1.5°C Paris Agreement pathway and validated by SBTi.

Under the LTIP, up to 20 percent of performance rights that satisfy the Operating EPS hurdle can be forfeited if the Group underperforms on the Board-approved targets for each grant. The sustainability performance targets are reviewed annually by the Board.

Our Remuneration Report, part of our Annual Report, provides further detailed information on our ESG targets and remuneration.

VIEW ANNUAL REPORT

#### Code of conduct

At Goodman, we prioritise conducting ourselves and our business with integrity as it is critical to maintain our reputation, and is one of our key values. Our Code of Conduct (the Code) reflects these beliefs and establishes clear standards of professional and ethical behaviour for all who represent us.

This year, we reviewed our Code and the corporate governance policies referenced in it, confirming their continued appropriateness and relevance to Goodman.

Our Boards endorse the Code, which applies to everyone who works for Goodman, including non-executive directors (Directors), employees and contractors (team members). The Code also guides our interactions with all individuals we encounter at work, such as customers, suppliers, investment partners, regulators, and Securityholders.

At Goodman, we maintain zero tolerance for any improper or unethical conduct, including bribery and corruption. All team members receive training on ethical behaviour, including bullying, harassment, and anti-bribery and corruption. This year, we also conducted face-to-face Respect at Work training (sexual harassment) in Australia in line with the new positive duty on our business to prevent workplace sexual harassment, with 100 percent attendance from Group employees.

The Code outlines nine guiding principles to uphold Goodman's reputation for doing the right thing by our customers and team members. These principles complement Goodman's values, policies and procedures, and everyone representing Goodman is expected to follow them.

VIEW OUR GOVERNANCE POLICIES AND CHARTERS
VIEW GOODMAN'S CORPORATE GOVERNANCE STATEMENT

## ESG BENCHMARKS

Goodman uses ESG performance and rating benchmarks to assess and communicate our sustainability efforts to investors, enabling us to identify areas for improvement. We participate in global benchmarking programs such as Global Real Estate Sustainability Benchmark (GRESB), Sustainalytics' ESG Risk Ratings, the MSCI ESG Index, and the Carbon Disclosure Project (CDP).

#### **GRESB**

As a leader in real estate sustainability assessments, GRESB has been instrumental in assessing our sustainability progress. Over the past decade, we have performed well, and the number of Goodman participating entities and our scores have increased. For the 2023 submissions, 11 Goodman entities submitted data with the results to be released in October 2023. Notable achievements from the year prior include:

- + Goodman maintained its 'A' rating for its public ESG disclosure
- + Goodman Japan Core Partnership was ranked #1 in its peer group in the GRESB Standing Investments benchmark
- + Goodman European Partnership, Goodman UK Partnership, and Goodman Brazil Logistics Partnership were ranked #1 in their respective peer groups in the GRESB Development benchmark
- + Goodman Japan Core Partnership, Goodman Hong Kong Logistics Partnership, Goodman European Partnership, and Goodman UK Partnership all achieved the maximum 5 Stars for ESG performance
- + Goodman Australia Partnership received Regional Sector Leader status (Oceania, Diversified Office/Industrial).

Sustainalytics

Sustainalytics recognised Goodman Group as "ESG Industry Top Rated" and "ESG Regional Top Rated". Our strong 9.7 rating sees us remain in the lowest ESG risk category of 'Negligible', reflecting our strong and consistent management of ESG.

**MSCI** 

We have maintained our MSCI rating of 'AA', recognising our robust corporate governance, health and safety and human capital development.

CDP

Goodman New Zealand was one of only four entities to be awarded an A-CDP Climate Change score, the highest score achieved in the country.

Together these achievements demonstrate our ongoing commitment to sustainability and our efforts to disclose our performance.

## CAPITAL MANAGEMENT

#### Sustainable finance

A sustainability financing approach serves as a win-win, as it incentivises us to improve our sustainability performance while at the same time strengthening Goodman's capital structure.

Following the development of our Sustainability-Linked Bond Framework and release of our first US\$500 million of Sustainability-Linked Bonds in 2022, Goodman progressed sustainable finance initiatives in four of our operating regions during FY23.

- + In Hong Kong SAR, we established two sustainability-linked loans connected to our ongoing GRESB performance score
- + Our New Zealand business established two Green Loan facilities linked to Green Star Built ratings for multiple new developments
- + In our China portfolio, we entered into a Green Loan linked to LEED Gold certification of our Wujiang Industrial Park development and four unsecured sustainability-linked loans connected to our ongoing GRESB performance score
- + In Continental Europe, we have adopted a Green Finance Framework, aligned to best practice global green bond and loan guidelines, enabling the business to channel investments towards its sustainable investments. In addition, the Goodman European Partnership transitioned to an Article 8 product that promotes environmental and social characteristics under European Sustainable Finance Disclosure Regulation.

Goodman Wujiang Industrial Park, Greater Shanghai, Mainland China

#### Investment grade credit rating

Critical to our ongoing business sustainability is the ability to maintain a strong balance sheet with available liquidity and continuous access to both equity and debt capital.

Core to our capital mix are our investment partners who increasingly value ESG performance. Our partners include major pension and sovereign wealth groups, many of which have their own ESG policies and targets, supporting the integration of sustainability principles into Goodman's development and management activities.

As a result, Goodman's external ESG benchmarks are strong. Our financial sustainability and strength are reflected in our investment grade stable outlook and credit ratings of BBB+ (S&P) and Baa1 (Moody's) highlighting our commitment to responsible investments and capital stability.

## COLLABORATING FOR CHANGE

We collaborate with a range of industry groups and policy makers to help achieve positive environmental and social outcomes. We participate in working groups, taskforces and panels, contributing our specialist knowledge and expertise to drive the industry forward.

Some of our collaborations in FY23 include:

#### Circular Australia - Industry and Precincts and Infrastructure Taskforces - Australia

Industry collaboration working towards a circular economy and raising awareness of the opportunities relating to adaptive reuse of existing sites

#### Materials and Embodied Carbon Leaders' Alliance (MECLA) - Australia

Industry collaboration aiming to drive the supply and demand for lower embodied carbon products

#### NSW Government - Australia

Participation on the NABERS Warehouse and Cold Stores Advisory Panel and Working Group to develop a rating tool for customers to measure and promote energy efficiency in industrial buildings

#### NZ Green Building Council - New Zealand

Member of the Experts Reference Panel and contributed to the Green Star Buildings industry consultation process

#### Property Council NZ - New Zealand

Participation in the Climate Risk Leadership Group and Technical Working Group to help establish climate change scenarios for the property and construction sectors

#### Property Council of Australia (PCA) - Australia

Industry engagement and collaboration on policy and ESG issues such as ISSB and TNFD disclosure standards, SBTi guidelines, carbon offsetting and issues relating to modern slavery

#### UK PV Thought Leadership Group - United Kingdom

New member of the working group consisting of developers, real estate agents and consultants to try and resolve practical challenges around the implementation of solar PV

#### Urban Land Institute - Sustainability Council - Continental Europe

Collaboration between investors, developers, customers, public officials and academics to explore best practices in sustainable development including climate risks

#### Urbanlab Taskforce - Mainland China

Industry collaboration coordinated by JLL to promote innovation and technology to help meet ESG trends within the Chinese property sector

#### US Green Building Council - US and Mainland China

Contributed to the LEED building standard specifications update in the US and collaborated to develop a prototype to 'pre-certify' Goodman's LEED Gold for developments and streamline certification in Mainland China.

#### **CASE STUDY:**

**PROJECT** 

#### INFORMATION

## Collaborating with Government to develop a new energy performance rating

Even though our real estate sector is fiercely competitive, our local teams realise the benefit of collaboration for greater collective influence and positive environmental impact.

When the NSW Government announced the expansion of the National Australian Built Environment Rating System (NABERS) to cover tenant energy usage in warehouses and cold stores, our Australia business signed up to the Advisory Panel.

The Panel involved nearly 80 representatives from State and Commonwealth Governments, consultants, property groups and customers. Goodman worked together with industry to contribute our knowledge and experience to develop a new operational energy performance rating tool, NABERS Energy for Warehouses and Cold Stores.

The Australia business reached out to its customer, Metcash, to participate in one of 17 pilots, to test and refine the tool at their cold storage warehouse facility at Huntingwood. Following the pilot, feedback was provided to the NABERS team before the final version of the tool was launched in September 2022.

#### NABERS LAUNCHES ENERGY RATINGS FOR WAREHOUSES AND COLD STORES

Our Australian warehouse customers now have access to an energy performance tool, enabling them to measure and improve their performance across our stabilised industrial portfolio. The Australian team also created a fact sheet to inform customers across Australia about the new tool and encourage adoption.

Meanwhile, Metcash, after receiving its pilot rating, proactively hired a consultant to conduct an energy audit of its facility, aiming to identify areas for improvement and optimise energy use.

- + Goodman properties with onsite solar PV can expect to achieve a higher "NABERS Energy for Warehouses and Cold Stores" rating
- + The Australia team continues to work with the NSW Government on the NABERS Warehouse and Cold Store Working Group established in 2023 to improve uptake of the tool.

## ESG AFFILIATIONS AND PARTNERSHIPS

TOFD	The TCFD aims to guide companies in incorporating the considerations of the effects of climate change into business and financial decisions to help facilitate the transition to a more sustainable, lower carbon economy.	TCFD   TASK FORCE ON CLIMATE-RELATED FINANCIAL DISCLOSURES

Science based targets	The Science Based Targets initiative (SBTi) drives ambitious climate action in the private sector by enabling organisations to set science-based emissions reduction targets.	SCIENCE BASED TARGETS DRIVING AMBITIOUS CORPORATE CLIMATE ACTION
Climate leaders coalition	CLC is a group of cross-sectoral Australian corporate CEOs supporting the Paris Agreement commitments and setting public decarbonisation targets.	CLIMATE LEADERS COALITION

Goodman Group Greenhouse gas emissions operational carbon inventory

Annually, we report our operational carbon inventory to Climate Active as part of our commitment to maintaining certification as a carbon-neutral organisation. Our emissions boundary encompasses our corporate activities, and across our property portfolio in areas where we have control over day-to-day operations. We take full responsibility for these emissions, irrespective of our equity share in the properties.

Notably, our Climate Active carbon-neutral organisation certification boundary excludes emissions from our customers' activities within leased areas and our embodied emissions.

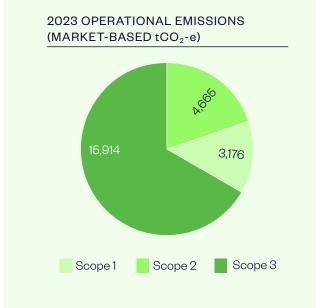

GHG Scope	Emissions Source tCO <sub>2</sub> .		2022 tCO <sub>2</sub> -e <sup>1</sup>	2023 tCO <sub>2</sub> -e
Scope 1	Fuels	898	846	888
	Natural Gas	1,001	899	805
	Refrigerants	1,414	1,360	1,483
Scope 2	Electricity (market-based)	37,065	11,637	4,665
	Electricity (location-based)	37,065	29,777	32,867
Scope 3	Electricity	4,032	2,251	3,053
	Fuels and Natural Gas	317	319	403
	Waste	3,073	2,975	1,350
	Business travel	432	542	2,303
	Employee commuting	292	438	575
	Other expenses <sup>2</sup>	4,438	4,139	8,231
	Total (market-based)	52,962	25,406	23,756
	Total (location-based)	52,962	43,546	51,958

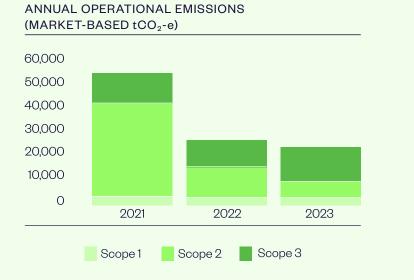

<sup>1.</sup> Due to the availability of more current data, previous data has been updated, where applicable

Previously, Goodman reported location-based electricity emissions which involved accounting for emissions from electricity purchases using publicly available electricity grid emissions factors.

Since 2022, Goodman adopted both location- and market-based electricity emissions reporting. Under the market-based approach, calculations for electricity emissions consider the retirement of renewable energy certificates.

 $<sup>2. \ \</sup> Water use, data servers, working from home, advertising, cleaning, telecommunications and other expenses.$ 

#### Science-based targets

The Science Based Targets initiative has validated Goodman Group's 2030 emissions reduction commitments.

Based on a 2021 baseline, our targets are to reduce total absolute Scope 1 and 2 GHG emissions by 42 percent. Additionally, we aim to lower Scope 3 emissions by 50 percent per square metre, covering both downstream leased and sold assets.

Our progress with our SBT is outlined below.

GHG Scope	Unit	2021	2022	2023	2030 target
Scope 1+2 (location-based)	tCO2-e	40,379	32,882	36,043	23,420
Scope 1+2 (market-based)	tCO2-e	40,379	14,742	7,841	
Scope 3	kgCO2-e/sqm leased assets	39.9	37.8	36.4	20
Scope 3	kgCO2-e/sqm sold assets	502.5	442.6	596.7	251

#### Sustainability-linked bond

Goodman Group issued a sustainability-linked bond in the Rule 144A / Reg S market in 2021, with maturity set for 2032. We based its performance criteria on our science-based targets for Scope 1 and Scope 2 emissions.

The table below illustrates our annual progress noting the substantial reduction in Scope 2 market-based emissions is primarily due to the use of GreenPower in our Australian operations and use of international renewable energy certificates (I-RECs).

GHG Scope	2021 (tCO2-e)	2022 (tCO2-e)	2023 (tCO2-e)	2030 target
Scope1	3,314	3,105	3,176	23,420
Scope 2 (location-based)	37,065	29,777	32,867	
Scope 2 (market-based)	37,065	11,637	4,665	

Externally verified by a qualified, independent reviewer.

Goodman Heshan Logistics Park, Greater Bay Area, Mainland China

#### Energy

Our property teams prioritise energy efficiency and implement enhancements to support our reduction trajectory, including lighting, building envelope, and energy monitoring upgrades.

Below is a summary of our energy consumption, encompassing all energy consumed from activities under our operational control. Electricity is the largest contributor to our energy footprint, highlighting the importance of onsite solar consumption and the use of renewable energy certificates.

Energy source	2023 (MWh)	Contribution %
Gasoline/Petrol	1,378	2
Diesel	1,893	3
Natural gas	4,340	7
Electricity	57,526	88
Total	65,137	100

### Chairman's letter

Goodman Group has delivered another excellent result in FY23 with operating earnings per security up 16% on the previous year. The location and quality of our properties, driven by the Group's sustainable, long-term strategy and the quality of our management team, are what continue to underwrite Goodman's success.

Within a tough economic environment and a growing digital economy, the Group remains committed to its business strategy. Over time we have seen the location of our properties attract a broader range of uses from the storage and movement of goods to data centres. This demand provides opportunities for Goodman to create value for Securityholders.

On occasions where land use changes are no longer aligned to our strategy, we work with rezoning and planning authorities before selling these assets to the relevant specialists. In many cases these are residential developers.

The Group remains prudent and disciplined in its capital management strategy, helping to facilitate long term sustainability of earnings and financial flexibility. With gearing low at 8.3% and \$3.1 billion of liquidity available to the Group, Goodman has the ability to fund organic growth through our substantial development program and also take advantage of opportunities as they arise.

#### Integrating sustainability

The success of the Group in FY23 also extends to its achievements across ESG initiatives. Sustainability remains a critical component of our business strategy and is more than a compliance function.

In addition to the strong financial performance for FY23, Goodman has made significant progress against all areas of our sustainability targets. Details are covered in the Group CEO's letter and in the Directors' report.

To oversee the environmental aspect of the ESG function, in October 2022, the Board established a Sustainability and Innovation Committee which has been focused on initiatives and investments that support sustainable developments, energy generation and storage solutions. It also assesses the impact and opportunities that emerging technologies, such as artificial intelligence, are expected to have on Goodman, our customers, and more broadly the way people will live, work and consume.

The social and governance areas are overseen by the Remuneration and Nomination Committee and the Audit, Risk and Compliance Committee.

Our sustainability-linked remuneration targets in the Group's Long Term Incentive Plan promote the integration of sustainability within the core business.

#### Remuneration

The attraction and retention of talent are critical for the success of the Group. We set ambitious and challenging targets for our business which are aligned to the interests of our Securityholders. We also continue to be challenged by competitors seeking to recruit our high-performing teams around the world. The Group's longstanding and consistent approach to remuneration has been a key driver of our sustained success as an international business over an extended period of time.

Despite receiving a second strike at last year's AGM, we recognise the significant support for our 2022 Remuneration Report which increased to over 71% from 58% a year before. While as a Board, we were naturally disappointed with the result, we were grateful at the overwhelming support for the Board in relation to the spill resolution. It is important to note that in the lead up to the AGM in 2022, we engaged directly with a large number of our investors representing approximately 60% of the securities on issue. Of this Group only a small proportion voted against the 2022 Remuneration Report. We received strong positive support for the plan structure, in particular our innovative ten-year plan for senior executives, and the changes from 2021.

Despite not receiving sufficient votes to avoid the strike in 2022, the Board is confident that a substantial majority of our Securityholders continue to believe firmly in our remuneration structure, and importantly its alignment with their long-term outcomes.

We have again reflected this sentiment in setting awards and hurdles this year. For our key management personnel:

- The STI component has been reduced by 10% (with the CEO continuing not to participate in STI awards)
- + The quantum of the FY24 LTI awards has also been reduced by 10% (to maintain the equivalent face value of the FY23 awards after taking into account the increase in the Goodman security price over the course of the year)
- + Challenging operating EPS hurdles (6% to 11% compound annual growth over a 4-year testing period and commencing from a substantially higher base) have again been imposed.

The remuneration awards are particularly significant in the context of the Group's FY23 performance, where operating EPS increased 16%, well ahead of the broader market and our own initial guidance.

The Board is always mindful of the focus on overall remuneration levels and spends considerable time each year determining remuneration outcomes in the context of our complex international operations. We recognise the need on the one hand, to attract, retain and incentivise our employees while, on the other hand, to meet the range of expectations of our Securityholders.

#### **Board appointments**

To meet the changing nature of our strategic drivers and match our geographic focus, we have continued to evolve and create a contemporary and diverse Board whose members bring together a broad global skill set. In line with the Board's diversity target of 40/40/20 for Non-Executive Directors, Board appointments over the past 18 months have seen four out of five positions be filled by females and three out of five by directors based outside of Australia, reflecting the global nature of Goodman's business.

Following the appointment of Hilary Spann and Vanessa Liu in 2022, both of whom are based in the USA, we recently appointed three new directors.

- Belinda Robson, based in Australia, was appointed in March and brings over 30 years' experience in retail and commercial funds management
- George Zoghbi, also based in Australia, was appointed in April. He is the CEO of Arnott's Group and brings extensive international consumer packaged goods and supply chain experience
- Kitty Chung, based in Hong Kong, was appointed to the Goodman Logistics (HK) Limited Board in July and has over 35 years audit and business advisory experience.

Belinda, George and Kitty will be standing for election to the Board at this year's Annual General Meetings. Full details of their experience are contained in the Notice of Meetings. Mark Johnson and I will stand for re-election.

I would like to acknowledge our long serving director, Phillip Pryke, who will be retiring from the Board in the first half of 2024. Phil, who chaired the Remuneration Committee from 2010 until earlier this year, has been instrumental in the formulation of the Group's remuneration strategies and to Board deliberations more generally. He has helped steward a successful international business with a strong shared culture and long-term focus that is a testament to the policies promoted by the Remuneration Committee. On behalf of the Board, I would like to thank Phil for his dedication and commitment to the Group over the last 13 years.

On behalf of the Board, I thank our customers and investors for their continued support, and all of Goodman's people for their significant contribution to the ongoing success of the business, in what has been a challenging economic environment.

#### Sincerely

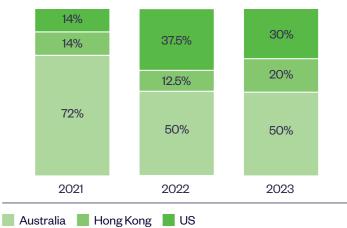

Stephen Johns Independent Chairman

# **Group CEO letter**

Goodman Group has continued to perform strongly in FY23, delivering positive results for our Securityholders. The quality and location of our sites has underpinned rental growth, property values and development activity.

Key financial highlights include:

- + Operating profit<sup>1</sup> of \$1.78 billion, up 17%
- + Operating EPS<sup>2</sup> of 94.3 cents, up 16%
- + Statutory profit of \$1.56 billion
- + 9% growth in Net Tangible Assets.

Key operational highlights include:

- + Total assets under management (AUM) of \$81.0 billion, up 11% on FY22
- + High portfolio occupancy of 99%3
- + Development work in progress (WIP) of \$13.0 billion
- + On track to achieve key Group sustainability targets including 306MW of solar PV installed or committed in FY23, taking us to 75% of our 400MW 2025 target.

#### Strong fundamentals delivering \$1.7 billion operating profit

Despite the macro uncertainty, the structural forces in our markets remain intact. They continue to be driven by the need for more efficient and sustainable assets, the growth of artificial intelligence, and the digital economy. Against this backdrop, there remains limited supply in our targeted markets.

Underlying property fundamentals remain strong, with high occupancy of 99% across our stabilised portfolio. While like-for-like net property income growth has increased to 4.7%, reversion to market remains significant. This should support growth in cash flows over the next few years, as well as valuations.

Development earnings were up 35% on FY22, increasing to \$1.3 billion. Our development workbook stands at \$13 billion with an annual production rate of approximately \$7 billion, and 99% of our developments were leased on completion. Yield on cost remains at 6.6% as our execution has been consistent, and we have continued to manage the rising cost environment.

Assets under management have grown 11% to \$81 billion, driven primarily by \$6.9 billion in development completions, in addition to acquisitions and revaluations across the Group and Partnerships. We delivered average total returns of 7.3% across the Partnerships and expanded the investment management platform with the establishment of four new Partnerships.

#### Balance sheet strength

Capital management discipline saw the Group maintain a strong balance sheet that provides flexibility to take advantage of opportunities. We raised \$1 billion of new equity commitments in Partnerships and completed \$6.4 billion of debt refinancing across the Group and Partnerships. The Group's gearing remains low at  $8.3\%^4$  while having \$3.1 billion of available liquidity, which provides financial flexibility. There is also significant liquidity of \$17.6 billion in the Partnerships<sup>5</sup>.

#### Value-add opportunities

Our strategy is also providing value-add opportunities, as we see increased competition for industrial sites from other uses such as data centres and residential rezoning. We've been developing data centres since 2010, and over that time they have grown to become a meaningful part of our business, in line with the rise of the digital economy. It currently constitutes approximately 30% of our \$13 billion development workbook, and importantly we have a pipeline of over 3GW which has significant value over time

Guided by our 2030 Sustainability Strategy, we continue to integrate ESG into the business. Our focus throughout FY23 remained on incorporating sustainable design features into our developments and reducing carbon emissions in line with our targets validated by the Science Based Targets Initiative. Highlights include reaching around 75% of our 2025 solar PV target and contributing \$10.8 million to community causes via the Goodman Foundation and our people.

#### FY24 outlook

Goodman is positioned well for FY24. Competition for land from a wide range of uses is constraining the availability of space in our markets and creating new opportunities for the Group.

We expect to see further opportunities to add value through site acquisition and redevelopment and have continued to maintain a strong balance sheet, which combined with retained income, provides significant liquidity, stability and financial resources to enable this. Our capital Partners are both prudent and supportive of investment into the Partnership platform.

We believe Goodman can continue to deliver growth despite the risks associated with current market volatility and expect FY24 operating EPS growth to be 9%.

#### Team effort

These results would not have been possible without our global team who live our values of integrity, determination, innovation and sustainability. I'd like to thank them, you, our securityholders, as well as our customers, and all other stakeholders for your continued support.

Sincerely

**Gregory Goodman** 

Group Chief Executive Officer

<sup>1.</sup> Operating profit comprises profit attributable to Securityholders adjusted for property valuations, derivative and foreign currency mark to market and other non-cash or non-recurring items.

<sup>2.</sup> Operating EPS is calculated using operating profit and weighted average diluted securities of 1,890.7 million which includes 12.1 million LTIP securities which have achieved the required performance hurdles and will vest in September 2023 and September 2024.

<sup>3.</sup> Partnership industrial and warehouse assets (excludes office properties which have been earmarked for redevelopment) and represents 95% of Partnership assets.

<sup>4.</sup> Gearing is calculated as total interest bearing liabilities over total assets, both net of cash and the fair values of certain derivative financial instruments included in other financial assets of \$81.7 million (30 June 2022: \$133.3 million). Total interest bearing liabilities are grossed up for the fair values of certain derivative financial instruments included in other financial liabilities of \$34.2 million (30 June 2022: \$79.6 million).

<sup>5.</sup> Partnership investments are subject to Investment Committee approval.

## **Corporate Governance 2023**

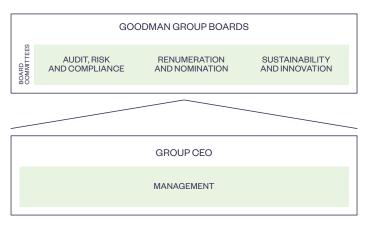

Goodman Group (Goodman or Group) is a triple stapled entity comprised of the Australian company, Goodman Limited (GL), the Australian trust, Goodman Industrial Trust (GIT) and the Hong Kong company, Goodman Logistics (HK) Limited (GLHK). The Boards of GL and Goodman Funds Management Limited as the responsible entity of GIT comprise the same directors while GLHK has a distinct Board with some overlap. Together they are referred to as the Boards.

The Goodman Boards and management team are committed to the highest standards of corporate governance and recognise that an effective corporate governance culture is critical to the long-term performance of the business.

Goodman's corporate governance framework underpins our commitment to maximise long-term sustainable value for Securityholders through:

- + Effective controls, risk management, transparency and corporate responsibility
- + Strategic planning and alignment of the interests of our people with those of Securityholders and other stakeholders
- + Meeting stakeholder expectations of a global ASX-listed entity through acting lawfully and responsibly while prudently managing both financial and non-financial risk.

#### Goodman's Corporate Governance Framework

In October 2022 the Board established the Sustainability and Innovation Committee to focus on sustainability matters and the impact of emerging technologies. In addition, in March 2023, the Board merged the Audit Committee and the Risk and Compliance Committee into the Audit, Risk and Compliance Committee, and the Remuneration Committee and the Nomination Committee into the Remuneration and Nomination Committee.

Goodman's Corporate Governance Statement can be viewed on our website at goodman.com/about-goodman/corporate-governance.

Goodman's core corporate governance framework documents including Charters and Policies are available at goodman.com/about-goodman/corporate-governance. Additional information for Securityholders is available at the Goodman Investor Centre at goodman.com/investor-centre.

The directors (Directors) of Goodman Limited (ABN 69 000 123 071) and Goodman Funds Management Limited (GFML), the responsible entity for Goodman Industrial Trust (ARSN 091 213 839), present their Directors' report together with the consolidated financial statements of Goodman Limited and the entities it controlled (Goodman or Group) and the consolidated financial statements of Goodman Industrial Trust and the entities it controlled (GIT) at the end of, or during, the financial year ended 30 June 2023 (FY23) and the audit report thereon.

Shares in Goodman Limited (Company or GL), units in Goodman Industrial Trust (Trust) and CHESS Depositary Interests (CDIs) over shares in Goodman Logistics (HK) Limited (GLHK) are stapled to one another and are quoted as a single security on the Australian Securities Exchange (ASX). In respect of stapling arrangements, Australian Accounting Standards require an acquirer to be identified and an in-substance acquisition to be recognised and accordingly GL is identified as having acquired control over the assets of GIT and GLHK. The consolidated financial statements of GL therefore include the results of GIT and GLHK.

As permitted by the relief provided in Australian Securities & Investments Commission (ASIC) Instrument 20-0568, the accompanying consolidated financial statements present both the financial statements and accompanying notes of Goodman and GIT. GLHK, which is incorporated and domiciled in Hong Kong, prepares its financial statements under Hong Kong Financial Reporting Standards and the applicable requirements of the Hong Kong Companies Ordinance and accordingly the financial statements of GLHK have not been included as adjacent columns in the consolidated financial statements. The financial statements of GLHK have been included as an appendix to this financial report.

GFML, as responsible entity for the Trust, is solely responsible for the preparation of the accompanying consolidated financial report of GIT, in accordance with the Trust's Constitution and the *Corporations Act 2001*.

#### **OPERATING AND FINANCIAL REVIEW**

#### **About Goodman**

Goodman Group is a global industrial property specialist, founded in Australia by Greg Goodman over 30 years ago. We provide essential infrastructure for the functioning of a modern economy that is adapting to digital innovation and ESG developments. We do so by owning, developing and managing high-quality properties that are close to consumers in key cities around the world.

We have 432 properties located in key consumer markets in 14 countries across Asia Pacific, Continental Europe, the United Kingdom and the Americas. With \$81.0 billion of assets under management, we are the largest property group on the Australian Securities Exchange, a top 20 entity by market capitalisation, and one of the largest listed specialist investment managers of industrial property globally. We invest significantly alongside our capital partners in our investment Partnerships, and work to provide sustainable long-term returns for our investors.

Our property portfolio includes logistics and distribution centres, warehouses, light industrial, multistorey industrial, business parks and data centres. But we're not just about real estate. We're about making a difference. We're a passionate team who work together to create a better future for our customers, our people, and the communities we operate in. We believe in innovation, determination, integrity, and sustainability and continually looking where we can optimise, increase resilience and make space for greatness in everything we do.

Environmental, Social and Governance (ESG) is integrated into Goodman's long-term business strategy. We make investment decisions based on strategic long-term thinking and operate with clear sustainability goals. The Goodman Group annual sustainability report provides additional detail supporting the strategies discussed within this report.

#### Our integrated business model

Goodman's Own Develop Manage model focuses our business on our customers' current and future needs.

We own and maintain high-quality properties close to consumers, we develop properties with specifications that include significant sustainability features, and we manage our global investment portfolio to the highest standards. We work alongside our capital partners, which include sovereign wealth, pension and large multi-manager funds.

In each market, our dedicated local teams take care of all aspects of property asset and investment management, enabling us to provide a high level of customer service.

Operating and financial review (continued)

#### **Our strategy**

#### Providing essential infrastructure for the digital economy

The way we live, work and consume is evolving. Urbanisation and population growth are changing our cities. There's a greater expectation that organisations act sustainably and prioritise health and wellbeing. Consumers are demanding faster and greener, and the need for data is growing very rapidly especially with the growing prospects for artificial intelligence.

Customer demand for our properties is driven by structural drivers including the growth of e-commerce, supply chain optimisation, and ongoing growth in data storage requirements. Customers want higher speed to market along with greater resilience in their supply chain and more sustainable properties.

Goodman takes a long-term view. Our strategy is to own assets close to consumers in key global markets where barriers to entry are high, supply is limited, and demand is strong. We concentrate our portfolio where we believe we can create the most value for customers and investors.

#### Productivity, efficiency, sustainability

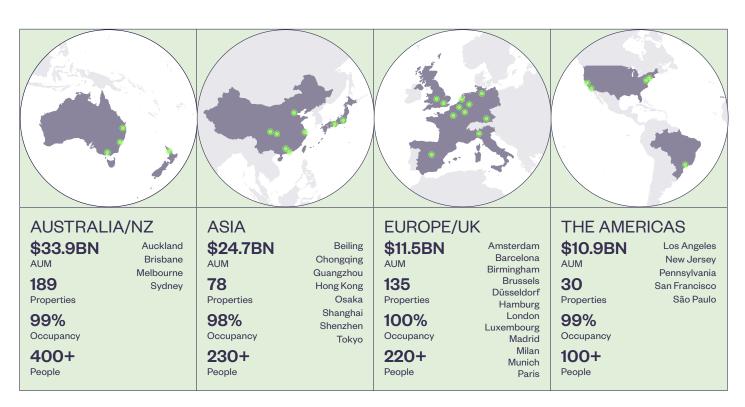

Within a highly competitive market, Goodman's long-term strategy is built on supporting our customers to operate in the most productive, efficient and sustainable way possible.

Our customers are looking to optimise their supply chain efficiency. It means the properties we develop for our customers can accommodate greater automation, are efficient and resilient, and well-located close to consumers. This can help our customers minimise costs and drive greater productivity from their properties.

#### Strategic locations

Our properties are strategically located in major consumer markets around the world and aim to meet the business, health and wellbeing needs of our customers. Our long-term horizon means we select sites with existing or future access to key transport networks and digital infrastructure. This provides our customers with greater connectivity and speed to market, helping them optimise distribution to meet rising consumer delivery and service expectations now and in the future. The close proximity also provides the opportunity to reduce transport costs and related carbon emissions – and can make access to labour and commuting to work easier for our customers' workforce.

Our focus on urban infill assets or brownfields sites that can be redeveloped, means we can often regenerate existing sites and revitalise communities, while minimising land use and our impact on biodiversity. These sites are often ideal for multi-storey facilities, optimising space and providing customers with centrally located facilities.

Operating and financial review (continued)

#### Our values

Goodman's values are integral to the success of the business. They shape our culture and focus our teams on delivering high-quality service, and innovative property and investment solutions over the long term. As part of the annual performance review process, our people are assessed on their demonstration of the Goodman values of innovation, determination, integrity and sustainability.

- + Innovation New ideas push our business forward. We focus on the future, proactively looking for new opportunities and improved solutions for our stakeholders that will make the world a better place for all of us.
- + **Determination** Determination gets things done. We are motivated by excellence and work hard to achieve it, actively pursuing the very best outcomes for our stakeholders.
- Integrity We have integrity, always. We work inclusively and transparently, balancing the needs of our business and our people, with the needs of the community and those we do business with.
- + Sustainability We are building our business for the long-term.
  That is why we consider the planet and the people on it in everything we do. Our initiatives demonstrate our ongoing commitment to having a positive economic, environmental and social impact on the world.

#### Our purpose

Goodman's purpose of making space for greatness recognises our stakeholders' needs and drives us to help them reach their full potential. Here's how we make space for greatness for each of our stakeholders.

#### Customers

Our customers come from a wide range of industries including e-commerce, logistics, retail, consumer goods, automotive, food production, pharmaceutical, life sciences, healthcare and technology. Regardless of their sector, they all need the right properties in the right locations. Proximity to their end consumer is key in order to increase speed to market and reduce transport costs and related emissions. Our customers are increasingly taking a strategic approach to their infrastructure decisions. They're boosting their investment in our buildings to maximise both supply chain efficiency and overall capacity as the digital economy grows.

To help our customers achieve their goals, we create spaces with sustainability in mind and provide them with excellent service, in high-quality locations. Here, the greatest ambitions of our customers can flourish as we give them the space and service support, they need to reach their goals.

#### Securityholders and investment partners

At Goodman, we invest in and manage the investment portfolio alongside our investment partners – some of the world's largest pension and sovereign wealth funds. We take a patient and long-term approach to managing capital and focus on growing a sustainable and resilient business over time.

This long-term approach guides our decision making. By owning, developing and managing high-quality properties in key locations, we provide both short-term and long-term benefits for our customers while simultaneously working to deliver sustainable returns for our Securityholders and investors.

#### Our people

Our team of around 1,000 people in 29 offices around the world is key to our long-term success. Skilled and diverse, team members use their expertise across the range of locations and cultures we operate in to deliver strong results. There are many opportunities for our people to get involved, to learn and to build rewarding careers.

Goodman encourages innovation. We look for people who want to realise their ambitions, challenge our thinking, drive change and develop new ideas that deliver a sustainable business – making a tangible difference today and long into the future. Through Goodman's Long Term Incentive Plan (LTIP), our team have a stake in our business, which motivates them to have a positive impact and take a long-term strategic approach to decision making.

#### Supply chains

We acknowledge that providing a high-quality sustainable offering to our customers is a team effort, requiring relationships built on integrity. Our network of suppliers extends from our general building contractors who we work with closely to build facilities for our customers, to the providers of our office supplies.

In each case, we respect the needs of our suppliers and provide an environment for them to succeed by setting high quality standards and practicing good business ethics across our operations and global supply chains. This ranges from implementing strategies against modern slavery to treating our suppliers as part of our team, keeping them safe and paying them fairly and on time. In return, we expect our suppliers to abide by our high standards and communicate these requirements within their own supply chains.

#### Our communities

As a long-term owner of properties, Goodman understands the importance of contributing to the local community. We build long-term relationships, engaging and collaborating with landowners, cities and municipalities, charity partners, and the community at large, to provide developments that meet our customers' needs and benefit the wider community.

Our properties add value to local communities and the wider economy by generating jobs, creating infrastructure, and enabling people to have the goods they need. They are developed in line with the local planning authorities' ambitions to build sustainable and resilient communities. Our urban infill developments, often on brownfield sites, optimise scarce land resources and support local regeneration. Our projects can also add social value – through the provision of cafes, fitness, and recreation facilities for the whole community to enjoy.

We add social value in other ways too – by working with local charities and community partners in all our markets to make a positive difference. Whether it's working with organisations on emergency response, prevention of violence against women and children, community and community health, children and youth, or food rescue and the environment, the Goodman Foundation provides tangible assistance that translates to real support where it's needed most.

As a global business headquartered in Sydney, Goodman considers the important role First Nations communities and peoples play in Australia. Our Reconciliation Action Plan (RAP) challenges us to think deeply about Goodman can contribute to a continent that is with fully reconciled with it First Nations peoples and this year our RAP received official endorsement. We have implemented cultural and community initiatives, and contributed \$1.7 million to First Nations peoples-focused community programs this year.

As it is closely aligned with operating cash generation, the Directors consider that Goodman's operating profit is a key measure by which to examine the underlying performance of the business, notwithstanding that operating profit is not an income measure under International Financial Reporting Standards.

INTEREST COVER<sup>4</sup>

36.7 times in FY22

<sup>1.</sup> Operating profit per security (operating EPS) is the operating profit divided by the weighted average number of securities on issue during FY23, including securities relating to performance rights that have not yet vested but where the performance hurdles have been achieved. Operating profit comprises profit attributable to Securityholders adjusted for unrealised net property valuations gains, non-property impairment losses, net gains/losses from the fair value movements on derivative financial instruments and unrealised fair value and foreign exchange movements on interest bearing liabilities and other non-cash adjustments or non-recurring items e.g. the share-based payments expense associated with Goodman's LTIP.

As it is closely aligned with operating cash generation, the Directors consider that Goodman's operating profit is a key measure by which to examine the underlying performance of the business.

<sup>2.</sup> Development work in progress (WIP) is the projected end value of active developments across Goodman and its investments in associates and joint ventures (referred to as Partnerships).

<sup>3.</sup> Gearing is calculated as total interest bearing liabilities over total assets, both net of cash and the fair values of certain derivative financial instruments included in other financial assets of \$81.7 million (2022: \$133.3 million). Total interest bearing liabilities are grossed up for the fair values of certain derivative financial instruments included in other financial liabilities of \$34.2 million).

<sup>4.</sup> Interest cover is operating profit before net finance expense (operating) and income tax (operating) divided by net finance expense (operating). The calculation is in accordance with the financial covenants associated with the Group's unsecured bank loans and includes certain adjustments to the numerator and denominator.

#### Overview

Given the successful execution of the key facets of the business, the Group has delivered another year of strong operating performance. Operating profit increased by 16.7% to \$1,783.2 million (2022: \$1,528.0 million). This equates to an operating EPS of 94.3 cents (2022: 81.3 cents), up 16.0% on FY22.

The scarcity of space in our locations, and customers' need for more productive and sustainable solutions is supporting underlying property fundamentals. These are driving development demand and rental growth. Despite the global macro-economic volatility, the fundamental strength of our specific markets means that our portfolio has almost zero vacancy and there remains impetus to continue to execute on our development strategy with the annual production rate of new properties during the year averaging around \$7 billion.

Consequently, both property investment earnings and development earnings are up on the prior year, with property investment earnings increasing by 7.4% to \$531.4 million and development earnings increasing by 35.4% to \$1,301.2 million.

The Group's net property uplift, after tax, including our share of the Partnerships, was \$264.1 million (2022: \$2,326.3 million). On an aggregated basis, the adverse valuation impacts from capitalisation rate expansion were mitigated by the growth in market rents and valuation uplifts from developments reaching completion. In response to rising interest rates throughout the year, the weighted average capitalisation rate for the stabilised assets in the portfolios increased from 4.0% to 4.5%. At the same time, the expected growth in cash flows from the properties in the portfolio has increased markedly. While there were fewer real estate transactions in FY23 compared to prior years, those transactions that did occur demonstrated that valuations for good quality logistics real estate in the right locations remain supported.

Our portfolio has continued to grow organically, primarily through development activity, with external assets under management increasing from \$68.7 billion to \$76.3 billion and total AUM increasing from \$73.0 billion to \$81.0 billion. As a result of the higher AUM, revenues from management services, which includes base management fees and property services income, increased to \$438.7 million (2022: \$380.4 million). However, performance related income from management services was lower in FY23 at \$41.9 million (2022: \$208.0 million), primarily because during the year there were fewer performance fee assessment dates within the Partnerships.

Goodman's statutory profit attributable to Securityholders decreased by \$1,854.1 million to \$1,559.9 million (2022: \$3,414.0 million), principally due to the lower net property valuation result during the year. The statutory profit is reported net of the accounting expense of the Goodman LTIP of \$286.0 million (2022: \$257.6 million) and a loss of \$225.8 million (2022: \$191.4 million) from derivative fair value movements (which is offset by a gain of \$360.6 million in the foreign currency translation reserve). These items, as well as the net property valuation gains, are excluded from the calculation of the Group's operating profit.

The strong financial position of the Group and Partnerships allows adaption to the volatile economic environment and the pursuit of opportunities that may emerge. At 30 June 2023, gearing was 8.3% (2022: 8.5%) and the cash and undrawn bank lines available to the Group were \$3.1 billion (2022: \$2.8 billion). Dividends and distributions relating to FY23 were maintained at 30 cents per security, equivalent to 32% of operating profit. The cash retained for future investment in the business enables the maintenance of a balance sheet and capital position that is consistent with our financial risk management targets given the significant development activity and the commensurate growth in investments that are expected in the near term.

Over the year, further progress was made on our ESG objectives, with FY23 targets met or exceeded. Further details will be provided in the Goodman Group Sustainability Report, which will be released before the 2023 Annual General Meeting (AGM).

#### Key operational highlights for FY23:

#### **Property investment:**

- + Property investment earnings of \$531.4 million (2022: \$494.6 million)
- + \$81.0 billion (2022: \$73.0 billion) of total AUM, of which the Group owns a whole or a part share
- + 4.7% (2022: 3.9%) like for like growth in net property income (NPI) from the assets in Partnerships
- + 99% (2022: 98.7%) occupancy across the Partnerships.

#### Management:

- + Management earnings of \$480.6 million (2022: \$588.4 million)
- + \$76.3 billion (2022: \$68.7 billion) of external AUM in Partnerships, of which \$68.8 billion (2022: \$60.6 billion) relates to stabilised properties
- + Partnerships reported 7.3% (2022: 21.4%) weighted average total return on net assets.

#### **Development:**

- + Development earnings of \$1,301.2 million (2022: \$960.7 million)
- + \$13.0 billion (2022: \$13.6 billion) of development WIP (by estimated end value)
- + 81% (2022: 85%) of WIP is currently conducted within, or pre-sold to, Partnerships or third parties.

Operating and financial review (continued)

#### Analysis of performance

Goodman's key operating regions are Australia and New Zealand (reported on a combined basis), Asia (Greater China, including the Hong Kong SAR, and Japan), Continental Europe, the United Kingdom and the Americas (principally North America and including Brazil). The operational performance can be analysed into property investment earnings, management earnings and development earnings, and the Directors consider this presentation of the consolidated results facilitates a better understanding of the underlying performance of Goodman given the differing nature of and risks associated with each earnings stream.

Property investment earnings consist of gross property income (excluding straight lining of rental income), less property expenses, plus Goodman's share of the operating results of Partnerships that is allocable to property investment activities which excludes the Group's share of property revaluations and derivative mark to market movements. The key drivers for maintaining or growing Goodman's property investment earnings are increasing the level of AUM (subject also to Goodman's direct and indirect interest), maintaining or increasing occupancy and rental levels within the portfolio, and controlling operating and financing costs within Partnerships.

Management earnings relate to the revenue from managing both the property portfolios and the capital invested in Partnerships. This includes performance related revenues but excludes earnings from managing development activities in Partnerships, which are included in development earnings. The key drivers for maintaining or growing management earnings are activity levels, asset performance, and increasing the level of AUM, which can be impacted by property valuations and asset disposals and is also dependent on liquidity including the continued availability of third party capital to fund both development activity and acquisitions across Goodman's Partnerships.

Development earnings consist of development income, plus Goodman's share of the operating results of Partnerships that is allocable to development activities, plus net gains or losses from disposals of investment properties and equity investments that are allocable to development activities (including the Group's share of realised valuation gains booked in prior periods in respect of properties that had been repositioned – refer to page 23), plus interest income on loans to development joint ventures (JVs), less development expenses. Development income includes development management fees and also performance related revenues associated with managing individual development projects in Partnerships. The key drivers for Goodman's development earnings are the level of development activity, land and construction prices, property valuations and the continued availability of third party capital to fund development activity.

The analysis of Goodman's performance and the reconciliation of the operating profit to profit for the year attributable to Securityholders for FY23 are set out in the table below:

	Note	2023 \$M	2022 \$M
Analysis of operating profit			
Property investment earnings		531.4	494.6
Management earnings		480.6	588.4
Development earnings <sup>1</sup>		1,301.2	960.7
Operating earnings		2,313.2	2,043.7
Operating expenses		(372.5)	(349.3)
		1,940.7	1,694.4
Net finance expense (operating) <sup>2</sup>		(13.5)	(39.3)
Income tax expense (operating) <sup>3</sup>		(144.0)	(127.1)
Operating profit		1,783.2	1,528.0
Adjustments for:			
Property valuation related movements			
- Net gain from fair value adjustments on investment properties	5(e)	278.9	260.1
- Share of fair value adjustments attributable to investment properties in Partnerships after tax	5(f)	544.7	2,272.9
- Deferred tax on fair value adjustments on investment properties	4(d)	(47.7)	(206.7)
- Realisation of prior years' property valuation gains, net of deferred tax1		(511.8)	-
		264.1	2,326.3
Fair value adjustments related to hedging activities			
- Fair value adjustments on derivative financial instruments	14	(221.3)	(189.7)
- Share of fair value adjustments on derivative financial instruments in Partnerships	5(f)	(4.5)	(1.7)
		(225.8)	(191.4)
Other non-cash adjustments or non-recurring items			
- Share based payments expense	1	(286.0)	(257.6)
- Straight lining of rental income and tax deferred adjustments		24.4	8.7
		(261.6)	(248.9)
Profit for the year attributable to Securityholders		1,559.9	3,414.0

<sup>1.</sup> Consistent with the 2021 amendment of the Group's operating profit policy (refer to page 23), Goodman has categorised \$511.8 million of property valuation gains that were realised during the current financial year in development earnings. These gains, which occurred in prior periods, related to investment properties (both directly and indirectly held) that had been repositioned for development activities and subsequently sold. The amount of \$511.8 million represents the cumulative valuation gains (as required under accounting standards) since the most recent repositioning activities commenced with \$163.0 million relating to the disposal of directly held investment properties and \$348.8 million relating to the disposal of investment properties in the Partnerships. In the reconciliation of the operating profit to profit attributable to Securityholders, these gains have been notionally offset against the current year valuation gains so that they are not double counted.

<sup>2.</sup> Net finance expense (operating) excludes derivative mark to market movements, and in FY22 interest income from related parties of \$6.2 million that was reported as development earnings in the analysis above.

<sup>3.</sup> Income tax expense (operating) excludes the deferred tax movements relating to investment property valuations and other non-operating items, such as the Group's LTIP.

Operating and financial review (continued)
Analysis of performance (continued)

#### Property investment

Property investment earnings in FY23 of \$531.4 million (2022: \$494.6 million) increased by 7.4% on the prior year and comprised 23% of the total operating earnings (2022: 24%).

	2023 \$M	2022 \$M
Analysis of property investment earnings		
Direct	87.4	103.7
Partnerships	444.0	390.9
	531.4	494.6
	2023	2022
Key metrics:		
Weighted average capitalisation rate (WACR) (%)	4.5	4.0
Weighted average lease expiry (WALE) (yrs)	5.5	5.2
Occupancy (%)	99	99

Goodman's property portfolios are concentrated in large, urban locations where available space remains restricted, driven by significant customer demand, combined with relatively high barriers to entry and limited supply. Consequently, we have seen significant market rental growth across many locations globally. This is supporting strong underlying investment fundamentals and cash flows in our portfolio.

The majority of the directly held properties have potential for significant long-term growth from redevelopment to more intense or higher and better uses. The net income from the Group's directly held properties decreased to \$87.4 million (2022: \$103.7 million) as a result of disposals to both Partnerships and external third parties or the deliberate creation of vacancy to facilitate their redevelopment. However, this was partly offset by further acquisitions and rental growth.

The more significant component of the Group's property investment earnings was from its cornerstone interests in the Partnerships.

The earnings from the Group's share of these stabilised assets increased by \$53.1 million to \$444.0 million (2022: \$390.9 million). This was due to the stabilisation of developments in FY22 and FY23, as the Group has continued to invest in the Partnerships to fund its share of those developments and rental income growth from existing stabilised properties, partly offset by higher interest expense. NPI from the Partnership portfolios in FY23 was up by 4.7% (2022: 3.9%) on a like for like basis compared to FY22 and average occupancy was maintained at 99%.

During FY23, the Group's share of property valuations from the stabilised portfolios (before deferred tax) was \$721.9 million (2022: \$2,138.8 million), which included valuation uplifts of \$465.3 million (2022: \$204.3 million) on developments that reached completion during the year.

The valuation gains were predominantly in Australia and North America, where growth in market rents and the valuation uplifts on development completions more than offset the impacts of higher capitalisation rates. At 30 June 2023, the WACR for the Group's portfolios was 4.5%, compared to 4.0% at the start of the financial year.

The operating income return on Goodman's investment in the stabilised portfolios held by the Partnerships was 3.5% compared to 4.2% in FY22 due to the higher asset base following the extremely strong valuation results in the prior year, partly offset by increased earnings. The net valuation uplifts in the current year resulted in a 7.3% total return for FY23. Gearing was maintained at the lower end of target ranges, which continued to be appropriate given the ongoing development activity and the aim of Goodman and its investment partners to position the Partnerships for sustainable long-term growth.

#### Management

Management earnings in FY23 of \$480.6 million (2022: \$588.4 million) decreased by 18% compared to the prior year and comprised 21% of total operating earnings (2022: 29%). This decrease was due to lower performance related income partly offset by higher base management and property service fee income.

Excluding performance related income, management fee income earned from the overall management of the Group's Partnerships was \$438.7 million (2022: \$380.4 million). The higher base management fees were primarily a result of the increased AUM. During FY23, external AUM increased to \$76.3 billion from \$68.7 billion, primarily due to acquisitions and developments in the Partnerships and the favourable impact of foreign currency translation.

#### **External AUM**

	FY2023 \$B
At the beginning of the year	68.7
Acquisitions	3.7
Disposals	(0.7)
Capital expenditure (developments)	2.8
Valuations	0.5
Foreign currency translation	1.3
At the end of the year	76.3

Performance fee revenue was \$41.9 million (2022: \$208.0 million), lower than the prior year in part because there were fewer performance fee assessment dates during the year and in part because of the volatility in financial markets, which makes assessments of future performance fees more difficult to predict, even when performance to date has exceeded the relevant performance hurdle. There still remains a significant backlog of potential fees that may be earned in the future if the relevant conditions are met.

For FY23, the Partnerships reported a weighted average total return on net assets of 7.3% (2022: 21.4%).

#### Development

In FY23, development earnings were \$1,301.2 million (2022: \$960.7 million), excluding unrealised valuation gains. This represents an increase of 35% on the prior year and development earnings comprised 56% of total operating earnings (2022: 47%).

The quality and location of our sites has underpinned the strength of the development workbook. The average annualised production rate (based on expected development end value) has been maintained at \$7.0 billion. The scarcity of available space has driven growth in rents, and combined with the Group's strong risk management and cost control, this has resulted in project margins being maintained, despite the volatility in global financial markets.

At 30 June 2023, WIP (based on development end value) was \$13.0 billion (2022: \$13.6 billion). The WIP is globally diversified across 81 projects and the majority of development activity was undertaken by or for the Partnerships and third parties (81% of WIP at 30 June 2023). The Group continues to selectively consider tightly held, strategic, large scale sites that display infrastructure-like characteristics, and sites that can be rezoned to higher and better use or value-add opportunities. The reduction in the total WIP has not had an adverse effect on the production rate as the projects that completed in the period included high rise properties in Hong Kong that have a much greater than average development period.

The Group remains focused on regeneration of existing land and buildings and enhancing value through intensification of use such as multi-storey developments. Goodman is continuing to add opportunities to its portfolio incrementally to support future development in constrained markets, while reducing its impact on the environment through brownfield developments. Brownfield developments and regeneration of sites continue to be greater than 50% of global WIP.

Data centre demand has risen markedly in recent times and the outlook for the near term remains strong. The providers of these services are adding to the demand for the Group's developments and simultaneously reducing the supply of space for other uses.

In locations where the supply of available land is restricted, the Group continues to commence certain projects prior to securing a pre-lease commitment. Consequently, of the \$6.0 billion of project commencements during the year, 57% had pre-committed leases. Commencing development without pre-leases in place is not unusual, and it is common to see leasing occur during the development period. Of the \$6.9 billion of development completions during the year, 99% had been leased, a reflection of the customer demand and the Group's ability to convert that into lease contracts during development.

Operating and financial review (continued)
Analysis of performance (continued)

#### Operating expenses

For FY23, operating expenses were \$372.5 million, up from \$349.3 million in the prior year, an increase of \$23.2 million.

Employee expenses were \$271.6 million, up from \$258.9 million in the prior year. The Group's aim is to keep base remuneration costs relatively steady, and instead use variable remuneration to incentivise staff. Globally, the Group has 971 employees at 30 June 2023, which is a relatively low number for a business of Goodman's size.

Administrative and other expenses increased to \$100.9 million from \$90.4 million primarily due to inflationary pressures in most regions, recommencement of international travel and higher expenditure on information technology.

#### Net finance expense (operating)

Net finance expense (operating), which excludes interest income on loans to development JVs, derivative mark to market and unrealised foreign exchange movements, decreased to \$13.5 million from \$39.3 million. This was due to higher interest earnings. There was also an increase in capitalised interest, with more development capital allocated directly by the Group.

#### Income tax expense (operating)

Income tax expense (operating) for FY23 at \$144.0 million (2022: \$127.1 million) increased compared to the prior year, primarily due to the nature and geographic location of the Group's growing earnings.

However, it should be noted that a significant proportion of Goodman's property investment earnings related to GIT and its controlled entities, which, as trusts, are 'flow through' entities under Australian tax legislation, meaning Securityholders (and not GIT) are taxed on their respective share of income.

On 9 May 2023, the Australian Government announced it will implement key aspects of Pillar Two of the OECD/G20 Two-Pillar Solution to address the tax challenges arising from digitalisation of the economy. The measure is not yet enacted, but the intention is that large multinational enterprises, such as Goodman, will be subject to a minimum global tax rate of 15%. This would apply to Goodman from 1 July 2024.

Management will continue to review the impacts of the proposed changes when further details are available. There are no impacts arising from the proposed legislation in the results for the year ended 30 June 2023.

#### Capital management

#### Interest bearing liabilities

At 30 June 2023, the Group's available debt facilities and fixed rate long-term bonds totalled \$5.0 billion, of which \$3.3 billion had been drawn, and had a weighted average maturity of 5.5 years. The Group's cash and undrawn bank facilities totalled \$3.1 billion and there are no significant debt maturities until 2025.

At 30 June 2023, gearing was 8.3% (2022: 8.5%), which continued to be at the lower end of the Group's policy range of 0% to 25%. Interest cover was 48.3 times (2022: 36.7 times) and the Group continued to have significant headroom relative to its financing covenants. Goodman's strong investment grade credit ratings were unchanged over the year.

Including the Partnerships, the Group completed \$6.4 billion of debt financing to refinance and expand its capacity. The Group also secured \$1.0 billion in third party equity commitments, which will provide capacity for future acquisition and development opportunities. At 30 June 2023, the Partnerships had \$17.6 billion in available cash, undrawn bank facilities and equity commitments, noting that the majority of the equity commitments remain subject to the approval by the relevant investment partners, including Goodman, of proposed property investments for which the funding is required.

#### Dividends and distributions

The Group's distribution for FY23 was maintained at 30 cents per security, a pay-out ratio of 32%, with 15 cents per security paid on 24 February 2023 and 15 cents per security to be paid on 25 August 2023. This retained income assisted the Group in obtaining sufficient funds for its ongoing development activity and in keeping gearing at an appropriate level, within the desired range. The distribution reinvestment plan was not in operation during the year.

In respect of the separate components that comprise the 30 cents per security distribution for FY23:

- + Goodman Limited did not declare any dividends during the financial year (2022: \$nil)
- Goodman Industrial Trust declared and accrued distributions of 25.0 cents per security (2022: 27.5 cents per security), amounting to \$470.4 million (2022: \$513.8 million)
- + GLHK declared and accrued a dividend of 5.0 cents per security (2022: 2.5 cents per security), amounting to \$94.2 million (2022: \$46.7 million).

# Summary of items that reconcile operating profit to statutory profit

#### Property valuation related movements

The net gain from fair value adjustments on investment properties directly held by Goodman was \$278.9 million (2022: \$260.1 million). The uplift in value was primarily due to repositioning activities on sites in Australia and included \$55.3 million that related to investment properties under development.

Goodman's share of net gains from fair value adjustments before deferred tax attributable to investment properties in Partnerships was \$508.1 million (2022: \$2,330.8 million), with increases in market rents and uplifts on stabilisation of developments partly offset by an expansion in capitalisation rates. This valuation uplift comprised \$498.3 million (2022: \$1,878.7 million) in respect of the stabilised portfolio, including the uplifts on developments that stabilised during the year, and \$9.9 million (2022: \$452.1 million) from investment properties that were still under development at 30 June 2023.

At 30 June 2023, the WACR for Goodman's stabilised property portfolios (both directly held and Partnerships) was 0.5 percentage points higher than 30 June 2022, increasing from 4.0% to 4.5%.

Fair value movements on properties subject to contracts for disposal

Given the increase in size and scale of the Group's projects over the past few years, it has become common for development periods to extend beyond 12 months. Consequently, these properties have become subject to more significant fair value adjustments at reporting dates. If the Group was to apply its historic operating profit policy, then these valuation movements would not form part of the Group's operating profit, although they would still be reflected in the Group's statutory profit attributable to Securityholders (as a valuation movement).

In the 2021 financial year, in order to better align performance measurement with the commercial outcomes that are linked to the cash generation from these repositioning activities, the Directors amended the Group's operating profit policy in respect of a property disposal. Under the amended policy, any property valuation movements arising between the date of commencement of the most recent repositioning activities and the date of disposal should be reported as part of development earnings, but only in the reporting period when the property has been sold. The effect of this is that the operating profit will reflect the cash gain in the period in which the transaction completes.

During FY23, \$511.8 million of gains were realised on completion of such transactions and as a consequence this amount has been reported as part of the Group's operating profit for FY23. In the reconciliation of the operating profit to profit attributable to Securityholders, these gains have been notionally offset against the current year valuation gains so that they are not double counted.

At 30 June 2023, the Group's share of cumulative unrealised valuation gains on properties that were subject to contracts for disposal but had not yet been derecognised was \$271.3 million (2022: \$429.6 million). These gains have been reported as part of the Group's statutory profit attributable to Securityholders in either the current or prior periods and would form part of future years' operating profit if and when the transactions are settled.

There were no impairment losses associated with the Group's inventories during the year.

#### Fair value adjustments relating to hedging activities

The amount reported in the income statement associated with the Group's derivative financial instruments was a net loss of \$225.8 million (2022: \$191.4 million net loss). This was primarily due to the weakening of the AUD against most of the Group's foreign currencies, partly offset by a strengthening of the AUD against the JPY and the impact of higher interest rates on the interest rate hedge contracts.

Under the Group's policy, it continues to hedge between 65% and 90% of the net investment in its major overseas operations. Where Goodman invests in foreign assets, it will borrow in that currency or enter into derivative financial instruments to create a similar liability. In so doing, Goodman reduces its economic exposures to those currencies. The unrealised fair value movement of the derivative financial instruments (up or down) is recorded in the income statement; however, the foreign currency translation of the net investment that is being hedged is recorded directly in reserves. In FY23, the movement in reserves attributable to foreign currency movements was a gain of \$360.6 million (2022: \$145.3 million gain).

#### Other non-cash adjustments or non-recurring items

The principal other non-cash adjustments or non-recurring items for FY23 related to the share-based payments expense of \$286.0 million (2021: \$257.6 million) for Goodman's LTIP. The increase was primarily due to the movement in the Goodman security price, from \$17.84 to \$20.07 in FY23 compared to a decrease from \$21.17 to \$17.84 in FY22, which resulted in a higher expense on remeasurement of the cash settled performance rights.

Operating and financial review (continued)

#### Statement of financial position

	2023 \$M	2022 \$M
Stabilised properties	2,086.2	2,387.1
Cornerstone investments in Partnerships	14,328.7	11,903.9
Development holdings	4,565.4	4,455.2
Intangible assets	850.1	795.4
Cash and cash equivalents	1,360.1	1,056.0
Other assets	836.7	834.8
Total assets	24,027.2	21,432.4
Interest bearing liabilities	3,292.9	2,832.2
Other liabilities	2,709.5	2,175.4
Total liabilities	6,002.4	5,007.6
Net assets	18,024.8	16,424.8

At 30 June 2023, the carrying value of the directly held stabilised investment properties, which included assets held for sale of \$509.6 million (2022: \$598.1 million), decreased by \$300.9 million to \$2,086.2 million at 30 June 2023. This was due to disposals of \$918.9 million, partly offset by acquisitions and development expenditure of \$131.9 million, development completions of \$233.0 million, valuation uplifts of \$223.6 million and foreign currency translation gains of \$27.4 million.

The value of Goodman's cornerstone investments in Partnerships, which excludes the Group's share of their development assets, increased by \$2,424.8 million to \$14,328.7 million. The movements during the year included the Group's net investments in the Partnerships of \$340.0 million, the valuation uplifts (net of deferred tax) across the portfolios of \$536.8 million, transfers from development properties on stabilisation of \$1,231.8 million and the impact of foreign currency translation \$245.2 million.

Goodman's development holdings increased by \$110.2 million to \$4,565.4 million (2022: \$4,455.2 million). Overall, activity levels were maintained across the year, with the Group's development WIP (as measured by estimated end value) at 30 June 2023 being slightly lower at \$13.0 billion (2022: \$13.6 billion) and the average production rate being consistent with the prior year at \$7.0 billion per annum. However, there has been a change in the mix of development holdings between directly held assets and the Group's share of the Partnerships.

The directly held development assets (both inventories and investment properties) increased by \$639.3 million to \$2,615.7 million (2022: \$1,976.4 million), with acquisitions and capital expenditure of \$1,023.8 million, valuation uplifts of \$55.3 million and foreign currency translation gains of \$66.1 million. These increases were partly offset by disposals and transfers to stabilised assets at completion of \$506.7 million.

The Group's share of development assets in the Partnerships decreased by \$529.1 million to \$1,949.7 million (2022: \$2,478.8 million). This was due to a significant level of transfers to stabilised assets at completion of \$1,231.8 million, disposals to third parties at completion of \$186.8 million partly offset by acquisitions of \$818.0 million, foreign currency translation gains of \$50.0 million and valuation uplifts of \$9.9 million (\$7.9 million, net of deferred tax).

The principal goodwill and intangible asset balance is in Continental Europe. The movement during the year related to changes in foreign currency exchange rates. There were no impairments or reversals of impairments.

The movement in the cash balance during the year is explained in the cash flows section of this report. In respect of the interest bearing liabilities, Goodman has renegotiated a number of bank facilities to provide ongoing funds for the business and to repay the foreign private placement of ¥12.5 billion that matured in April 2023. There are no maturities in the next 12 months and all drawn debt is disclosed as non-current.

Other assets included receivables, right of use assets from the Group's operating leases (primarily office premises) and the fair values of certain derivative financial instruments, which hedge the Group's interest rate and foreign exchange rate risks. There were no material movements during FY23.

Other liabilities included trade and other payables, lease liabilities, the provision for distributions to Securityholders, fair values of certain derivative financial instruments and tax liabilities (including deferred tax). The increase in other liabilities is primarily due to development related payables and increased liabilities associated with the Group's derivative financial instruments.

#### **Cash flows**

	2023 \$M	2022 \$M
Operating cash flows	1,284.2	841.0
Investing cash flows	(716.0)	(1,001.5)
Financing cash flows (excluding dividends and distributions)	253.3	856.9
Dividends and distributions paid	(562.1)	(557.2)
Net increase in cash held	259.4	139.2
Cash and cash equivalents at the beginning of the year	1,056.0	920.4
Effect of exchange rate fluctuations on cash held	44.7	(3.6)
Cash and cash equivalents at the end of the year	1,360.1	1,056.0

#### Operating cash flows

Operating cash flows of \$1,284.2 million (2022: \$841.0) million were higher than the prior year. This was mainly due to higher net cash inflows associated with development inventories and an increase in cash received from the Partnership distributions, partly offset by an increase in other cash payments and lower cash receipts from portfolio performance fees.

The net development cash inflow was \$827.1 million (2022: \$367.1 million). This has remained the primary reason for the difference between operating cash flow and operating profit. The gross receipts from development activities were lower than the prior year at \$1,416.7 million (2022: \$1,587.8 million) primarily due to the timing of inventory completions. The gross payments for development activities were much lower than the prior year at \$589.6 million (2022: \$1,220.7 million), which was due to the nature and structure of the Group's development activities – a greater proportion of the Group's development spend has been reported in investing cash flows during FY23, either as payments for investment properties or investments in Partnerships. Nevertheless, the Group has continued to invest in inventory and expects to recover its investments and generate a margin from them in future periods.

The increase in other cash payments was due to an increase in operating costs, driven by inflationary increases in wages and salaries and additional spend in areas such as travel and information technology. Other cash payments also include the outflow from the cash settled performance rights under the LTIP. Similar to the prior year, new securities were issued (reported in financing cash flows) to fund the cash settled portion of the LTIP. As a result, the LTIP was cash neutral overall.

The distributions received from Partnerships in FY23 were \$583.5 million (2022: \$442.5 million). The Partnerships continued to distribute their net cash flows from property investment (rental income) and the Goodman share of these earnings increased due to the improved profitability of the Partnerships. However, the increase was also partly the result of the timing of distributions associated with the Group's share of development activities in the Partnerships.

Portfolio performance fee revenues are reported under cash receipts from management and other activities. The timing of receipts of portfolio performance fees is dependent on the assessment dates for the Partnerships although revenues may be recognised in advance of the assessment dates where the returns and the economic conditions mean that the receipt of revenue is highly probable. During FY23, the cash flows have been in line with the revenue recognised but were lower than the prior period because there were fewer performance fee assessment dates in FY23.

#### Investing cash flows

Investing net cash outflow was \$716.0 million (2022: \$1,001.5 million), a decreased outflow of \$285.5 million compared to the prior year. During FY23, the principal investing cash outflows related to acquisitions of directly held properties mainly outside Australia of \$441.2 million (2022: \$431.7 million) and to investments in the Group's Partnerships of \$1,243.9 million (2022: \$1,332.3 million). The Group received proceeds of \$629.7 million (2022: \$671.8 million) from the disposals of investment properties in Australia and \$352.4 million (2022: \$4.4 million) from the partial disposal of its investment in a Partnership joint venture in Australia. There were no capital returns from the Partnerships during the year but in the prior year the Group received \$91.8 million following capital management initiatives in two of the Partnerships.

#### Financing cash flows

Financing net cash outflow (net of dividends and distributions) was \$308.8 million, a movement of \$608.5 million compared to a net cash inflow of \$299.7 million in the prior year.

Proceeds from borrowings and derivative financial instruments were \$1,029.3 million (2022: \$1,466.5 million). This included cash inflows in respect of new bank facilities of A\$192.9 million and drawdowns on the Group's existing revolving bank loans of \$836.4 million.

Payments on borrowings and derivative financial instruments were \$772.0 million (2022: \$789.3 million). This included repayments on the Group's revolving bank loans of \$550.0 million (2022: \$768.4 million), the redemption of the \$135.3 million (JPY12.5 billion) private placement in April 2023 and payments on derivative maturities of \$84.5 million.

The net cash flow from related party loans was an outflow of \$58.0 million (2022: \$111.4 million net inflow). These loans are provided by the Group to fund developments in the Partnerships (including JVs) and are repaid either at completion or when the Partnership obtains its own external debt.

The net proceeds from the issue of stapled securities of \$67.2 million (2022: \$109.7 million) were directly used to fund obligations under the LTIP that have been reported as part of the Group's operating cash flows.

The other principal financing cash outflows were the distributions paid to Securityholders of \$562.1 million (2022: \$557.2 million).

Operating and financial review (continued)

#### Outlook

Goodman has developed significant expertise and a deliberate strategy to target high barrier to entry markets, providing our customers access to facilities where they are scarce. In particular, the rapid proliferation of demand for data storage and processing capacity is supplementing demand and reducing the available supply for warehouses and logistics centres. This has positioned the Group well for future growth.

In the near term, market conditions are likely to be volatile and the risks associated with rising inflation, interest rates and slowing economic growth are elevated. This may impact consumers; however, they continue to seek faster and more flexible delivery, which requires ongoing intensification of warehousing in urban locations to optimise delivery and improve productivity. Our business remains agile, focused on the changing consumption habits across the physical and digital space and, as a result, the evolving requirements of customers around the world.

Demand is currently exceeding supply in our markets, supporting our development-led growth strategy. This is producing well located assets for the Group and our Partnerships. In addition to strategic site acquisitions, the opportunities for regeneration of existing assets support our future development activities by providing value add opportunities. This can assist in the reduction of the environmental impacts of our business activities. The development production rate, project management and depth of customer demand are supporting the outlook for development earnings into FY24.

In addition, the Group continues to maintain a strong balance sheet, which combined with retained income, provides significant liquidity, stability and financial resources.

The outlook for property investment and management earnings remains positive, as the customer demand and supply constraints in the Group's markets provide support for both rental growth and a high level of occupancy. Investment and management earnings will also benefit from the completion of ongoing developments. Absent a material adverse movement in property valuations, development completions and rental growth are also expected to support growth in AUM.

Goodman has made a strong start to FY24 with a significant development workbook underway, continued underlying structural demand from customers and a robust capital position across the Group and Partnerships. We believe the Group is positioned to continue to deliver growth despite the risks associated with current market volatility and expects to achieve operating EPS growth of 9.0% in FY24.

The Group sets financial performance targets annually and reviews them regularly. Forecasts are subject to there being no material adverse change in market conditions or the occurrence of other unforeseen events.

#### **Risks**

Goodman identifies strategic and operational risks for each of its regions as part of its strategy process. The key risks, an assessment of their likelihood of occurrence and consequences and controls that are in place to mitigate the risks are reported to the Board regularly.

Goodman has established formal systems and processes to manage the risks at each stage of its decision making process. This is facilitated by a Group Investment Committee comprising senior executives, chaired by the Group Chief Executive Officer, which considers all major operational decisions and transactions. The Group Investment Committee meets on a weekly basis.

The Audit, Risk and Compliance Committee reviews and monitors a range of material risks in Goodman's risk management systems including, among other risks, market risks, operational risks, sustainability, regulation and compliance, financial risk management, tax policies and information technology.

The key risks faced by Goodman and the controls that have been established to manage those risks are set out in the following table:

	Risk area	Mitigation
Capital management (debt, equity and cash flow)	Goodman could suffer an inability to deliver its strategy, or an acute liquidity or solvency crisis, financial loss or financial distress as a result of a failure in the design or execution of its capital management and financing strategy.	<ul> <li>+ Monthly preparation of a consolidated Capital Management Plan, which is reported to the Group Investment Committee and the Finance and Treasury management committee</li> <li>+ Financial reporting to the Goodman Board</li> <li>+ Weekly cashflow monitoring and reporting</li> <li>+ Goodman Board approved Financial Risk Management (FRM) policy</li> <li>+ Capital partnering transfers risks into Partnerships</li> <li>+ Low gearing, ample liquidity and appropriate hedging and duration to absorb market shocks</li> <li>+ Diversity and tenure of debt funding sources and cash on deposit</li> <li>+ Appropriate hedging quantities and duration in accordance with FRM policy</li> <li>+ Distribution pay-out ratio consistent with contribution of development earnings</li> <li>+ Long lease terms with prime customers</li> <li>+ Strong assets that can generate better rental outcomes and growth</li> <li>+ Key urban market strategy – urban, infill locations support re-usability of property</li> <li>+ Insurance program (both Goodman's and key counterparties) including project specific insurance</li> </ul>
Economic and geopolitical environment	Global economic conditions and government policies present both risks and opportunities in the property and financial markets and the business of our customers, which can impact the delivery of Goodman's strategy and its financial performance.  A continued increase in geopolitical tension between countries could have potential consequences on our people, operations and capital partners.  In the near term, market conditions are likely to be volatile and the risks associated with rising inflation, interest rates and slowing economic activity are elevated.	<ul> <li>+ Global diversification of Goodman's property portfolios</li> <li>+ Focus on core property portfolios in key urban market locations and adaptable assets</li> <li>+ Annual 5-year business strategy</li> <li>+ Focus on cost management</li> <li>+ Annual risk assessment and profile</li> <li>+ Annual budget</li> <li>+ Regular independent property valuations</li> <li>+ Asset planning program</li> <li>+ Prudent capital management with low gearing and significant available liquidity to allow for potential market shocks</li> <li>+ Adherence to FRM policy as it relates to hedging of interest rates and currencies</li> <li>+ Review of customer credit</li> <li>+ Co-investment with local capital partners</li> </ul>
Governance, regulation and compliance	Non-compliance with legislation, regulators, or internal policies, or to understand and respond to changes in the political and regulatory environment (including taxation) could result in legal action, financial consequences and damage our standing and reputation with stakeholders.	<ul> <li>+ Independent governance structures</li> <li>+ Core values and attitudes, with an embedded compliance culture focused on best practice</li> <li>+ Dedicated Group Head of Risk and Compliance Officer</li> <li>+ Review of transactions by the Group Investment Committee</li> <li>+ Annual compliance plan audits</li> <li>+ Partnership investment committees independent of the manager</li> <li>+ Global tax risk management framework</li> <li>+ Regional and Group Executive declarations and sign-offs</li> <li>+ Verification process and sign-off of public documents</li> <li>+ Comprehensive insurance program, covering property, liability, Directors and Officers and Professional Indemnity</li> <li>+ Continuous disclosure regime – regular group management meetings</li> </ul>

# Directors' report Risks (continued)

	Risk area	Mitigation
People and culture	Failure to recruit, develop, support, and retain staff with the right skills and experience may result in significant underperformance or impact the effectiveness of operations and decision making, in turn impacting business performance.	+ Competitive remuneration structures, in particular performance rights under the LTIP, with ALL staff having ownership  + Succession planning for senior executives and key roles  + Performance management and staff review  + Overall performance review ratings to assess culture and engagement  + Learning and development program to enhance skills sets  + Goodman Values program  + Staff engagement through team strategy days, town halls and the (good) life program.
Development	Development risks may arise from location, site complexity, planning and permitting, infrastructure, size, duration along with general contractor capability.	<ul> <li>+ Review and approval of development projects by the Group Investment Committee and relevant Partnership Investment Committee</li> <li>+ Targeted returns are higher for the size and complexity of the project</li> <li>+ Engaging general contractors that are better capitalised</li> <li>+ Senior oversight and responsibility by Executive Directors</li> <li>+ Capital partnering transfers risks into partnerships</li> <li>+ Specialised staff who understand the development process, including development staff by region</li> <li>+ Goodman defined design specifications, which cover environmental, technological, and safety requirements, protecting against short term obsolescence</li> <li>+ Fixed price, design and construct contracts with appropriately capitalised contractors</li> <li>+ Redevelopment of older assets to intensify use</li> <li>+ Insurance program (both Goodman's and key contractors), including project specific insurance</li> <li>+ Spread and diversification of projects</li> <li>+ Ongoing monitoring and reporting of WIP and levels of speculative development, with Board oversight including limits with respect to speculative development and higher development risk provisions</li> <li>+ Implementation of Goodman policies and procedures (e.g. reporting, Safety framework and delegation of authority)</li> <li>+ Leasing prior to reaching development completion.</li> </ul>
Disruption, changes in demand and obsolescence	The longer-term risk that an inability to understand and respond effectively to changes in our competitive landscape and customer value chain could result in business model disruption and asset obsolescence, including the perception of obsolescence in the short term.	<ul> <li>Key urban market strategy – urban, infill locations support re-usability of property</li> <li>Adaptable and reusable building design – ease to reconfigure for another customer</li> <li>Geographic diversification – capital allocation across regions and location of properties</li> <li>Capital partnering transfers risks into partnerships</li> <li>Insurance program (both Goodman's and key contractors), including project specific insurance covering design and defects</li> <li>Long lease terms with prime customers</li> <li>Innovation and technology strategy – visibility and insight into technology trends along with direct investment into technology start-ups</li> <li>Competition analysis and behaviour.</li> </ul>
Environmental sustainability and climate change	Failure to deliver on Goodman's sustainability leadership strategy and ambitions may lead to a negative impact on Goodman's reputation, ability to raise capital and a disruption to operations and stranded assets.	<ul> <li>+ Corporate Responsibility and Sustainability policy</li> <li>+ 2030 Sustainability Strategy and reporting against those targets</li> <li>+ Assessment of individual assets to improve resilience and implementation of sustainability initiatives</li> <li>+ Sustainability guidelines for development projects including embodied carbon measurement and offset</li> <li>+ Review and approval of acquisitions and development projects by the Group Investment Committee and relevant Partnership Investment Committee, including consideration of climate risks in the due diligence process and minimum property specifications</li> <li>+ Adoption of the Task Force on Climate-Related Financial Disclosures recommendations as a framework for the assessment, management and disclosure of climate risks</li> <li>+ Investor, customer and regulatory requirements</li> <li>+ Verification process and sign-off of public sustainability documents</li> <li>+ Adherence to Group Procurement Policy for selection and purchase of Carbon Credits</li> <li>+ LTIP performance directly linked to meeting the Group's sustainability initiatives.</li> </ul>

	Riskarea	Mitigation
Asset and portfolio	Inability to execute asset planning and management strategies, including leasing risk exposures, can reduce returns from Goodman's portfolios.	<ul> <li>+ Key urban market strategy – urban, infill locations where customer demand is strongest</li> <li>+ In-house property management team</li> <li>+ Diversification of customer base and lease expiries</li> <li>+ Review and approval of significant leasing transactions and development projects by the Group Investment Committee and relevant Partnership Investment Committee</li> <li>+ Capital expenditure programs keeping pace with property lifecycle</li> <li>+ Implementation of Goodman policies and procedures (e.g. reporting, Safety framework, sustainability measures and minimum design specifications)</li> <li>+ Insurance program including Public Liability, including property risk assessment reports</li> <li>+ Customer risk assessments</li> <li>+ Asset plans – in particular categorisation of assets, maintenance program, customer engagement</li> <li>+ Portfolio strategy – locations, type of building.</li> </ul>
Concentration of counterparties and markets	Over-exposure to specific areas, such as capital partners, supply chain, customers and markets, may limit growth and sustainability opportunities.	<ul> <li>+ Standardised governance structures around Partnerships, which includes: <ul> <li>Relationship deeds articulating service arrangements</li> <li>Pre-emptive rights</li> </ul> </li> <li>+ Independent governance structure</li> <li>+ Diversification of capital partners and fund expiries, including local investors. <ul> <li>Analysis of alternate capital sources</li> </ul> </li> <li>+ Goodman's cornerstone investment in each Partnership and the underlying strength of the Manager</li> <li>+ Appropriate Management contracts across all Partnerships</li> <li>+ Contractor pre-selection and tendering</li> <li>+ Diversification of customer base and lease expiry</li> <li>+ Investment metrics established for GMG and Partnerships, setting limits including: <ul> <li>Speculative development</li> <li>Geographic and customer exposure</li> </ul> </li> <li>+ FRM policy establishing criteria for financial institution counterparties.</li> </ul>
Information and data security	Maintaining security (including cyber security) of Information Technology (IT) environment and data, ensuring continuity of IT infrastructure and applications to support sustainability and growth and prevent operational, regulatory, financial and reputational impacts.	<ul> <li>+ Strategic roadmap for delivery of secured IT systems, benchmarked against the Australian Signal Directorate's Essential maturity model and the United States National Institute of Standards and Technology Cyber Security framework</li> <li>+ Proactive monitoring, review and testing of infrastructure and system behaviour</li> <li>+ Incident response, disaster recovery and business continuity planning</li> <li>+ Penetration testing, vulnerability scanning and network review to identify and remediate</li> <li>+ IT Dashboard Reporting to the Audit, Risk &amp; Compliance Committee</li> <li>+ Phishing awareness program implemented to educate and test employees' awareness and vigilance in avoiding threats</li> <li>+ Cyber security awareness/training</li> <li>+ Decommissioning legacy systems</li> <li>+ Transition from employee password reliance</li> <li>+ Speed of threat/vulnerability detection</li> <li>+ Data system back-up/restore testing</li> <li>+ Phishing simulation testing/reporting</li> <li>+ Reporting and compliance with Essential Eight, baseline strategies to mitigate cyber security incidents, developed by the Australian Cyber Security Centre.</li> </ul>

Remuneration report - audited (continued)

### Letter from the Chairman and Chair of the Remuneration and Nomination Committee

Dear Securityholders.

On behalf of the Board, I am delighted to present the 2023 Remuneration Report, outlining Goodman's remuneration strategy and principles which we firmly believe provide appropriate alignment of the interests of management and Securityholders.

FY23 was another successful year for the Group, where we significantly exceeded financial performance expectations while also making excellent progress on our ESG initiatives. This was delivered by our management team in a particularly volatile and difficult global economic and market environment. The ongoing impact of global political instability, rising inflation and higher interest rates continue to present challenges for Goodman's business, our people, customers, investors, and the communities in which we operate and live.

The attraction and retention of talent are critical for the success of the Group. This is increasingly challenging as opportunistic competitors in our business seek to recruit high-performing teams around the world. The Group's longstanding and consistent approach to remuneration has been a key driver of our sustained success as an international business over an extended period of time.

This approach is reflected in our strong financial results for FY23 including:

- + Operating profit of \$1.8 billion (+17%), growth of 68% for the three years ended 30 June 2023 (which aligns with the Group's relevant LTIP testing period)
- + Statutory profit of \$1.6 billion and \$3.0 billion across the combined Group and Partnerships
- + Goodman operating EPS growth of 16%, materially exceeding initial expectations of 11%
- + Significant volume of development work in progress of \$13.0 billion at 30 June 2023, across 81 projects and providing a solid base for future profitability
- + Total AUM increasing 11% to \$81.0 billion
- + Low leverage of 8.3% and significant liquidity of \$3.1 billion providing strong financial capacity both for resilience and growth.

We have continued to reflect the importance placed on providing financial returns and operating within appropriate sustainability and environmental objectives, incorporating key ESG targets into the operations and long-term business strategies of the Group.

# 2022 AGM results and subsequent securityholder engagement

Despite receiving a second strike at last year's AGM, we recognise the significant support for our Remuneration Report which increased to over 71% from 58% a year before. While, as a Board, we were naturally disappointed with the result, we were grateful at the overwhelming support for the board in relation to the spill resolution. It is important to note that in the lead up to the AGM in 2022, we engaged directly with a large number of our investors representing approximately 60% of the securities on issue. Of this Group only a small proportion voted against the 2022 Remuneration Report. We received strong positive support for the plan structure, in particular our innovative ten year plan for senior executives, and the changes from 2021, specifically:

- + Reducing the proposed quantum of awards significantly (by 46% for the CEO and by 33% for KMP in terms of face value) while retaining the ability to recognise exceptional outperformance
- + Adopting significantly more challenging and competitive hurdles for operating EPS, notwithstanding the considerable market uncertainties existing at the time, which if achieved, at the top end of the range (11% per annum compound growth over the four year testing period; 52% growth overall) would provide Securityholders with exceptional performance in both relative and absolute terms.

We have also met with proxy advisors to explain and discuss our remuneration policies. These meetings have been constructive. An issue raised by one of the firms is our method of calculating operating profit and that it should include the share-based payment expense. We detail the reasons for our methodology in determining operating profit in section 3.5.5. In essence, operating profit reflects only cash profits, with non-cash items such as share-based payments and asset revaluations being excluded. Relevantly:

- + Management runs our business primarily on the basis of cash generation and employee performance is assessed accordingly
- + Based on analyst reports and management's discussions with investors and analysts, we believe the market uses operating profit as the most relevant measure to value the Group
- + Cash generation not only supports the payment of distributions but underwrites the robust financial health of the Group.

The Board believes that managing the business, on what is primarily a cash profit basis as represented by diluted operating EPS, is fundamental to long-term resilience and is the strongest determinant of value creation for Securityholders over time.

Despite not receiving sufficient votes to avoid the strike in 2022, the Board is confident that a substantial majority of our Securityholders continue to believe firmly in our remuneration structure, and importantly its alignment with their long-term outcomes.

We have again reflected this sentiment in setting awards and LTI hurdles this year. For KMP:

- + The STI component has been reduced by 10% (with the CEO continuing to not participate in STI awards)
- + The quantum of the FY24 LTI awards has also been reduced by 10% (so as to maintain the equivalent face value of the FY23 awards after taking into account the increase in the Goodman security price over the course of the year)
- + Challenging operating EPS hurdles (6% to 11% compound annual growth over a four year testing period and commencing from a substantially higher base) for LTI have again been imposed.

This remuneration result is particularly significant in the context of the Group's FY23 performance, where operating EPS increased 16%, well ahead of the broader market and our own guidance, but quantum of STI and LTI is similar to FY22. Furthermore, following exceptional results in the past two years where operating profit is up 46%, management will need to increase profit by over \$1 billion by FY27 in order to achieve maximum vesting of the FY24 awards.

The Board is always mindful of the focus on overall remuneration levels and spends considerable time each year determining remuneration outcomes in the context of our complex international operations. We recognise the need on the one hand, to attract, retain and incentivise our employees while, on the other hand, to meet the range of expectations of our Securityholders.

In closing I would like to acknowledge our long serving director, Phillip Pryke, who will be retiring from the Board in the first half of 2024. Phil, who chaired the Remuneration Committee from 2010 until earlier this year, has made a significant contribution to the formulation of the Group's remuneration strategies and to Board deliberations more generally.

We look forward to receiving your views and support at our 2023 AGM.

Yours sincerely,

Stephen Johns

Chairman and Chairs of the Remuneration and

**Nomination Committee** 

Remuneration report - audited (continued)

## 1. REMUNERATION GOVERNANCE

# The role of the Board and the Remuneration and Nomination Committee

The Board and the Remuneration and Nomination Committee are responsible for approving the structure of the remuneration of the Group's employees and for the specific pay of the Group CEO and other KMP. In setting these, the Board considers remuneration with a five to ten year horizon. It takes into consideration the impact that decisions made over the last three to five years have had on current performance and how it expects the business to perform in the longer term. It is not solely an exercise in reviewing a single year.

The Board believes the success of Goodman is primarily due to its people and their ability to execute a global strategy that requires agility, strong collaboration and an inclusive culture, all of which are key elements supported by the LTIP.

#### The Board:

- Encourages management to take a long-term strategic view rather than an opportunistic approach to property investment
- + Expects the senior leadership team to accept collective responsibility for the outcomes
- + Focus on the creation of long-term sustainable returns
- + Focuses on the consistency of cash generation, through the Group's operating profit, as the most tangible means of measuring long-term value creation for Securityholders.

When determining the remuneration levels and outcomes for FY23, the Remuneration and Nomination Committee has considered:

- + Feedback from Securityholder engagement
- + The significant operational and financial outperformance of the Group
- + The specifics of individual performance
- + The long-term structure of remuneration and the challenging hurdles employed relative to expectations.

These have been assessed in the context of the current and expected future volatility as a result of inflationary conditions affecting capital markets and the global operating environment. This is particularly evident in the pressures on construction and development operations. It is our view that the logistics real estate sector continues to be favoured for investment, so the Remuneration and Nomination Committee has considered the impact continued competitor activity in our sector is having on attracting and retaining employees.

Remuneration this year aims to further balance Securityholder and employee outcomes and to continue to reinforce Goodman's long-term decision making. While the Group delivered strong operating EPS growth (+16.0%) in FY23, well ahead of original market guidance, for KMP the face value of awards (STI and LTI) has remained the same relative to the prior year and there are no increases in base pay for FY24 (other than where base pay is contractually subject to inflation-based indexation).

#### The Board has:

- + Reduced STI by 10% (increasing the skew to at risk LTI)
- Increased the difficulty of the hurdles for the proposed FY24 LTI awards compared with FY23 by maintaining the challenging operating EPS hurdles of 6% to 11%, off a substantially higher base year (refer section 3.5.4)
- + Reduced the number of performance rights awarded to KMP by approximately 10%, in order to maintain similar face value of the combined STI and LTI, as a consequence of the increase in Goodman's security price and the reduction in STI.

This approach is consistent with the business and operational strategy as well as providing competitive remuneration to attract and retain high quality people.

The Board acknowledges the strike received at our AGM last year in relation to the 2022 Remuneration Report. However, we remain confident that our remuneration strategies are best suited to the long-term future of Goodman.

# 1.2. Key activities of the Remuneration and Nomination Committee for FY23

From 1 July 2022 to 31 March 2023, the Board had a separate Remuneration Committee and Nomination Committee. From 1 April 2023 these committees were combined into the Remuneration and Nomination Committee. Members of the Remuneration and Nomination Committee (and the predecessor Remuneration Committee during FY23 were:

Member	Role
Stephen Johns	Independent Director and Chairman of Goodman Group, Member of Remuneration Committee 1 July 2022 – 31 March 2023, Chair of the Remuneration and Nomination Committee 1 April 2023 – 30 June 2023
Chris Green	Independent Director - Member of Remuneration Committee 1 July 2022 - 31 March 2023, Member of the Remuneration and Nomination Committee 1 April 2023 - 30 June 2023
Mark Johnson	Independent Director - Member of Remuneration Committee 1 October 2022 - 31 March 2023, Member of Remuneration and Nomination Committee 1 April 2023 - 30 June 2023
Rebecca McGrath	Independent Director, Member of Remuneration Committee 1 July 2022 – 1 October 2022
Phillip Pryke	Independent Director and Chairman of the Remuneration Committee 1 July 2023 - 31 March 2023

Following significant enhancements to the remuneration policies in FY22 and FY23, the Remuneration and Nomination Committee has made additional changes for the FY24 awards. Key decisions made and items considered in the determination of FY24 awards, include the following:

- + An approximate 10% reduction in STI for KMP that receive STI, further increasing the at risk long-term nature of remuneration
- + Agreed with the Group CEO (as in prior years) that he would not participate in the STI award and all his performance-based remuneration in relation to his FY23 performance will be in the form of LTI. In general, LTI remains the significant focus of remuneration awards across the Group
- + The quantum of LTI awards has been reviewed and in determining these, face value and structure relative to peers, the reduction in STI and the more challenging hurdles have been considered. Accordingly:
  - For the Group CEO, the number of rights has declined 10% relative to the FY23 award, offsetting the security price increase during FY23 and resulting in the face value of the FY24 LTI awards being similar to FY23
  - For the other executive KMP, the number of rights has declined by approximately 9% relative to the FY23 awards offsetting the security price increase during FY23 and lower STI and resulting in the face value of the FY24 LTI awards being similar to FY23
- + Continued the issuance of LTI awards under the ten-year plan for the Group CEO, executive KMP and other senior executives
- + Continued to make the five-year LTIP available to the balance of employees
- + Further increase in the challenge and outperformance required to achieve hurdles
  - For the maximum vesting to occur on the operating EPS linked portion of the plan, a compound annual growth rate (CAGR) of 11% per annum (at the Upper Level) must be achieved over four years (in the case of the 10-year plan); this equates to almost 60% growth in operating profit in FY27 relative to the very strong FY23 result
  - The Board's operating EPS growth targets for management have remained consistent despite the deteriorating market and the effect of compounding growth off the 43% increase in operating EPS in the past 2 years. This means all the hurdles are materially higher than in comparable FY22 awards

- Based on the Board approved business and financial strategy,
   the Target level of performance is 8.5% CAGR growth in operating
   EPS over the four year testing period. This is the mid-point of the
   6% to 11% operating EPS growth hurdles
- To achieve maximum vesting at the Upper Level hurdles, equates to operating profit growth in FY27 of over \$1,020 million (from the FY23 base year) and an increase of over \$240 million above the Board's Target level of performance
- Given the more challenging operating environment globally, analyst consensus expectations for the broader market (as evident in the S&P/ASX 100) and Goodman, are materially lower than both Board Target and the Upper Level. The Upper Level vesting hurdle reflects an approximately 4% higher growth rate per annum than market consensus and Visible Alpha forecasts and therefore a significant stretch component for management.
- + The Board Considers the 6% to 11% operating EPS CAGR range to be a truly challenging hurdle range for management in the current environment
- Environmental and sustainability targets, included in the FY24 performance rights testing conditions have been reviewed and updated as considered appropriate
- + Fixed remuneration levels for Greg Goodman and Nick Vrondas were unchanged in FY23. Danny Peeters fixed remuneration is contractually subject to inflation-based indexation, calculated by reference to the change in the Luxembourg HICP Index. Accordingly, in respect of FY23 his base pay increased by 10.2% to €585,450. In respect of Nick Kurtis and Anthony Rozic, increases were made to fixed remuneration after benchmarking against similar roles in relevant locations.

Remuneration report - audited (continued)

#### 1.3 Key Management Personnel (KMP)

Member	Role	Tenure at Goodman
	Role	Tenure at Goodman
Executive KMP		
Gregory Goodman	Group Chief Executive Officer	28 years
Danny Peeters	Executive Director Corporate	17 years 1 month
Anthony Rozic	Deputy CEO and CEO North America	19 years 1 month
Nick Kurtis	Group Head of Equities	23 years 4 months
Michael O'Sullivan <sup>1</sup>	Group Chief Risk Officer	20 years 10 months
Nick Vrondas	Group Chief Financial Officer	17 years 2 months
Non-Executive KMP		
Stephen Johns	Chairman and Non-Executive Director	6 years 6 months
Chris Green	Non-Executive Director	4 years 2 months
Mark Johnson	Non-Executive Director	3 years 1 month
Vanessa Liu	Non-Executive Director	1 year 1 month
Belinda Robson	Non-Executive Director	2 months
Phillip Pryke	Non-Executive Director	12 years 9 months
Hilary Spann	Non-Executive Director	1 year 3 months
George Zoghbi	Non-Executive Director	2 months
David Collins	GLHK Non-Executive Director	5 years 5 months

<sup>1.</sup> Michael O'Sullivan retired from his role as Group Chief Risk Officer and ceased to be a KMP on 28 March 2023.

Kitty Chung was appointed as a GLHK Non-Executive Director on 1 July 2023 and became a KMP of Goodman from that date.

# 2. REMUNERATION STRATEGY

Goodman is one of the largest listed industrial real estate fund managers and developers globally. The Group's people are largely based outside Australia. The remuneration structure reflects the requirements in the highly competitive labour markets the Group operates in globally, not just in Australia, and the objective of aligning multiple regional businesses and operational segments with a global strategy and pay for performance outcomes.

A significant proportion of the value of the Group, reflected in the \$20.6 billion premium between the security price of \$20.07 at 30 June 2023 and Goodman's net tangible assets per security of \$9.12, is attributable to the value created across the global platform. Given the active nature of the Group's operations, the Board believes that this is almost entirely due to Goodman's people, the decisions they make and their ability to execute consistently and at all levels that has positioned the Group to sustainably grow the cash generation measure of the business that is encapsulated by operating profit (as described in the section 3.5.5).

The retention of talent is therefore critical for the long-term success of the Group and is increasingly challenging as opportunistic competitors seek to recruit high-performing teams around the world. The Group's remuneration policy is crucial in its ability to have the appropriate human resources to deliver on the strategy, create the right culture and drive performance for the benefit of all stakeholders.

The Group's remuneration structure, in particular the focus on equity-based reward, has been a key component of its success as an international organisation. The Board believes that aligning all employees with Securityholders through the Group's remuneration policy has added significant value to the Group. It has been a fundamental differentiator in generating and rewarding long-term performance and retaining quality people in a highly competitive global environment. It is particularly important considering the challenges created by the volatility in global political and capital markets as it binds all employees together as owners of the business and is a powerful incentive and driver of operational resilience.

## 2.1 Key remuneration principles

# Continuing alignment of remuneration in line with Group strategy, structural changes and ESG aspirations

Given the cyclical nature of real estate, incentive structures within real estate businesses are highly outcome driven (particularly by private equity real estate managers where most institutional assets reside). The Group's capital and resource allocations shift over time in response to variable market circumstances. The effects of these real estate strategies take time to manifest, requiring rewards to be measured over longer periods. The Group's remuneration framework is therefore focused on influencing long-term decision making and collaboration across business units and international operations to derive sustainable outcomes.

There are several key principles of remuneration that the Board considers to be most relevant:

- + Focus on LTI as the predominant source of pay for performance for senior members and a material factor for all employees of the Group. All employees are eligible to receive LTI grants as a material component of remuneration that are tested using challenging hurdles without encouraging inappropriate risk (see section 3.5.4), enhancing alignment of rewards across the Group with Securityholders
  - Aligning the deliverable outcomes of all employees globally, with Goodman's aspirations of long-term cash flow growth, resilience, and sustainability. This is practically achieved through the focus on operating profit (which is closely aligned with cash profits) as the primary testing measure for LTI awards (see section 3.5.5)
  - Goodman's remuneration structure results in a significantly higher proportion of pay in the form of equity-based performance awards (93% for the Group CEO versus less than 43% for S&P/ASX 20 CEO's). Consequently, despite only 25% of LTI testing against relative total securityholder return (TSR), employees have significant alignment and exposure to TSR outcomes versus typical remuneration structures. In addition, operating profit which determines operating EPS is a cash-based measure which management globally can have a tangible influence on
  - Importantly operating EPS is the underlying value driver for Goodman securities and is expected to ultimately align with TSR outcomes over the longer term
- + Securityholders are the beneficiaries of the Group-wide outcomes.

  Collaboration is required to achieve Group-wide targets across regions and business units. Remuneration should engender a collective responsibility for the consolidated outcomes which can facilitate decision making that leads to the optimal allocation of resources between locations and activity types to pursue the most appropriate opportunities at different points in time
- A culture of ownership, inclusion and alignment, where all employees experience investment returns aligned with Securityholders creates stability which reduces staff turnover
- Balancing reward and retention with long-term cost to Securityholders at respective levels of performance.

# Business strategy requires long-term remuneration timeframes to align outcomes

Goodman's increased focus on urban infill markets with their significant increase in complexity has led to longer development horizons to maximise outcomes but delivered significant returns to investors. In summary:

- Site acquisition and value add to existing stabilised sites, often takes five to ten years, and sometimes longer, to achieve highest and best use and urban regeneration outcomes
- + The Group's approach to development considers the lifecycle of an asset even for new developments which allow further intensification or change of use at a later time. This sometimes comes at the expense of short-term performance; however, this approach is consistent with the Group's strategic objectives and provides future value realisation potential, over significant time periods
- + Increased focus on ESG and integration of environmental sustainability aspirations into the Group's operational activities requires significant time periods (often beyond five years) for implementation. Goodman's approach to outcomes for the community, environmental sustainability and wellbeing are long-term aspirations aligned with the financial sustainability objectives.

In the Board's view, the long-term nature of the structural trends impacting the sector, the Group's approach to real estate investment in relation to this, and investor feedback, supports continuation of the LTIP structure. The ten-year plan for the Group CEO, other executive KMP and other senior executives in the organisation, will continue to influence decision making and closely align with the time periods required to deliver superior operational results on a sustainable basis. It also provides sufficient time to implement key ESG initiatives and achieve the Group's targets, particularly in relation to longer-dated environmental and sustainability objectives, in a manner that creates alignment with the desired outcomes for Securityholders. The five-year LTIP is longer than most in the S&P/ASX 100 and remains in place for all eligible employees who do not participate in the ten-year plan and will continue to include hurdles aligned with the ten-year plan.

# **Directors' report**Remuneration report – audited (continued)

# 2.2 Objectives of the remuneration strategy

Attract	Reward	Long-term alignment of our people and Securityholders
Remuneration structure	Performance conditions	Alignment with strategy and long-term performance
Fixed remuneration Low fixed costs, with the focus on "at risk" equity.	Scope and complexity of the role, individual absolute and relative comparison in the relevant market and comparator group.	Real estate investment management and development are cyclical, so fixed employee costs are kept relatively low, below median and mean for comparable companies. Group CEO fixed remuneration has not changed for 16 years.
STI remuneration is a 100% at risk performance base award tied to operational performance metrics over the past 12 months. However, the Group CEO forgoes STI in favour of LTI. Other executive KMP received between 6% to 10% of total FY23 remuneration in STI, with payments made in two instalments, the first in August or September after the financial year end and the second 12 months later.	Assessment includes four key components:  + Achieving operating EPS target¹  + Meeting Goodman behavioural expectations per the Code of Conduct  + Individual financial and operational assessment  + Assessment against environmental and sustainability objectives.  ¹ Achieving the operating EPS target does not determine the level of STI. It is a "gate" to the creation of the STI pool for the entire organisation. The test is therefore different and distinct from the LTI test where operating EPS performance determines the level of LTI vesting.	STI is an at risk component, rewarding financial and non-financial performance against objectives of the individual and the Group. Awards in FY23 represent 67% of the maximum for executive KMP.  The performance of individuals is assessed through a performance appraisal process based on contribution to strategic, financial, operation and ESG objectives, while also reflecting behavioural expectations (see section 4.4.).  Financial performance is the primary measure in determining the maximum level of STI for the individual; however, this can be penalised if behavioural standards or ESG targets are not met or breached (up to 100% of STI for certain measures). These factors together incentivise the executive KMPs to achieve not only the operating EPS targets, but also that the method in which they are met matches appropriate risk and governance settings. Given the complex nature of the Group's global operations, individual financial metrics are reflected in the operating EPS This structure is simple and transparent and aligns management with the operating EPS growth expectations of Securityholders. Detailed financial metrics for the business are additionally disclosed in reporting. In additio LTI operating EPS targets as LTIP targets are set over four years and represent the longer-term aspirations of the business with performance result directly determining financial outcomes through level of vesting.
LTI is "at risk" remuneration that rewards long-term sustained performance.  New awards will be granted in FY24 in relation to FY23 performance achievements, an assessment of potential future contributions and relevant alignment of employees.  Ten-year plan awards to the Group OEO, executive KMP and senior executives are tested over four years with vesting in equal tranches, annually, from the end of year four to the end of year ten.  Five-year plan awards to remaining employees are tested over three years with vesting in equal tranches, annually, from the end of year 5.	75% tested based on achieving the cash-based operating EPS hurdle range 25% tested based on relative TSR against the S&P/ASX 100 constituents. The benchmark index aligns with a significant portion of investors' benchmarks relevant to their holdings and provides closest alignment with their performance.  Environmental and sustainability targets (set by the Board) over the LTIP testing period with penalty to vesting outcomes of up to 20% of rights satisfying the operating EPS hurdle for material underperformance against targets.	The high weighting to LTI is believed to be the most effective way of rewarding sustained performance and retaining talent while maintaining alignment with Securityholders' experience.  Hurdles are set to be competitive relative to reference groups and challenging for management with a significant stretch component, but without encouraging inordinate risk in execution (see sections 3.5.4 and 3.5.5) relative to external and internal reference points.  TSR provides an effective check against increasing risk or unsustainable practices within the Group. The price to earnings multiple attributable to securities will reflect the risk in achieving operating EPS targets, which impacts the likelihood of vesting and the ultimate value upon vesting. The relative TSR and operating EPS hurdles interact as TSR impacts the value of all performance rights. Given the significant skew in remuneration to performance rights, the effective impact of the TSR on remuneration is significantly greater than its 25% weighting. The combination of 25% TSR testing and >80% equity-based remuneration for executive KMP, provides significant overall exposure to TSR, based on the Group's remuneration structure.  The total number of performance rights outstanding under the LTIP at 30 June 2023 equates to 4.1% of the Group's issued securities. The maximum number of performance rights under the LTIP is limited to 5% of the Group's issued securities including cash settled performance right ("phantoms"). Equity issuance to all employees encourages a collaboratia approach and broader distribution of remuneration across the entire workforce when the Group is performing well.

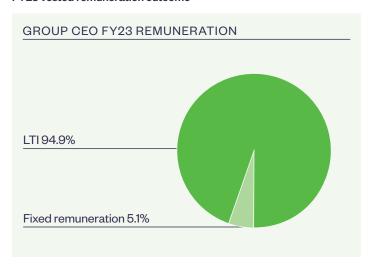

## 2.3 Remuneration mix and alignment across the Group

The Board believes that the alignment between pay and long-term performance is evidenced by the significant proportion of the total remuneration that is at risk for the Group CEO, the other executive KMP and employees throughout the organisation. In respect of the Group CEO, all of his at risk remuneration is in the form of LTI.

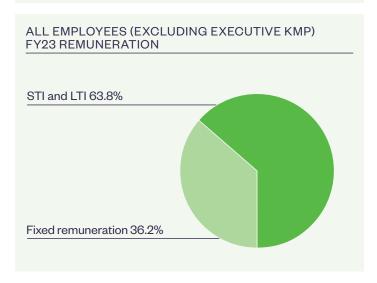

This is demonstrated in the charts below that consider the vested remuneration received during FY23. Vested remuneration represents the value that is received during FY23. It includes fixed base pay, STI and the value of performance rights that vested during FY23 (from prior grants) using the closing Goodman security price on the day of vesting.

The Board believes that this demonstrates the alignment of the remuneration outcomes for the Group CEO with the outcomes for Securityholders, who have experienced strong performance over a significant period alongside the Group CEO. Had the Securityholder returns been lower, the level of at risk remuneration would have been lower (due to lower vesting outcomes and lower value of vesting performance rights) and fixed remuneration would have made up a greater proportion of the total vested remuneration in FY23 for all employees, but especially for the Group CEO and the other executive KMP.

#### FY23 vested remuneration outcome

Remuneration report - audited (continued)

## 3. EXECUTIVE REMUNERATION FRAMEWORK

#### 3.1 Feedback and response

While the Group received a second strike at the AGM in November 2022, the result improved significantly from 58% in 2021 to 71% in 2022. The Chairman and the Group Head of Stakeholder Relations engaged with as many investors as reasonably possible in the lead up to the AGM. This led to engagement with 48 investors representing approximately 60% of Goodman's securities. Of this group only a small percentage voted against the remuneration. We received strong positive support for the changes from 2021 and specifically for the plan structure and hurdles.

Response

### Securityholder and Proxy Feedback

# etruoturo

Strongly positive feedback regarding the structure of the plan, testing and vesting period.

Continued the issuance of LTI awards under the ten-year plan for the Group CEO, other executive KMP and other senior executives. This ten-year plan will apply for the intended grant of performance rights to be made in September 2023 (therefore in FY24) in respect of FY23 performance.

While Securityholders recognise the long-term nature of LTI awards and many recognize the economic value approach, the majority use face value for determining outcomes.

The Group has relied on face value comparison with peer groups, noting the structure of respective plans, for the setting of awards. Awards have been reviewed relative to our global competitors and local peers. In addition, despite the Group delivering strong operating EPS growth (+16%) in FY23, well ahead of original market guidance, the Board acknowledges the strike received at the November 2022 AGM, and consequently for executive KMP has:

- Reduced STI by 10% (which further increases the skew to at risk LTI)
- Maintained the face value of the intended FY24 LTI awards at a level equivalent with FY23

Quantum is high relative to the ISS peer group.

In the Board's view, the ISS generated peer group is not a comparable group of companies, as the companies are significantly smaller, less active and operate almost solely in Australia. The Board has outlined what it considers to be relevant peer groups in section 3.7.1 and has considered these when assessing the quantum of remuneration awards.

Operating profit/operating EPS has been raised by one of the proxy advisors as a bespoke calculation and that it should include non-cash share-based payment expense.

The Board believes that managing the business, on what is primarily a cash profit basis as represented by diluted operating EPS, is fundamental to long-term resilience and is the strongest determinant of value creation for Securityholders over time. That is the intent of the Group's operating profit definition (and operating EPS), and it is one of the key measures used to drive the business strategy for employees to execute. It is also why the Board has used operating EPS (operating profit per share, diluted for tested performance rights) as one of the principal performance tests in its LTI awards and why it continues to be an appropriate means by which to assess employee performance. Based on analyst reports and investor discussions, the market overwhelmingly uses operating profit as the most relevant and appropriate measure to value the Group. This is covered in further detail in Section 3.5.5.

Hurdles are set to be competitive and challenging in line with long term performance and the risk settings appropriate for the Group. Feedback, from the overwhelming majority of investors was that hurdles and the 'stretch' were appropriate, relative to targets. One proxy considered the hurdles were not challenging enough.

LTI hurdles have been set for FY24 awards with a further increase to the challenge and outperformance required to achieve vesting. For the maximum vesting to occur on the operating EPS linked portion of the plan, a compound annual growth rate (CAGR) of 11% per annum (at the Upper Level) must be achieved over four years (in the case of the 10-year plan); this equates to almost 60% growth in operating profit in FY27 relative to the very strong FY23 result.

The Board's operating EPS growth targets for management have remained consistent despite the deteriorating market and the effect of compounding growth off the 43% increase in operating EPS in the past two years. This means all the hurdles are materially higher than in comparable FY22 awards.

Based on the Board approved business and financial strategy, the Target level of performance is 8.5% annual growth in operating EPS over the four year testing period. This is the mid-point of the 6% to 11% operating EPS growth hurdles.

To achieve maximum vesting at the Upper Level hurdle, equates to operating profit growth in FY27 of over \$1,020 million (from the FY23 base year) and FY27 operating profit more than \$240 million above the Board's Target level of performance. Given the more challenging operating environment globally, analyst consensus expectations for the broader market (as evident in the S&P/ASX 100) and Goodman, are materially lower than both the Board's Target level and the Upper Level. The Upper Level hurdle reflects a 4% per annum higher growth rate than market consensus (Visible Alpha forecasts), and a significant stretch component for management

# Securityholder and Proxy Feedback Response Should we increase TSR tested portion The Board has again considered the appropriate portion of the performance rights to be of performance rights to 50%? tested using the TSR measure. We continue to believe the current structure providing 75% operating EPS testing and 25% TSR testing is the appropriate mix for Goodman. The Board believes that managing the business, on what is primarily a cash profit basis, is fundamental to long-term value creation and therefore Securityholder performance over time. The Board gave consideration to: 1. Having engaged with a significant number of investors, there is no clear indication that TSR testing is a preferred approach for Goodman, and strong support remains for long-term cash flow measures 2. The LTI plan is a significant component of all eligible employee remuneration, not just for a small group of senior executives. Importantly, most of these employees are domiciled outside Australia with limited connection to the ASX or the factors which impact equity market volatility and TSR. In the Board's view, it is not appropriate or in the interest of Securityholders to link the most significant portion of remuneration for all employees to TSR, which is subject to short-term factors they have no control over 3. Employees across the business contribute to sustainable cash-based earnings growth in their day to day roles, and therefore the Board believes that in order to effectively incentivise them, operating EPS represents the most appropriate single measure 4. The relative TSR and operating EPS hurdles interact as TSR i.e. the security price, impacts the value of all LTI tranches. Given the significant skew in remuneration to LTI, the effective impact of the TSR on remuneration is significantly greater than its 25% weighting. The combination of 25% TSR testing and >80% equity-based remuneration for employees, provides significant overall exposure to TSR, based on the Group's remuneration structure. 5. The 25% TSR does provides an effective check against increasing risk or unsustainable practices within the Group. The price to earnings multiple attributable to securities will reflect the risk in achieving operating EPS targets, which impacts the likelihood of vesting and the ultimate value upon vesting. Preference for long-term ESG targets. ESG targets will remain as an additional test for operating EPS tranches of performance rights, allowing for up to 20% reduction in vesting outcomes in the event of material underperformance against the targets. Targets have been reviewed and additional environmental and sustainability targets have been included in the testing conditions for FY24 awards. Progress against targets is reviewed annually. Preference for long-term at risk remuneration. Agreed with the Group CEO (as in prior years) that he would not participate in the STI award Securityholders prefer in principle lower fixed and all his performance-based remuneration in relation to his FY23 performance will be in and STI remuneration and more at risk LTI. the form of LTI.

# **Directors' report**Remuneration report – audited (continued)

# 3.2 Remuneration for executive KMP

Key testing criteria and minor modifications made to the Long-Term Incentive plan

EPS performance testing	Ten-year plan FY23	Change	Ten-year plan FY24	Comment/rationale
Threshold	6% (CAGR) in operating EPS (25% of performance rights vest at the Threshold).	No	6% CAGR in operating EPS for the 4 years to FY27 (25% of performance rights vest at the Threshold)	Performance at the Threshold level (compound annual growth in operating EPS of 6% for the four years to FY27) for performance rights vesting to start has been set such that it requires performance significantly in excess of that expected from relevant peer groups. Goodman must deliver >15% EPS growth compared to the S&P/ASX 100 (2.5% per annum) and S&P/ASX 200 REIT's (2.7% per annum) based on broker consensus earnings in order to achieve the Threshold Level.
Vesting at Threshold	25%	No	25%	
Target	8-9% CAGR in operating EPS (55% to 70% of performance rights vest at Target)	Yes	8.5% CAGR in operating EPS. For the 4 years to FY27 (62.5% of performance rights vest at Target)	Based on the Board approved business and financial strategy, the Target level of performance is 8.5% compound annual growth in operating EPS over the four year testing period. This is the mid-point of the 6% to 11% operating EPS growth hurdles. It is in excess of average broker research estimates for the Group (of approximately 7% per annum) and materially in excess of peers. The Board's operating EPS growth targets for management have remained consistent despite the deteriorating market and the effect on the hurdles of the 43% increase in operating EPS in the past two years. As a consequence, the Board considers the hurdles are higher than in comparable FY23 awards.
Vesting at Target	55% to 70%		62.5%	
Upper level	11% CAGR in operating EPS (100% of performance rights vest)	No	11% CAGR in operating EPS for the 4 years to FY27 (100% of performance rights vest)	For the maximum vesting to occur a compound annual growth of 11% per annum, the Upper Level, must be achieved over four years; this equates to almost 60% growth in operating profit in FY27 relative to the very strong FY23 result.  Vesting at the Upper Level equates to operating profit growth in FY27 of over \$1,020 million (from the FY23 base year) and the FY27 operating profit would be more than \$240 million above the Board's Target level of performance. Given the more challenging operating environment globally, analyst consensus expectations for the broader market (as evident in the S&P/ASX 100) and Goodman, are materially lower than both the Board's Target level and the Upper Level. The Upper Level vesting hurdle, reflects a 4% per annum higher growth rate than market consensus (Visible Alpha) forecasts and a significant stretch component for management
Vesting at Upper level	100%	No	100%	

TSR performance hurdle	Ten-year plan FY23	Change	Ten-year plan FY24	Comment/rationale
Testing criteria	TSR against S&P/ASX 100.	No	TSR against S&P/ASX 100.	S&P/ASX 100 correlates with most benchmarks relevant to Securityholders.
Testing thresholds	0% at 50th percentile 25% at 51st percentile Straight line vesting percentage to 90th percentile where 100% vests.	No	0% at 50th percentile 25% at 51st percentile Straight line vesting percentage to 90th percentile where 100% vests.	Outperformance of the index average is required before any portion is vested. This aligns with Securityholders albeit underlying operational performance may not be reflected in TSR if macro environment changes (as has happened in FY23)
Environmental and sustainability hurdles	Ten-year plan FY23	Change	Ten-year plan FY24	Comment/rationale
Environmental and sustainability performance	Targets set by the Board are tested at the end of year four. A Penalty applies to the number of performance rights that have satisfied the operating EPS hurdle, with 20% maximum reduction in the event of material underperformance against targets.	Yes (refreshed hurdles)	Targets set by the Board are tested annually and at the end of year four.  A Penalty is applied to the number of performance rights that have satisfied the operating EPS hurdle, with 20% maximum reduction in the event of material underperformance against targets.	Given environmental and sustainability initiatives are integrated into the operations of the business, A penalty is applied to the number of performance rights that satisfy the operating EPS hurdle.  A 20% maximum reduction would apply in the event of material underperformance against targets

While STI and LTI both utilise an operating EPS measure the testing criteria are materially different.

#### For the STI:

- + Achieving the operating EPS guidance for a particular financial year acts as a gate and not a financial test determining level of payment.

  The Group's guidance for the financial year ahead must be achieved in order for any bonus pool to be available for that year
- + STI also includes a "gate" relating to conduct and behaviour
- + STI (excluding the CEO) is then determined based on individual employee performance relative to KPI's.

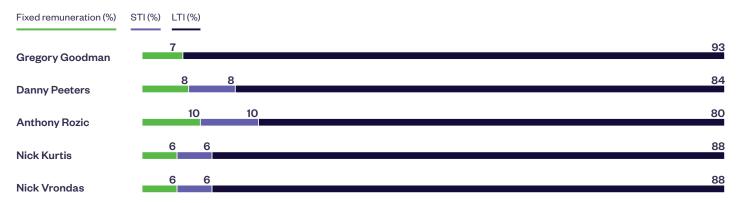

#### For the LTI:

- + Operating EPS is tested over four years, so while the first year's guidance is relevant, it is only one year of the four years growth required to determine CAGR and therefore the vesting of the operating EPS tranches of the LTI. The level of compound annual growth achieved (from 6% to 11%) will determine the financial outcome under the LTI as it relates to the number of securities that would vest
- + The level of certainty relating to operating EPS growth is lower beyond one year, and hence the guidance for the coming financial year is not indicative of future years.

The chart below illustrates the components of KMP remuneration in relation to FY23 performance using:

- + Current fixed base pay
- + STI award (where applicable)
- + LTI award value using the intended grant to be made in September 2023 based on the face value at 30 June 2023 as detailed in section 4.5.

#### REMUNERATION

Note: This analysis is different to both the statutory presentation of remuneration and the vested remuneration, which are referred to elsewhere in the remuneration report.

Under the ten-year plan and with the above remuneration structure:

- + The Group CEO would not receive any performance-based reward in respect of his performance for FY23 if the Group does not meet its minimum performance hurdles under the LTIP over the next four years (measured at 30 June 2027)
- + At the Threshold level of performance (6% per annum compound growth in operating EPS), the Group would have significantly outperformed the S&P/ASX 20 (based on market consensus forecasts) but this would only result in 25% vesting and remuneration outcomes that are materially below the current median for the entities in the S&P/ASX 20 and our comparators (Section 3.7).
- + The ultimate value of the award will be subject to Goodman's security price performance and will only be realised in its entirety in September 2033 (ten years).

Remuneration report - audited (continued)

### 3.3 When is remuneration earned and received?

The chart below illustrates the timing of receipt of the remuneration components for executive KMP. Performance goals under the ten-year plan must be achieved over a period of four years to qualify for performance-based pay. Vesting then occurs in seven equal tranches from years four to ten. There is significant risk associated with vesting given the required returns to satisfy vesting and the final cash outcome is dependent on the movement in the security price over the next ten years.

ren	Fixed nuneration	100% of fixed pay awarded in cash	
	STI	Performance period (1 year), 50% awarded in cash	50% of total STI deferred for 1 year, awarded in cash
			75% of award based on an operating EPS hurdle and subject to no material underperformance against environmental and sustainability targets. Performance measured at the end of year 4.  25% of award based on a relative TSR hurdle. Performance measured at the end of year 4
ıneration			14% of LTI award (subject to service/performance requirements) vests shortly after the end of year 4.  14% of LTI award (subject to service/performance requirements) vests shortly after the end of year 5.
At risk remuneration	LTI	Performance period (1 year)	14% of LTI award (subject to service / performance requirements) vests shortly after the end of year 6.
			14% of LTI award (subject to service / performance requirements) vests shortly after the end of year 7.
			14% of LTI award (subject to service / performance requirements) vests shortly after the end of year 8.
			14% of LTI award (subject to service / performance requirements) vests shortly after the end of year 9.
			14% of LTI award (subject to service / performance requirements) vests shortly after the end of year 10.
		Current year	Year1 Year2 Year3 Year4 Year5 Year6 Year7 Year8 Year9 Year10

#### 3.4 Short-term incentive (STI)

STI is a component of remuneration that is at risk. It is assessed through a series of "gates" based on achievement of financial and non-financial objectives. This structure is transparent, ensures minimum performance requirements for eligibility and aligns individuals with Securityholders.

Questions	
Who is eligible to participate in the STI?	All full-time and part-time permanent employees.  The Group CEO agreed with the Board not to participate in the STI awards, to emphasise reward for long-term decision making across the organisation.
What is the form of the STI award?	Cash. For executive KMP, 50% of the STI award is paid on finalisation of Goodman's full year result.  50% of the STI award is deferred and paid in cash after a period of 12 months and this deferred STI amount is subject to forfeiture under malus provisions (see below).
What is the maximum award participants may earn?	STI awards are capped at 150% of fixed remuneration for executive KMP. Target STI for individuals is also compared to market-based remuneration data and their manager's own assessment of what an appropriate level of incentive compensation may be relative to the long-term value that person brings to the Group.
How is the STI earned?	The Board sets budget targets for the business annually. These targets are set relative to the market conditions, earnings visibility, financial structure and strategy and are believed to be challenging and appropriate.  STI for all staff is subject to: (1) achieving operating EPS (based on the annual target for the relevant year which is disclosed to the market at the beginning of the year in the form of "guidance"; (2) meeting behavioural expectations under the Group's Code of
	Conduct; (3) financial and operational assessment; and (4) assessment against environmental and sustainability targets.  It is important to note, achieving the operating EPS Target does not determine the level of STI. It is a "gate" to the creation of the STI pool for the entire organisation. The test is therefore different and distinct from the LTI test where operating EPS performance determines the level of LTI vesting.
How is the individual STI award determined?	STI rewards annual performance against objectives of the individual and the Group.  The Group objectives include multiple factors as set from time to time, dependent on the market and strategy of the Group.  Overall Group financial performance relative to targets is the primary assessment, overlaid with required achievement against environmental and sustainability objectives and adherence to the Group's core values and conduct.  The performance of individuals is assessed through a detailed and formal performance appraisal process based on contribution to defined objectives, behavioural expectations, annual contribution to results as well as strategic and other contributions where these results or benefits may be reflected in future years. Consideration is also given to the total remuneration package with a view to retaining and appropriately aligning and motivating employees.
Is there malus/clawback?	The executive KMP STI awards are subject to 50% deferral for 12 months from the date of publication of Goodman's financial statements. This deferral period provides protection from malus. The Board has discretion to forfeit deferred amounts for material misstatement, fraud or adverse changes that would have affected the award where there is executive responsibility.
Is STI deferred into equity?	No. A much greater portion of remuneration for executive KMP is in the form of LTI (equity) than arguably any other S&P/ASX 100 entity and hence they are already significantly more aligned with Securityholders' outcomes than executives at other listed entities. As a result, in the Board's view, there is little further benefit in deferring STI into equity.
What happens to STI upon termination or resignation?	For all executive KMP, the deferred portion of STI award is subject to immediate forfeiture in circumstances where employees are dismissed for cause without notice (e.g. fraud or serious misconduct) or resign from the organisation, barring special circumstances.

# 3.5 Long-term incentive (LTI)

The Goodman LTIP is an equity plan where rewards are at risk and dependent on performance and time. It is open to all permanent employees to create alignment with the interests of Securityholders over the long term.

- + No value is derived from LTI unless minimum performance hurdles of operating EPS and relative TSR are met or exceeded, and performance rights have no entitlement to dividends or assets until they vest. The Threshold target with respect to operating EPS (where only 25% of these performance rights vest) is significantly ahead of estimates for the S&P/ASX 20, S&P/ASX 100 and S&P/ASX 200 REIT sector
- + If performance achieves or exceeds long-term targets and performance rights vest, LTI represents the majority of remuneration for executive KMP and becomes a material component of remuneration for all participating employees
- + Performance rights represent a small portion of the Group's equity and a small percentage of the likely value created for Securityholders if they vest. CAGR for operating EPS is used to test performance and has to absorb dilution created through the vesting of securities under the LTIP, effectively mitigating the impact of the dilution on Securityholders.

The key terms of the LTIP are set out on the next page.

# 3.5.1 FY24 LTI awards

Questions in relation to	Questions in relation to grants to be made in FY24					
Who is eligible to participate?	All full-time and part-time permanent employees are eligible to participate in either the five-year or the ten-year plans. Executive KMP and senior executives participate in the ten-year plan.					
What is the form of the award?	The LTIP awards performance rights linked to the underlying ASX listed securities. The performance rights do not receive distributions or have any right to income, net assets or voting until vesting.					
What is the maximum LTI participants may earn?	When considering the overall size of LTI awards, the Board also considers the number of securities that could vest and the associated impact on the operating EPS growth. The total five-year and ten-year performance rights outstanding under the LTIP are capped at 5% of issued capital with vesting of approximately 0.7% pa, assuming all hurdles are met and all employees remain employed.  The Board considers the performance of the Group relative to the comparator group, the amount of overall operating profit, the competitive nature of the global labour markets in which the Group operates and the value of the team in the local and global marketplace, as appropriate. Ultimately it is a function of the performance of Goodman and the security price, the better the performance and the higher the price, the greater the reward. This is fully aligned with the outcomes for the Securityholders.					
How is the number of rights determined?	The Board sets the quantum based on a number of factors described in sections 3.7.1 and 3.7.2. The Board considers the face value per right as well as other factors when determining the LTI award.					
What are the performance measures?	Behaviour in accordance with Goodman's core values is an absolute requirement for the granting of performance rights. The Board believes that the commercial decisions management makes in fulfilment of its overall financial objectives are best reflected in two key indicators: operating EPS and TSR (relative to the S&P/ASX 100).  Operating EPS is a critical measure of long-term Group-wide performance of the operations (see section 3.5.5).  The hurdles are set to be competitive and challenging relative to external and internal historical and prospective reference points (see section 3.5.4).  TSR provides an effective check against increasing risk practices within the Group in that the security price to earnings multiple will reflect the perceived risk in the Group in achieving operating EPS targets.  Focus on LTI is an efficient way of rewarding sustained performance and retaining talent.  The proposed FY24 LTI awards, will incorporate environmental and sustainability targets, in addition to the operating EPS and relative TSR hurdles. Targets set by the Board will be tested annually and at the end of the LTIP testing period. A penalty can apply to the number of performance rights that have satisfied the operating EPS hurdle, with 20% maximum reduction if material underperformance against the environmental and sustainability targets occurs.					
What is the weighting?	75% operating EPS hurdle 25% relative TSR hurdle					
What is the performance period?	Ten-year plan: both operating EPS and relative TSR performance are tested over four financial years starting from 1 July in the year the grant was made. Operating EPS growth is assessed in the fourth year relative to the year preceding the year of the grant. Environmental and sustainability targets are reviewed annually and tested at the end of year four. Five-year plan: both operating EPS and relative TSR performance are tested over three financial years starting from 1 July in the year the grant was made. Operating EPS growth is assessed in the third year relative to the year preceding the year of the grant. Environmental and sustainability targets are reviewed annually and tested at the end of year three.					
How do the LTIP awards vest?	Ten-year plan: Subject to meeting performance hurdles, vesting occurs in equal tranches shortly after the end of years 4 – 10, provided participants remain employed by the Group.  Five-year plan: Subject to meeting performance hurdles, vesting occurs in equal tranches shortly after the end of years 3 – 5, provided participants remain employed by the Group.					
Is there malus/clawback?	Subject to immediate forfeiture in circumstances where employees are dismissed for cause (e.g. fraud or serious misconduct). LTI will also be forfeited where employees cease to be employed, unless in Special Circumstances.					
What happens to LTIP awards upon termination?	Performance rights lapse upon the employee leaving Goodman unless in Special Circumstances (primarily Death, Total and Permanent Disablement, Redundancy and Retirement in the normal course) in which case they are not subject to the employment requirement and vest subject to performance hurdles being met and the usual vesting timetable.					
What rights are attached to the performance rights?	Performance rights have no Securityholder rights prior to vesting (e.g. distributions, voting, rights issue participation). They would be subject to reconstruction in instances of corporate events such as stock splits or stock consolidations.					
Executive KMP equity holding	Executive KMP are required to hold 100% of the value of their fixed remuneration in Goodman securities, determined at time of purchase. In addition, Goodman's remuneration structure includes significant emphasis on performance-based remuneration in equity and the overall exposure of executive KMP to Goodman securities extends significantly beyond this requirement principally through participation in the LTIP.					

# Questions in relation to grants to be made in FY24 (continued)

# What are the vesting conditions for FY24 ten-year plan grants?

### Operating EPS tested (75% of grant)

The Board has set an operating EPS performance hurdle of growing operating EPS from the FY23 result of 94.3 cents to between 119.1 cents (Threshold level) and 143.2 cents (Upper level) in FY27. Vesting of 25% of the operating EPS portion occurs upon satisfying testing conditions at the Threshold level with a sliding scale up to 100% at the Upper level. The range is equivalent to between 6%pa and 11%pa CAGR in operating EPS or approximately 26% to 52% cumulatively over the four-year testing period.

In addition, a penalty may apply to the number of performance rights that have satisfied the operating EPS hurdle if environmental and sustainability targets are not met. These are reviewed by the Board annually and at the end of the testing period with 20% maximum reduction in the number of rights vesting under the operating EPS tranches, in the event of material underperformance against targets.

## Relative TSR tested (25% of grant)

Vesting of the TSR awards is subject to achievement of cumulative TSR relative to the S&P/ASX 100 entities over a four year period:

- + 25% of awards vest for performance at the 51st percentile
- + Awards vest on a sliding scale between 25% and 100% for performance between the 51st and the 90th percentile
- + 100% of awards vest for performance at the 90th percentile or above.

# What are the vesting conditions for FY24 five-year plan grants?

### Operating EPS tested (75% of grant)

The Board has set an operating EPS performance hurdle of growing operating EPS from the FY23 result of 94.3 cents to between 112.3 cents (Threshold level) and 129.0 cents (Upper level) in FY26. Vesting of 25% of the operating EPS portion occurs upon satisfying testing conditions at the Threshold level with a sliding scale up to 100% at the Upper level. The range is equivalent to between 6% pa and 11% CAGR in operating EPS or approximately 19% to 37% cumulatively over the three-year testing period.

In addition, a penalty may apply to the number of performance rights that have satisfied the operating EPS hurdle if environmental and sustainability targets are not met. These are reviewed by the Board annually and at the end of the testing period with 20% maximum reduction in the number of rights vesting under the operating EPS tranches, in the event of material underperformance against targets.

# Relative TSR tested (25% of grant)

Vesting of the TSR awards is subject to achievement of cumulative TSR relative to the S&P/ASX 100 entities over a three year period:

- + 25% of awards vest for performance at the 51st percentile
- + Awards vest on a sliding scale between 25% and 100% for performance between the 51st and the 90th percentile
- + 100% of awards vest for performance at the 90th percentile or above.

# Can the hurdles be adjusted?

No (subject to ASX Listing Rule adjustments).

No.

Remuneration report - audited (continued)

#### 3.5.2 FY23 LTI awards

### Questions specific to grants made in FY23

# What are the vesting conditions for FY23 ten-year plan grants?

# Operating EPS tested (75% of grant)

The Board set an operating EPS performance hurdle of growing operating EPS from the FY22 result of 81.3 cents to between 102.7 cents (Threshold level) and 123.4 cents (Upper level) in FY26. Vesting of 25% of the operating EPS portion occurs upon satisfying testing conditions at the Threshold level with a sliding scale up to 100% at the Upper level. The range is equivalent to between 6% pa and 11% pa CAGR in operating EPS or approximately 26% to 52% cumulatively over the four-year testing period.

In addition, a penalty may apply to the number of performance rights that have satisfied the operating EPS hurdle if environmental and sustainability targets are not met. These are reviewed by the Board annually and at the end of the testing period with 20% maximum reduction in the number of rights vesting under the operating EPS tranches, in the event of material underperformance against targets.

### Relative TSR tested (25% of grant)

Vesting of the TSR awards is subject to achievement of cumulative TSR relative to the S&P/ASX 100 entities over a four year period:

- + 25% of awards vest for performance at the 51st percentile
- + Awards vest on a sliding scale between 25% and 100% for performance between the 51st and the 90th percentile
- + 100% of awards vest for performance at the 90th percentile or above.

# What are the vesting conditions for FY23 five-year plan grants?

# Operating EPS tested (75% of grant)

The Board set an operating EPS performance hurdle of growing operating EPS from the FY22 result of 81.3 cents to between

96.9 cents (Threshold level) and 111.2 cents (Upper level) in FY25. Vesting of 25% of the operating EPS portion occurs upon satisfying testing conditions at the Threshold level with a sliding scale up to 100% at the Upper level. The range is equivalent to between 6% pa and 11% CAGR in operating EPS or approximately 19% to 37% cumulatively over the three-year testing period. In addition, a penalty may apply to the number of performance rights that have satisfied the operating EPS hurdle if environmental and sustainability targets are not met. These are reviewed by the Board annually and at the end of the testing period with 20% maximum reduction in the number of rights vesting under the operating EPS tranches, in the event of material underperformance against targets.

### Relative TSR tested (25% of grant)

Vesting of the TSR awards is subject to achievement of cumulative TSR relative to the S&P/ASX 100 entities over a three year period:

- + 25% of awards vest for performance at the 51st percentile
- + Awards vest on a sliding scale between 25% and 100% for performance between the 51st and the 90th percentile
- + 100% of awards vest for performance at the 90th percentile or above.

# 3.5.3 FY22 LTI awards

# Questions specific to the grants made in FY22

What are the vesting conditions for FY22 ten-year plan grants?

# Operating EPS tested (75% of grant)

The Board has set an operating EPS performance hurdle of growing operating EPS from the FY21 result of 65.6 cents to between 82.8 cents (Threshold level) and 96.0 cents (Upper level) in FY25. Vesting of 25% of the operating EPS portion occurs upon satisfying testing conditions at the Threshold level with a sliding scale up to 100% at the Upper level. The range is equivalent to between 6% and 10% CAGR in operating EPS or approximately 26% to 46% cumulatively over the four-year testing period.

In addition, a penalty may apply to the number of performance rights that have satisfied the operating EPS hurdle if environmental and sustainability targets are not met. These are reviewed by the Board annually and at the end of the testing period with 20% maximum reduction in the number of rights vesting under the operating EPS tranches, in the event of material underperformance against targets.

# Relative TSR tested (25% of grant)

Vesting of the TSR awards is subject to achievement of cumulative. TSR relative to the S&P/ASX 100 entities over a four year period:

- + 25% of awards vest for performance at the 51st percentile
- + Awards vest on a sliding scale between 25% and 100% for performance between the 51st and the 90th percentile
- + 100% of awards vest for performance at the 90th percentile or above.

# What are the vesting conditions for FY22 five-year plan grants?

# Operating EPS tested (75% of grant)

The Board has set an operating EPS performance hurdle of growing operating EPS from the FY21 result of 65.6 cents to between 78.1 cents (Threshold level) and 87.3 cents (Upper level) in FY24. Vesting of 25% of the operating EPS portion occurs upon satisfying testing conditions at the Threshold level with a sliding scale up to 100% at the Upper level. The range is equivalent to between 6% and 10% CAGR in operating EPS or approximately 19% to 33% cumulative growth in operating profit over the three year testing period.

# Relative TSR tested (25% of grant)

Vesting of the TSR awards is subject to achievement of cumulative TSR relative to the S&P/ASX 100 entities over a three year period:

- + 25% of awards vest for performance at the 51st percentile
- + Awards vest on a sliding scale between 25% and 100% for performance between the 51st and the 90th percentile
- + 100% of awards vest for performance at the 90th percentile or above.

### 3.5.4 Setting operating EPS hurdles

The operating EPS target range under the ten-year plan is only for the purpose of testing criteria for vesting of performance rights. The range does not constitute earnings guidance for the Group.

The hurdles are set in line with the "pay for performance" culture and the desire for them to be both challenging and competitive while maintaining the integrity of the business strategy and risk management objectives in a sustainable manner.

The hurdle range, has been set with particular reference to:

- + The significant proportion of the Group's revenue over the next four years, being at risk in the sense that it is not currently contracted and subject to a wide number of variables, particularly in regard to development activities and performance fees
- + The range of potential real estate opportunities for the Group globally, given the Group's risk parameters and concentrated locations of operation
- + The long-run historical performance of the Group, noting that previous history is not a reflection of future earnings
- Increased volatility across the global economic and political environment which is manifesting in higher cost inflation, slower real GDP growth rates and higher interest rates.

The Board's operating EPS growth targets for executive KMP and the senior executives have remained consistent despite the deteriorating financial market conditions as reflected in the analyst consensus expectations for the broader market (as evident in the S&P/ASX 100) and Goodman being materially lower than both the Target and the Upper Level hurdles. In addition, the Group has delivered a 43% increase in operating EPS in the past two years. Combined, this means the difficulty of the hurdles for the FY24 awards has increased significantly compared with FY23 by maintaining the challenging growth rates in operating EPS of 6% to 11%, despite the substantially higher base. To achieve maximum vesting at the Upper Level hurdle equates to operating profit growth in FY27 of over \$1,020 million (from the FY23 base year) and an increase in operating profit of more than \$240 million compared to the Board's Target level of performance.

Since implementation of the ten-year plan in FY21 there has been two years of significant operating profit growth. As a result, the increase in operating profit from the base year required for full vesting of FY24 awards represents a 46% higher outcome than for the awards made in FY22.

### Profit growth to achieve full vesting for the operating EPS tranches

	<i>A</i>	ward yea	ır
	FY22	FY23	FY24
Base year operating profit (\$M)	1,219	1,528	1,528
Final year operating profit (\$M) at 11% CAGR in operating EPS	1,935	2,424	1,929
Increase in operating profit (\$M) relative to the base year required to achieve Upper Level hurdle	715	896	2,320
Percentage increase in operating profit growth versus FY22 awards	n/a	25%	46%

The Board has set the operating EPS hurdles as follows:

Threshold Level hurdle – CAGR in operating EPS of 6% for the four years to FY27

Performance at the Threshold Level hurdle is required for performance rights vesting to start and has been set such that it requires performance materially in excess of relevant peer groups (S&P/ASX 20, S&P/ASX 100 S&P/ASX 200 REIT. The Board considers performance at Threshold level to be very good relative to the market and with respect to the required operational outcomes. However, despite significant outperformance required in excess of comparator Groups, only 25% vesting would occur and remuneration outcomes are estimated to be well below the median remuneration outcomes for these comparators.

Target Level hurdle – CAGR in operating EPS of 8.5% for the four years to FY27

Performance at "Target" Level is in line with aspirations determined by the Board business and financial strategy and is considered by it to be a very strong outcome. It must be achieved while taking into account what the Board believes are appropriate risk management constraints for the business, and given the context of the global economic and political environment, higher interest rates, inflation, cost of capital and risk settings. It is contingent upon increased activity levels and market conditions remaining favourable. As stated above, the Board's operating EPS growth targets for management have remained consistent despite the deteriorating market and the effect of compounding growth off the 43% increase in operating EPS in the past 2 years, which means all the hurdles are higher than in comparable FY22 awards. Target level is in excess of average broker research estimates1 for the Group (approximately 7% pa) and materially in excess of peers. Only 62.5% of performance rights vest at Target.

Remuneration report - audited (continued)

Upper-Level hurdle – CAGR in operating EPS of 11% for the four years to FY27

- Performance at the Upper-Level hurdle would require outcomes significantly ahead of internal targets and analyst expectations (see below) and is considered by the Board to be an outstanding outcome incorporating a large stretch component
- + To achieve maximum vesting at the Upper Level hurdles, equates to operating profit growth in FY27 of 60% or over \$1,020 million (from the FY23 base year) and an increase in operating profit of more than \$240 million compared to the Board's Target level of performance
- + Given the more challenging operating environment globally, analyst consensus expectations for the broader market (as evident in the S&PASX 100) and Goodman, are materially lower than the Upper Level. The Upper Level vesting hurdle reflects a 4% per annum higher growth rate than market consensus, Visible Alpha forecasts.

The hurdles are set for the entire period of the plan and hence performance must be achieved regardless of changes to business conditions globally. Management and other employees carry the risk associated with external factors negatively impacting operating earnings and in the Board's view this risk has increased given the ongoing geo-political tensions and impacts on supply chains, and global economic activity. The Board considers the 6% to 11% operating EPS CAGR to be a truly challenging hurdle range for executives in the current environment.

In addition, the hurdles are set with the desire to achieve a sustainable long-term growth rate that is competitive with the market on a risk adjusted basis. This is reflected in the relatively low gearing of the Group (relative to comparators) and its other risk settings. Considering the difference in gearing, the FY24 hurdles are relatively higher compared to peers.

Comparator Group	Ten-year plan operating EPS¹ hurdles (cents)	Estimated CAGR in operating EPS <sup>1</sup> FY24 - FY27	Growth in operating EPS¹ FY24 to FY27 based on estimated CAGR	LTI vesting based on estimated CAGR in operating EPS	Additional operating profit <sup>2</sup> to achieve Upper Level hurdle (A\$M)

# 3.5.5. Operating EPS – long-term cash flow alignment with vesting outcomes

The Group presents statutory profit in accordance with Australian Accounting Standards, including all required disclosures. Operating profit is a Board/Management defined profit measure in addition to Statutory profit which is common market practice (bespoke to each company and typically not an IFRS measure, such as underlying profit, operating profit, management profit, normalised profit, FFO, AFFO etc.) to better reflect the underlying earnings of the business (or in Goodman's case, the underlying cash-based earnings).

The Board believes that managing the business, on what is primarily a cash profit basis, is fundamental to long-term resilience and is the strongest determinant of value creation for Securityholders over time. That is the intent of the Group's operating profit definition (and operating EPS), and it is one of the key measures used to drive the business strategy that is communicated to employees to execute. It is also why the Board has used operating EPS (operating profit per share diluted for tested performance rights) as one of the principal performance tests in its LTI awards. This reflects the actual cash-based operating EPS to Securityholders when testing outcomes are confirmed.

Importantly, based on analyst reports and investor discussions, the market overwhelmingly uses operating profit as the most relevant and appropriate measure to value the Group. This is important as it directly impacts the targets we set.

# Calculation of operating EPS

Operating EPS has been calculated and applied consistently since being adopted in 2005.

- + Operating profit intentionally excludes non-cash measures.
  Previously, the Group has excluded significant realised gains (such as the urban renewal realisation gains) where these were believed to be cyclical in nature and not reflective of underlying long-term earnings
- As required under the accounting standards, the share-based payments (SBP) expense in the Group's statutory income statement reflects the amortisation of the aggregated "fair value" applicable to the outstanding performance rights. Given the volatility inherent in the accounting valuation of the performance, it is appropriate for the SBP expense to be excluded from operating profit, like other non-cash items (such as revaluations, derivative movements). They have no impact on Securityholders until they are vested.

+ The Board believes the cost of the plan, which arises from the future dilution through the issuance of securities under the LTIP, is most appropriately reflected by including all vested and tested performance rights in the denominator used for determining operating EPS. This is not subject to accounting estimation and is a more reliable measure of the cost to Securityholders and the actual impact on operating EPS

The operating EPS at each reporting date is calculated using the weighted average number of securities, which includes:

- + All securities that have already vested
- + Rights that have been tested and assessed as having met the hurdles but have not yet vested
- + Noting that if we amended the calculation to include in the denominator all securities potentially issuable under the LTIP (i.e. including those which have not passed the test and therefore may not ever vest), it would not have made a material difference to operating EPS growth or vesting. For the avoidance of doubt, all rights that have passed the testing hurdles are included in the operating EPS calculation and therefore operating profit needs to absorb this dilution to meet future hurdles.

The inclusion of these unvested performance rights in the operating EPS calculation is a conservative treatment as:

- + The financial impact of the performance rights occurs only when securities are issued through the dilution to net assets per security at the time of issuance and the dilution to future operating EPS
- + Not all performance rights vest even if they have satisfied performance hurdles, which does not align with the accounting for the SBP expense. The accounting for SBP potentially has the effect of incurring an expense impacting prior year performance, which is later reversed if vesting conditions are not met. This is not an appropriate methodology of testing employee performance
- + Following successful testing at years three or four (for the five-year plan and ten-year plan respectively), performance rights still have no entitlement to income (distributions) or net assets nor do they have any of the other usual Securityholder rights until they vest, which may be up to six years later (under the ten-year plan).

Therefore, in the Board's view realised cash profit as represented by diluted operating EPS is the most reliable measure of value creation for Securityholders and continues to be the most appropriate means by which to assess employee performance. It is also consistent with the valuation of Goodman by the market, which primarily uses operating profit and operating EPS to assess security value.

Remuneration report - audited (continued)

#### Use of cash settled performance rights

In certain jurisdictions, it is impractical to issue performance rights which vest into Goodman securities. In these instances, cash settled performance rights ("phantoms") are issued, with the same economic outcome on vesting. From time to time, the Group may issue new securities into the market to fund the settlement of those rights. This results in the same outcome to Securityholders as if the phantoms had been settled in Goodman securities because it results in the situation where the dilutionary impact to operating EPS is consistent with the equity settled performance rights. As in recent years, the Board's current intention is to issue securities to fund the cash requirements to settle the phantoms. This results in the effective funding of the LTIP having no cash impact for the Group and therefore the share-based payments expense remains effectively a non-cash item in the context of the definition of operating profit.

# 3.6 Non-financial measures

# 3.6.1 Types of non-financial measures

Goodman continues to increase accountability and transparency across a range of non-financial measures which are important to the Group's culture, its stakeholders and the world more broadly. These are integral components to the operations of the organisation, the health and wellbeing of the Group's people and the communities in which Goodman operates.

These values and aspirations encompass a wide range of areas including:

- + Environmental considerations for developments and building operations
- + Energy procurement including renewable targets
- + Group emissions and embodied emissions
- + Health and wellbeing of Goodman's people and communities
- Good corporate and social governance including diversity and inclusion in the workforce
- + Behaviour in line with Goodman's Code of Conduct.

All of these aspirations are integrated into Goodman's culture and business operations and the Group's financial results are achieved while also implementing and performing to these standards.

The way employees conduct themselves is crucial to the success of the Group. Goodman has consistent and transparent practices in place for managing non-compliance with policies and the approach to risk guides the way all employees are expected to conduct themselves. Within the Code of Conduct, there is a set of eight guiding principles that encourage employees to uphold Goodman's reputation and behave appropriately in dealing with our customers and other team members. The guiding principles are:

- + Act in a professional manner
- + Work as a team and respect others
- + Treat stakeholders fairly
- Value honesty and integrity
- + Follow the law and our policies
- Respect confidentiality and do not misuse information
- + Manage conflicts of interest
- + Strive to be a great team member.

Individuals' behaviour and adherence to the Code of Conduct, governance, implementation of diversity principles and social programs are assessed as a gate to STI and LTI awards. Breaches can also result in forfeiture of LTI or potentially more severe consequences, depending on severity.

### Consequences of breaches of Code of Conduct in FY23

#### Conduct and or behavioural Issues

Consequences Termination, forfeiture of STI, forfeiture of LTI

In respect of the FY23 STI awards and the intended LTI awards that will be made in September 2023 (in respect of FY23 performance), key environmental and sustainability targets will also be assessed based on the individuals' areas of influence and contributions as part of overall assessment.

### 3.6.2 Integration of non-financial measures into STI

STI process		
		Impact
1st hurdle	Conduct, Governance, Social and Diversity	Gate
2nd hurdle	Operating EPS	Gate
Financial, and operational assessments (including environmental objectives)	Individual assessment	0% to 100%

# 3.6.3 Integration of non-financial measures into LTI

The Board also believes that ownership through the LTIP assists in creating a common purpose in the organisation and that this has been strongly reflected in the Group's performance over many years. Behaviour and adherence to the Group's Code of Conduct have always been a prerequisite to entitlement to vested LTI and since 2021, additional hurdles for vesting, related to our environmental and sustainability targets have been incorporated into intended awards.

- + The Board will review progress on targets annually and set review long term targets each year as they relate to the new testing period
- + Environmental and sustainability objectives and their execution are integrated into the operations of the Group, particularly for development projects. For this reason, the additional penalty criteria will apply to the operating EPS tested performance rights. This aligns operational targets which are within the control of senior executives and employees at all levels and therefore have the most logical connection to operational performance
- + Targets set by Board will be tested formally at the end of the testing period (year four for the ten-year plan)
- + The penalty applies to the number of performance rights that have satisfied the operating EPS hurdle with 20% maximum reduction in the event of material underperformance against targets
- + Targets will be reported each year in the remuneration report.

# LTI Process - three- and four-year testing period

	, 01	
		Impact
1st hurdle	Conduct and behaviour	Gate: 0% to 100%
2nd hurdle	Operating EPS and relative TSR	0% to 100%
Group assessment	Environmental and sustainability	The penalty applies to the number of performance rights that have satisfied the operating EPS hurdle with 20% maximum reduction in the event of material underperformance against targets

Remuneration report - audited (continued)

#### 3.7 Considerations for setting of awards

The Board is focused on creating a remuneration structure that supports the Group's strategy and is aligned with outcomes for Securityholders and then on determining an appropriate quantum of remuneration under that structure. In assessing the Group CEO and other executive KMP remuneration for FY23, the Board has given consideration to:

- + Feedback from investor engagement following the November 2022 AGM for remuneration related matters
- + Maintaining the structure and principles of the Group's remuneration strategy
- + The Group's relative performance against operational targets in FY23
- + The Group's consistent track record over the past ten years that has also positioned the business for the future
- + Global market conditions for human capital in the sector
- + Balancing employee and Securityholder outcomes
- + Hurdles and testing criteria for performance rights.

The Board has assessed outcomes for Securityholders, based on the testing criteria under the five and ten-year plans and that the pay for performance alignment is with all Goodman employees (all permanent employees, up to 971 people, are eligible to participate in the LTIP). Based on the proposed hurdles, the Board believes that significant balance and alignment exists between the cost of the plan and net outcomes achieved for Securityholders.

- + Before any performance awards are realised under the ten-year plan hurdles, significant Securityholder value that equates to \$12 billion in market capitalisation growth, must be created, consistent with >32% TSR over the testing period (all other things being equal and based on the assumptions set out in the table below)
- + The maximum employee share of the value created will occur if the awards fully vest through achieving the 11% CAGR in operating EPS over the four year testing period and the relative TSR performance is at the 90th percentile. This represents only 3.1% of the \$22 billion value created for Securityholders (net of dilution) or 52% potential security price growth (all other things being equal)
- + Delivered over 10 years, the dilution to Securityholders from the plan at maximum vesting, averages only 0.3% per annum compared to the 52% total security price growth experienced by Securityholders. In addition, by definition, this 0.3% dilution has been absorbed to achieve the hurdles
- + If growth were to exceed 11% per annum and the security price grows beyond the assumption above, the employee share diminishes relative to value created for Securityholders.

### Estimated Securityholder value over the four-year testing period under the LTIP

	CAGR in operating EPS over the four year testing per				
	Less than 6.0%	6.0%	11.0% (or more)		
Economic outcomes					
Cumulative operating profit growth	<32.1%	32.1%	58.5%		
Cumulative operating EPS growth	<26.2%	26.2%	51.8%		
Percentage of performance rights vesting <sup>1</sup>	0.0%	25.0%	100.0%		
Year 4 operating profit	<\$2.4B	\$2.4B	\$2.8B		
Market capitalisation (MCAP) at end of year 42	<\$49.8B	\$49.9B	\$59.9B		
Net value created for Securityholders (growth in MCAP) <sup>2</sup>	<\$11.9B	\$11.9B	\$22.0B		
Assumed security price <sup>3</sup>	n/a	\$25.34	\$30.47		
Effect cost of total plan / MCAP	0.0%	0.3%	1.1%		
Employee share of Securityholder value created <sup>4</sup>	0.0%	1.4%	3.1%		

- 1. Assumes that the proportion of rights that vest under the operating EPS hurdle also applies to the rights that vest under the relative TSR hurdle.
- 2. Based on 30 June 2023 security price, assuming the market Price/Earnings (P/E) multiple applied to operating EPS remains unchanged over time and is inclusive of an allowance for increases in the securities on issue because of securities vesting under the LTIP. Excludes distributions and dividend payments that may be made during the period.
- 3. Assumes constant P/E multiple at the end of year 4 and the relevant CAGR in operating EPS growth.
- 4. Values the number of vested securities at the assumed security price which is calculated using the 30 June 2023 value and growing it at the same rate as the operating EPS growth. This includes full dilution including the five-year plan securities assuming the same growth rate for FY27.

### 3.7.1 Considerations for award quantum - Goodman Group in context

The Board and Remuneration and Nomination Committee have considered the Group's global operations, including its Partnerships, when assessing the executives' roles and remuneration awards.

In this context, Goodman:

- + Is an international real estate fund manager
- + Reported \$1.8 billion operating profit, and a combined statutory profit across the Group and Partnerships of \$3.0 billion in FY23
- + Reported NTA of \$9.12, with gearing of 8.3% and available liquidity of \$3.1 billion
- + Is the largest listed specialist developer of logistics real estate in the world, \$13.0 billion of WIP and significant growth in scale, value and complexity of our development projects
- Manages and creates value across \$81 billion of assets globally which has almost doubled in the past five years
- Manages capital allocation and funding across various activity types, which is sourced from multiple jurisdictions
- + Has a market capitalisation of \$37.8 billion at 30 June 2023 and is a member of the S&P/ASX 20 index
- Generates 77% of operating earnings from management and development activities, which require more intensive day to day activity than a passive investment portfolio
- Provides its customers and partners with investment management, asset management, development, financial, transaction and capital management services in the listed and private equity capital markets globally
- + Derives 63% of operating earnings from international markets with approximately 65% of employees situated offshore.

The Group has limited direct comparable market peers in Australia, having operating businesses in five continents and 14 countries, each with market driven remuneration outcomes. The Group has up to 971 employees at 30 June 2023, the majority of whom are offshore, and consequently Goodman competes for labour in an international market, which the Board considers when assessing the quantum of remuneration awards. In FY23, the Board has referenced:

- A range of local and global comparators with operations of similar scale and complexity and certain companies in the S&P/ASX 20
- + A range of relevant Australian listed comparators with significant (>50%) global operations
- + Global real estate companies, REITs and developer/ fund managers including specifically from the logistics real estate sector. In the Real Estate Sector the closest comparators are Prologis and Segro, noting that:
  - Prologis is larger by market capitalisation and assets, but Goodman has a more significant proportion of earnings from development and management activities. Also Goodman has more globally diversified activities – whilst Prologis operates in a similar number of jurisdictions it is more skewed to one location, being the US
  - Segro is smaller and predominantly UK focused, with a small proportion of its assets in Europe, whereas Goodman operates in 14 countries globally. Again, Goodman has a more significant proportion of earnings from development and management activities.
- + While Goodman is an S&P/ASX REIT under the GICS classification system, the ASX listed REITs:
  - Are significantly smaller (on average <20% of Goodman's market capitalisation)
  - Typically have less than 20% active earnings compared to 77% for Goodman
  - Typically only operate in Australia, whereas Goodman has significant global operation.

Remuneration report - audited (continued)

Private equity (PE) firms. Noting that PE firms are significant players in the logistics real estate sector with considerable new capital with a desire to assemble teams and invest in the sector. PE remuneration structures are particularly relevant because:

- + the nature of pay for performance remuneration structures is highly equity-based and outcome-driven similar to the Group's remuneration structure
- + the period of testing and realisation of remuneration is linked to investor outcomes over significant periods of up to ten years, again a similar remuneration structure. The majority of the Group's assets are within PE (unlisted) market entities, which in turn creates significant competition for high performing people.

# Various Reference Groups

	Annual CEO remuneration								
Peer group comparator	Reason for comparison	Range	Average	Median	% LTI	LTI term (yrs)	1 year TSR	3 year TSR	5 year TSR
Goodman	Group CEO	n/a	\$19.5m <sup>1</sup>	n/a	92%	10	14%	41%	128%
S&P/ASX 20	Goodman is number 15 in the S&P/ASX 20 index	\$6m - \$37m	\$11m	\$9m	43%	4	16%	49%	59%
Selected ASX listed companies with global operations	63% of Goodman's earnings are outside Australia. The comparator group provides a reference to local companies with international operations	\$6m - \$37m	\$15m	\$11m	49%	4	14%	44%	80%
S&P/ASX 100 and Global Property Companies/ REITs <sup>2</sup>	Global comparators are included given the jurisdictions in which they operate, the complexity of their operations and the size and scale of the entities.	\$5m - \$73m	\$15m	\$8m	44%	5	-4%	12%	28%

<sup>1.</sup> Based on proposed FY24 award.

In the Board's view, the competitive environment for logistics assets and consequently also for teams with skills to develop and manage the products and services over the long term, remains intense. Goodman is seen as a global leader in this space and the potential loss of key employees and regional teams poses significant commercial risk. The Board has also assessed the FY24 awards in this context.

## 3.7.2 Considerations for award quantum - structure

The Board has made its comparison of the awards based on face value, assessed against comparator groups. Given the variability in the components of remuneration structures in the market, Goodman's comparator group analysis of value and quantum of awards is assessed in the context of the degree of risk associated with the structures and the vesting periods:

- + The Board has set the hurdles in respect of the intended LTI award for FY24 to provide additional challenges (and risk of achievement) for all employees and to achieve a high degree of alignment and balance with Securityholder outcomes demonstrated in the Economic Outcomes table in section 3.7
- + Performance rights awarded under the LTIP do not have any voting rights or rights to dividends until vested, even after passing testing hurdles
- + Significant financial outperformance in FY23 versus targets and continued outperformance relative to peer group over three and five years
- + The proposed LTI awards have longer testing period, longer vesting period and significantly larger portion at risk than the market generally.

On this basis of the total remuneration outlined, considering the market capitalisation and performance differentials of the groups above, it is considered that an appropriate benchmark for the Group CEO's remuneration remains a potential Face Value of around A\$20 million The Board has set the remuneration accordingly.

The Board's proposed award for the Group CEO (based on face value of the LTI) is detailed below:

Group CEO:	Number of rights	Goodman security price <sup>1</sup> \$	LTI at Threshold <sup>2</sup> \$M	LTI at Target <sup>2</sup> \$M	LTI at Upper level <sup>2</sup> \$M	Fixed pay \$M	Fixed pay and LTI (25.0% vesting) \$M	Fixed pay and LTI (62.5% vesting) \$M	Fixed pay and LTI (100% vesting) \$M
FY23 CEO	900,000	20.07	4.5	11.3	18.1	1.4	5.9	12.7	19.5
FY22 CEO	1,000,000	17.84	4.5	11.2	17.8	1.4	5.9	12.6	19.2
Variance (%)	(10.0)%	12.5%	1.3%	1.3%	1.3%	-	1.0%	1.1%	1.2%

<sup>1.</sup> Face value at the end of the financial year

## Group CEO maximum possible outcomes for FY23 versus FY22

Based on the proposed award, the maximum Face Value of remuneration which can be received by the Group CEO, over ten years, if 100% vesting occurs, is equivalent to (1% higher than) the remuneration awarded last year, noting that in FY23 the Group posted significant outperformance and followed FY22, the strongest financial performance in the Group's history. Based on the hurdles set for the FY24 awards, the Group CEO would only receive 62.5% vesting at the Board's Target performance level.

	CAGR in EPS	Vesting %	Vesting \$m	Fixed remuneration \$m	Total remuneration \$m	Total return over four years	Out- performance versus S&P/ASX 20	Pay difference <sup>1</sup> \$m
S&P/ASX 20 consensus	2.8%	n/a	n/a	2.4	10.7	12%	n/a	n/a
Goodman Threshold	6.0%	25%	4.5	1.4	5.9	26%	13%	-4.7
Goodman Target	8.5%	63%	11.1	1.4	12.7	39%	25%	2.1
Goodman Upper level	11.0%	100%	118.1	1.4	19.5	52%	37%	8.9

 $<sup>1. \</sup>quad \text{Between Group CEO's potential remuneration vs S\&P/ASX 20 OEO's potential remuneration} \\$ 

 $<sup>2. \</sup> Threshold would result in 25.0\% \, LTI \, vesting, Target \, would \, result in 62.5\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, would \, result in 100.0\% \, LTI \, vesting \, and \, Upper \, level \, upper \, lev$ 

Remuneration report - audited (continued)

## 4. GROUP PERFORMANCE AND OUTCOMES

The Group has delivered an exceptional result, significantly outperforming the original estimates notwithstanding the challenging operating conditions and market volatility. Goodman's security price has continued to demonstrate a significant premium to underlying net assets and medium and longer term outperformance relative to the peer group indices, attributable to the value creation by employees.

The Group's remuneration strategy, focused on long-term outcomes, is the key driver of this sustained performance.

#### 4.1 Group FY23 highlights

#### Financial

Statutory profit of \$1.6 billion for Goodman and \$3 billion for the combined Group and Partnerships

Operating profit of \$1.8 billion (up 17% on FY22)

Operating EPS of 94.3 cents (up 16% on FY22)

Distribution maintained at 30.0 cents per security to sustain financial risk management objectives

Net tangible assets per security increased 9% to \$9.12

# Operational property investment, management, and development

High occupancy maintained at 99% and like for like net property income growth of 4.7%

Total AUM of \$81 billion (up 11% on FY22)

Strong performance by the 20 Partnerships, achieving weighted average returns of over 7%

Development WIP (end value) of \$13.0 billion and with 99% commitment levels on completions and 13 year weighted average lease terms

# People, culture and community

Social investment of \$10.8 million by the Goodman Foundation, employee fund raising and contributions in kind through efforts of employees worldwide, contributing almost 3,200 hours to volunteering in our communities

The level of females in senior roles remained at 30% in FY23. Goodman continues to work towards 40% females in senior roles by 2030 and 50/50 representation overall by 2030

Continued implementation of our Sustainable Sourcing Framework to support human rights and social procurement initiatives.

Strong focus on reinforcing employee behaviours that are consistent with the Group's values

Feedback from employees in various regions via surveys undertaken in FY23 indicates strong leadership, communication and high employee engagement

Goodman, globally, is expected to maintain certification as a carbon-neutral organisation

Goodman's global renewable energy usage is expected to be more than 80%, with the Australian operations consuming 100% certified GreenPower and other regions using renewable energy certificates

Approximately 306 Megawatts (MW) of solar photovoltaic (PV) is now installed or committed across the global portfolio, an increase of 103MW in FY23

Continued calculating the embodied emissions for all of Goodman's logistics developments globally and established a process for integrating into approval processes

## Capital management

Maintained significant available liquidity of \$3.1 billion for the Group and capital resources of \$17.6 billion in the Partnerships

Significant business growth while maintaining low gearing at 8.3%

Group and Partnerships completed debt refinancing transactions totalling \$6.4 billion

Over the past decade, the focus on the long term as influenced by the LTIP, has enabled the Group to establish a global business with significant specialist expertise, financial resources, and a strategic real estate portfolio. The business has been deliberately positioned to maximise cash flow resilience in varying market cycles, primarily through:

- + Concentration of the portfolio on logistics real estate in urban infill markets, where supply is limited, and demand is relatively high due to the long-term structural trends that have been identified many years ago
- + Proactive pursuit of planning and change of use through site identification, planning and power to intensify site utilisation into multistorey logistics, data centre and residential uses, and over the long term
- + Deleveraging the Group's balance sheet and retaining significant liquidity
- + Partnering with long-term capital to share risk and return over a significant globally diversified platform.

This has included specific actions over several years, including:

- + Significant reduction and maintenance of low financial leverage (gearing) with the target gearing range reduced to 0% to 25% and maintaining a position below the mid-point in the past five years. The Groups significant balance sheet flexibility allows it to be opportunistic in the more challenging Global environment
- + Increased quality of the property portfolio through more than \$30 billion of asset sales since 2013, concentrating the portfolio in predominantly urban infill markets and providing funding for the development of new buildings
- + Established and maintained an international platform with significant depth of experience required to generate excess returns in competitive high barrier to entry markets
- + Diversification of the Group's sources of debt and tenor
- + Reduced operational risk through undertaking a significant proportion of development activity in Partnerships, which has reduced the volatility of earnings while increasing return on assets for the Group. The impact of increased development within the Partnerships has increased their returns and the prospects for Goodman to earn performance fees in the medium to longer term
- + Maintained a conservative distribution pay-out ratio to retain funding for growing development activity
- + Investment in innovation and technology to provide knowledge of potential future risks and opportunities for our operations
- + Many of these strategic initiatives rely on foregoing some short-term returns to secure potentially larger long-term sustainable returns, and hence the value in the LTIP over ten years aligning with, and incentivising, long-term decisions.

The resilience of the Group through this period is largely due to strategic long-term thinking, a highly talented team with specialist skills, and incentivising those employees through equity, linked to sustained operational performance over a long period.

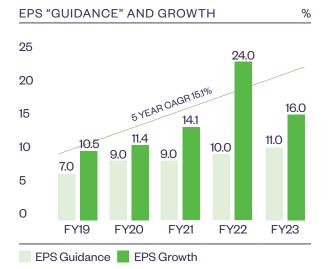

### 4.2 Financial measures

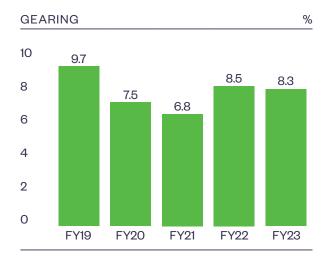

Performance measures	FY18	FY19	FY20	FY21	FY22	FY23
Operating profit (\$M)	845.9	942.3	1,060.2	1,219.4	1,528.0	1,783.2
Operating EPS (cents)	46.7	51.6	57.5	65.6	81.3	94.3
Operating EPS growth (%)	8.3	10.5	11.4	14.1	24.0	16.0
Security price as at 30 June (\$)	9.62	15.03	14.85	21.17	17.84	20.07
Distributions per security (cents)	28.0	30.0	30.0	30.0	30.0	30.0
3-year TSR (%) <sup>1</sup>	69.5	130.8	103.4	133.4	24.7	41.3
NTA per security (\$)	4.64	5.34	5.84	6.68	8.37	9.12
Growth in NTA (\$B)	0.9	1.3	1.0	1.7	3.3	1.5
Gearing (%)	5.1	9.7	7.5	6.8	8.5	8.3
AUM (\$B)	38.3	46.2	51.6	57.9	73.0	81.0
Market capitalisation premium to NTA (\$B)	9.0	17.6	16.5	26.8	17.7	20.6

<sup>1.</sup> TSR is the increase in market capitalisation plus dividends and distributions, attributable to the respective financial year.

Remuneration report - audited (continued)

The key financial metrics which are aligned with the Group's strategy, long-term performance and LTI programs for all employees, are operating EPS and to a lesser extent relative TSR. CAGR in operating EPS over the past five years has been exceptional at 15.1%, which has exceeded forecasts. This has been achieved while at the same time as maintain low gearing, and not utilising the short-term benefits of low interest rates to financially engineer performance.

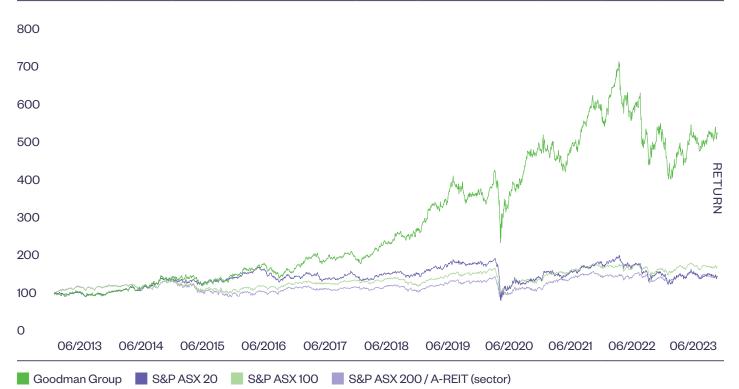

# 4.3 Total security price returns comparison

Goodman is the only real estate group currently in the S&P/ASX 20 and the 15th largest ASX listed entity at 30 June 2023 with a market capitalisation of \$37.8 billion. Despite the volatility in the past 12 to 18 months impacting pricing of global interest rate sensitive sectors, the chart below shows the Group has consistently outperformed the S&P/ASX 20, S&P/ASX 100 and S&P/ASX 200 A-REIT indices over medium to longer term. Importantly, underlying performance of the operations has been significantly ahead of guidance and the indices.

64

# 4.4 Remuneration outcomes for FY23

# 4.4.1 STI outcomes

The Board has again agreed with the Group CEO that he will not participate in the STI award. In line with continued focus on sustained long-term performance, all performance-based remuneration relating to the Group CEO's FY23 performance will be awarded in the form of performance rights.

Given the global nature of the Group's operations, the STI recommendations for the other executive KMP are based on the Remuneration and Nomination Committee's review of several sources of market information relating to the individual's role, region and global comparisons and specific incentive schemes that apply in competitor organisations.

Based on the Group and individual performances in FY23, the executive KMP were eligible for the maximum STI.

Test	Metrics	Result
Gate 1: Behaviour	Code of Conduct: Pass/Fail	Pass
Gate 2: Operating EPS – FY23 operating EPS versus target	Operating EPS growth: Target 11% (90.3 cents)	16.0% operating EPS growth (94.3 cents)
Financial and operational assessments (including environmental objectives)	Individual assessment	Various (0% to 100%)

The table below indicates the maximum possible STI and the actual STI awarded for FY23.

Executive	Year	STI maximum	Actual STI awarded	Cash component	Deferred component	Actual STI % of maximum
		\$М	\$М	\$M	\$М	
Gregory Goodman	FY23	2.1	-	-	-	-
	FY22	2.1	-	-	-	-
Nick Kurtis	FY23	1.35	0.90	0.45	0.45	67
	FY22	1.05	1.0	0.5	0.5	95
Michael O'Sullivan	FY23	0.75	0.45	0.225	0.225	60
	FY22	0.75	0.55	0.275	0.275	73
Nick Vrondas	FY23	1.05	0.81	0.405	0.405	77
	FY22	1.05	0.90	0.45	0.45	86
		€М	€M	€М	€М	
Danny Peeters	FY23	0.97	0.63	0.315	0.315	65
	FY22	0.92	0.70	0.35	0.35	76
		US\$M	US\$M	US\$M	US\$M	
Anthony Rozic	FY23	1.425	0.950	0.475	0.475	67
	FY22	1.05	1.05	0.525	0.525	100

Remuneration report - audited (continued)

#### 4.4.2 ESG assessment

STI and LTI award grant assessments are undertaken with reflection on behaviour, governance, social, environmental and sustainability goals and targets. The Group has made significant contributions and efforts in a wide range of areas, with key highlights including:

- + Goodman's global operations are on track to maintain certification under the Climate Active program for being a Carbon Neutral Organisation (FY23 certification is underway)
- + Committed to reducing and tracking carbon emissions in line with our science-based emissions reduction targets, validated by the Science Based Targets Initiative's (SBTi) validation team
- + Approximately 306MW of solar PV installed or committed on Goodman's properties globally, reaching approx. 75% of our 2025 target of 400MW
- + Continued transition to renewable energy across Goodman's operations, with global renewable energy usage for FY23 expected to be more than 80%. Significant work has been done to enable increased renewable energy use in future years
- + Integrated a consistent process for calculating and including embodied emissions into Goodman's approval process for new developments, with approximately 89 embodied carbon assessments completed on new developments during the year
- + Identified by Sustainalytics as a 'Sector' and 'Region' Top Rated ESG performer during 2023 with a 'Negligible' ESG risk rating
- + Ten Goodman entities made submissions to the Global Real Estate Sustainability Benchmark (GRESB) in FY23, with results due later this year. In the FY22 results, Goodman achieved an 'A' ESG public disclosure rating, and several Goodman Partnerships were awarded 'Sector Leader' status
- + Goodman's Task Force on Climate related Financial Disclosures (TCFD) statement has been updated and is available on the Goodman website
- + Sustainable design initiatives were included in our development specifications including solar PV, battery storage, electric vehicle charging points and LED lighting
- + Greater than 50% of Goodman's developments globally were completed on brownfield developments, enhancing circularity opportunities
- + Continued support of biodiversity initiatives relating to urban forests and reforestation, and investigations into collaboration opportunities with research institutes and industry experts
- + Zero workplace fatalities across Goodman's global operations including our workforce and contractors
- + Facilitated workshops in most regions to raise awareness on environment and social procurement
- + Contributed \$10.8 million to community and philanthropic causes.

The key areas of environmental and sustainability assessment, including new targets for FY24 onwards, are disclosed below. The form of disclosure below (subject to relevant evolution and changes over time as set by the Board) is used as the basis for future assessment of environmental and sustainability measures. The measures are formally set over the testing period for performance rights and are reviewed annually for relevant progress.

# Environment and sustainability assessment Existing LTI targets

Area	Long-term target	Progress	
Renewable Energy	100% renewable electricity use within Goodman's operations by 2025 (subject to government regulation in each jurisdiction)	Goodman's global renewable energy usage for FY23 is expected to be more than 80%, with continued use of certified GreenPower electricity in our Australian operations and use of renewable energy certificates in other regions.	On target
Solar PV Installation	400MW of solar PV installed or committed by 2025	Approximately 103MW of new solar installations or commitments taking global total to approximately 306MW, 75% of the way towards our 400MW target.	On target
Carbon Neutral	Carbon neutral operations by 2025	Carbon neutral certification in FY23 is on track, with certification submission to Climate Active due October 2023. This follows our initial carbon neutral certification in 2021.	Ahead of target
TCFD	Achieve TCFD by FY22	TCFD statement updated and available online.	
Occupancy	>95% (ensures utilisation of sites and therefore appropriate use of resources)	99%	Materially ahead of target

# Additional Targets for FY24 onwards

			,
Area	Long-term target	Progress	
Embodied Carbon	We are committed to measuring, reducing and offsetting embodied carbon emissions from our global development workbook and have commenced the process to reduce and offset this over time	Embodied carbon emissions calculated and included in all GIC development papers. During FY23, 89 embodied carbon assessments were completed.  Reduction initiatives are longer-term and ongoing, demonstrated by our industry and supplier engagement, collaborations and carbon assessments of materials. Offset procurement guidance and criteria is continually refined and shared with the global teams.  Several buildings have been developed on an embodied carbon neutral basis as offsets have been purchased and retired.	New target for FY24
Solar PV Installation	100MW additional solar PV installed or committed in total from 2026 to 2030	To be commenced from FY26 post initial 400MW target.	New target for FY24
Science Based Targets	In addition to our continued commitments to renewable energy and carbon neutrality, the Group has committed to Scope 1 and 2 greenhouse gas emissions reductions of 42% by 2030 in line with 1.5°C Paris Agreement pathway and validated by the SBTi validation team.	Scope 1 and 2 emissions are calculated annually and published within Goodman's annual sustainability report in September. FY23 emissions data will be finalised and included in the Data Metrics section of the FY23 Sustainability Report.  For reference, our FY22 Scope 1 and 2 emissions data were on track to meet our 2030 targets under the SBTi.	New target for FY24

# **Directors' report**Remuneration report – audited (continued)

In addition, the following non-financial measures are assessed when determining STI and future LTI awards:

# Code of conduct, behaviour, social and governance

Area	Long-term target	Progress	
Diversity			
Gender ratio in the workforce	50% gender ratio in the workforce by 2030	Female representation stable with total employees 44% female, 56% male overall. Significant progress has been made on career development (job scope widening, internal promotions etc.) and recruitment of females.	On target
Women in senior roles	More than 40% in senior roles by 2030	Women represent 30% of senior positions. The progress on female career development and recruitment of females into new roles should over time evolve into senior roles.	On target
Governance			
Workplace safety	Safe working environment with demonstrable risk controls, contractor management and monitoring of key safety metrics	There have been zero fatalities in FY23. This includes Goodman employees or contractors on Goodman controlled areas or contractor controlled sites. There has been significant focus on ensuring the implementation and execution of the Group's comprehensive safety processes and procedures.	On target
Significant reputational issues arising from illegal conduct	Zero	No issues have occurred.	On target
Social			
Social/charitable donations	\$50 million cumulative investment by Goodman Foundation from 2019 to 2030	\$10.8 million was contributed to community and philanthropic causes during FY23, taking our total investment to \$42.4 million since 1 July 2019.	Ahead of target

#### 4.4.3 LTI outcomes

Testing as at 30 June 2023 was completed for the grants of performance rights made to executive KMP in respect of executive KMP performance in FY20 (called FY21 awards). The FY21 awards had two hurdles: operating EPS and a relative TSR (the mechanics of the testing are detailed in section 3.5.). The operating EPS hurdle was measured in the year ended 30 June 2023 against hurdles set in FY21. The relative TSR hurdle was measured over the three years ended 30 June 2023. Performance rights that achieved the hurdles will vest in three equal tranches in September 2023, September 2024 and September 2025.

### 4.4.3.1 Operating EPS hurdle (75% weighting)

The operating EPS is calculated by dividing operating profit by the weighted average number of securities on issue, adjusted to include all unissued securities relating to performance rights which had passed the testing criteria at the start of the financial year. This is to account for the operating EPS dilution that will arise when those performance rights vest. Operating EPS for the year ended 30 June 2023 was 94.3 cents, compared to a hurdle of 74.5 cents at the upper level.

	Threshold level	Upper level	Actual	Outperformance	Outcome
FY21 LTIP grant - Operating EPS hurdle <sup>1</sup>	68.5 cents	74.5 cents	94.3 cents	19.8 cents	100%

<sup>1.</sup> Testing period for grant: operating EPS from 1 July 2022 to 30 June 2023. At the threshold level, 25% satisfy the hurdle with a sliding scale up to 100% satisfying the hurdle at the upper level.

### 4.4.3.2 Relative TSR hurdle (25% weighting)

TSR provides an effective check against increasing risk practices within the Group, as the price to earnings multiple will reflect the perceived risk in the Group. Relative TSR is measured against the S&P/ASX 100 peer group. Vesting applies on a sliding scale:

- + Zero vesting up to and including the 50th percentile
- + Vesting of 50% starts at the 51st percentile on a sliding scale with 100% vesting at the 75th percentile.

Goodman posted a three-year TSR of 35.7% to 30 June 2023, under the LTIP TSR calculation methodology. This ranked Goodman in the 52nd percentile against the S&P/ASX 100 and consequently 52% of these performance rights vested.

	Goodman TSR <sup>1</sup>	S&P/ASX 100 TSR1	Percentile	Outcome
FY20 LTIP grant - TSR hurdle <sup>1</sup>	35.7%	33.0%	52nd	52%

<sup>1.</sup> Testing period for grant was 1 July 2020 to 30 June 2023. In accordance with the LTIP, the TSR is based on the 10 day volume weighted average price (VWAP) at beginning and end of testing period and is therefore different from the three year TSR sourced from Bloomberg and presented elsewhere in this report.

As a result of satisfying 100% of the operating EPS hurdle and 52% of the relative TSR hurdle, it is expected that up to 10,723,875 equity settled performance rights will vest in September 2023, September 2024 and September 2025. In addition, up to 2,993,250 cash settled performance rights are also expected to vest and the Group currently intends to issue an equivalent number of new securities to satisfy this obligation.

Remuneration report – audited (continued)

### 4.4.4 Group CEO achievements

In determining the Group CEO's remuneration, the Board acknowledged his strong leadership through the challenges of significant economic, market and operational volatility in the past two years, positioning the business for resilience and significant outperformance in FY23, far exceeding the Group's operational targets. It has also considered the following contributing factors and highlights:

### Goodman

### **Group CEO**

#### Leadership

- + Developed and drove a consistent global business strategy across all markets to sustain the performance of the Group despite the increases in volatility, costs and risk in the global operating environment. Positioned the business in key locations providing future opportunities for development and higher cash flow resilience
- + The Group has adapted to the challenging global operating environment and continues to outperform targets, retaining employees and increasing community support and charitable programs
- + Positioned the business as a leader in its field, managing, motivating and incentivising key personnel across the platform to perform in highly competitive environment
- + Fostered a culture that focused on delivering quality across all aspects of the business: people, properties and service
- + Led global internal programs to promote a strong culture of inclusion, collaboration and conduct across the organisation, underpinned by the long-held principles in the Group's Code of Conduct, treating all stakeholders with integrity, and accountability, reflected in top decile engagement scores
- + Reinforced Goodman's purpose aimed at understanding the drivers of change and the needs of customers and all stakeholders to support their future success
- + Only 6.2% voluntary staff turnover in FY23, a marginal decrease from the level of FY22.

### risk

- Financial and + Fostered continuity of strategy over successive years leading to continued outperformance over benchmark indices and comparator companies in FY23, and with strong and sustained TSR of 151.36% over five years
  - + Delivered:
  - Statutory profit of \$1.6 billion despite cap rate expansion in many markets and interest rate increases
  - Significant operating profit growth of 17% on FY22, to \$1,783 million, significantly ahead of budget
  - Revaluation growth across the Group and Partnership of \$0.8 billion
  - Operating EPS of 94.3 cents, up 16% on FY22
  - NTA increased 9% to \$9.12 per security
  - Occupancy maintained at 99%
  - + Exceeded earnings guidance in FY23 after posting significant outperformance in FY22 through the pandemic and volatile economic conditions
  - + Drove a clearly defined capital management strategy with financial leverage of 8.3% and maintained a strong Group balance sheet with \$3.1 billion of liquidity
  - + Continued managing relationships with capital partners and secured additional equity and financial facilities to total \$17.6 billion of available funding capacity
  - + Integrated strong risk management approaches globally.

- Environment + Instrumental in significantly increasing the focus on ESG initiatives and programs throughout the Group and a culture which continually looks to improve Goodman's impact on the world. In particular:
  - Establishing a carbon neutral emissions target for the Group by 2025, achieving and maintaining since FY21
  - Significant progress on the 2025 solar PV installation on the rooftops of Goodman's global portfolios and installing or committing to 103 MW in FY23 taking global installation and commitment to over 306MW
  - Implemented further Solar installation commitments from 2026-2030 this year
  - Maintained compliance with TCFD since FY21
  - + Established a process for measuring and assessing embodied carbon to transition to carbon neutral developments, including 89 projects reviewed in FY23. As part of a greater program to reduce embodied carbon, the CEO has encouraged partnerships with materials suppliers to accelerate production of components which will reduce our carbon footprint
  - + Drove the development of science-based emissions reduction targets validated by the Science Based Target initiative as being ambitious and aligned with a 1.5°C Paris Agreement pathway
  - + Supported implementation and progression of EV incentive scheme for staff globally to encourage a shift towards lower

### Social and cultural

- + Continued to lead the shift for all employees to increase alignment with Securityholders through the LTIP as the preferred form of remuneration by taking 100% of performance-based remuneration in performance rights and working with the Board to implement the ten-year plan
- + Commenced new initiatives, including Goodman Foundation commitments. Initiatives during FY23 included:
  - Expanding Goodman's supply chain ethics towards a global supplier Code of Conduct, increasing the focus on human rights and potential modern slavery, including implementation of Supply Business Code of Conduct
  - Contributing \$10.8 million to community and philanthropic causes, including \$530,000 raised directly by staff. The Goodman Foundation focuses on community resilience, providing basic human needs e.g. food, housing and employment, psychological wellbeing, prevention of violence against women and children and responding to natural disasters and humanitarian issues. During the year, Goodman's founding food rescue partners have continued to provide meals to feed people in need and the Group has made a significant commitment to domestic violence prevention. The Group remains well ahead of its cumulative social investment target of \$50 million by 2030
  - Enabling the Goodman team globally to contribute 3,172 hours to volunteering and community events.

The charts below demonstrate the performance of the Group and various key metrics relative to the Group CEO's vested remuneration outcomes in FY23 and prior years. They illustrate that the significant operating profit growth, security price growth and consequently returns for Securityholders over the testing and vesting periods, correlate with increased Group CEO remuneration over time. Despite significant market volatility and price movement in FY23, the market price of securities between the time of the grant and the time of vesting has seen significant growth, and the Group CEO (and all recipients of the LTIP) has participated in this performance alongside Securityholders.

The table below includes awarded remuneration at grant date and the vested remuneration over the past five years for the Group CEO. The figures in this table differ from the statutory disclosure in section 6 primarily due to the differences in the measurement and timing of recognition in respect of performance rights granted under the LTIP and not the final vesting outcome. The below figures show the base salary received by the Group CEO in the respective year plus the value of performance rights which vested during that year at the closing price on the day the performance rights vested.

### The table highlights:

- + No change in fixed remuneration over the period
- + The proportion of remuneration from fixed (cash) salary has declined materially over time
- + Growth in the value of LTI from grant date to the vesting date due to the increase in security price (on average an increase of 82% for grants vesting in FY23).

	FY18	FY19	FY20	FY21	FY22	FY23
	\$М	\$M	\$M	\$M	\$M	\$М
Base salary	1.4	1.4	1.4	1.4	1.4	1.4
STI	-	-	-	-	-	_
Value of LTI on grant date <sup>1</sup>	4.7	7.3	11.6	14.4	15.9	14.3
Value of LTI on vesting date	8.8	13.5	25.4	35.6	42.9	26.0
Total remuneration based on LTI value at grant date <sup>1</sup>	6.1	8.7	13.0	15.8	17.3	15.7
Total vested remuneration based on LTI value at vesting date	10.2	14.9	26.8	37.0	44.3	27.4
Increase in LTI value due to security price performance of the Group	4.1	6.2	13.8	21.2	26.9	11.7
Percentage growth in value of LTI during vesting period	88%	86%	119%	147%	169%	82%

<sup>1.</sup> Value based on the security prices at the grant dates for the performance rights that vested in the financial year. This is so as to allow comparison of the security price outperformance over the period between grant and vesting dates.

Remuneration report - audited (continued)

The chart below illustrates the increase in the value of the Group CEO's vested LTI in FY23 from the date of the original awards in 2018, 2019 and 2020. These significant gains have arisen due to consistent earnings growth and security price outperformance of the Group.

 $Value\ of\ LTIP\ on\ grant\ (\$ M)\ \ Value\ of\ LTIP\ on\ vesting\ (\$ M)$ 

### 4.4.5 Other executive KMP achievements

In FY23, the Board considered the following highlights when assessing other executive KMP:

anny Peeters	Executive Director, Corporate
	+ Successfully overseeing Brazil, playing a critical role in communicating and reinforcing the Group's strategy, both from a real estate and corporate perspective – currently acting as CEO ad interim
	+ Played a key role in overseeing the Brazil Investment Partnership with strong financial outcomes
	+ Continued to progress acquisition and permitting of significant infill development sites, positioning the Group and Partnership in a strong position to capitalise on the growing e-commerce penetration
	<ul> <li>Construction completion including permits and successful leasing progress of major development sites despite the complicated regulatory and commercial context in Brazil – strong leasing results. Strong focus on quality of developments and property management to drive long term value of the assets</li> </ul>
	+ Provided guidance and team coaching in a complex acquisition and development environment effecting above-target performance
	+ Embedded key controls and culture with the team working cohesively and capability increasing
	+ Further integrated the Brazil operation into the global network
	+ Provided advice and support to senior management in Continental Europe and Group regarding sustainability, modern slavery and innovation initiatives
	+ Further improved key controls and culture with the team working cohesively and increasing capability
	+ Important direct link for the Board to the operations in Continental Europe and Brazil.

### Anthony Rozic Chi

### Chief Executive Officer North America, and Deputy Group Chief Executive Officer

- + FY23 EBIT exceeded budget by 17.5% and valuations for the Partnership (\$1.1 billion)
- + Strong investment outperformance of 30.3% during the year
- + Played a critical role in communicating and reinforcing the Group's strategy in the region
- + Managed a focused and motivated team with an emphasis on succession planning, strong leadership in embedding the Goodman values in the behaviour of the team and encouraging teamwork and collaboration
- + With the post COVID-19 disruption, employees have returned to working at the office, enhancing team collaboration and productivity whilst maintaining focus on key operational priorities
- + Continued to develop a high-quality portfolio and strongly differentiated brand position and building team capabilities and skill sets for complex acquisitions and developments ahead of future growth
- + Commenced 1.5 million square feet (AUD\$1.2 billion), completed 2.9 million square feet (A\$2.4 billion), stabilised 1.9 million square feet (\$1.6 billion) of infill development projects
- + Continued to grow infill development pipeline with acquisitions of in major US gateway cities providing strong positioning for future performance
- + Successfully grew the presence in the two new target markets of New York and San Francisco with the acquisition of strategic developments and value add opportunities
- + Extended the bank facility to a total debt maturity profile of 5.8 years whilst maintaining a total unsecured and rated debt platform of \$1.5 billion at a significantly below market average cost of debt. Maintained a conservative gearing level of 13.1% in the Partnership
- + Successfully oversaw strong growth in business operations in North America, achieving a number of key milestones:
  - Significant growth in AUM to \$10.6 billion
  - Stabilised occupancy of 100%
  - Maintained a long WALE of 8.2 years
- + Introduced new regional and global customer relationships to the portfolio over FY23 with a number of developments pre-leased and replenishing the land/value-add inventory. Emphasis on developing major infill sites and value-add development skill sets
- + Continued to successfully execute on numerous ESG initiatives including renewable energy, solar power and progressing with our first carbon neutral development in North America at Fullerton.

### Nick Kurtis

### **Group Head of Equities**

- + Formulated and implemented the Partnerships' strategies to successfully deliver significant total returns.
- + Partnership investment portfolio delivered:
  - Annualised average total return on net assets of 7.3% (based on the respective Partnership reporting periods) in excess of benchmark and target hurdle returns
- Delivered strong performance metrics including:
  - Management earnings contribution of \$481 million to the Group's operating earnings including Performance fee revenue of \$42 million, with significant future embedded performance fees
  - Growth in external AUM up 11% to \$76.3 billion across 20 Partnerships in 14 countries
- + Facilitated over \$10bn in real estate transactions and over \$1.2bn in equity arrangements
- + Established new ventures to facilitate the growth of the partnership platform
- + Implemented strategic asset planning and new asset selection focus resulting in superior property level returns
- + Communicated and executed the Group's strategy and values across Investment Management platform
- Communicated with key Capital Partners as the economic landscape evolved during the year and established investment and financing strategies to ensure portfolio investment program and execution was consistent with Capital Partner expectations
- + Oversight of Partnership capital management plans, including equity, debt and hedging strategies across the whole portfolio in all jurisdictions
- + Fostered strong relationships with existing and new Capital Partners
- Provided strategic advice across a range of corporate and structural transactions in the business to position opportunities for future years.

Remuneration report - audited (continued)

### Michael O'Sullivan

### Group Chief Risk Officer (up to 28 March 2023)

- + Responsible for identifying, assessing, and monitoring risks at Goodman and reporting to the Audit, Risk and Compliance Committee
- + Overseen and aligned the Group Investment Committee (GIC) process with strategy execution to ensure final commercial outcomes remain consistent with Group strategy
- + A requested member of regional due diligence committee meetings relating to major acquisitions, disposals, and capital market transactions
- + Performed a critical role in commercial oversight and assessment of globally complex transactions of the Group to allow the required level of autonomy at a regional level within delegated authority limits
- + Maintained risk management frameworks with improved outcomes across the Group and Partnerships in FY23 adapting to the changing nature of our business including nature, scale, and complexity of development projects globally
- + Co-ordinated the Group Corporate Service functions, specifically as they relate to the identification and monitoring of non-financial risks with specific reference to internal audit, safety, sustainability, compliance, insurance and business continuity planning
- + Work closely with all Group functions, in particular, Finance, Legal, Compliance, Technical, Investment Management and IT in respect of risk management practices and processes in those specific functions
- + FY23 saw continued growth in Group activities, in relation to the GIO process including:
  - Over 330 GIC submissions with over 40% involving detailed involvement from the Group Risk function
  - WIP of \$13.0 billion with an annual production rate of circa \$7 billion
  - \$2.0 billion of asset sales, including both the disposals of directly held developments and disposals to external parties globally
  - \$7.8 billion of global acquisitions and development expenditure
  - 20 Partnership business plans and strategy proposals across \$76.3 billion of external AUM, in which the Group's equity investment was \$16.3 billion.

### **Nick Vrondas**

### **Group Chief Financial Officer**

- + Successfully developed and played a key role in the execution of the business strategy including the management and allocation of capital that has delivered strong returns to investors over several years culminating in the strong FY23 operating profit
- + Improved oversight of balance sheet and income outcomes for the Group and Partnerships across multiple jurisdictions. Effective statutory and management financial reporting giving clarity to support strong operational and transactional decision making
- + Strengthened monitoring, coordination and consolidation of financial performance and financial position of regional business units to support them in exceeding their financial plans
- + Effected Financial Risk Management policies and commensurate capital management plans of Group and Partnerships that have placed the Group and Partnerships in a strong position to withstand the recent volatility.
- + In a volatile market environment, successfully oversaw and/or had direct involvement in debt finance transactions in banking and debt capital markets of over \$6.4bn for the Group and its Partnerships, adding liquidity, term to maturity and diversity of funding sources
- + Effective hedging and financial risk management through oversight and/or direct involvement in money market and hedge transactions of over \$8.5bn for the Group and Partnerships
- + Built improvements and resilience into systems and controls framework
  - Progressed framework for future risk mitigation measures
  - Led operational improvements in relation to business IT systems and processes, particularly considering the necessary changes that the recent operating climate have given rise to
  - Updated and improved various operational policies to enhance compliance and reduce risk
- + Demonstrated an ability to manage through variable market conditions
- + Maintained valuable relationships in the capital markets.

### 4.5 LTI grants in relation to FY23 performance

The remuneration proposed by the Board in respect of the executive KMP performance in FY23 comprise fixed remuneration, STI awards and awards under the LTIP.

As discussed in earlier sections, the Board has decided to reduce the number of performance rights to be issued to the Group CEO and other executive KMP under the LTIP, by approximately 10%. The Board believes the grants reflect a balance between the interests of Securityholders and the recipients.

The table below lists the maximum number of performance rights which could vest if the maximum hurdles are met over the four years ending 30 June 2027. The minimum vesting percentage is 0% if the threshold hurdles are not met. The vesting of those performance rights that achieve the performance hurdles (if any) will occur in seven equal tranches in September each year, starting from September 2027 with the last tranche vesting ten years from initial grant, in September 2033.

The grants that the Board intends to make in September 2023 and proposes to make for Executive Directors after the AGM (subject to Securityholder approval) in respect of the executive KMP performance in FY23, are detailed below:

Executive	Year of grant	Performance rights proposed Number	Face value per performance right \$	Face value of grant \$M
Gregory Goodman	FY24	900,000	20.07	18.1
Danny Peeters	FY24	455,000	20.07	9.1
Anthony Rozic	FY24	500,000	20.07	10.0
Nick Kurtis	FY24	585,000	20.07	11.7
Nick Vrondas	FY24	500,000	20.07	10.0

Remuneration report - audited (continued)

### 5. NON-EXECUTIVE DIRECTOR REMUNERATION

### 5.1 Key elements of the Non-Executive Director remuneration policy

- + The policy is structured to ensure independence of judgement in the performance of their duties
- + Non-Executive Directors receive fixed fees for Board membership and additional fees for membership of committees.
- + The fees are set considering the size and scope of Goodman's activities and the responsibilities and experience of the Directors. Periodically, these fees are benchmarked against data for comparable entities provided by external advisers
- + As approved by Securityholders at the 2022 AGM, total remuneration (including superannuation) payable by Goodman to all Non-Executive Directors in aggregate must not exceed \$4.0 million per annum. The increase (previously the pool was capped at \$2.5 million) was to allow for recent Board appointments, which have increased the size and depth of operations of the Group, and responsibilities of Directors. For FY23, total Non-Executive Directors' remuneration was \$2.8 million (2022: \$2.4 million).
- + Non-Executive Directors are not entitled to participate in any STI or LTI schemes as they may be perceived to create a bias when overseeing executive decision making.
- + To align the interests of the Board with Securityholders, the Board updated the Directors' Security Holding Policy in April 2021. The policy requires Non-Executive Directors to accumulate and hold Goodman securities with a value equivalent to their pre-tax annual base fee within three years of appointment, or in the case of the Chairman the pre-tax Chairman's fee within three years of appointment as Chairman (subject to a transitional year following adoption of the new policy). For the purpose of this policy, the value of each parcel acquired is the higher of the purchase price or market value at the end of the financial year.

#### 5.2 Board and committee annual fees

The current Board and Committee fees that applied (on an annualised basis) for the period 1 April 2023 to 30 June 2023 (and remain current) are set out below: the Remuneration Committee and the Nomination Committee were merged into the Remuneration & Nomination Committee on 1 April 2023, and the Audit Committee and the Risk and Compliance Committee were merged into the Audit, Risk and Compliance Committee on 1 April 2023. The Sustainability and Innovation Committee was established on 1 October 2022.

	Board	Audit, Risk and Compliance Committee	Remuneration and Nomination Committee	Sustainability and Innovation Committee
	\$	\$	\$	\$
Chairman	625,000	70,000	n/a	50,000
Member	240,000	30,000	30,000	30,000

During the period from 1 July 2022 to 30 March 2023 the Board and Committee fees were as set out below:

	Board \$	Audit Committee \$	Risk and Compliance Committee \$	Remuneration Committee	Nomination Committee
Chairman	625,000	60,000	50,000	50,000	n/a
Member	240,000	30,000	30,000	30,000	30,000

The remuneration of the Non-Executive Director of GLHK was HK\$680,000.

### 6. STATUTORY DISCLOSURES

### 6.1 KMP remuneration (statutory analysis)

Details of the nature and amount of each major element of the remuneration of each executive KMP, as calculated under Australian Accounting Standards, are set out below:

							Long-term	1	Share based payments		Perfori r	mance elated
		Salary and fees <sup>1</sup>	Bonus (STI) <sup>2</sup>	Other <sup>3,4</sup>	Total	Superannuation benefits	Bonus (STI) <sup>2</sup>	Other³	Performance rights (LTI) <sup>6</sup>	Total	STI and LTI as % of total	LTI as % of total
Executive KMP		\$	\$	\$	\$	\$	\$	\$	\$	\$	%	%

The footnotes for this table are set out on the following page.

Remuneration report - audited (continued)

Executive KMP are engaged under written employment contracts until notice is given by either Goodman or the executive KMP. Notice periods are for six months except for Gregory Goodman and Danny Peeters for whom the period is 12 months. Danny Peeters provides his services through a management company, DPCON Bvba.

Footnotes to the executive KMP remuneration table:

- 1. Salary and fees represent the amounts due under the terms of executives' service contracts and include movements in annual leave provisions.
- 2. Executives' bonus (STI) awards are paid in two instalments: 50% on finalisation of Goodman's financial statements and 50% 12 months later. Under Australian Accounting Standards, this means the entire bonus award is considered as a long-term benefit with regard to the disclosure of individual executive's remuneration. No bonuses were forfeited during the financial year.
- 3. Other includes changes in long service leave provisions and in the prior year, car parking and reportable fringe benefits.
- 4. The Board agreed certain tax equalisation payments with Anthony Rozic in connection with his employment arrangements in the United States and Australia to ensure that he was no better or worse off. As a result, in FY20 Goodman made additional tax related payments of USD 150,005 in respect of the period prior to 1 January 2019. These amounts were on top of Anthony Rozic's Australian tax obligations for which he remained exclusively responsible. The Board also advanced under an interest free loan, double-tax amounts for which foreign income tax offsets from the Australian Taxation Office will be used to repay the advances.
  - At 1 July 2022, the advances made by Goodman amounted to USD 503,729 and as there have been no further advances or repayments during the year ended 30 June 2023, the balance at 30 June 2023 was also US\$503,729. The amount of interest that would have been payable if charged on an arm's length basis during the year is USD 30,224 (2022: USD 20,149). The notional interest amount has been included in Anthony Rozio's statutory remuneration (Other remuneration). No other executive KMP received a loan from the Group during the current or prior financial years.
- 5. Performance rights are an LTI and in accordance with Australian Accounting Standards: the values of the awards are determined using option pricing models and amortised in the income statement over the vesting periods.
- 6. Michael O'Sullivan retired from his role as Group Chief Risk Officer and ceased to be a KMP on 28 March 2023. His remuneration disclosed is for the period he was a KMP.
- 7. The remuneration of Danny Peeters is disclosed in Euros, the currency in which his base remuneration and STI are determined. The value attributed to his performance rights is translated from Australian dollars at the weighted average rate for the relevant financial year.
- 8. The remuneration of Anthony Rozio is disclosed in US dollars, the currency in which his base remuneration and STI are determined. The value attributed to his performance rights is translated from Australian dollars at the weighted average rate for the relevant financial year.

### 6.2 Movements in performance rights held by executive KMP

The movements in the number of performance rights during FY23 are summarised as follows:

		Held at the start of the year	Granted as compensation	Vested	Forfeited	Held at the end of the year <sup>1</sup>
<b>Executive Directors</b>						
Gregory Goodman	FY23	5,010,001	1,000,000	(1,354,667)	(36,000)	4,619,334
	FY22	5,316,667	1,560,000	(1,866,666)	-	5,010,001
Danny Peeters	FY23	1,905,001	500,000	(478,668)	(13,998)	1,912,335
	FY22	1,846,667	625,000	(566,666)	-	1,905,001
Anthony Rozic	FY23	2,070,000	550,000	(521,601)	(15,198)	2,083,201
	FY22	2,013,333	690,000	(633,333)	-	2,070,000
Other executive KMP						
Nick Kurtis	FY23	2,275,000	645,000	(521,601)	(15,198)	2,383,201
	FY22	2,103,333	805,000	(633,333)	-	2,275,000
Michael O'Sullivan	FY23	1,596,667	450,000	(359,333)	(12,000)	1,675,334
	FY22	1,450,000	560,000	(413,333)	-	1,596,667
Nick Vrondas	FY23	2,090,000	550,000	(521,601)	(15,198)	2,103,201
	FY22	2,050,000	690,000	(650,000)	-	2,090,000

	600,000	28 Sep 2018	FY19	8.52	5,112,000	33.3	33.3	-	3,834,000	2022-2024
	600,000	30 Sep 2017	FY18	6.41	3,846,000	66.7	33.3	-	3,834,000	2021-2023

Footnotes to the analysis of executive KMP performance rights table:

<sup>1.</sup> The fair value was determined at grant date for each of the tranches and calculated using a combination of the standard Black Scholes model with a continuous dividend/distribution yield and a Monte Carlo model which simulated total returns for each of the S&P/ASX 100 entities and discounted the future value of any potential future vesting performance rights to arrive at a present value.

<sup>2.</sup> As performance rights had an exercise price of \$nil, Goodman securities were automatically issued to employees when the performance rights vested. Accordingly, the percentage of performance rights that vested during the year equalled the percentage of securities issued during the year.

<sup>3.</sup> The value of performance rights vested was calculated using the closing price of a Goodman security on the ASX of \$19.17 on 1 September 2022, the day the performance rights vested.

<sup>4.</sup> As Goodman securities were automatically issued to employees when the performance rights vested, and lapsed where they failed to do so, the vesting date was also deemed to be the expiry date.

Remuneration report - audited (continued)

### 6.4 Securities issued on exercise of performance rights

During FY23, Goodman issued 13,479,812 securities as a result of the vesting of performance rights. The amount paid by the employees on exercise of these securities was \$nil.

No performance rights have vested since the end of the financial year.

### 6.5 Unissued securities under performance rights

At the date of this Directors' report, unissued securities of Goodman under performance rights, i.e. those performance rights that have not yet vested, were:

Vesting date <sup>1</sup>	Exercise price \$	Number of performance rights <sup>2</sup>
Ten-year plan		
Sep 2032	-	1,276,432
Sep 2031	-	2,883,576
Sep 2030	-	2,883,572
Sep 2029	-	2,883,571
Sep 2028	-	2,883,569
Sep 2027	-	2,883,569
Sep 2026	-	2,883,569
Sep 2025	-	1,607,142
Five-year plan		
Sep 2027	-	2,819,471
Sep 2026	-	5,258,340
Sep 2025	-	9,320,912
Sep 2024	-	9,917,043
Sep 2023	-	12,698,023

<sup>1.</sup> As Goodman securities were automatically issued to employees when the performance rights vested, and lapsed where they failed to do so, the vesting date was also deemed to be the expiry date.

<sup>2.</sup> The number of performance rights at the date of this Directors' report is net of any rights forfeited and excludes 16,119,301 performance rights where the intention is to cash settle.

### 6.6 Non-Executive Directors' remuneration (statutory analysis)

Details of the nature and amount of each major element of the remuneration of Non-Executive Directors, as calculated under Australian Accounting Standards, are set out below:

		Salary and fees	Superannuation benefits	Total
Non-Executive Directors - GL and GFMI	L	\$	\$	\$
Stephen Johns	FY23	599,708	25,292	625,000
	FY22	601,432	23,568	625,000
Christopher Green	FY23	330,000	-	330,000
	FY22	300,000	-	300,000
Mark Johnson	FY23	323,874	25,292	349,166
	FY22	306,432	23,568	330,000
Vanessa Liu <sup>1</sup>	FY23	262,500	-	262,500
	FY22	20,000	-	20,000
Rebecca McGrath <sup>2</sup>	FY23	220,833	-	220,833
	FY22	344,108	5,892	350,000
Phillip Pryke <sup>3</sup>	FY23	418,727	25,292	444,019
	FY22	408,701	23,568	432,269
Belinda Robson <sup>4</sup>	FY23	81,569	8,431	90,000
	FY22	-	-	-
Hilary Spann⁵	FY23	262,500	-	262,500
	FY22	59,048	-	59,048
Penny Winn <sup>6</sup>	FY23	-	-	-
	FY22	107,850	9,195	117,045
George Zoghbi <sup>7</sup>	FY23	55,059	5,691	60,750
	FY22	-	-	-
Non-Executive Director - GLHK		HK\$	нк\$	HK\$
David Collins <sup>8</sup>	FY23	680,000	-	680,000
	FY22	680,000	-	680,000

<sup>1.</sup> Vanessa Liu was appointed as a Director on 1 June 2022.

 $<sup>2. \ \</sup> Rebecca\,MoGrath\,retired\,as\,a\,Director\,on\,28\,February\,2023.$ 

<sup>3.</sup> Salary and fees for Phillip Pryke included an amount of A\$91,516 (NZ\$100,000) (2022: A\$93,747 (NZ\$100,000)) due in respect of his role on the board and audit committee of Goodman (NZ) Limited, the manager of Goodman Property Trust.

<sup>4.</sup> Belinda Robson was appointed as a Director on 1 March 2023.

<sup>5.</sup> Hilary Spann was appointed as a Director on 4 April 2022.

<sup>6.</sup> Penny Winn retired as a Director on 18 November 2021.

<sup>7.</sup> George Zoghbi was appointed as a Director on 11 April 2023.

<sup>8.</sup> David Collins is a Director of GLHK and his Director's fees are disclosed in Hong Kong dollars.

Remuneration report - audited (continued)

### 6.7 Movements in Goodman securities held

The movements during the year in the number of Goodman securities held, directly, indirectly or beneficially, by each KMP, including their related parties, are set out below:

### 6.8 Transactions with Directors, executives and their related entities GreenPoint Real Estate Innovation and Technology Venture, LP (GreenPoint)

In order to enhance understanding of and access to technologies that may influence the property sector and the business, the Group committed to investing USD15.0 million in GreenPoint, a property technology fund that is a Delaware limited partnership, managed by GreenPoint Partners. GreenPoint Partners is beneficially owned and controlled by Christopher Green, a director of GL.

In FY23, the Group invested a further USD1.9 million and the total investment in GreenPoint at 30 June 2023 was USD7.2 million (30 June 2022: USD5.3 million). No distributions were received from GreenPoint in the current year (2022: \$0.8 million).

### Wyuna Regenerative Ag Investment Fund (Wyuna)

As part of its ESG strategy, Goodman has committed to investing up to \$30.0 million in an integrated carbon credit and regenerative platform in Australia – Wyuna. Investing alongside Australia's Clean Energy Finance Corporation, this project assists land regeneration, sustainable food production and land-based solutions to climate change. Wyuna is managed by Wyuna Regenerative Ag Pty Limited, which is 50% owned by Christopher Green, a director of GL.

In FY23, GL invested \$11.9 million, and the total investment in Wyuna at 30 June 2023 was \$11.9 million (30 June 2022: \$nil). No distributions were received from Wyuna in the current and prior year.

Other than as disclosed elsewhere in the remuneration report, there were no other transactions with Directors, executives, and their related entities.

(continued)

### **Environmental regulations**

Goodman has policies and procedures to identify and appropriately address environmental obligations that might arise in respect of Goodman's operations that are subject to significant environmental laws and regulation. The Directors have determined that Goodman has complied with those obligations during the financial year and that there has not been any material breach.

# Declaration by the Group Chief Executive Officer and Group Chief Financial Officer

The Group Chief Executive Officer and Group Chief Financial Officer declared in writing to the Board that, in their opinion, the financial records of Goodman for the year ended 30 June 2023 have been properly maintained and the financial report for the year ended 30 June 2023 complies with accounting standards and presents a true and fair view of Goodman's financial condition and operational results. The Group Chief Executive Officer and Group Chief Financial Officer confirmed that the above declaration was, to the best of their knowledge and belief, founded on a sound system of risk management and internal control and that the system was operating effectively in all material respects in relation to the financial reporting risks.

# Disclosure in respect of any indemnification and insurance of officers and auditors

Pursuant to the Constitution of Goodman, current and former Directors and officers of Goodman are entitled to be indemnified. Deeds of Indemnity have been executed by Goodman, consistent with the Constitution, in favour of each Director. The Deed indemnifies each Director to the extent permitted by law for liabilities (other than legal costs) incurred in their capacity as a director of Goodman Limited or a controlled entity and, in respect of legal costs, for liabilities incurred in defending or resisting civil or criminal proceedings.

Goodman has insured to the extent permitted by law, current and former Directors and officers of Goodman in respect of liability and legal expenses incurred in their capacity as a director or officer. As it is prohibited under the terms of the contract of insurance, the Directors have not included details of the nature of the liabilities covered or the amount of the premiums paid.

The auditors of Goodman are not indemnified by Goodman or covered in any way by this insurance in respect of the audit.

### Non-audit services

During the financial year, KPMG, Goodman and GIT's auditor, performed certain other services in addition to the audit and review of the financial statements.

The Board has considered the non-audit services provided during the financial year by the auditor and, in accordance with written advice authorised by a resolution of the Audit, Risk and Compliance Committee, resolved that it is satisfied that the provision of those non-audit services during the financial year by the auditor is compatible with, and did not compromise, the auditor independence requirements of the Corporations Act 2001 for the following reasons:

- All non-audit services were subject to the corporate governance procedures adopted by Goodman and have been reviewed by the Audit, Risk and Compliance Committee to determine they do not impact the integrity and objectivity of the auditor
- + The non-audit services provided do not undermine the general principles relating to auditor independence as set out in APES 110 Code of Ethics for Professional Accountants, as they did not involve reviewing or auditing the auditor's own work, acting in a management or decision making capacity for Goodman, acting as an advocate for Goodman or jointly sharing risks and rewards.

Details of the amounts paid to the auditor of Goodman and GIT, KPMG and its network firms, for the audit and non-audit services provided during the financial year are set out in note 25 to the consolidated financial statements.

# Lead auditor's independence declaration under section 307C of the *Corporations Act 2001*

The lead auditor's independence declaration is set out on page 88 and forms part of this Directors' report for the financial year.

### Rounding

Goodman and GIT are entities of a kind referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191. In accordance with that Instrument, amounts in this Directors' report and the consolidated financial statements have been rounded to the nearest hundred thousand dollars, unless otherwise stated.

### Events subsequent to balance date

There has not arisen in the interval between the end of the financial year and the date of this report any item, transaction or event of a material and unusual nature likely, in the opinion of the Directors, to affect significantly the operations of Goodman, the results of those operations, or the state of affairs of Goodman, in future financial years.

The Directors' report is made in accordance with a resolution of the Directors.

Stephen Johns

Independent Chairman

Group Chief Executive Officer

Sydney, 17 August 2023

# Lead Auditor's Independence Declaration under Section 307C of the Corporations Act 2001

To the Directors of Goodman Limited and Goodman Funds Management Limited, as Responsible Entity for Goodman Industrial Trust

I declare that, to the best of my knowledge and belief, in relation to the audits of Goodman Limited (as the deemed parent presenting the stapled security arrangement of the Goodman Group) and Goodman Industrial Trust for the financial year ended 30 June 2023 there have been:

i no contraventions of the auditor independence requirements as set out in the Corporations Act 2001 in relation to the audits; and

Even Hoggett

ii no contraventions of any applicable code of professional conduct in relation to the audits.

The consolidated cash flow statements are to be read in conjunction with the accompanying notes.

Non-cash transactions are included in note 20(c).

### Notes to the consolidated financial statements

### **BASIS OF PREPARATION**

This section sets out the general basis upon which Goodman and GIT have prepared their financial statements and information that is disclosed to comply with the Australian Accounting Standards, *Corporations Act 2001* or Corporations Regulations.

Specific accounting policies can be found in the sections to which they relate.

Goodman Limited and Goodman Industrial Trust are for-profit entities domiciled in Australia.

### Statement of compliance

These consolidated financial statements are general purpose financial statements which have been prepared in accordance with Australian Accounting Standards adopted by the Australian Accounting Standards Board (AASB) and the *Corporations Act 2001*. International Financial Reporting Standards (IFRS) form the basis of Australian Accounting Standards adopted by the AASB. The consolidated financial statements also comply with IFRS.

The consolidated financial statements are presented in Australian dollars and were authorised for issue by the Directors on 17 August 2023.

### Basis of preparation of the consolidated financial reports

Shares in the Company, units in the Trust and CDIs over shares in GLHK are stapled to one another and are quoted as a single security on the ASX. Australian Accounting Standards require an acquirer to be identified and an in-substance acquisition to be recognised. In relation to the stapling of the Company, the Trust and GLHK, the Company is identified as having acquired control over the assets of the Trust and GLHK. In the consolidated statement of financial position of the Group, equity attributable to the Trust and the CDIs over the shares of GLHK are presented as non-controlling interests.

As permitted by the relief provided in ASIC Instrument 20-0568, these financial statements present both the financial statements and accompanying notes of Goodman and GIT. GLHK, which is incorporated and domiciled in Hong Kong, prepares its financial statements under Hong Kong Financial Reporting Standards and the applicable requirements of the Hong Kong Companies Ordinance and accordingly the financial statements of GLHK have not been combined and included as adjacent columns in this report. The financial statements of GLHK have been included as an appendix to this report.

The consolidated financial statements are prepared on the historical cost basis, subject to any impairment of assets, except that the following assets and liabilities are stated at fair value:

- + Investment properties
- + Derivative financial instruments
- + Investments in unlisted securities
- + Liabilities for cash settled share-based payment arrangements.

In accordance with ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191, amounts in these consolidated financial statements have been rounded to the nearest hundred thousand dollars, unless otherwise stated.

### Foreign currency translation

### Functional and presentation currency

Items included in the consolidated financial statements of each of the controlled entities are measured using the currency of the primary economic environment in which the entity operates (functional currency). The consolidated financial statements are presented in Australian dollars, which is the Company's and the Trust's functional and presentation currency.

### **Transactions**

Foreign currency transactions are translated to each entity's functional currency at rates approximating to the foreign exchange rates ruling at the dates of the transactions. Amounts receivable and payable in foreign currencies at the balance date are translated at the rates of exchange ruling on that date. Resulting exchange differences are recognised in the income statement.

Non-monetary assets and liabilities that are measured in terms of historical cost are translated at rates of exchange applicable at the date of the initial transaction. Non-monetary items which are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

### Translation of controlled foreign operations

The assets and liabilities of controlled foreign operations are translated into Australian dollars at foreign exchange rates ruling at the balance date.

Revenue and expenses are translated at weighted average rates for the financial year. Exchange differences arising on translation are taken directly to the foreign currency translation reserve. On cessation of operations in a foreign region, the cumulative exchange differences relating to the operations in that region, that have been included in the foreign currency translation reserve, are reclassified to the income statement.

Exchange differences arising on monetary items that form part of the net investment in a controlled foreign operation are recognised in the foreign currency translation reserve on consolidation.

### Notes to the consolidated financial statements

Basis of preparation (continued)

### Exchange rates used

The following exchange rates are the main exchange rates used in translating foreign currency transactions, balances and financial statements to Australian dollars:

	Weighted	d average	As at 3	0 June
Australian dollar (AUD) to	2023	2022	2023	2022
New Zealand dollar (NZD)	1.0927	1.0667	1.0871	1.1057
Hong Kong dollar (HKD)	5.2751	5.6626	5.2235	5.4241
Chinese yuan (CNY)	4.6804	4.6840	4.8339	4.6154
Japanese yen (JPY)	92.3936	85.1512	96.1530	93.7770
Euro (EUR)	0.6433	0.6442	0.6109	0.6594
British pound sterling (GBP)	0.5592	0.5456	0.5249	0.5676
United States dollar (USD)	0.6731	0.7255	0.6664	0.6912
Brazilian real (BRL)	3.4743	3.8037	3.1911	3.5905

### Changes in accounting policies

The Group has adopted Amendments to AASB 112 – International Tax Reform – Pillar Two Model Rules, which was effective from 29 June 2023. The amendments provide a temporary mandatory exception from deferred tax accounting for the top-up tax, which is effective immediately and require new disclosures about the Pillar Two exposure from 30 June 2024. The mandatory exception applies retrospectively. However, because no new legislation to implement the top-up tax was enacted or substantively enacted at 30 June 2023 in any jurisdiction in which the Group operates and no related deferred taxes were recognised at that date, the retrospective application has no impact on the Group's financial statements at 30 June 2023.

The AASB has also issued other amendments to standards that were first effective from 1 July 2022 but none of these had a material impact on the Group's financial statements.

### Australian Accounting Standards issued but not yet effective

The Group has not applied any new or amended standard that is not yet effective but available for early application in the current accounting period. None of the new or amended accounting standards are expected to have a significant impact on the future results of the Group.

# Critical accounting estimates used in the preparation of the consolidated financial statements

The preparation of consolidated financial statements requires estimates and assumptions concerning the application of accounting policies and the future to be made by Goodman. Estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year can be found in the following notes:

- Note 5 Property assets
- + Note 13 Goodwill and intangible assets
- + Note 17 Financial risk management.

The accounting impacts of revisions to estimates are recognised in the period in which the estimate is revised and in any future periods affected.

### Measurement of fair values

A number of Goodman's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When measuring the fair value of an asset or a liability, Goodman uses market observable data as far as possible. Fair values are categorised into different levels in a fair value hierarchy and have been defined as follows:

- + Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- + Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Further information about the assumptions made in measuring fair values is included in the following notes:

- + Note 5 Property assets
- + Note 17 Financial risk management.

### RESULTS FOR THE YEAR

The notes in this section focus on the significant items in the income statement, and include the profit per security, analysis of the results by operating segment and taxation details.

### 1 Profit before income tax

### Gross property income

Gross property income comprises rental income under operating leases (net of incentives provided) and amounts billed to customers for outgoings (e.g. rates, levies, cleaning, security, etc). Amounts billed to customers for outgoings are a cost recovery for Goodman and are recognised once the expense has been incurred. The expense is included in property expenses.

Rental income under operating leases is recognised on a straight-line basis over the term of the lease contract. Where operating lease rental income is recognised relating to fixed increases in rentals in future years, an asset is recognised. This asset is a component of the relevant investment property carrying amount. The cost of lease incentives provided to customers is amortised on a straight-line basis over the life of the lease as a reduction of gross property income.

### Management and development income

The revenue from management and development activities is measured based on the consideration specified in a contract with a customer.

Goodman recognises revenue when it transfers control over a product or service to a customer.

### Management income

Fee income derived from management services relates to investment management base fees and property services fees and is recognised and invoiced progressively as the services are provided. Customers make payments usually either monthly or quarterly in arrears.

Performance related management income generally relates to portfolio performance fee income, which is recognised progressively as the services are provided but only when the income can be reliably measured and is highly probable of not being reversed. These portfolio performance fees are typically dependent on the overall returns of a Partnership relative to an agreed benchmark return, assessed over the life of the Partnership, which can vary from one year to seven years. The returns are impacted by operational factors such as the quality and location of the portfolio, active property management, rental income rates and development activity but can also be significantly affected by changes in global and local economic conditions. Accordingly, portfolio performance fee revenue is only recognised towards the end of the relevant assessment period, as prior to this revenue recognition is not considered to be sufficiently certain.

In determining the amount of revenue that can be reliably measured, management prepares a sensitivity analysis to understand the impact of changes in asset valuations on the potential performance fee at the assessment date. The assessment of revenue will depend on the prevailing market conditions at the reporting date relative to long-term averages and also the length of time until the assessment date e.g. the longer the time period to assessment date, the greater the impact of the sensitivity analysis. The potential portfolio performance fee revenue is then recognised based on the length of time from the start of the assessment period to the reporting date as a proportion of the total assessment period. Where the income is attributable to development activities or it relates to a combination of inextricable management and development activities that have occurred over the performance fee period, then it is reported as development income; otherwise, the income is reported as management income. The Partnerships make payments in respect of portfolio performances fees at the end of the performance periods once the attainment of the conditions has been verified and the amount of the fee has been agreed by all parties.

### Notes to the consolidated financial statements

Results for the year (continued)

1 Profit before income tax (continued)

### Development income - disposal of inventories

The disposal of inventories is recognised at the point in time when control over the property asset is transferred to the customer. This will generally occur on transfer of legal title and payment in full by the customer. The gain or loss on disposal of inventories is calculated as the difference between the carrying amount of the asset at the time of disposal and the proceeds on disposal (less transaction costs) and is included in the income statement in the period of disposal.

### Development income - development management services

Fee income from development management services (including masterplanning, development management and overall project management) is recognised progressively as the services are provided in proportion to the stage of completion by reference to costs. Payments are received in accordance with the achievement of agreed milestones over the development period. The development period can exceed 24 months for larger, more complex projects.

Performance related development income includes income associated with the returns from individual developments under the Group's management and performance fee income that relates to development activity. Income in respect of individual developments is recognised by Goodman on attainment of the performance related conditions, which is when the income can be reliably measured and is highly probable of not being reversed. These amounts are paid by the Partnership when the amounts have been measured and agreed. Income associated with development activities as part of a portfolio assessment is recognised on the same basis as outlined above in the management income section.

### Development income - fixed price development contracts

Certain development activities are assessed as being fixed price development contracts. This occurs when a signed contract exists, either prior to the commencement of or during the development phase, to acquire a development asset from Goodman on completion. Revenue and expenses relating to these development contracts are recognised in the income statement in proportion to the stage of completion of the relevant contracts by reference to costs. The payments by the purchaser usually occur on completion of the development once legal title has been transferred, but payments may be made during the development period on achievement of agreed milestones. The development period can exceed 24 months for larger, more complex projects.

### Net gain on disposal of investment properties

The disposal of an investment property is recognised at the point in time when control over the property has been transferred to the purchaser.

#### **Employee expenses**

### Wages, salaries and annual leave

Wages and salaries, including non-monetary benefits, and annual leave represent present obligations resulting from employees' services provided to the balance date. These are calculated at undiscounted amounts based on rates that are expected to be paid as at balance date including related on-costs, such as insurances and payroll tax.

#### Bonuses

A liability is recognised in other payables and accruals for bonuses where there is a contractual obligation or where there is a past practice that has created a constructive obligation. Liabilities for bonuses are measured at the amounts expected to be paid, including related on-costs, when they are settled.

### Superannuation

#### Defined contribution funds

Obligations for contributions to defined contribution funds are recognised as an expense as incurred.

### Defined benefit retirement schemes

The net obligation in respect of defined benefit retirement schemes is recognised in the statement of financial position and is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets. The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses and the return on plan assets (excluding interest), are recognised immediately in other comprehensive income. Net interest expense and other expenses related to defined benefit retirement schemes are recognised in the income statement.

Profit before income tax has been arrived at after crediting/(charging) the following items:

<sup>1.</sup> Fee revenues from single contractual arrangements involving a combination of inextricable investment management and development management services and recognised over the life of the underlying development projects are classified as development income for statutory reporting purposes. During the year, \$41.7 million (2022: \$77.0 million) of such income was recognised.

### Notes to the consolidated financial statements

Results for the year (continued)

### 2 Profit per security

Basic profit per security of the Group is calculated by dividing the profit attributable to the Securityholders by the weighted average number of securities outstanding during the year. Diluted profit per security is determined by adjusting the profit attributable to the Securityholders and weighted average number of securities outstanding for all dilutive potential securities, which comprise performance rights issued under the LTIP.

### Goodman

	2023	2022
	¢	¢
Profit per security		
Basic profit per security	83.0	183.2
Diluted profit per security	81.3	178.8

Profit after tax of \$1,559.9 million (2022: \$3,414.0 million) was used in calculating basic and diluted profit per security.

Weighted average number of securities used in calculating basic and diluted profit per security:

	2023	2022
	Num	ber of securities
Weighted average number of securities used in calculating basic profit per security	1,878,611,049	1,863,693,802

Weighted average number of securities used in calculating diluted profit per security	1,919,153,560	1,909,090,204

The calculation of profit per security is not required for GIT.

### Goodman Limited

Under Australian Accounting Standards, the issued units of the Trust and the CDIs over the shares of GLHK are presented as non-controlling interests. As a consequence, the Directors are required to present a profit per share and a diluted profit per share based on Goodman Limited's consolidated result after tax but excluding the results attributable to the Trust and GLHK.

	2023 ¢	2022 ¢
Profit per Goodman Limited share	*	<del>_</del>
Basic profit per Goodman Limited share	15.3	29.7
Diluted profit per Goodman Limited share	15.0	28.9

Profit after tax of \$288.2 million (2022: \$552.6 million) was used in calculating basic and diluted profit per Goodman Limited share.

### 3 Segment reporting

An operating segment is a component of Goodman that engages in business activities from which it may earn revenues and incur expenses. Goodman reports the results and financial position of its operating segments based on the internal reports regularly reviewed by the Group Chief Executive Officer in order to assess each segment's performance and to allocate resources to them.

Operating segment information is reported on a geographic basis and Goodman has determined that its operating segments are Australia and New Zealand (reported on a combined basis), Asia (Greater China (including the Hong Kong SAR) and Japan), Continental Europe (with the majority of assets located in Germany, France, Spain and Netherlands), the United Kingdom and the Americas (principally North America and including Brazil).

The activities and services undertaken by the operating segments include:

- Property investment, through both direct ownership and cornerstone investments in Partnerships
- + Management activities, both investment and property management
- Development activities, including development of directly owned assets (predominantly disclosed as inventories) and management of development activities for Partnerships.

The segment results that are reported to the Group Chief Executive Officer are based on profit before net finance expense and income tax expense, and also exclude non-cash items such as fair value adjustments and impairments, corporate expenses and share-based remuneration. The assets allocated to each operating segment are the property assets, including the investments in Partnerships and trade and other receivables associated with the operating activities, but exclude inter-entity funding, income tax receivables and corporate assets. The liabilities allocated to each operating segment primarily relate to trade and other payables associated with the operating activities, but exclude interest bearing liabilities, derivative financial instruments, provisions for distributions and corporate liabilities.

The accounting policies used to report segment information are the same as those used to prepare the consolidated financial statements of Goodman and GIT.

For the purpose of operating segment reporting, there are no material intersegment revenues and costs.

Information regarding the operations of each reportable segment is included on the following pages.

<sup>1.</sup> Realisation of prior years' property valuation gains, net of deferred tax is a non-IFRS measure and relates to the Group's share of realised valuation gains on repositioned properties (both directly and indirectly owned) that have transacted during the year. During FY23, \$511.8 million of these realised valuation gains have been included in development earnings and as at 30 June 2023, the Group's share of unrealised valuation gains since the repositioning activities commenced was \$271.3 million (30 June 2022; \$429.6 million). Refer to page 23 of the Directors report for further details.

<sup>2.</sup> In the prior year, development earnings included \$6.2 million of interest income from a loan to a development JV. The interest income is reported under finance income in note 14.

<sup>3.</sup> Other unallocated amounts in Goodman and GIT included other financial assets and liabilities, deferred tax assets, tax payables and provisions which did not relate to the reportable segments.

Additionally, other unallocated assets and liabilities in GIT included loans due from/to controlled entities of Goodman.

#### 4 Taxation

Income tax for the period comprises current tax and movements in deferred tax assets and liabilities. Current tax and movements in deferred tax assets and liabilities are recognised in the income statement except to the extent that they relate to items recognised directly in equity, in which case the relevant amounts of tax are recognised directly in equity.

Current tax is the expected tax payable on the taxable income for the financial year and any adjustment to tax payable in respect of previous financial years.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not accounted for:

- + Goodwill
- + The initial recognition of assets or liabilities that affect neither accounting nor taxable profit
- + Differences relating to investments in controlled entities to the extent that they will probably not reverse in the foreseeable future.

The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities. Deferred tax assets or liabilities in respect of investment properties held at fair value are calculated on the presumption that the carrying amount of the investment property will be recovered through sale. A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Additional income taxes that arise from dividends/distributions are recognised at the same time as the liability to pay the related dividends/distributions.

#### (a) Amounts recognised in the income statement

Current tax payables	(170.2)	(173.4)
	(158.3)	(169.5)

## (d) Deferred tax assets and liabilities

Deferred tax assets/(liabilities) are attributable to the following:

		Goodman				
	Deferre	d tax assets	Deferred	Deferred tax liabilities		
	2023 \$M	2022 \$M	2023 \$M	2022 \$M		
Investment properties <sup>1</sup>	-	_	(493.6)	(403.4)		
LTIP	68.8	39.3	-	-		
Other items	20.4	19.9	(9.9)	(10.9)		
Tax assets/(liabilities)	89.2	59.2	(503.5)	(414.3)		
Set off of tax	(45.3)	(34.0)	45.3	34.0		
Net tax assets/(liabilities)	43.9	25.2	(458.2)	(380.3)		

<sup>1.</sup> Including withholding tax on potential future distributions from the disposal of investment properties by Partnerships.

Movements in deferred taxes recognised in expenses and equity are attributable to the following:

	Goo	odman
	2023 \$M	2022 \$M
Deferred tax (expense)/benefit recognised in expenses		
Investment properties - fair value adjustments	(47.7)	(206.7)
LTIP	28.9	16.2
Other items	(28.8)	1.5
Total deferred tax expense recognised in expenses	(47.6)	(189.0)
Deferred tax (expense)/benefit recognised in equity		
LTIP	0.6	(4.2)
Other items	-	-
Total deferred tax benefit/(expense) recognised in equity	0.6	(4.2)
Total deferred tax movements recognised in expenses and equity	(47.0)	(193.2)

Deferred tax assets of \$281.8 million (2022: \$266.9 million) arising primarily from tax losses (revenue and capital in nature) and deductions associated with the LTIP have not been recognised by Goodman.

#### **GIT**

At 30 June 2023, deferred tax liabilities of \$375.0 million (2022: \$267.9 million) have been recognised in relation to withholding tax on potential future distributions from the disposal of investment properties by Partnerships.

## (e) Taxation of GIT

Under current Australian income tax legislation, the Trust is not liable for income tax, including capital gains tax, provided that Securityholders are presently entitled to the distributable income of the Trust as calculated for trust law purposes. The controlled entities of the Trust that operate in certain foreign jurisdictions are liable to pay tax in those jurisdictions.

#### **OPERATING ASSETS AND LIABILITIES**

The notes in this section focus on Goodman's property assets, working capital and goodwill and intangible assets.

## 5 Property assets

#### (a) Principles and policies

Investment in property assets includes both inventories and investment properties (including those under development), which may be held either directly or through investments in Partnerships (both associates and JVs).

#### Inventories

Inventories relate to land and property developments that are held for sale or development and sale in the normal course of the Group's business. Inventories are carried at the lower of cost or net realisable value. The calculation of net realisable value requires estimates and assumptions which are regularly evaluated and are based on historical experience and expectations of future events that are believed to be reasonable under the circumstances.

Inventories are classified as non-current assets unless they are contracted to be sold within 12 months of the end of the reporting period, in which case they are classified as current assets.

## Investment properties

Investment properties comprise investment interests in land and buildings held for the purpose of leasing to produce rental income and/or for capital appreciation. Investment properties are carried at fair value. The calculation of fair value requires estimates and assumptions which are continually evaluated and are based on historical experience and expectations of future events that are believed to be reasonable under the circumstances. Investment properties are not depreciated as they are subject to continual maintenance and regularly revalued on the basis described below. Changes in the fair value of investment properties are recognised directly in the income statement.

## Components of investment properties

Land and buildings (including integral plant and equipment) comprising investment properties are regarded as composite assets and are disclosed as such in the consolidated financial report.

Investment property carrying values include the costs of acquiring the assets and subsequent costs of development, including costs of all labour and materials used in construction, costs of managing the projects, holding costs and borrowing costs incurred during the development periods.

Amounts provided to customers as lease incentives and assets relating to fixed rental income increases in operating lease contracts are included within investment property values. Lease incentives are amortised over the term of the lease on a straight-line basis. Direct expenditure associated with leasing a property is also capitalised within investment property values and amortised over the term of the lease.

#### Classification of investment properties

Investment properties are classified as either properties under development or stabilised properties. Investment properties under development include land, new investment properties in the course of construction and investment properties that are being redeveloped. Stabilised investment properties are all investment properties not classed as being under development and would be completed properties that are leased or are available for lease to customers.

For investment properties under development, the carrying values are reviewed by management at each reporting date to consider whether they reflect the fair value and at completion external valuations are obtained to determine the fair values.

For stabilised investment properties, independent valuations are obtained at least every two years to determine the fair values. At each reporting date between obtaining independent valuations, the carrying values are reviewed by management to ensure they reflect the fair values.

#### Deposits for investment properties

Deposits and other costs associated with acquiring investment properties that are incurred prior to obtaining legal title are recorded at cost and disclosed as other receivables in the statement of financial position.

#### (b) Summary of investment in property assets

		Goodman		GIT

Total property assets		20,690.8	18,528.7	13,246.7	11,857.3

#### (c) Estimates and assumptions in determining property carrying values

### Inventories

For both inventories held directly and inventories held in Partnerships, external valuations are not performed but instead valuations are determined using the feasibility studies supporting the land and property developments. The end values of the developments in the feasibility studies are based on assumptions such as capitalisation rates, letting up periods, rental income and incentives that are consistent with those observed in the relevant market. If the feasibility study calculations indicate that the forecast cost of a completed development will exceed the net realisable value, then the inventories are impaired.

## Investment properties

## Stabilised investment properties

The fair value of stabilised investment properties is based on current prices in an active market for similar properties in the same location and condition and subject to similar lease and other contracts. The current price is the estimated amount for which a property could be exchanged between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgably, prudently and without compulsion.

## Approach to determination of fair value

The approach to determination of fair value of investment properties is applied to both investment properties held directly and investment properties held in Partnerships.

Valuations are determined based on assessments and estimates of uncertain future events, including upturns and downturns in property markets and availability of similar properties, vacancy rates, market rents and capitalisation and discount rates. Recent and relevant sales evidence and other market data are taken into account. Valuations are either based on an external independent valuation or on an internal valuation.

External valuations are undertaken only where market segments were observed to be active. In making the determination of whether a market segment is active, the following characteristics are considered:

- + Function of the asset (distribution/warehouse or suburban office)
- + Location of asset (city, suburb or regional area)
- + Carrying value of the asset (categorised by likely appeal to private (including syndicates), national and/or institutional investors)
- + Categorisation as primary or secondary based on a combination of location, weighted average lease expiry, quality of tenant covenant (internal assessment based on available market evidence) and age of construction.

Each property asset is assessed and grouped with assets in the same or similar market segments. Information on all relevant recent sales is also analysed using the same criteria to provide a comparative set. The number of sales and the circumstances of each sale are assessed to determine whether a market segment is active or inactive.

Operating assets and liabilities (continued)

5 Property assets (continued)

Where a market segment is observed to be active, then external independent valuations are instructed for stabilised investment properties where there has been a combination of factors that are likely to have resulted in a material movement in valuation. The considerations include a greater than 10% movement in market rents, more than a 25 basis point movement in capitalisation rates, a material change in tenancy profile (including changes in the creditworthiness of a significant customer that may have a material impact on the property valuation), significant capital expenditure, a change in use (or zoning), a development has reached completion/stabilisation of the asset or it has been two years since the previous external independent valuation. For all other stabilised investment properties in an active market segment, an internal valuation is performed based on observable capitalisation rates and referenced to independent market data.

Where a market segment is observed to be inactive, then no external independent valuations are performed and internal valuations are undertaken based on discounted cash flow (DCF) calculations. The DCF calculations are prepared over a 10-year period. The key inputs considered for each individual calculation are:

- + Current contractual lease terms
- + Current market rents
- + Projected growth in market rents
- + Expected and likely capital expenditures
- + Projected letting up incentives provided to customers and vacant time on expiry of leases
- + Discount rates computed using the 10 year bond rate or equivalent in each jurisdiction plus increments to reflect country risk, tenant credit risk and industry risk. Where possible, the components of the discount rate are benchmarked to available market data.

## Market assessment

With the more volatile economic conditions in FY23 compared to prior years, there have been fewer transactions of industrial, logistics and warehousing properties during the year. Nevertheless, at 30 June 2023, the Board has been able to assess that all markets in which the Group operated were active and as a consequence no adjustments have been made to the carrying values of the Group's stabilised investment property portfolios on the basis of internally prepared discounted cash flow valuations.

The overall weighted average capitalisation rates for the divisional portfolios (including Partnerships) are as set out in the table below:

Total portfolio weighted average capitalisation rate

	Goodn	nan	GIT	
Division	<b>2023</b> %	<b>2022</b> %	<b>2023</b> %	2022 %
Australia and New Zealand	4.4	3.9	4.3	3.8
Asia	4.4	4.3	4.1	3.8
Continental Europe	4.5	3.5	4.5	3.5
United Kingdom	4.9	3.7	-	_
Americas	4.7	4.1	4.7	4.1

In respect of the Group's and GIT's directly held stabilised investment properties at 30 June 2023, 72% (2022: 57%) and 100% (2022: 100%), respectively, had been valued by an external independent valuer during the financial year. All independent valuers used by the Group are required to hold a recognised and relevant professional qualification and have recent experience in the location and category of the investment properties being valued.

For the Partnerships, all properties that had been stabilised investment properties throughout FY23 were valued by an external independent valuer during the financial year.

## Sensitivity analysis

The fair value measurement approach for directly held investment properties has been categorised as a Level 3 fair value based on the inputs to the valuation method used. The usual valuation methods are either based on income capitalisation or market comparison. Where the income capitalisation method is adopted, then the stabilised investment property valuations at 30 June 2023 are most sensitive to the following inputs:

- + Capitalisation rates
- + Market rents
- Incentives provided to customers and/or vacant time on expiry of leases.

The directly held stabilised investment properties are in Australia and Asia. The range of market rents and average capitalisation rate and range of prices are summarised in the table below:

Valuation technique	Significant unobservable inputs	2023	2022
Income capitalisation	Range of net market rents (per square metre per annum)	\$110 to \$450	\$90 to \$450
	Average capitalisation rate	4.5%	4.4%
Market comparison	Price per square metre	\$1,851 to \$21,218	\$1,786 to \$18,019

The impacts on the Group's financial position that would arise from the changes in capitalisation rates, market rents and incentives/re-leasing time are set out in the table below. This illustrates the impacts on Goodman in respect of both the directly held stabilised investment properties and its share of those stabilised investment properties held by Partnerships.

	Goodman		GIT

Increase in incentives/ re-leasing time +6 months	(7.3)	(84.8)	(3.6)	(63.4)	

- 1. Goodman's share of stabilised investment properties held by Partnerships.
- 2. On assumed lease expiries over the next 12 months.

#### Investment properties under development

For the directly held investment properties under development, external independent valuations are generally not performed, but instead valuations are determined at each reporting date using the feasibility assessments supporting the developments. The end values of the developments in the feasibility assessments are based on assumptions such as capitalisation rates, market rents, incentives provided to customers and vacant time that are consistent with those observed in the relevant market adjusted for a profit and risk factor. This profit and risk factor is dependent on the function, location, size and current status of the development and are generally in a market range of 10% to 15%; although for larger more complex projects that are at an early stage of the development, the profit and risk factor could be higher. This adjusted end value is then compared to the forecast cost of a completed development to determine whether there is an increase or decrease in value.

In respect of the Partnerships, certain Partnerships obtain external independent valuations of investment properties under development at reporting dates. However, the majority determine the fair values at reporting dates by reference to the feasibility assessments, with external independent valuations obtained when the properties have been stabilised.

Land and development properties	1,781.3	1,727.1	-	5.9
	1,781.3	1,727.1	-	5.9

#### Goodman

During the current and prior financial year, no impairment losses were recognised on land and development properties.

During the financial year, borrowing costs of \$5.1 million (2022: \$3.1 million) previously capitalised into the carrying value of inventories were expensed to the income statement on disposal of the inventories.

### (e) Investment properties

## Reconciliation of carrying amount of directly held investment properties

	Goodma	an	GIT	
	2023 \$M	2022 \$M	2023 \$M	2022 \$M

More than five years	137.4	87.0	54.6	10.9
	341.7	270.3	127.5	86.8

#### (f) Investments accounted for using the equity method

Investments accounted for using the equity method comprise associates and JVs, which are collectively referred to as Partnerships.

#### Associates

An associate is an entity in which Goodman exercises significant influence but not control over its financial and operating policies.

#### JVs

A JV is an arrangement in which Goodman is considered to have joint control for accounting purposes, whereby Goodman has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities.

In the consolidated financial statements, investments in Partnerships are accounted for using the equity method. Under this method, Goodman's investment is initially recognised at cost. Subsequent to initial recognition, the consolidated financial statements include Goodman's share of the gains or losses and other comprehensive income of Partnerships until the date on which significant influence or joint control ceases.

		280.1	1,146.1			8,315.4	7,850.7	271.3	980.4			7,291.9	6,814.4

<sup>1.</sup> GMT is listed on the New Zealand Stock Exchange (NZX). At 30 June 2023, the market value of Goodman's investment in GMT using the quoted price on the last day of trading was \$721.7 million (2022: \$651.7 million), which compared to the carrying value of \$797.9 million. Goodman does not consider its investment impaired as the carrying value is equal to its share of GMT's net assets and is supported by independent valuations of the individual investment properties in GMT.

GIT has a 5.4% ownership interest in GMT, which forms part of Goodman's 25.2% ownership interest in GMT. As a result, the Directors have assessed that GIT has significant influence over GMT and has applied the equity method of accounting for its 5.4% interest.

<sup>2.</sup> Goodman's ownership interest in GJCP reflected the weighted average ownership interest in the various property investment vehicles.

<sup>1.</sup> Shareholder loans have been provided by investors of GCLP in proportion to their ownership interest. The shareholder loans are interest free and unsecured and have no fixed terms of repayment. The shareholder loans are not expected to be repaid within 12 months from the end of the reporting period and the Directors consider the loans to form part of Goodman's investment in GCLP.

With respect to Goodman's other JVs, the total profit after tax and revaluations was \$254.9 million (2022: \$1,333.2 million) and total other comprehensive income was \$nil (2022: \$nil). With respect to GIT's other JVs, the total profit after tax and revaluations was \$317.2 million (2022: \$1,024.5 million) and total other comprehensive income was \$nil (2022: \$nil).

Operating assets and liabilities (continued)

#### 6 Receivables

Receivables comprise trade and other receivables and loans to related parties and are recognised on the date that they are originated, initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, receivables are measured at amortised cost using the effective interest rate method, less any impairment losses.

Receivables are derecognised when the contractual rights to the cash flows from the receivable expire or the Group transfers the rights to receive the contractual cash flows on the receivable in a transaction in which substantially all the risks and rewards of the receivable are transferred.

	Goo	Goodman		GIT	
	2023 \$M	2022 \$M	2023 \$M	2022 \$M	
Current					
Trade receivables	20.9	7.8	-	0.1	
Tax receivables	11.9	3.9	-	_	
Other receivables	110.1	123.1	18.2	3.8	
Amounts due from related parties	100.2	83.0	8.9	-	
Loans to related parties <sup>1</sup>	-	-	215.0	127.1	
	243.1	217.8	242.1	131.0	
Non-current					
Other receivables	2.8	5.9	-	_	
Loans to related parties <sup>1</sup>	228.2	167.5	3,122.4	3,137.4	
	231.0	173.4	3,122.4	3,137.4	

<sup>1.</sup> Refer to note 23 for details of amounts due from and loans to related parties.

Goodman assessed the receivables balances at 30 June 2023 for expected credit losses (risk of non-payment). The level of provisioning was not significant in the context of the Group's financial position.

#### 7 Contract balances

Contract assets primarily comprise amounts recoverable from fixed price development contracts (disclosed net of any payments received on account) and accrued performance fee income where the Group assesses that the income can be reliably measured.

Contract liabilities primarily comprise consideration received in advance of the completion of development contracts and rental guarantees.

The following table provides an analysis of receivables from contracts with customers (excluding rental income receivables), contract assets and contract liabilities at the reporting dates:

	Good	dman
	2023 \$M	2022 \$M
Current		
Receivables, which are included in trade receivables, other receivables and amounts due from related parties	133.6	111.7
Contract assets	72.9	77.6

Total	72.9	21.2	77.6	4.7			

Details regarding Goodman's future rental income associated with existing lease agreements is included in note 5.

In addition, Goodman receives investment management, development management and property services fees under various contracts that it has with its Partnerships. These contracts are for varying lengths of time and are typically transacted on terms that are consistent with market practice. The revenues under these contracts are linked to the AUM, total development project costs or gross property income of Partnerships and are invoiced as the services are provided.

Operating assets and liabilities (continued)

#### 8 Assets held for sale

In June 2023, the Group entered into a conditional contract to dispose of two controlled entities which own two stabilised investment properties. As the conditions under the contracts had not been satisfied as at 30 June 2023, the directly held assets and liabilities to be disposed have been presented as a disposal group held for sale.

## Assets and liabilities of disposal group held for sale

At 30 June 2023, the disposal group was held at the lower of carrying amount and fair value less costs to sell, and comprised the following assets and liabilities within the Australia and New Zealand segment:

	\$М
Investment properties	515.3
Other assets	1.7
Payables	(7.4)
Assets held for sale	509.6

No impairment losses have been recognised in FY23 in respect of the disposal group.

In the prior year, assets held for sale amounting to \$608.2 million related to two investment properties in Australia. The disposal of the investment properties was completed in FY23.

## 9 Payables

Trade and other payables are recognised initially at trade date fair value plus any directly attributable transaction costs. Subsequent to initial recognition, trade and other payables are measured at amortised cost.

Trade and other payables are derecognised when the contractual obligations are discharged or cancelled or expire.

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, there is a legal right to offset the amounts and an intention to either settle on a net basis or to realise the asset and settle the liability simultaneously.

## 10 Provisions

A provision is recognised when there is a legal, equitable or constructive obligation as a result of a past event and it is probable that a future sacrifice of economic benefits will be required to settle the obligation, the timing or amount of which is uncertain.

<sup>1.</sup> Refer to note 12 for property, plant and equipment held as a lessee.

### 12 Leases

Goodman leases office buildings, motor vehicles and office equipment.

Certain investment properties and developments classified as inventories are also built on land held under leasehold interests.

Goodman recognises a right of use asset and a lease liability at the lease commencement date. The right of use asset is initially measured at cost plus any direct costs incurred and an estimate of costs to restore the underlying asset or the site on which it is located, less any lease incentives received.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the lessee's incremental borrowing rate. After initial recognition, the lease liability is measured at amortised cost and interest expense is calculated using the effective interest rate method. The lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, or there is a change arising from the reassessment of whether Goodman will be reasonably certain to exercise an extension or termination option.

The right of use assets in respect of office buildings, motor vehicles and office equipment are depreciated using the straight-line method over the period of the lease. Right of use assets that meet the definition of investment property are carried at fair value in accordance with note 5(a). Ground leases of development land that are classified as inventories are not depreciated but are assessed at each reporting date for impairments to ensure they are recorded at the lower of cost and net realisable value.

Information about leases for which Goodman is a lessee is detailed below:

	2023 \$M	2022 \$M
Right of use assets		
Inventories	561.8	453.3
Investment properties	695.6	568.0
Property, plant and equipment	43.8	42.4

14.4

## 13 Goodwill and intangible assets

Goodman recognises both goodwill and indefinite life management rights in its statement of financial position.

#### Goodwill

Goodwill arising on the acquisition of controlled entities is stated at cost less any accumulated impairment losses (refer below). No amortisation is provided.

#### Management rights

When fund and/or investment management activities are acquired as part of a business combination, management rights are recorded where they arise from contractual or other legal rights, and the fair value can be measured reliably.

Management rights are stated at cost less impairment. Management rights are not amortised as they are assumed to have an indefinite life, given they are routinely renewed at minimal cost and on broadly similar terms.

#### **Impairment**

The carrying amounts of goodwill and management rights are tested annually for impairment. For the purpose of impairment testing, goodwill and management rights are allocated to the related cash-generating units monitored by management. An impairment loss is recognised whenever the carrying amount of the cash-generating unit exceeds its recoverable amount. Recoverable amount is the greater of the fair value (net of disposal costs) and the value in use but given that goodwill and management rights are not frequently traded (i.e. fair value is difficult to ascertain), the recoverable amount will be equal to the value in use of the cash-generating unit. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the cash-generating unit.

Impairment losses are recognised in the income statement. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the goodwill allocated to the cash-generating unit, then to the carrying amount of the management rights allocated to the cash-generating unit and then to reduce the carrying amount of the other assets in the cash-generating unit on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. An impairment loss for management rights is reversed only to the extent that its carrying amount does not exceed its original cost.

A summary of Goodman's goodwill and intangible assets is set out by below:

	God	odman
	2023 \$M	2022 \$M
Goodwill	738.3	685.6
Management rights	111.8	109.8
	850.1	795.4

Operating assets and liabilities (continued)

13 Goodwill and intangible assets (continued)

The carrying value of goodwill and intangible assets is analysed by division in the table below:

	2023	2022
	\$M	\$M
Analysed:		
Goodwill		
Continental Europe	622.8	577.0
Other	115.5	86.6
Subtotal - goodwill	738.3	685.6

Total	67.1	(10.9)	(2.8)	53.4	4.4	57.8

#### Impairments and reversals of impairments

There were no impairment losses or reversals of impairment losses during either the current or prior financial year.

#### Impairment testing for intangible assets

The carrying values of both goodwill and indefinite life management rights are assessed for impairment annually. For the purpose of impairment testing, goodwill and indefinite life management rights are allocated to the Goodman divisions that represent the lowest level within Goodman at which the goodwill and indefinite life management rights are monitored for internal management purposes. Where goodwill and management rights arise in the same division, impairment testing has been performed on the combined intangible asset.

The impairment tests for all intangible assets are based on each division's value in use. Value in use is determined by discounting the future projected cash flows generated from continuing operations. These cash flows are for a five-year period, with a year five terminal value calculated using a terminal growth rate and an appropriate discount rate for each division.

The key drivers of value in respect of the intangible assets are:

- + Development cash flows, which are dependent on development volumes and margins and whether the developments are undertaken directly by Goodman or directly by Partnerships or in joint venture with Partnerships
- + Management cash flows, which are dependent on the level of external AUM and net property income in Partnerships and, in the case of portfolio performance fee income, the long-term performance of the Partnerships.

The estimation of future cash flows requires assumptions to be made regarding uncertain future events. The cash flows do not assume a downturn in earnings that might arise in the event of a significant adverse change in market conditions for the Group. The cash flows also assume that Goodman's management contracts with Partnerships have an indefinite life. This is on the basis that in the past these contracts have been typically renewed at minimal cost and on broadly similar financial terms.

The post-tax discount rates used in the value in use calculations were determined using the capital asset pricing model, with individual assumptions referenced to market data, where available, and adjusting for specific factors associated with each division. A risk premium was included in each division's discount rate, reflecting the level of forecasting, size, country and financing risks for that division. The value in use was determined using the after-tax cash flows and the post-tax discount rates, with the discount rates then converted to the equivalent pre-tax rates.

When assessing a potential impairment, the value in use is compared against the sum of the intangible asset balance and the property, plant and equipment balance for each division.

The principal intangible asset balance relates to the Group's business activities in Continental Europe. The value in use and the key assumptions used to calculate the value in use are set out below.

## Value in use - Continental Europe

The value in use for Continental Europe is consistent with the prior years. The Group's strategy remains the same with assets focused on core infill locations, close to consumers.

	2023	2022
Value in use (A\$M)	2,559.4	2,444.3
Key assumptions:		
Pre-tax discount rate (per annum)	12.7%	11.6%
Average annual development expenditure (A\$B)	1.2	1.3
Average annual growth in AUM	6.6%	7.7%

All amounts were calculated in local currency and translated to Australian dollars at the closing exchange rate at the end of the financial period.

Averages related to average amounts over the five-year forecast period.

Operating assets and liabilities (continued)

13 Goodwill and intangible assets (continued)

#### **Development earnings**

During FY23 there has been a decrease in the market values of properties in Continental Europe, however, demand continues to exist for modern, well-located industrial product. The activities will be focused on the regions core markets in western and southern Europe and will be a mix of development undertaken directly by Goodman and developments undertaken in joint venture with Partnerships. The average annual development cash outflow to fund the projected development pipeline across the forecast period is A\$1.2 billion per annum (2022: A\$1.3 billion per annum). This is slightly lower than the prior year, with higher inflation and higher interest rates expected to persist in the short term. The development earnings forecasts include projects which have not yet been contracted.

#### Management earnings and AUM

External AUM at 30 June 2023 was \$A7.8 billion (2022:A\$8.1 billion). The average annual increase in external AUM of 6.6% (2022: 7.7%) assumes most of the projected development over the forecast period is for Partnerships.

For the purpose of the value in use assessments, property values are expected to be stable over the period and no portfolio performance revenue is assumed.

#### Sources of funding for development activity

Capital inflows required to fund acquisitions and development activity are assumed to arise from the following sources: equity investment directly into Partnerships (including distribution reinvestment plans) by Goodman and its investment partners (in some cases, the projections assume future equity investment will be greater than existing commitments); lending facilities advanced to Partnerships; debt capital markets; customer-funded turnkey developments; and proceeds from disposals of assets. It is not practicable to determine the percentage of the total which will flow from each source.

Funds available to Goodman and its investment partners are assumed to be sourced from available global markets and are not limited to regional lending markets.

#### Assumptions impacting the terminal year

The cash flow projections assumes that there will be no significant change in regional or global market conditions. Long-term growth rates have been used to extrapolate cash flow projections beyond the period covered by the five-year forecast. For Continental Europe, the growth rate of 3.2% (2022: 2.3%) was based on the average consumer price indices over the past five years.

## **CAPITAL MANAGEMENT**

The notes in this section focus on Goodman's and GIT's financing activities, capital structure and management of the financial risks involved.

## 14 Net finance income/(expense)

Interest income and expense are recognised using the effective interest rate method.

Finance costs relating to a qualifying asset are capitalised as part of the cost of that asset using a weighted average cost of debt. Qualifying assets are assets which take a substantial time to get ready for their intended use or sale. All other finance costs are expensed using the effective interest rate method.

<sup>1.</sup> Borrowing costs were capitalised to inventories and investment properties under development during the year at rates between 0.95% and 4.85% per annum (2022: 0.95% and 4.85% per annum).

Capital management (continued)

## 15 Interest bearing liabilities

Interest bearing liabilities comprise bank loans and notes issued in the capital markets. Interest bearing liabilities are recognised initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, interest bearing liabilities are measured at amortised cost using the effective interest rate method

#### 16 Other financial assets and liabilities

Other financial assets and liabilities primarily comprise derivative financial instruments that are recognised initially on the trade date at which Goodman and GIT become a party to the contractual provisions of the instrument.

#### Derivative financial instruments and hedging

Goodman and GIT use derivative financial instruments to hedge their economic exposure to foreign exchange and interest rate risks arising from operating, investing and financing activities. In accordance with the Group's financial risk management (FRM) policy, Goodman and GIT do not hold or issue derivative financial instruments for speculative trading purposes.

Goodman and GIT's derivative financial instruments are not designated as a hedge for accounting purposes, and accordingly movements in the fair value of derivative financial instruments are recognised in the income statement.

#### Cash flow hedges

Certain of Goodman and GIT's associates and JVs continue to designate derivative financial instruments as cash flow hedges for accounting purposes. Goodman's and GIT's share of the effective portion of changes in the fair value of derivative financial instruments in associates and JVs that are designated and qualify as cash flow hedges is recognised in the cash flow hedge reserve. The gain or loss relating to any ineffective portion is recognised in the income statement.

Capital management (continued)

## 17 Financial risk management

The Board has overall responsibility for approving Goodman's risk management framework. The Board has established the Audit, Risk and Compliance committee, which is responsible for reviewing, approving and subsequently monitoring the Group's risk management policies, including the FRM policy. The FRM policy is established to identify and analyse the financial risks faced by the Group, to set appropriate risk limits and controls for managing the financial affairs of the Group, and to monitor those risks and adherence to limits by Management.

Goodman's treasury function is responsible for the day to day compliance with the Group's FRM policy and prepares reports for consideration by management committees and the Board including:

- + Cash flow projections over a period of at least 12 months to assess the level of cash and undrawn facilities, and headline gearing at each month end
- + Debt maturity profile, to allow the Group to plan well in advance of maturing facilities
- Interest rate hedge profile over the next 10 years, to allow the Group to manage the proportion of fixed and floating rate debt in accordance with its FRM policy
- + Capital hedge position (by currency) and profile of expiring currency derivatives, to allow the Group to manage its net investment hedging in accordance with its FRM policy.

Any significant investments or material changes to the finance facilities or FRM policy require approval by the Board.

#### Capital management

Goodman's principal capital management objectives are to maintain a strong capital base and provide funds for operating activities (including development expenditure), capital expenditure and investment opportunities as they arise. This is achieved through an appropriate mix of debt and equity.

Goodman is able to alter the capital mix by issuing new Goodman debt and equity securities or hybrid securities, by reinstating the distribution reinvestment plan, by adjusting the timing of development and capital expenditure and by selling assets to reduce borrowings. Goodman also manages capital through its distribution policy in which distributions made to Securityholders are based on the Group's operating profit, subject to a minimum distribution equal to the taxable income of the Trust.

Goodman's key financial risks are market risk (including foreign exchange and interest rate risk), liquidity risk and credit risk.

#### (a) Market risk

#### Foreign exchange risk

Goodman is exposed to foreign exchange risk through its investments in New Zealand, Hong Kong, China, Japan, Continental Europe, the United Kingdom, North America and Brazil. Foreign exchange risk represents the gain or loss that would be recognised from fluctuations in currency prices against the Australian dollar as a result of Goodman's net investment in foreign operations, future commercial transactions, and other foreign currency denominated assets and liabilities.

In managing foreign exchange risks, Goodman aims to reduce the impact of short-term fluctuations on Goodman's earnings and net assets. However, over the long term, permanent changes in foreign exchange rates will have an impact on both earnings and net assets.

Goodman's capital hedge policy for each overseas region is to hedge between 65% and 90% of foreign currency denominated assets with foreign currency denominated liabilities. This is achieved by borrowing in the same currency as the overseas investments to form a natural economic hedge against any foreign currency fluctuations and/or using derivatives such as cross currency interest rate swaps (CCIRS) and foreign exchange contracts (FEC).

The Group's hedge position is monitored on an ongoing basis and the Group will enter into new derivatives (including forward start contracts) and close out or enter into contra derivative contracts to manage the capital hedge position.

As at 30 June 2023, the principal that was used to hedge its exposures using derivatives and the weighted average exchange rates, by currency, are set out below:

In addition to the derivatives detailed in the table above, GIT also has FECs with a controlled entity of GL to hedge that entity's USD exposure. On maturity of the contracts, GIT will receive USD 206.8 million from GL (2022: USD 81.8 million) and pay GBP 167.8 million to GL (2022: GBP 53.8 million).

#### Sensitivity analysis

Throughout the financial year, if the Australian dollar had been 5% stronger against all other currencies, with all other variables held constant, the profit attributable to Securityholders, excluding derivative mark to market and unrealised foreign exchange movements, would have decreased by A\$50.0 million (2022: A\$107.9 million decrease) for Goodman and A\$21.0 million (2022: A\$48.1 million) for GIT. If the Australian dollar had been 5% weaker against all other currencies, with all other variables held constant, the profit attributable to Securityholders, excluding derivative mark to market and unrealised foreign exchange movements, would have increased by A\$50.0 million (2022: A\$107.9 million increase) for Goodman and A\$21.0 million (2022: A\$48.1 million) for GIT.

## Interest rate risk

Goodman's interest rate payments risk arises from variable rate borrowings and the Group's CCIRS that hedge the overseas investments. Goodman has a policy of hedging between 60% and 100% of its payments exposure to changes in interest rates for a 3 year period, progressively decreasing from the fourth year. Goodman enters into interest rate derivatives (IRD) to manage cash flow risks associated with the interest rates on payments that are floating. The IRD contracts are for 90-day intervals and involve quarterly payments or receipts of the net amount of interest.

As at 30 June 2023, Goodman and GIT's fixed and floating interest rate exposure (by principal) based on existing interest bearing liabilities and derivative financial instruments is set out below:

#### Goodman

	Interest bearing	Impact of deriva	Impact of derivatives		
	liabilities A\$M	CCIRS A\$M	IRD A\$M	rate exposure A\$M	
30 June 2023 <sup>1</sup>

	2,844.7	3,034.9	_	5,879.6	

- 1. Goodman and GIT are also exposed to variable interest rates on cash at bank and the principal amount of the Australian dollar receiver legs of the CCIRS. To hedge this interest rate exposure, Goodman and GIT hold IRDs.
  - At 30 June 2023, Goodman's cash at bank was \$1,360.1 million (FY22: \$1,056.0 million) and the principal amount of the Australian dollar receiver legs of the CCIRS was \$6,184.9 million (FY22: \$5,933.4 million). The principal amount of the IRDs to hedge this exposure amounted to \$3,341.0 million (FY22: \$2,630.0 million). Accordingly, at 30 June 2023, Goodman had a net variable interest rate exposure on its cash and receivables (by principal) of \$4,204.0 million (2022: \$4,359.4 million).
  - At 30 June 2023, GIT's cash at bank was \$689.9 million (FY22: \$473.6 million) and the principal amount of the Australian dollar receiver legs of the CCIRS was \$3,709.3 million (FY22: \$3,031.8 million). The principal amount of the IRDs to hedge this exposure amounted to \$3,341.0 million (FY22: \$2,630.0 million). Accordingly, at 30 June 2023, GIT had a net variable interest rate exposure on its cash and receivables (by principal) of \$1,058.2 million (2022: \$875.4 million).
- 2. For consistency with the current year's presentation, the comparative figures have been adjusted to exclude the principal amount of the Australian dollar receiver legs of the CCIRS and the principal amount of the IRDs which hedge the interest rate exposure on these receiver legs. For Goodman, the adjustments amounted to \$5,933.4 million to the principal amount of the CCIRS and \$2,130.0 million to the principal amount of the IRDs. For GIT, the adjustments amounted to \$3,031.9 million to the principal amount of the CCIRS and \$2,130.0 million to the principal amount of the IRDs.

Capital management (continued)

17 Financial risk management (continued)

As a result of the fixed rate interest bearing liabilities and derivative financial instruments that existed at 30 June 2023, Goodman and GIT would have the following fixed payable interest rate exposure (by principal) at the end of each of the next five financial years. This assumes all interest bearing liabilities and derivative financial instruments mature in accordance with current contractual terms and that no new arrangements are entered into.

5 years	2,242.2	3.76	2,598.4	3.45	

<sup>1.</sup> For consistency with the current year's presentation, the comparative figures have been adjusted to exclude the principal amount and associated interest rate impact of the Australian dollar receiver legs of CCIRS and the principal amount of IRDs which hedge the inflows arising from them.

#### Sensitivity analysis

Throughout the financial year, if interest rates (based on the interest bearing liabilities and derivative financial instruments in place at the end of the year) had been 100 basis points per annum higher/lower, with all other variables held constant, the profit attributable to Securityholders, excluding derivative mark to market movements, would have increased/decreased by A\$1.4 million (2022: increased/decreased by A\$8.1 million) for Goodman and decreased/increased by A\$9.3 million (2022: decreased/increased by A\$5.4 million) for GIT.

#### Managing interest rate benchmark reform and associated risks

A fundamental reform of major interest rate benchmarks has been undertaken globally, including the replacement of some interbank offered rates (IBORs) with alternative nearly risk-free rates (referred to as 'IBOR reform'). The Group had exposure to IBORs through certain of its bank loans (interest bearing liabilities) and its derivative instruments (IRD and CCIRS). Most of the Group's external interest bearing liabilities are bonds with fixed coupons and are not exposed to IBORs. The Group's derivative instruments are governed by contracts based on the International Swaps and Derivatives Association (ISDA) master agreements.

Amendments to the Group's financial instruments with contractual terms indexed to sterling LIBOR, Japanese yen LIBOR or US dollar LIBOR, such that they incorporate the new benchmark rates, were completed by 31 December 2021. The sterling and Japanese yen LIBORs transitioned on 1 January 2023 and the US dollar LIBOR transitioned to SOFR on 1 July 2023.

For Goodman's other IBOR exposures, the transition to alternative risk-free rates has been deferred and/or extended and therefore no action has been or will be taken in that regard until such time as the alternative reference rates are defined and scheduled. It is expected that these will follow the conventions established in other markets and the Group will apply the same principles for those transitions as and when they become relevant.

#### (b) Liquidity risk

Liquidity risk is the risk that Goodman will not be able to meet its financial obligations as they fall due. Goodman's objective is to maintain sufficient liquidity to fund short-term working capital, capital expenditure, investment opportunities, debt expiries and distributions. This is achieved through the monthly preparation of a three-year cash flow forecast to understand the uses of funds and to identify potential shortfalls in funding or potential breaches of financial covenants in its loan arrangements. This allows Goodman to plan for renewal of debt facilities, negotiation of new debt facilities, new issues of securities, including the distribution reinvestment plan, and other potential sources of funding.

Goodman's treasury function is responsible for reporting details of all debt maturities to the Board at its regular meetings.

Goodman seeks to spread its debt maturities such that the total debt repayable in a single financial year does not exceed Board approved policy levels.

Capital management (continued)

17 Financial risk management (continued)

#### (c) Credit risk

Credit risk represents the loss that would be recognised if counterparties failed to perform as contracted.

The maximum exposure to credit risk on financial assets, excluding investments, which have been recognised on the statement of financial position, is equal to the carrying amount.

Goodman has a policy of assessing the creditworthiness of all potential customers and is not materially exposed to any one customer. Goodman evaluates all customers' perceived credit risk and may require the lodgement of rental bonds or bank guarantees, as appropriate, to reduce credit risk. In addition, all rents are payable monthly in advance. Bank guarantees are accepted from financial institutions which have an investment grade credit rating from a major rating agency.

Concentration of credit risk may exist due to receivables in respect of the disposals of investment properties. The credit risk is minimised as legal title to the properties is only transferred upon receipt of proceeds and typically Goodman will have either received a cash deposit or be the beneficiary of a bank guarantee for 10% to 20% of the total proceeds.

In relation to material bank deposits, Goodman minimises credit risk by dealing with major financial institutions. The counterparty must have a long-term investment grade credit rating from a major rating agency. The amounts and other terms associated with bank deposits are formally reviewed monthly.

The credit risks associated with derivative financial instruments are managed by:

- + Transacting with multiple derivatives counterparties that have a long-term investment grade credit rating
- + Utilising ISDA agreements with derivative counterparties in order to limit exposure to credit risk through netting of amounts receivable and amounts payable to individual counterparties (refer below)
- + Formally reviewing the mark to market position of derivative financial instruments by counterparty on a monthly basis.

#### Master netting off or similar agreements

Goodman enters into derivative transactions under ISDA master netting off agreements. Under these agreements, where certain credit events occur (such as a default), all outstanding transactions under the agreement are terminated and a single net termination value is payable in full and final settlement.

As Goodman does not have any current legally enforceable right to offset, the fair values associated with derivative financial instruments have been presented gross in the statement of financial position. However, if a credit event occurred, the ISDA master netting off agreement would allow A\$278.0 million (2022: A\$361.3 million) and A\$227.2 million (2022: A\$256.1 million) of financial assets and financial liabilities in relation to Goodman's and GIT's respective derivative financial instruments to be offset.

#### (d) Fair values of financial instruments

The carrying amounts shown in the statement of financial position and fair values of financial assets and liabilities are as follows:

		Good	man		GIT

	_	518.9	-	518.9	-	351.2	-	351.2

There were no transfers between the levels during the year.

#### Valuation techniques used to derive Level 2 and Level 3 fair values

The Level 2 derivative financial instruments held by Goodman and GIT consist of IRD, CCIRS and FEC.

The fair values of derivative financial instruments are determined using generally accepted pricing models which discount estimated future cash flows based on the terms and maturity of each contract and current market interest rates and/or foreign currency rates, adjusted for specific features of the instruments.

Capital management (continued)

#### 18 Dividends and distributions

Dividends and distributions are recognised when they are declared and before deduction of any withholding tax. Any non-recoverable withholding tax is included in income tax.

#### Goodman

#### FY23 dividends/distributions

Dividends/distributions paid	(562.1)	(557.2)	(515.6)	(446.6)
Balance at the end of the year	282.5	280.0	188.4	233.5

#### 19 Issued capital

#### (a) Ordinary securities

Ordinary securities are classified as equity. Incremental costs directly attributable to issues of ordinary securities are recognised as a deduction from equity, net of any tax effects.

			Good	man	GI	Т
	2023	2022	2023	2022	2023	2022
	Num	ber of securities	\$M	\$M	\$M	\$M

Total issued capital	1,883,819,883	1,868,222,609	8,273.3	8,206.1	8,355.4	8,154.5

#### Terms and conditions

Stapled security means one share in the Company stapled to one unit in the Trust and one CDI over a share in GLHK. Holders of stapled securities are entitled to receive dividends or distributions as declared from time to time and are entitled to one vote per security at Securityholders' meetings. In the event of a winding up, Securityholders rank after creditors and are fully entitled to any net proceeds of liquidation.

#### Movement in ordinary securities

Date	Details	Number of securities	Goodman \$M	GIT \$M
30 June 2021	Balance before accumulated issue costs	1,847,429,255	8,257.3	7,997.7

30 June 2023	Closing balance	1,883,819,883	8,273.3	8,355.4

#### (b) Share based payments

#### LTIP

The Group's share-based payments primarily relate to performance rights awarded to employees under the LTIP. These performance rights entitle an employee to either acquire Goodman securities for \$nil consideration (equity settled performance rights) or, in certain jurisdictions, to receive an amount in cash equal to the value of the securities (cash settled performance rights), subject to the vesting conditions having been satisfied. Further details regarding the vesting conditions are included in the remuneration report section of the Directors' report.

During the year, the movement in the number of performance rights under the LTIP was as follows:

	Nu	ımber of rights
	2023	2022
Outstanding at the beginning of the year	71,750,644	68,640,720
Granted	22,431,397	23,468,860
Exercised	(16,830,607)	(19,545,855)
Forfeited	(1,033,344)	(813,081)
Outstanding at the end of the year	76,318,090	71,750,644
Exercisable at the end of the year	-	_

Capital management (continued)
19 Issued capital (continued)

#### Share-based payments transactions

The fair value of equity settled performance rights at the grant date is expensed with a corresponding increase in the employee compensation reserve over the period from the grant date to the vesting dates. The expense is adjusted to reflect the actual number of performance rights for which the related service and non-market vesting conditions are expected to be met. The accumulated share-based payments expense of performance rights which have vested or lapsed is transferred from the employee compensation reserve to retained earnings.

The fair value of cash settled performance rights is also recognised as an expense but with a corresponding increase in liabilities over the vesting period. The expense is adjusted to reflect the actual number of performance rights for which the related service and non-market vesting conditions are expected to be met. The liability is remeasured at each reporting date and at the vesting date based on the fair value of the rights.

The fair value of services received in return for performance rights granted under the LTIP is measured by reference to the fair value of the performance rights granted. The fair value of the performance rights granted during the year was measured as follows:

- + Operating EPS tranches: these rights were valued as a granted call option, using the standard Black Scholes model with a continuous dividend/distribution yield
- + Relative TSR tranches: these rights were valued using a Monte Carlo model which simulated total returns for each of the ASX 100 stocks and discounted the future value of any potential future vesting performance rights to arrive at a present value. The model uses statistical analysis to forecast total returns, based on expected parameters of variance and co-variance.

The model inputs for performance rights, both equity and cash settled, awarded during the current financial year included the following:

	10-year rights issued on	10-year rights issued on	5-year rights issued on
	17 Nov 2022	30 Sep 2022	30 Sep 2022
Fair value at measurement date (\$)	13.89	11.69	12.32
Security price (\$)	18.18	15.78	15.78
Exercise price (\$)	_	-	-
Expected volatility (%)	27.61	27.15	31.49
Rights' expected weighted average life (years)	6.8	6.9	3.9
Dividend/distribution yield per annum (%)	1.65	1.90	1.90
Average risk free rate of interest per annum (%)	3.43	3.76	3.62

The model inputs for the remeasurement of the cash settled performance rights at 30 June 2023 included the following:

	10-year rights issued in FY23	10-year rights issued in FY22	5-year rights issued in FY23	5-year rights issued in FY22	5-year rights issued in FY21	5-year rights issued in FY20	5-year rights issued in FY19
Fair value at measurement date (\$)	9.00	12.11	9.18	14.51	19.72	19.87	20.02
Security price (\$)	20.07	20.07	20.07	20.07	20.07	20.07	20.07
Exercise price (\$)	_	-	-	-	_	-	-
Expected volatility (%)	27.59	27.88	28.50	28.33	26.02	25.28	19.62
Rights' expected weighted average life (years)	6.2	5.7	3.2	2.2	1.2	0.7	0.2
Dividend/distribution yield per annum (%)	1.49	1.49	1.49	1.49	1.49	1.49	1.49
Average risk free rate of interest per annum (%)	3.99	4.01	4.12	4.12	4.17	4.18	4.18

The amounts recognised as a share-based payments expense in the consolidated income statement are set out in note 1. At 30 June 2023, a liability of \$146.1 million (2022: \$126.6 million) was recognised in relation to cash settled performance rights.

#### Goodman's New Zealand Long Term Incentive Plan

Under Goodman's New Zealand Long Term Incentive Plan, employees receive approximately half of their LTI in the form of performance rights over GMT units that vest subject to meeting performance hurdles based on the achievement of distributable earnings targets by GMT and the relative total unitholder return from holding GMT units compared to other NZX property vehicles. On vesting, delivery of units in GMT is made from units held by Goodman or acquired on-market.

#### **OTHER ITEMS**

The notes in this section set out other information that is required to be disclosed to comply with the Australian Accounting Standards, *Corporations Act 2001* or Corporations Regulations.

#### 20 Notes to the cash flow statements

#### (a) Reconciliation of cash

For the purpose of the cash flow statements, cash and cash equivalents include cash on hand at the bank and short-term deposits at call. Cash at the end of the year as shown in the cash flow statements is reconciled to the related items in the statements of financial position as follows:

	Goodn	Goodman		
	2023 \$M	2022 \$M	2023 \$M	2022 \$M
Bank balances	1,360.1	811.3	689.9	184.2
Call deposits	-	244.7	-	289.4
	1,360.1	1,360.1 811.3 - 244.7		473.6

#### (b) Reconciliation of profit for the year to net cash provided by operating activities

#### 21 Equity attributable to Goodman Limited and non-controlling interests

Under Australian Accounting Standards, stapled entities are required to separately identify equity attributable to the parent entity from equity attributable to other entities stapled to the parent. The equity attributable to other entities stapled to the parent is presented as non-controlling interests in the statement of financial position of the Group. The tables below in notes 22(a) and 22(b) provide an analysis of equity, profit for the year and total comprehensive income for the year attributable to each of Goodman Limited and the other entities stapled to Goodman Limited (non-controlling interests).

#### 22 Controlled entities

Controlled entities are entities controlled by the Company. Under Australian Accounting Standards, the Company is identified as having acquired control over the assets of the Trust and GLHK. The consolidated financial statements incorporate the assets and liabilities of all controlled entities as at 30 June 2023 and the results of all such entities for the year ended 30 June 2023.

Where an entity either began or ceased to be controlled during the financial year, the results of that entity are included only from or to the date control commenced or ceased.

Unrealised gains and losses and inter-entity balances resulting from transactions with or between controlled entities are eliminated in full on consolidation.

The significant controlled entities of the Company are set out below:

Significant controlled entities of Goodman Limited	Country of establishment/ incorporation
GA Industrial Portfolio Trust <sup>1</sup>	Australia
GIT Investments Holding Trust No.3 <sup>1</sup>	Australia

#### 23 Related parties

The names of KMP of Goodman at any time during the financial year are as follows:

#### Non-Executive Directors - GL and GFML

Stephen Johns
Christopher Green
Mark Johnson
Vanessa Liu

Rebecca McGrath
Phillip Pryke

Belinda Robson Hilary Spann

George Zoghbi

#### Non-Executive Director - GLHK

**David Collins** 

#### Remuneration of KMP

The KMP remuneration totals are as follows:

Executive KMP
Gregory Goodman
Danny Peeters
Anthony Rozic
Nick Kurtis
Michael O'Sullivan
Nick Vrondas

	Goodman		Goodman Limited <sup>1</sup>	
	2023 \$000	2022 \$000	2023 \$000	2022 \$000
Short-term employee benefits	8,654.0	7,596.6	-	_
Post-employment benefits	209.9	203.6	-	_
Post-employment benefits	37,769.7	42,106.0	-	_
Long-term employee benefits	4,536.4	5,037.4	-	_
	51,170.0	54,943.6	_	-

<sup>.</sup> The remuneration is paid by wholly owned controlled entities of Goodman Limited.

GIT does not employ personnel in its own right. However, it is required to have an incorporated responsible entity to manage its activities and GFML is considered to be the key management personnel of GIT.

#### Individual Directors' and executives' compensation disclosures

Information regarding individual Directors' and executives' compensation and some equity instruments disclosures as required by Corporations Regulations 2M.3.03 is provided in the remuneration report section of the Directors' report.

#### GreenPoint Real Estate Innovation and Technology Venture, LP (GreenPoint)

In order to enhance understanding of and access to technologies that may influence the property sector and the business, GIT committed to investing USD15.0 million in GreenPoint, a property technology fund that is a Delaware limited partnership, managed by GreenPoint Partners. GreenPoint Partners is beneficially owned and controlled by Christopher Green, a director of GL. Total investment in GreenPoint at 30 June 2023 was USD7.2 million (2022: USD5.3 million). No distributions were received from GreenPoint in the current year (2022: \$0.8 million).

#### Wyuna Regenerative Ag Investment Fund (Wyuna)

As part of its ESG strategy, Goodman has committed to investing up to \$30.0 million in an integrated carbon credit and regenerative platform in Australia – Wyuna. Investing alongside Australia's Clean Energy Finance Corporation, this project assists land regeneration, sustainable food production and land-based solutions to climate change. Wyuna is managed by Wyuna Regenerative Ag Pty Limited, which is 50% owned by Christopher Green, a director of GL.

In FY23, GL invested \$11.9 million, and the total investment in Wyuna at 30 June 2023 was \$11.9 million (30 June 2022: \$nil). No distributions were received from Wyuna in the current and prior year.

#### Transactions with associates and JVs

The transactions with Partnerships during the year were as follows:

	Revenue from d of investment pr	•		Revenue from management and development activities		n Ioans d JVs
Goodman	2023 \$000	2022 \$000	2023 \$000	2022 \$000	2023 \$000	2022 \$000
Associates	-	400,825.4	683,993.9	1,279,744.9	-	_
JVs	-	274,018.6	495,718.3	447,461.7	2,117.3	6,514.7
GIT						
Associates	_	346,825.4	_	-	(19.1)	(36.1)
JVs	_	_	_	_	1,688.6	6,166.6

In addition to the transactions included in the table above:

- + Goodman disposed of a 40% interest in a JV to GAIP for proceeds of \$353.7 million in FY23
- + Goodman incurred \$3.6 million (2022: \$3.7 million) of costs from Partnerships, primarily for the leasing of office premises.

Amounts due from Partnerships at 30 June 2023 were as follows:

		Goodman					GIT				
	Amounts due from related parties			Loans provided by Goodman <sup>1</sup>		Amounts due from related parties		ovided			
	2023 \$000	2022 \$000	2023 \$000	2022 \$000	2023 \$000	2022 \$000	2023 \$000	2022 \$000

Other JVs	21,577.5	6,359.9	228,184.2	167,464.7	8,984.7	4.8	221,188.1	140,162.8			
	41,340.0	31,483.0	228,184.2	167,464.7	8,984.7	4.8	221,188.1	140,162.8			

<sup>1.</sup> Loans provided by Goodman and GIT to associates and JVs have been provided on an arm's length basis.

#### Transactions between GIT and other Goodman entities

The transactions with other Goodman entities during the year were as follows:

	G	IT
	2023 \$000	2022 \$000
Management income	1,045.5	1,850.9
Reimbursement of expenses	71,192.7	58,381.5
	72,238.2	60,232.4

Interest bearing loans exist between GIT and other Goodman entities. At 30 June 2023, interest bearing loans of \$3,114.4 million (2022: \$3,122.6 million) were receivable by GIT from other Goodman entities and \$572.7 million (2022: \$723.8 million) was payable by GIT to other Goodman entities. Loans to related Goodman entities bear interest at rates referenced to GIT's external funding arrangements.

In the prior year, GIT acquired 65,906,199 units in GMT from a controlled entity of GL for consideration of NZ\$139.1 million.

Other items (continued)

#### 24 Commitments

#### **Development activities**

At 30 June 2023, Goodman was committed to expenditure in respect of \$641.5 million (2022: \$691.8 million) on inventories and other development activities. GIT had no such commitments (2022: \$nil).

#### Investment properties

At 30 June 2023, Goodman had capital commitments of \$90.1 million (2022: \$6.1 million) in respect of investment properties. GIT had \$86.7 million (2022: \$4.5 million) of such commitments.

#### **Partnerships**

At 30 June 2023, Goodman had remaining equity commitments of \$173.8 million (2022: \$217.9 million) into GAIP and \$145.8 million (2022: \$135.0 million) into GEP. In addition, Goodman has undertaken to acquire up to 82.1 million units in GAIP if their holder elects to sell them. The price Goodman will pay will be determined by the prevailing unit price at the time of the sale. As at 30 June 2023, this equates to a total value of \$173.8 million (cum distribution value) or \$172.8 million (ex-distribution price). Goodman's commitment to this sale process ends in May 2026. These commitments also apply to GIT.

In relation to GEP, Goodman offers two liquidity facilities which allow certain of the partners to sell to the Group some or all of their investments in GEP, but only when Goodman's ownership interest in GEP is below 40.0%. At 30 June 2023, Goodman's ownership interest in GEP was 19.8% and therefore the facilities are available to the partners. The first facility, which applies to 1.3% of the issued and committed units, would require Goodman to purchase up to €39.5 million of units (at a 1% discount to current unit value), subject to a maximum in each quarter of 2.5% of units. The second facility, which applies to 32.2% of the issued and committed units, would require Goodman to purchase up to €150.0 million of units (at a 5% discount to current unit value), subject to a maximum in each calendar year of €50.0 million.

Furthermore, in respect of certain Partnerships, Goodman and its investment partners have committed to invest further capital, subject to the approval by the partners (including Goodman) of the expenditures for which the funding is required. Goodman's commitment in respect of these Partnerships is set out below:

- + \$18.1 million (2022: \$30.0 million) into Wyuna
- + \$135.0 million (2022: \$130.7 million) into KWASA Goodman Germany
- + \$201.3 million (2022: \$344.8 million) into Goodman Japan
   Development Partnership
- + \$705.3 million (2022: \$793.8 million) into GCLP
- + \$501.1 million (2022: \$599.3 million) into GUKP
- + \$1,791.1 million (2022: \$1,888.9 million) into GNAP
- + \$80.9 million (2022: \$73.0 million) into Goodman Brazil Logistics Partnership (GBLP).

The Commitments in GNAP and GBLP also apply to GIT.

Total equity	1,000.3	703.1	5,036.7	5,059.2	

Other items (continued)

The financial information for the parent entities of Goodman and GIT has been prepared on the same basis as the consolidated financial statements, except as set out below:

#### Investments in controlled entities and Partnerships

Investments in controlled entities and Partnerships are accounted for at cost in the financial statements of GL and GIT. Distributions/dividends received from Partnerships are recognised in the income statement, rather than being deducted from the carrying amount of these investments.

#### Tax consolidation

GL is the head entity in a tax consolidated group comprising all Australian wholly owned subsidiaries (this excludes GIT). The head entity recognises all of the current tax assets and liabilities of the tax consolidated group (after elimination of intra-group transactions).

#### Financial guarantees

Where the parent entities have provided financial guarantees in relation to loans and payables of controlled entities for no compensation, the fair values of these guarantees are accounted for as contributions and recognised as part of the cost of the investment.

#### Parent entity capital commitments

At 30 June 2023, the parent entities had no capital commitments (2022: \$nil).

#### Parent entity contingencies

#### **Capitalisation Deed Poll**

The Company, GFML, as responsible entity of the Trust, GLHK and certain of their wholly owned controlled entities are 'investors' under a Capitalisation Deed Poll (CDP) dated 23 May 2007. Under the CDP, each investor undertakes to pay to the relevant controlled entity borrower (borrower) any amounts owing under finance documents for the purpose of the CDP when the borrower fails to make a payment. Any payments by an investor to a borrower will be by way of loan to, or proceeds for the subscription of equity in, the borrower by the investor.

#### US144A/Regulation S senior notes

Under the issue of notes in the US144A/Regulation S bond market (refer to notes 15(b) and 15(c)), controlled entities of GIT had on issue USD and EUR notes amounting to US\$1,350.0 million and €500.0 million respectively. GL, GFML, as responsible entity of the Trust, and GLHK have unconditionally and irrevocably guaranteed on a joint and several basis the payment of principal and interest in respect of each of the notes.

#### 27 Events subsequent to balance date

#### Goodman and GIT

Other than as disclosed elsewhere in the consolidated financial report, there has not arisen in the interval between the end of the financial year and the date of this consolidated financial report any item, transaction or event of a material and unusual nature likely, in the opinion of the Directors, to affect significantly the operations of Goodman and GIT, the results of those operations, or the state of affairs of Goodman and GIT, in future financial years.

### **Directors' declaration**

In the opinion of the directors of Goodman Limited and the directors of Goodman Funds Management Limited, the responsible entity for Goodman Industrial Trust:

- a. the consolidated financial statements and the notes of Goodman Limited and its controlled entities and Goodman Industrial Trust and its controlled entities set out on pages 89 to 158 and the remuneration report that is contained on pages 35 to 85 in the Directors' report, are in accordance with the *Corporations Act 2001*, including:
  - giving a true and fair view of Goodman's and GIT's financial position as at 30 June 2023 and of their performance for the financial year ended on that date
  - (ii) complying with Australian Accounting Standards (including Australian Accounting Interpretations) and the *Corporations Regulations* 2001
- there are reasonable grounds to believe that the Company and the Trust will be able to pay their debts as and when they become due and payable.

The Directors have been given the declarations required by section 295A of the *Corporations Act 2001* from the Group Chief Executive Officer and Chief Financial Officer for the financial year ended 30 June 2023.

The Directors draw attention to note 1 to the consolidated financial statements, which includes a statement of compliance with International Financial Reporting Standards.

Signed in accordance with a resolution of the Directors.

Stephen Johns

Independent Chairman

Gregory Goodman

Group Chief Executive Officer Sydney, 17 August 2023

## Independent Auditor's Report

To the stapled security holders of Goodman Group and the unitholders of Goodman Industrial Trust

#### Report on the audit of the Financial Reports

#### **Opinion**

We have audited the *Financial Report* of Goodman Limited (the Company) as the deemed parent presenting the stapled security arrangement of the *Goodman Group* (the Goodman Group Financial Report).

We have also audited the Financial Statements and Directors' Declaration of Goodman Industrial Trust (the Trust Financial Report).

In our opinion, each of the accompanying Goodman Group Financial Report and Trust Financial Report are in accordance with the *Corporations Act* 2001, including:

- + giving a true and fair view of the **Goodman Group's** and of the **Trust's** financial position as at 30 June 2023 and of their financial performance for the year ended on that date; and
- + complying with Australian Accounting Standards and the Corporations Regulations 2001.

The respective *Financial Reports* of the Goodman Group and Trust comprises:

- + Consolidated statement of financial position as at 30 June 2023;
- Consolidated income statement, Consolidated statement of comprehensive income, Consolidated statement of changes in equity and Consolidated statement of cash flows for the year then ended;
- + Notes including a summary of significant accounting policies; and (Collectively referred to as *Financial Statements*)
- + Directors' Declaration.

The *Goodman Group* consists of Goodman Limited and the entities it controlled at the year-end or from time to time during the financial year, Goodman Industrial Trust (the *Trust*) and the entities it controlled at the year-end or from time to time during the financial year, and Goodman Logistics (HK) Limited and the entities it controlled at the year-end or from time to time during the financial year.

#### **Basis for opinion**

We conducted our audit in accordance with *Australian Auditing Standards*. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report.

We are independent of the Goodman Group, Goodman Limited, Goodman Funds Management Limited (the Responsible Entity of the Trust) and the Trust in accordance with the Corporations Act 2001 and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (including Independence Standards) (the Code) that are relevant to our audit of the Financial Report in Australia. We have fulfilled our other ethical responsibilities in accordance with these requirements.

#### **Key Audit Matters**

The Key Audit Matters we identified for Goodman Group are:

- Valuation of investment properties, investments accounted for using the equity method and inventories; and
- + Recognition of development income.

**Key Audit Matters** are those matters that, in our professional judgement, were of most significance in our audit of the Financial Report for the current period.

These matters were addressed in the context of our audit of the Financial Report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

# Valuation of investment properties (\$1,644.8m), investments accounted for using the equity method (\$16,285.2m) and inventories (\$2,245.5m)

Refer to Note 5 to the Financial Report

#### The key audit matter

Goodman Group's investments in property assets include investment properties and inventories, which are held either directly or through its investments accounted for using the equity method.

Goodman Group's policy is investment properties are held at fair value and inventories are held at the lower of cost and net realisable value, determined using internal methodologies or through the use of external valuation experts.

The valuation of property assets is a key audit matter as they are significant in value (being 84% of total assets) and contain assumptions with estimation uncertainty.

This leads to additional audit effort due to differing assumptions used by Goodman Group based on asset classes, geographies and characteristics of individual property assets.

We considered significant assumptions in the valuation of property assets including:

- + Investment properties:
  - capitalisation rates;
  - discount rates;
  - market rental income;
  - weighted average lease expiry and vacancy levels;
  - projections of capital expenditure; and
  - lease incentive costs.
- + Inventories
  - forecast capitalisation rates and market rental income;
  - land value per square metre;
  - letting up periods and lease incentive costs; and
  - development costs.

In assessing this Key Audit Matter, we involved real estate valuation specialists, who understand the Group's investment profile, business and the economic environment it operates in.

#### How the matter was addressed in our audit

Our procedures included:

- + Obtaining an understanding of Goodman Group's process regarding the valuation of property assets.
- Assessing the methodologies used in the valuations of property assets, for consistency with accounting standards, industry practice and Goodman Group's policies.
- Working with real estate valuation specialists to read published reports and industry commentary to gain an understanding of prevailing property market conditions.

For a sample of investment properties, taking into account asset classes, geographies and characteristics of individual investment properties:

- Assessing the scope, competence and objectivity of external valuation experts and Goodman Group's internal valuers.
- + Challenging significant assumptions, with reference to published industry reports and commentary of prevailing property market conditions.
- + With the assistance of real estate valuation specialists, assessing a sample of significant assumptions including capitalisation rates, discount rates, customer covenant strength, market rental income, weighted average lease expiry and vacancy levels, projections of capital expenditure and lease incentive costs. We did this by comparing to market analysis published by industry experts, recent market transactions, inquiries with Goodman Group's historical performance of the assets and using our industry experience.
- Assessing the disclosures in the financial report using our understanding obtained from our testing, against accounting standard requirements.

For a sample of inventories:

+ Challenging the key assumptions included in Goodman Group's internal recoverability assessments by comparing to commentary published by industry experts, recent market transactions, and our knowledge of historical performance of the assets.

#### Recognition of development income (\$1,407.2m)

Refer to Note 1 to the Financial Report

#### The key audit matter

Development income was a key audit matter due to:

- + its significant value (43% of revenue and other income);
- + the unique nature of contracts; and
- + the judgements applied by us to assess Goodman Group's determination of revenue recognised during the period in relation to contracts which remain in progress at period end.

Income from development management services is recognised progressively, requiring judgment by us when considering Goodman Group's determination of the amount and extent of the services provided within the period based on contract deliverables.

Goodman Group's policy is for income from inventory disposals to be recognised at a point in time when control is transferred to the customer and fixed price development contracts to be recognised in proportion to the stage of completion of the relevant contracts.

We focused on the stage of completion estimation which is based on costs incurred as a percentage of estimated total costs for each contract.

#### How the matter was addressed in our audit

Our procedures included:

- + Evaluating Goodman Group's recognition of development income against the criteria in the accounting standards.
- + Selecting specific contracts from development income recognised based on quantitative and qualitative information (such as the size and complexity of the arrangement) and performed the following:
  - Understanding the underlying contractual arrangements, in particular their unique terms, for their impact to recognition of development income.
  - Where recognition of development income was conditional upon certain events occurring, checking conditions within the contract to evidence of achievement of conditions, such as correspondence with external parties.
  - Assessing Goodman Group's determination of revenue recognised during the period in accordance with the provision of services stipulated in the underlying contract or the stage of completion.
  - For revenue recognised based on the stage of completion, assess the cost assumptions used by the Group in determining the stage of completion estimate as follows:
    - Costs incurred assessing a sample of costs incurred to date to relevant underlying external sources, such as invoices; and
    - Estimated total costs assessing a sample of total forecast costs to secured contracts for construction activities, other relevant underlying sources, and our understanding of the industry and economic conditions.

#### Other Information

Other Information is financial and non-financial information in Goodman Group's annual reporting which is provided in addition to the Financial Report and the Auditor's Report. The Directors of the Company and the Directors of the Responsible Entity are responsible for the Other Information.

The Other Information we obtained prior to the date of this Auditor's Report was the Directors' Report (including the Remuneration Report).

Our opinion on the Financial Report does not cover the Other Information and, accordingly, we do not express an audit opinion or any form of assurance conclusion thereon, with the exception of the Remuneration Report and our related assurance opinion.

In connection with our audit of the Financial Report, our responsibility is to read the Other Information. In doing so, we consider whether the Other Information is materially inconsistent with the Financial Report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We are required to report if we conclude that there is a material misstatement of this Other Information, and based on the work we have performed on the Other Information that we obtained prior to the date of this Auditor's Report, we have nothing to report.

#### Responsibilities of the Directors for the Financial Report

The Directors of the Company and the Responsible Entity are responsible for:

- + preparing the Financial Report that gives a true and fair view in accordance with *Australian Accounting Standards* and the *Corporations Act 2001*;
- implementing necessary internal control to enable the preparation of a Financial Report that gives a true and fair view and is free from material misstatement, whether due to fraud or error; and
- + assessing the Goodman Group and Trust's ability to continue as a going concern and whether the use of the going concern basis of accounting is appropriate. This includes disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless they either intend to liquidate the Goodman Group or the Trust or to cease operations, or have no realistic alternative but to do so.

#### Auditor's responsibilities for the audit of the Financial Report

Our objective is:

- + to obtain reasonable assurance about whether the Financial Report as a whole is free from material misstatement, whether due to fraud or error; and
- + to issue an Auditor's Report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with *Australian Auditing*Standards will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error. They are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Financial Report.

A further description of our responsibilities for the audit of the Financial Report is located at the *Auditing and Assurance Standards Board* website at: https://www.auasb.gov.au/admin/file/content102/c3/ar1\_2020.pdf. This description forms part of our Auditor's Report.

#### Report on the Remuneration Report

#### Opinion

In our opinion, the Remuneration Report of Goodman Limited for the year ended 30 June 2023, complies with Section 300A of the Corporations

Act 2001

#### Directors' responsibilities

The Directors of Goodman Limited are responsible for the preparation and presentation of the Remuneration Report in accordance with Section 300A of the Corporations Act 2001.

#### Our responsibilities

We have audited the Remuneration Report included in pages 35 to 85 of the Directors' report for the year ended 30 June 2023.

Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with *Australian Auditing Standards*.

### **Report of the Directors**

The Directors have pleasure in submitting their annual financial report together with the audited financial statements of Goodman Logistics (HK) Limited (Company) and its subsidiaries (collectively referred to as the Consolidated Entity) for the year ended 30 June 2023 (FY23).

#### Incorporation and principal place of business

Goodman Logistics (HK) Limited was incorporated in Hong Kong on 18 January 2012 and has its principal place of business at Suite 901, Three Pacific Place, 1 Queen's Road East, Hong Kong.

On 22 August 2012, the Company became a party to the stapling deed with Goodman Limited (GL) and Goodman Industrial Trust (GIT), and together the three entities and their subsidiaries are known as Goodman Group. Goodman Group is listed on the Australian Securities Exchange (ASX).

#### **Principal activities**

The principal activities of the Consolidated Entity are investment in industrial property (either directly or in partnerships with other investors) and management services provided to the partnerships (including investment management, property management and development management). The principal activities and other particulars of the subsidiaries are set out in note 19 to the consolidated financial statements.

#### Financial statements

The financial performance of the Consolidated Entity for the year ended 30 June 2023 and the Consolidated Entity's financial position at that date are set out in the consolidated financial report on pages 178 to 217.

During the financial year, the Company declared a final dividend of 5.0 cents per share amounting to \$94.2 million. This dividend will be paid on 25 August 2023. In the prior year, the Company declared a final dividend of 2.5 cents per share amounting to \$46.7 million, which was paid on 25 August 2022.

#### Share capital

Details of the movements in share capital of the Company during FY23 are set out in note 15 to the consolidated financial statements.

#### Directors

The Directors during the year and up to the date of this report were:

Stephen Paul Johns

**David Jeremy Collins** 

Kit Yi Kitty Chung (appointed on 1 July 2023)

Gregory Leith Goodman (alternate Director to Stephen Paul Johns)

Daniel Cornelius D. Peeters.

#### Directors of subsidiaries

The names of Directors who have served on the Boards of the subsidiaries of the Company during the year and up to the date of this report are set out below:

Andrew McGregor Izak ten Hove Aurelien Noel James Benge **Bart Manteleers** James Cornell Charles Crossland Jason Harris Jesse Verbist Chen Binghua Chen Zhiming John Conway Chi Wing Lin John Dakin **Christof Prange** Jorn Bruyninckx Chun Kit Fung Joseph Salvaggio Clare Gow Karl Dockx Paul Heslop Kelly Moore David Hinchey Kristoffer Harvey Dirk Mölter Lien Standaert Dominique Prince Luke Caffey **Edwin Chong** Marwan Bustani Gareth Owen Matthew Macdonald Michael Woodford Godfrey Abel Hans Ongena Michael O'Sullivan Henry Kelly Nicholas Kurtis Hugh Baggie Nick Taunt Ignacio Garcia Nigel Allsop

# **Report of the Directors**

(continued)

#### **BUSINESS REVIEW**

#### State of affairs

There were no significant changes in the Consolidated Entity's state of affairs during the year.

#### **About Goodman Group**

Goodman Group is a global industrial property specialist group whose strategy is to maximise returns by providing essential infrastructure for the digital economy by owning, developing and managing high-quality properties that are close to consumers in key cities around the world.

#### Goodman Group's integrated business model

Goodman Group's Own Develop Manage model focuses the business on its customers' current and future needs.

The Consolidated Entity owns and maintains high-quality properties close to consumers, develops sustainable properties, and manages its global investment portfolio to a high standard. The Consolidated Entity works alongside its capital partners, which include sovereign wealth, pension and large multi-manager funds.

In each market, the Consolidated Entity has dedicated local teams which take care of property asset and investment management, delivering a high level of customer service.

#### Performance review

The Consolidated Entity has operations in Asia, Continental Europe and the United Kingdom, and its earnings are derived from property investment, development and management activities.

During the year, governments across Continental Europe and in the United Kingdom have increased interest rates in response to rising inflation. This has impacted property valuations with weighted average capitalisation rates expanding from 3.4% to 4.4% in Continental Europe and 3.7% to 4.9% in the United Kingdom. As a consequence, the Consolidated Entity's share of the fair value adjustments from its Partnerships was a loss of \$160.1 million compared to gain of \$269.8 million in the prior year.

However, the scarcity of space in the Consolidated Entity's locations, and customer need for more productive and sustainable solutions has supported underlying property fundamentals. These have driven and continue to drive development demand and rental growth. Despite the global macro-economic volatility, there is almost zero vacancy in the property portfolios and the Consolidated Entity continues to execute on its development strategy.

As a consequence of the strong rental income growth and the Consolidated Entity's continued investment in its portfolios, property investment earnings have increased compared to the prior year. Management earnings have also increased as the investment in the Partnerships and the stabilisation of properties during both the current and prior year, notably in Asia, has offset the impacts on external assets under management (AUM) from the devaluations in FY23. Development earnings are lower than the prior year, but this is more a reflection of the strength of the FY22 development result, and current year earnings have again been a significant contributor to the Consolidated Entity's overall results. The quality and location of sites has underpinned development activity and project returns. In addition, the locations of the sites are often delivering value add opportunities with intensification and change of use.

In assessing the Consolidated Entity's underlying performance, the Directors consider operating profit as well as statutory profit. Operating profit is a proxy for 'cash earnings' and is not an income measure under Hong Kong Financial Reporting Standards. It is defined as profit attributable to Shareholders adjusted for property valuations, impairment losses and other non-cash adjustments or non-recurring items.

	2023 \$M	2022 \$M
Analysis of operating profit		
Property investment earnings	111.9	82.1
Management earnings	187.9	170.6
Development earnings	494.0	689.1
	793.8	941.8
Operating expenses	(193.4)	(207.9)
	600.4	733.9
Net finance expense (operating) <sup>1</sup>	(2.7)	(12.4)
Income tax expense (operating) <sup>2</sup>	(79.3)	(114.1)
Operating profit	518.4	607.4

- Net finance expense (operating) excludes derivative mark to market and unrealised foreign exchange movements.
- Income tax expense (operating) excludes the deferred tax movements relating to investment property valuations and other non-operating items, such as the Goodman Group Long Term Incentive Plan (LTIP).

#### Property investment activities

Property investment earnings in FY23 of \$111.9 million were higher than the prior year and comprised 14% of the total earnings (2022: 9%).

	2023 \$M	2022 \$M
Net property income	42.4	40.9
Partnerships	69.5	41.2
Property investment earnings	111.9	82.1

Key metrics	2023	2022
Weighted average capitalisation rate (%)	5.0	4.7
Weighted average lease expiry (years)	4.6	4.2
Occupancy (%)	96.6	97.6

Property investment earnings comprise gross property income (excluding straight lining of rental income), less property expenses, plus the Consolidated Entity's share of the results of property investment joint ventures (JV) (referred to as Partnerships). The key drivers for maintaining or growing the Consolidated Entity's property investment earnings are increasing the level of AUM (subject also to the Consolidated Entity's direct and indirect interest), maintaining or increasing occupancy and rental levels within the portfolio, and controlling operating and financing costs within Partnerships.

The Consolidated Entity's property portfolios are concentrated in large, urban locations where available space remains restricted due to significant customer demand, high barriers to entry and limited supply. Consequently, the Consolidated Entity has experienced significant market rental growth across its locations and occupancy has remained high. This is supporting strong underlying investment fundamentals and cash flows in the Consolidated Entity's portfolio.

## **Report of the Directors**

Business review (continued)

The net income from the Consolidated Entity's directly held properties increased by 4% to \$42.4 million compared to the prior year with acquisitions in Asia in both the current and prior year offsetting the lower contribution to rental income in FY23 from completed inventories, prior to their disposal.

The Consolidated Entity's share of investment earnings from its cornerstone holdings in the Partnerships increased by 69% to \$69.5 million compared to the prior year. This was due to acquisitions and the stabilisation of developments in FY22 and FY23, as the Consolidated Entity and its capital partners have continued to invest in the Partnerships, and also due to the rental income growth from existing stabilised properties.

During FY23, the Consolidated Entity's share of property valuations from the stabilised portfolios was a loss of \$1601 million. Valuation decrements primarily arose in Continental Europe and the United Kingdom due to the expansion of capitalisation rates, in response to increased interest rates. At 30 June 2023, the weighted average capitalisation rate for the Consolidated Entity's portfolios was 5.0%, compared to 4.7% at the start of FY23.

#### Management activities

External AUM (\$B)

Management earnings in FY23 of \$187.9 million increased by 10% compared to the prior year and comprised 24% of total operating earnings (2022: 18%).

	2023 \$M	2022 \$M
Management earnings	187.9	170.6
Key metrics	2023	2022
Number of Partnerships	8	8

287

278

Management earnings relate to the revenues from managing both the property portfolios and the capital invested in the Partnerships. This includes performance related revenues but excludes earnings from managing development activities in the Partnerships, which are included in development earnings. The key drivers for maintaining or growing management earnings are activity levels, asset performance, and increasing the level of AUM, which can be impacted by property valuations and asset disposals and is also dependent on liquidity including the continued availability of third party capital to fund both development activity and acquisitions across the Consolidated Entity's Partnerships.

The main driver of the increased management earnings was the acquisitions and stabilisations of properties during 2022 and 2023. This has more than offset the impact on base management fee income from property devaluations in Asia, Continental Europe and the United Kingdom.

#### **Development activities**

Development earnings in FY23 were \$494.0 million, a decrease of 28% on the prior year, but still comprised 62% of total operating earnings (2022: 73%).

	2023 \$M	2022 \$M
Net development income	485.2	645.7
Partnerships	8.8	43.4
Development earnings	494.0	689.1
Key metrics	2023	2022
Work in progress (\$B)	5.8	7.1

5.8	
0.0	7.1
32	36
14	23
	14

Development earnings consist of development income, plus the Consolidated Entity's share of the operating results of Partnerships that is allocable to development activities, plus net gains or losses from disposals of investment properties and equity investments that are allocable to development activities, plus interest income on loans to development JVs, less development expenses. Development income includes development management fees and performance related revenues associated with managing individual development projects in Partnerships. The key drivers for the Consolidated Entity's development earnings are the level of development activity, land and construction prices, property valuations and the continued availability of capital to fund development activity.

Most of the inventory disposals and fixed price contract income arose in Continental Europe, as Goodman Group's Partnerships in Continental Europe generally acquire completed developments from the Consolidated Entity. In the Consolidated Entity's other operating segments, development earnings are a mix of development management income, including performance related income, and transactional activity, including the Consolidated Entity's share of development profits reported by the Partnerships themselves.

Development activity and margins continued to be sound with work in progress of \$5.8 billion across 32 projects at 30 June 2023. The decrease in the Consolidated Entity's development earnings was volume driven, with lower activity in Continental Europe. However, this follows several years of significant acceleration in the Consolidated Entity's development activity.

#### Other items

Operating expenses increased mainly due to lower incentive-based remuneration partly offset by modest inflation pressure. The net finance expense has decreased as a result of increased interest income on the Consolidated Entity's related party loans. The increase in tax expense is primarily a function of changes to the origin and nature of revenue arising from management and development activities.

#### Statement of financial position

	2023 \$M	2022 \$M
Stabilised investment properties	451.7	336.8
Cornerstone investments in Partnerships	1,850.6	1,845.6
Development holdings	1,532.2	1,552.6
Cash	391.9	357.5
Other assets	1,076.9	1,190.8
Total assets	5,303.3	5,283.3
Loans from related parties	1,676.1	1,941.0
Other liabilities	817.8	756.2
Total liabilities	2,493.9	2,697.2
Non-controlling interests	42.6	28.2
Net assets attributable to Shareholders	2,766.8	2,557.9

The stabilised investment properties relate to acquisitions in Asia.

The carrying value of cornerstone investments in Partnerships has increased by \$5.0 million to \$1,850.6 million, principally due to the net investment in the Partnerships and the valuation uplifts. A reconciliation of the current year movement in cornerstone investments in Partnerships is detailed in note 6(f) to the consolidated financial statements.

The decrease in development holdings by \$20.4 million to \$1,532.2 million was primarily due to to the completion of development projects during the year..

Other assets included receivables, fair values of derivative financial instruments that are in an asset position, contract assets, property, plant and equipment and tax assets (including deferred tax). Other liabilities included trade and other payables, the provision for dividends to Shareholders, fair values of derivative financial instruments that are in a liability position, employee benefits and tax liabilities (including deferred tax).

#### **Cash flows**

	2023 \$M	2022 \$M
Operating cash flows	682.3	216.5
Investing cash flows	(293.0)	(234.8)
Financing cash flows	(360.7)	12.5
Net increase/(decrease) in cash held	28.6	(5.8)
Effect of exchange rate fluctuations on cash held	5.8	4.9
Cash and cash equivalents at the beginning of the year	357.5	358.4
Cash and cash equivalents at the end of the year	391.9	357.5

The increase in the net operating cash flows is primarily due to lower inventory expenditure.

The net investing cash outflow was due to the net investment in the Consolidated Entity's Partnerships, to fund acquisitions and new developments, plus the acquisitions of investment properties in Asia.

Financing cash flows principally relate to the net repayment of loans with related parties and payment of the dividend in August 2022.

## **Report of the Directors**

Business review (continued)

#### Outlook

Goodman Group has developed significant expertise and a deliberate strategy to target high barrier to entry markets, providing our customers access to facilities where they are scarce. In particular, the rapid proliferation of demand for data storage and processing capacity is supplementing demand and reducing the available supply for warehouses and logistics centres. This has positioned the Consolidated Entity well for future growth.

In the near term, market conditions are likely to be volatile and the risks associated with rising inflation, interest rates and slowing economic growth are elevated. This may impact consumers; however, they continue to seek faster and more flexible delivery, which requires ongoing intensification of warehousing in urban locations to optimise delivery and improve productivity. The business remains agile, focused on the changing consumption habits across the physical and digital space and, as a result, the evolving requirements of customers around the world.

Demand is currently exceeding supply in the Consolidated Entity's markets, supporting our development-led growth strategy. This is producing well located assets for the Consolidated Entity and its Partnerships. In addition to strategic site acquisitions, the opportunities for regeneration of existing assets support the future development activities by providing value add opportunities. This can assist in the reduction of the environmental impacts of the Consolidated Entity's business activities. The development activity, project management and depth of customer demand are supporting the positive outlook for development earnings into FY24.

The strong customer demand and the supply constraints are resulting in high levels of occupancy and strong rental growth in the portfolio, which supports investment earnings. Absent a material adverse change in market conditions, the rental growth and the development completions will also support the growth in AUM and therefore management earnings.

In addition, the Consolidated Entity continues to maintain a strong balance sheet, which combined with retained income, provides significant liquidity, stability and financial resources.

The Board believes the Consolidated Entity is positioned to deliver growth in FY24 despite the risks associated with current market volatility.

The Consolidated Entity sets financial performance targets annually and reviews them regularly. Forecasts are subject to there being no material adverse change in market conditions or the occurrence of other unforeseen events.

#### Risks

Goodman Group identifies strategic and operational risks for each of its regions as part of its strategy process. The key risks, an assessment of their likelihood of occurrence and consequences and controls that are in place to mitigate the risks are reported to the Goodman Group Board regularly.

Goodman Group has established formal systems and processes to manage the risks at each stage of its decision-making process. This is facilitated by a Goodman Group Investment Committee comprising senior executives, chaired by the Group Chief Executive Officer, which considers all major operational decisions and transactions. The Goodman Group Investment Committee meets on a weekly basis.

The Goodman Group Audit, Risk and Compliance Committee reviews and monitors a range of material risks in Goodman Group's risk management systems including, among other risks, market risks, operational risks, financial risk management, sustainability, regulation and compliance, tax policies and information technology.

The key risks faced by Goodman Group and the controls that have been established to manage those risks are set out in the following table:

	Risk area	Mitigation
Capital management (debt, equity and cash flow)	Goodman Group could suffer an inability to deliver its strategy, or an acute liquidity or solvency crisis, financial loss or financial distress as a result of a failure in the design or execution of its capital management and financing strategy.	<ul> <li>+ Monthly preparation of a consolidated Capital Management Plan, which is reported to the Goodman Group Investment Committee and the Finance and Treasury management committee</li> <li>+ Financial reporting to the Goodman Group Board</li> <li>+ Weekly cashflow monitoring and reporting</li> <li>+ Goodman Group Board approved Financial Risk Management (FRM) policy</li> <li>+ Capital partnering transfers risks into Partnerships</li> <li>+ Low gearing, ample liquidity and appropriate hedging and duration to absorb market shocks</li> <li>+ Diversity and tenure of debt funding sources and cash on deposit</li> <li>+ Appropriate hedging quantities and duration in accordance with FRM policy</li> <li>+ Distribution pay-out ratio consistent with contribution of development earnings</li> <li>+ Long lease terms with prime customers</li> <li>+ Strong assets that can generate better rental outcomes and growth</li> <li>+ Key urban market strategy – urban, infill locations support re-usability of property</li> <li>+ Insurance program (both Goodman Group's and key counterparties) including project specific insurance.</li> </ul>
Economic and geopolitical environment	Global economic conditions and government policies present both risks and opportunities in the property and financial markets and the business of our customers, which can impact the delivery of Goodman Group's strategy and its financial performance.  A continued increase in geopolitical tension between countries could have potential consequences on our people, operations and capital partners.  In the near term, market conditions are likely to be volatile and the risks associated with rising inflation, interest rates and slowing economic activity are elevated.	<ul> <li>+ Annual budget</li> <li>+ Regular independent property valuations</li> <li>+ Asset planning program</li> <li>+ Prudent capital management with low gearing and significant available liquidity to allow for potential market shocks</li> </ul>
Governance, regulation and compliance	Non-compliance with legislation, regulators, or internal policies, or to understand and respond to changes in the political and regulatory environment (including taxation) could result in legal action, financial consequences and damage our standing and reputation with stakeholders.	<ul> <li>Independent governance structures</li> <li>Core values and attitudes, with an embedded compliance culture focused on best practice</li> <li>Dedicated Goodman Group Head of Risk and Compliance Officer</li> <li>Review of transactions by the Goodman Group Investment Committee</li> <li>Annual compliance plan audits</li> <li>Partnership investment committees independent of the manager</li> <li>Global tax risk management framework</li> <li>Regional and Goodman Group Executive declarations and sign-offs</li> <li>Verification process and sign-off of public documents</li> <li>Comprehensive insurance program, covering property, liability, Directors and Officers and Professional Indemnity</li> <li>Continuous disclosure regime – regular group management meetings.</li> </ul>
People and culture	Failure to recruit, develop, support, and retain staff with the right skills and experience may result in significant underperformance or impact the effectiveness of operations and decision making, in turn impacting business performance.	+ Competitive remuneration structures, in particular performance rights under the LTIP, with ALL staff having ownership + Succession planning for senior executives and key roles + Performance management and staff review + Overall performance review ratings to assess culture and engagement + Learning and development program to enhance skills sets + Goodman Values program + Staff engagement through team strategy days, town halls and the (good) life program.

# Report of the Directors Business review (continued)

	Risk area	Mitigation
Development	Development risks may arise from location, site complexity, planning and permitting, infrastructure, size, duration along with general contractor capability.	<ul> <li>Review and approval of development projects by the Goodman Group Investment Committee and relevant Partnership Investment Committee</li> <li>Targeted returns are higher for the size and complexity of the project</li> <li>Engaging general contractors that are better capitalised</li> <li>Senior oversight and responsibility by Executive Directors</li> <li>Capital partnering transfers risks into partnerships</li> <li>Specialised staff who understand the development process, including development staff by region</li> <li>Goodman Group defined design specifications, which cover environmental, technological, and safety requirements, protecting against short term obsolescence</li> <li>Fixed price, design and construct contracts with appropriately capitalised contractors</li> <li>Redevelopment of older assets to intensify use</li> <li>Insurance program (both Goodman Group's and key contractors), including project specific insurance</li> <li>Spread and diversification of projects</li> <li>Ongoing monitoring and reporting of WIP and levels of speculative development, with Board oversight including limits with respect to speculative development and higher development risk provisions</li> <li>Implementation of Goodman Group policies and procedures (e.g. reporting, Safety framework and delegation of authority)</li> <li>Leasing prior to reaching development completion.</li> </ul>
Disruption, changes in demand and obsolescence	The longer-term risk that an inability to understand and respond effectively to changes in our competitive landscape and customer value chain could result in business model disruption and asset obsolescence, including the perception of obsolescence in the short term.	<ul> <li>Key urban market strategy – urban, infill locations support re-usability of property</li> <li>Adaptable and reusable building design – ease to reconfigure for another customer</li> <li>Geographic diversification – capital allocation across regions and location of properties</li> <li>Capital partnering transfers risks into Partnerships</li> <li>Insurance program (both Goodman Group's and key contractors), including project specific insurance covering design and defects</li> <li>Long lease terms with prime customers</li> <li>Innovation and technology strategy – visibility and insight into technology trends along with direct investment into technology start-ups</li> <li>Competition analysis and behaviour.</li> </ul>
Environmental sustainability and climate change	Failure to deliver on Goodman Group's sustainability leadership strategy and ambitions may lead to a negative impact on Goodman Group's reputation, ability to raise capital and a disruption to operations and stranded assets.	<ul> <li>+ Corporate Responsibility and Sustainability policy</li> <li>+ 2030 Sustainability Strategy and reporting against those targets</li> <li>+ Assessment of individual assets to improve resilience and implementation of sustainability initiatives.</li> <li>+ Sustainability guidelines for development projects including embodied carbon measurement and offset</li> <li>+ Review and approval of acquisitions and development projects by the Goodman Group Investment Committee and relevant Partnership Investment Committee, including consideration of climate risks in the due diligence process and minimum property specifications</li> <li>+ Adoption of the Task Force on Climate-Related Financial Disclosures recommendations as a framework for the assessment, management and disclosure of climate risks</li> <li>+ Investor, customer and regulatory requirements</li> <li>+ Verification process and sign-off of public sustainability documents</li> <li>+ Adherence to Goodman Group Procurement Policy for selection and purchase of Carbon Credits</li> <li>+ LTIP performance directly linked to meeting Goodman Group's sustainability initiatives.</li> </ul>

	Risk area	Mitigation
Asset and portfolio	Inability to execute asset planning and management strategies, including leasing risk exposures, can reduce returns from Goodman Group's portfolios.	<ul> <li>+ Key urban market strategy - urban, infill locations where customer demand is strongest</li> <li>+ In-house property management team</li> <li>+ Diversification of customer base and lease expiries</li> <li>+ Review and approval of significant leasing transactions and development</li> <li>projects by the Goodman Group Investment Committee and relevant Partnership</li> <li>Investment Committee</li> <li>+ Capital expenditure programs keeping pace with property lifecycle</li> <li>+ Implementation of Goodman Group policies and procedures (e.g. reporting, Safety framework, sustainability measures and minimum design specifications)</li> <li>+ Insurance program including Public Liability, including property risk assessment reports</li> <li>+ Customer risk assessments</li> <li>+ Asset plans - in particular categorisation of assets, maintenance program, customer engagement</li> <li>+ Portfolio strategy - locations, type of building.</li> </ul>
Concentration of counterparties and markets	Over-exposure to specific areas, such as capital partners, supply chain, customers and markets, may limit growth and sustainability opportunities.	<ul> <li>+ Standardised governance structures around Partnerships, which includes: <ul> <li>Relationship deeds articulating service arrangements</li> <li>Pre-emptive rights</li> </ul> </li> <li>+ Independent governance structure</li> <li>+ Diversification of capital partners and fund expiries, including local investors. <ul> <li>Analysis of alternate capital sources</li> </ul> </li> <li>+ Goodman Group's cornerstone investment in each Partnership and the underlying strength of the Manager</li> <li>+ Appropriate Management contracts across all Partnerships</li> <li>+ Contractor pre-selection and tendering</li> <li>+ Diversification of customer base and lease expiry</li> <li>+ Investment metrics established for Goodman Group and Partnerships, setting limits including: <ul> <li>Speculative development</li> <li>Geographic and customer exposure</li> </ul> </li> <li>+ FRM policy establishing criteria for financial institution counterparties.</li> </ul>
Information and data security	Maintaining security (including cyber security) of Information Technology (IT) environment and data, ensuring continuity of IT infrastructure and applications to support sustainability and growth and prevent operational, regulatory, financial and reputational impacts.	+ Strategic roadmap for delivery of secured IT systems, benchmarked against the Australian Signal Directorate's Essential maturity model and United States National Institute of Standards and Technology Cyber Security framework  + Proactive monitoring, review and testing of infrastructure and system behaviour  + Incident response, disaster recovery and business continuity planning  + Penetration testing, vulnerability scanning and network review to identify and remediate  + IT Dashboard Reporting to the Audit, Risk & Compliance Committee  + Phishing awareness program implemented to educate and test employees' awareness and vigilance in avoiding threats  + Cyber security awareness/training  + Decommissioning legacy systems  + Transition from employee password reliance  + Speed of threat/vulnerability detection  + Data system back-up/restore testing  + Phishing simulation testing/reporting  + Reporting and compliance with Essential Eight, baseline strategies  to mitigate cyber security incidents, developed by the Australian Cyber Security Centre.

### **Report of the Directors**

(continued)

#### **Environmental regulations**

The Consolidated Entity has policies and procedures to identify and appropriately address environmental obligations that might arise in respect of the Consolidated Entity's operations that are subject to significant environmental regulation under the laws of the countries the Consolidated Entity operates in. The Directors have determined that the Consolidated Entity has complied with those obligations during the financial year and that there has not been any material breach.

#### Disclosure in respect of any indemnification of Directors

A permitted indemnity provision (as defined in section 469 of the Hong Kong Companies Ordinance) for the benefit of the Directors of the Company is currently in force and was in force throughout this year.

#### Directors' interests in contracts

No contract of significance in relation to the Consolidated Entity's business to which the Company, its subsidiaries or any of its fellow subsidiaries was a party and in which the Directors of the Company had a material interest, whether directly or indirectly, subsisted at the end of the year or at any time during the year.

#### Directors' interests in shares

At the end of the year, the Directors (including alternate Directors) held the following interests in the stapled securities of Goodman Group, which are listed on the ASX:

Directors	Directly held securities	Indirectly held securities	Total
Stephen Paul Johns	-	41,143	41,143
David Jeremy Collins	5,000	5,000	10,000
Gregory Leith Goodman	-	38,667,487	38,667,487
Daniel Cornelius Peeters	_	1,678,465	1,678,465

In addition, Gregory Goodman and Daniel Peeters participate in the LTIP under which they hold performance rights. Performance rights entitle participants to receive Goodman Group stapled securities without the payment of consideration, subject to Goodman Group satisfying performance criteria and the participants remaining employees of Goodman Group.

Details of the awards of performance rights under the LTIP granted as compensation to the Directors (including alternate Directors) at 30 June 2023 are as follows:

	Number of performance rights at the start of the year	Number of performance rights granted during the year	Number of performance rights vested during the year	Number of performance rights forfeited during the year	Number of performance rights at the end of the year	Date performance rights granted	Financial years in which grant vests
Gregory Leith Goodman	-	1,000,000	-	-	1,000,000	17 Nov 2022	2027 - 2033
	1,560,000	_	-	-	1,560,000	18 Nov 2021	2026 - 2032
	950,000	-	-	-	950,000	19 Nov 2020	2024 - 2026
	900,000	_	(288,000)	(36,000)	576,000	20 Nov 2019	2023 - 2025
	1,066,667	_	(533,333)	-	533,334	15 Nov 2018	2023 - 2024
	533,334	_	(533,334)	-	_	16 Nov 2017	2023
Daniel Cornelius Peeters	_	500,000	-	-	500,000	17 Nov 2022	2027 - 2033
	625,000	-	-	-	625,000	18 Nov 2021	2026 - 2032
	380,000	-	-	-	380,000	19 Nov 2020	2024 - 2026
	350,000	-	(112,001)	(13,998)	224,001	20 Nov 2019	2023 - 2025
	366,667	-	(183,333)	-	183,334	15 Nov 2018	2023 - 2024
	183,334	_	(183,334)	-	_	16 Nov 2017	2023

Apart from the above, at no time during the year was the Company, its subsidiaries or any of its fellow subsidiaries a party to any arrangement to enable the Directors of the Company to acquire benefits by means of the acquisition of shares in or debentures of the Company or any other related body corporate.

#### **Auditors**

KPMG retire and, being eligible, offer themselves for re-appointment. A resolution for the re-appointment of KPMG as auditors of the Company is to be proposed at the forthcoming Annual General Meeting.

#### Subsequent events

There has not arisen in the interval between the end of the financial year and the date of this report any item, transaction or event of a material and unusual nature likely, in the opinion of the Directors, to affect significantly the operations of the Consolidated Entity, the results of those operations, or the state of affairs of the Consolidated Entity, in future financial years.

# Declaration by the Group Chief Executive Officer and Chief Financial Officer

The Directors have been given declarations equivalent to those required of listed Australian companies by section 295A of the *Corporations Act 2001* from the Group Chief Executive Officer and Group Chief Financial Officer for the year ended 30 June 2023.

By order of the Board of Directors

Stephen Paul Johns

Independent Chairman

**David Jeremy Collins** 

Director

Sydney, 17 August 2023

### Independent Auditor's Report

To the members of Goodman Logistics (HK) Limited (Incorporated in Hong Kong with limited liability)

#### **Opinion**

We have audited the consolidated financial statements of Goodman Logistics (HK) Limited (the Company) and its subsidiaries (the Group) set out on pages 178 to 217, which comprise the consolidated statement of financial position as at 30 June 2023, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated cash flow statement for the year then ended and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 30 June 2023 and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards (HKFRSs) issued by the Hong Kong Institute of Certified Public Accountants (HKICPA) and have been properly prepared in compliance with the Hong Kong Companies Ordinance.

#### **Basis for opinion**

We conducted our audit in accordance with Hong Kong Standards on Auditing (HKSAs) issued by the HKICPA. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report. We are independent of the Group in accordance with the HKICPA's *Code of Ethics for Professional Accountants* (the Code) and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

# Information other than the consolidated financial statements and auditor's report thereon

The Directors are responsible for the other information which comprises all the information included in the Company's Report of the Directors.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Responsibilities of the Directors for the consolidated financial statements

The Directors are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with HKFRSs issued by the HKICPA and the Hong Kong Companies Ordinance and for such internal control as the Directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

# Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. This report is made solely to you, as a body, in accordance with section 405 of the Hong Kong Companies Ordinance, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Holdentify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- + Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.

## **Independent Auditor's Report (continued)**

To the members of Goodman Logistics (HK) Limited (Incorporated in Hong Kong with limited liability)

- + Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- + Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- + Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Cash and cash equivalents at the end of the year	16(a)	391.9	357.5

The notes on pages 182 to 217 form part of these consolidated financial statements.

(expressed in Australian dollars)

#### BASIS OF PREPARATION

#### Statement of compliance

These financial statements have been prepared in accordance with all applicable Hong Kong Financial Reporting Standards (HKFRSs), which collective term includes all applicable individual Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards and Interpretations issued by the Hong Kong Institute of Certified Public Accountants (HKICPA) and accounting principles generally accepted in Hong Kong. These financial statements also comply with the applicable requirements of the Hong Kong Companies Ordinance.

#### Basis of preparation of the consolidated financial statements

The measurement basis used in the preparation of the consolidated financial statements is the historical cost basis except for investment properties, derivative financial instruments, investment in unlisted securities and liabilities for cash settled share based payment arrangements which are stated at fair value.

#### Accounting for acquisitions of non-controlling interests

Acquisitions of non-controlling interests are accounted for as transactions with equity holders in their capacity as equity holders and therefore no gain or loss and no goodwill is recognised as a result of such transactions.

#### Foreign currency translation

#### Functional and presentation currency

Items included in the consolidated financial statements of each of the Company's subsidiaries are measured using the currency of the primary economic environment in which the entity operates (functional currency). The consolidated financial statements are presented in Australian dollars, which is the Company's functional and presentation currency.

#### Transactions

Foreign currency transactions are translated to each entity's functional currency at rates approximating the foreign exchange rates ruling at the dates of the transactions. Amounts receivable and payable in foreign currencies at the reporting date are translated at the rates of exchange ruling on that date. Resulting exchange differences are recognised in profit or loss.

Non-monetary assets and liabilities that are measured in terms of historical cost are translated at rates of exchange applicable at the date of the initial transaction. Non-monetary items which are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

#### Translation of controlled foreign operations

The assets and liabilities of controlled foreign operations are translated into Australian dollars at foreign exchange rates applicable at the reporting date.

Revenue and expenses are translated at weighted average rates for the financial year. Exchange differences arising on translation are taken directly to the foreign currency translation reserve until the disposal or partial disposal of the operations.

Exchange differences arising on monetary items that form part of the net investment in a controlled foreign operation are recognised in the foreign currency translation reserve on consolidation.

#### Exchange rates used

The following exchange rates are the main exchange rates used in translating foreign currency transactions, balances and financial statements to Australian dollars.

Australian dollar	Weighte	d average	As at 30 June		
(AUD) to	2023	2022	2023	2022	
Hong Kong dollar (HKD)	5.2751	5.6626	5.2235	5.4241	
Chinese yuan (CNY)	4.6804	4.6840	4.8339	4.6154	
Japanese yen (JPY)	92.3936	85.1512	96.1530	93.7770	
Euros (EUR)	0.6433	0.6442	0.6109	0.6594	
British pounds sterling (GBP)	0.5592	0.5456	0.5249	0.5676	
United States dollar (USD)	0.6731	0.7255	0.6664	0.6912	

#### Changes in accounting policies

The Consolidated Entity has adopted International Tax Reform – Pillar Two Model Rules – Amendments to HKAS 12 upon their release in July 2023. The amendments provide a temporary mandatory exception from deferred tax accounting for the top-up tax, which is effective immediately and require new disclosures about the Pillar Two exposure from 30 June 2024. The mandatory exception applies retrospectively. However, because no new legislation to implement the top-up tax was enacted or substantively enacted at 30 June 2023 in any jurisdiction in which the Consolidated Entity operates and no related deferred taxes were recognised at that date, the retrospective application has no impact on the Consolidated Entity's financial statements at 30 June 2023.

The HKICPA has also issued other amendments to standards that were first effective from 1 July 2022 but none of these had a material impact on the Consolidated Entity's financial statements.

#### Accounting standards issued but not yet effective

The Consolidated Entity has not applied any new standard or interpretation that is not yet effective for the current accounting period. None of the new accounting standards or interpretations is expected to have a significant impact on the future results of the Consolidated Entity.

# Critical accounting estimates used in the preparation of the consolidated financial statements

The preparation of consolidated financial statements requires estimates and assumptions concerning the application of accounting policies and the future to be made by the Consolidated Entity. Estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year can be found in the following notes:

- + Note 5 Property assets
- + Note 13 Financial risk management.

The accounting impacts of revisions to estimates are recognised in the period in which the estimate is revised and in any future periods affected.

#### Measurement of fair values

A number of the Consolidated Entity's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When measuring the fair value of an asset or a liability, the Consolidated Entity uses market observable data as far as possible. Fair values are categorised into different levels in a fair value hierarchy and have been defined as follows:

- + Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- + Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Further information about the assumptions made in measuring fair values is included in the following notes:

- + Note 5 Property assets
- + Note 13 Financial risk management.

#### RESULTS FOR THE YEAR

#### 1 Profit before interest and income tax

#### Gross property income

Gross property income comprises rental income under operating leases (net of incentives provided) and amounts billed to customers for outgoings (e.g. rates, levies, cleaning, security, etc). Amounts billed to customers for outgoings are a cost recovery for the Consolidated Entity and are recognised once the expense has been incurred. The expense is included in property expenses.

Rental income under operating leases is recognised on a straight-line basis over the term of the lease contract. Where operating lease rental income is recognised relating to fixed increases in rentals in future years, an asset is recognised. This asset is a component of the relevant investment property carrying amount. The cost of lease incentives provided to customers is amortised on a straight-line basis over the life of the lease as a reduction of gross property income.

#### Management and development income

The revenue from management and development activities is measured based on the consideration specified in a contract with a customer.

The Consolidated Entity recognises revenue when it transfers control over a product or service to a customer.

#### Management income

Fee income derived from management services relates to investment management base fees and property services fees and is recognised and invoiced progressively as the services are provided. Customers make payments usually either monthly or quarterly in arrears.

Performance related management income generally relates to portfolio performance fee income, which is recognised progressively as the services are provided but only when the income can be reliably measured and is highly probable of not being reversed. These portfolio performance fees are typically dependent on the overall returns of a Partnership relative to an agreed benchmark return, assessed over the life of the Partnership, which can vary from one year to seven years. The returns are impacted by operational factors such as the quality and location of the portfolio, active property management, rental income rates and development activity but can also be significantly affected by changes in global and local economic conditions. Accordingly, portfolio performance fee revenue is only recognised towards the end of the relevant assessment period, as prior to this revenue recognition is not considered to be sufficiently certain.

Results for the year (continued)

1 Profit before interest and income tax (continued)

In determining the amount of revenue that can be reliably measured, management prepares a sensitivity analysis to understand the impact of changes in asset valuations on the potential performance fee at the assessment date. The assessment of revenue will depend on the prevailing market conditions at the reporting date relative to long-term averages and also the length of time until the assessment date e.g. the longer the time period to assessment date, the greater the impact of the sensitivity analysis. The potential portfolio performance fee revenue is then recognised based on the length of time from the start of the assessment period to the reporting date as a proportion of the total assessment period. Where the income is attributable to development activities or it relates to a combination of inextricable management and development activities that have occurred over the performance fee period, then it is reported as development income, otherwise the income is reported as management income. The Partnerships make payments in respect of portfolio performances fees at the end of the performance periods, when the attainment of the conditions has been verified and the amount of the fee has been agreed by all parties.

#### Development income - disposal of inventories

The disposal of inventories is recognised at the point in time when control over the property asset is transferred to the customer. This will generally occur on transfer of legal title and payment in full by the customer. The gain or loss on disposal of inventories is calculated as the difference between the carrying amount of the asset at the time of disposal and the proceeds on disposal (less transaction costs) and is included in profit or loss in the period of disposal.

#### Development income - development management services

Fee income from development management services (including masterplanning, development management and overall project management) is recognised progressively as the services are provided in proportion to the stage of completion by reference to costs. Payments are received in accordance with the achievement of agreed milestones over the development period. The development period can exceed 24 months for larger and more complex developments.

Performance related development income includes income associated with the returns from individual developments under the Consolidated Entity's management and performance fee income that relates to development activity. Income in respect of individual developments is recognised by the Consolidated Entity on attainment of the performance related conditions, which is when the income can be reliably measured and is highly probable of not being reversed. These amounts are paid by the Partnership when the amounts have been measured and agreed. Income associated with development activities as part of a portfolio assessment is recognised on the same basis as outlined above in the management income section.

#### Development income - fixed price development contracts

Certain development activities are assessed as being fixed price development contracts. This occurs when a signed contract exists, either prior to the commencement of or during the development phase, to acquire a development asset from the Consolidated Entity on completion. Revenue and expenses relating to these development contracts are recognised in profit or loss in proportion to the stage of completion of the relevant contracts by reference to costs. The payments by the purchaser usually occur on completion of the development once legal title has been transferred but payments may be made during the development period on achievement of agreed milestones. The development period can exceed 24 months for larger and more complex developments.

#### Net gain on disposal of investment properties

The disposal of an investment property is recognised at the point in time when control over the property has been transferred to the purchaser.

#### **Employee benefits**

#### Wages, salaries and annual leave

Wages and salaries, including non-monetary benefits, and annual leave represent present obligations resulting from employees' services provided to the reporting date. These are calculated at undiscounted amounts based on rates that are expected to be paid as at the reporting date including related on-costs, such as workers' compensation insurance and payroll tax.

#### **Bonuses**

A liability is recognised in other payables and accruals for bonuses where there is a contractual obligation or where there is a past practice that has created a constructive obligation. Liabilities for bonuses that are expected to be settled within 12 months are measured at the amounts expected to be paid, including related on-costs, when they are settled.

### Superannuation

#### Defined contribution retirement plans

Obligations for contributions to defined contribution retirement plans are recognised as an expense as incurred.

## Defined benefit retirement schemes

The net obligation in respect of defined benefit retirement schemes is recognised in the statement of financial position and is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets. The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses and the return on plan assets (excluding interest), are recognised immediately in other comprehensive income. Net interest expense and other expenses related to defined benefit retirement schemes are recognised in profit or loss.

Profit before interest and income tax has been arrived at after crediting/(charging) the following items:

	2023 \$M	2022 \$M
Management services	189.2	162.7
Performance related income	0.3	31.0
Management income	189.5	193.7
Income from disposal of inventories	530.7	747.4
Income from fixed price development contracts	215.6	114.6
Other development income, including development management <sup>1</sup>	164.6	169.6
Net gain on disposal of special purpose development entities, including JVs	23.8	43.4
Development income	934.7	1,075.0
Inventory cost of sales	(296.0)	(354.9)
Other development expenses	(158.4)	(78.6)
Development expenses	(454.4)	(433.5)
Included in employee expenses are the following items:		
Salaries, wages and other benefits	(151.4)	(169.1)
Contributions to defined contribution retirement plans	(0.9)	(1.4)
Employee expenses	(152.3)	(170.5)
Depreciation of plant and equipment	(8.5)	(8.7)
Auditor's remuneration	(1.9)	(1.5)

<sup>1.</sup> Fee revenues from single contractual arrangements involving a combination of inextricable investment management and development management services and recognised over the life of the underlying developments projects are classified as development income for statutory reporting purposes. During the year, \$41.7 million (2022: \$77.0 million) of such income was recognised.

## 2 Segment reporting

An operating segment is a component of the Consolidated Entity that engages in business activities from which it may earn revenues and incur expenses. The Consolidated Entity reports the results and financial position of its operating segments based on the internal reports regularly reviewed by the Group Chief Executive Officer in order to assess each segment's performance and to allocate resources to them.

Operating segment information is reported on a geographic basis and the Consolidated Entity has determined that its operating segments are Asia (Greater China (including the Hong Kong SAR) and Japan), Continental Europe (with the majority of assets located in Germany, France, Spain and the Netherlands) and the United Kingdom.

The activities and services undertaken by the operating segments include:

- + Property investment, both through direct ownership and cornerstone investments in Partnerships
- + Management activities, both investment and property management
- + Development activities, including development of directly owned assets (predominantly disclosed as inventories) and management of development activities for the Consolidated Entity's Partnerships.

The segment results that are reported to the Group Chief Executive Officer are based on profit before net finance expense and income tax expense, and also exclude non-cash items such as fair value adjustments and impairments, corporate expenses and share based remuneration. The assets allocated to each operating segment relate to the properties, which also include the investments in Partnerships, and the trade and other receivables associated with the operating activities, but exclude receivables from GL, GIT and their controlled entities, income tax receivables and corporate assets. The liabilities allocated to each operating segment primarily relate to trade and other payables associated with the operating activities, but exclude payables to GL, GIT and their controlled entities, provision for dividends to Shareholders, income tax payables and corporate liabilities.

The accounting policies used to report segment information are the same as those used to prepare the consolidated financial statements for the Consolidated Entity.

For the purpose of operating segment reporting, there are no material intersegment revenues and costs.

Information regarding the operations of each reportable segment is included on the following pages.

Results for the year (continued) 2 Segment reporting (continued)

Results for the year (continued)

#### 3 Taxation

Income tax for the period comprises current tax and movements in deferred tax assets and liabilities. Current tax and movements in deferred tax assets and liabilities are recognised in profit or loss except to the extent that they relate to items recognised in other comprehensive income or directly in equity, in which case the relevant amounts of tax are recognised in other comprehensive income or directly in equity respectively.

Current tax is the expected tax payable on the taxable income for the period, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax assets and liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Deferred tax assets also arise from unused tax losses and unused tax credits. Apart from differences which arise on initial recognition of assets and liabilities, all deferred tax liabilities and all deferred tax assets, to the extent that it is probable that future taxable profits will be available against which the asset can be utilised, are recognised.

The amount of deferred tax recognised is measured based on the expected manner of realisation or settlement of the carrying amount of the assets and liabilities, using tax rates enacted or substantively enacted at the reporting date. Deferred tax assets and liabilities are not discounted.

#### (a) Taxation in the consolidated statement of comprehensive income

	2023 \$M	2022 \$М
Current tax expense - Hong Kong profits tax	•	· ·
Current year	(13.2)	(14.2)
Changes in estimates related to prior years	2.3	1.9
	(10.9)	(12.3)
Current tax expense - overseas		
Current year	(57.0)	(59.8)
Changes in estimates related to prior years	(3.1)	0.4
	(60.1)	(59.4)
Deferred tax benefit/(expense)		
Origination and reversal of temporary differences	44.1	(42.4)
	44.1	(42.4)
Total income tax expense	(26.9)	(114.1)

The provision for Hong Kong profits tax for the year ended 30 June 2023 is calculated at 16.5% (2022: 16.5%) of the estimated assessable profits for the year. Taxation for overseas subsidiaries is charged at the appropriate current rates of taxation ruling in the relevant countries.

## (b) Reconciliation between accounting profit and income tax expense at applicable tax rates

	2023 \$М	2022 \$M
Profit before income tax	227.1	876.9
Notional tax on profit before income tax, calculated at the rates applicable to profits in the countries concerned	(70.5)	(206.4)
(Increase)/decrease in income tax due to:		
- Current year losses for which no deferred tax asset was recognised	(13.7)	(11.4)
- Non-assessable income	60.9	123.5
- Non-deductible expense	(27.4)	(45.4)
- Utilisation of previously unrecognised tax losses	24.6	23.3
- Changes in estimates related to prior years	(0.8)	2.3
Income tax expense	(26.9)	(114.1)

#### (c) Current tax receivables/payables

	2023 \$M	2022 \$M
Net income tax payable at the beginning of the year	(31.9)	(44.7)
Decrease/(increase) in current net tax payable due to:		
- Net income taxes paid	68.8	87.7
- Net income tax expense on current year's profit	(70.2)	(74.0)
- Changes in estimates related to prior years	(O.8)	2.3
- Other	(17.7)	(3.2)
Net income tax payable at the end of the year	(51.8)	(31.9)
Current tax receivables	0.3	0.6
Current tax payables	(52.1)	(32.5)
	(51.8)	(31.9)

#### (d) Deferred tax assets and liabilities

Deferred tax assets of \$20.2 million (2022: \$18.8 million) arising from performance rights awarded under the LTIP and deferred tax liabilities of \$9.5 million (2022: \$50.5 million) arising from investment properties were recognised in the consolidated statement of financial position.

Movements in deferred taxes recognised in expenses and equity are attributable to the following:

	2023 \$M	2022 \$M
Deferred tax benefit/(expense) recognised in expenses		
Investment properties - fair value adjustments	50.9	(54.6)
LTIP	1.5	7.8
Other items	(8.3)	4.4
Total deferred tax benefit/(expense) recognised in expenses	44.1	(42.4)
Deferred tax benefit/(expense) recognised in equity		
LTIP	(1.1)	(4.2)
Total deferred tax expense recognised in equity	(1.1)	(4.2)
Total deferred tax movements recognised in expenses and equity	43.0	(46.6)

Deferred tax assets of \$205.2 million (2022: \$190.0 million) arising primarily from tax losses have not been recognised by the Consolidated Entity.

## 4 Profit attributable to equity shareholders of the Company

The consolidated profit attributable to equity shareholders of the Company includes a profit of \$603.8 million (2022: \$265.3 million) which has been dealt with in the financial statements of the Company.

#### OPERATING ASSETS AND LIABILITIES

## 5 Property assets

#### (a) Types of property assets

Investment in property assets includes both inventories and investment properties (including those under development), which may be held either directly or through investments in Partnerships.

#### Inventories

Inventories relate to land and property developments that are held for sale or development and sale in the normal course of business. Inventories are carried at the lower of cost or net realisable value. The calculation of net realisable value requires estimates and assumptions which are regularly evaluated and are based on historical experience and expectations of future events that are believed to be reasonable under the circumstances.

Inventories are classified as non-current assets unless they are contracted to be sold within 12 months of the end of the reporting period, in which case they are classified as current assets.

#### Investment properties

Investment properties comprise investment interests in land and buildings held for the purpose of leasing to produce rental income and/or for capital appreciation. Investment properties are carried at fair value. The calculation of fair value requires estimates and assumptions which are continually evaluated and are based on historical experience and expectations of future events that are believed to be reasonable under the circumstances. Investment properties are not depreciated as they are subject to continual maintenance and regularly revalued on the basis described below. Changes in the fair value of investment properties are recognised directly in profit or loss.

## Components of investment properties

Land and buildings (including integral plant and equipment) comprising investment properties are regarded as composite assets and are disclosed as such in the consolidated financial statements.

Investment property carrying values include the costs of acquiring the assets and subsequent costs of development, including costs of all labour and materials used in construction, costs of managing the projects, holding costs and borrowing costs incurred during the development periods.

Amounts provided to customers as lease incentives and assets relating to fixed rental income increases in operating lease contracts are included within investment property values. Lease incentives are amortised over the term of the lease on a straight-line basis. Direct expenditure associated with leasing a property is also capitalised within investment property values and amortised over the term of the lease.

#### Classification of investment properties

Investment properties are classified as either properties under development or stabilised properties. Investment properties under development include land, new investment properties in the course of construction and investment properties that are being redeveloped. Stabilised investment properties are all investment properties not classified as being under development and would be completed properties that are leased or are available for lease to customers.

For investment properties under development, the carrying values are reviewed by management at each reporting date to consider whether they reflect their fair values and at completion external valuations are obtained to determine the fair values.

For stabilised investment properties, independent valuations are obtained at least every two years to determine the fair values. At each reporting date between obtaining independent valuations, the carrying values are reviewed by management to ensure they reflect the fair values.

#### Deposits for investment properties

Deposits and other costs associated with acquiring investment properties that are incurred prior to obtaining legal title are recorded at cost and disclosed as other assets in the consolidated statement of financial position.

#### (b) Summary of the Consolidated Entity's investment in property assets

	Note	2023 \$M	2022 \$M
Inventories		i	
Current	5(d)	121.6	175.2
Non-current	5(d)	1,410.6	1,377.4
		1,532.2	1,552.6
Investment properties			
Stabilised investment properties	5(e)	451.7	336.8
		451.8	336.8
Property held by Partnerships			
Investments accounted for using the equity method	5(f)	1,850.6	1,845.6
		1,850.6	1,845.6

#### (c) Estimates and assumptions in determining property carrying values

#### Inventories

For both inventories held directly and inventories held in Partnerships, external valuations are not performed but instead valuations are determined using the feasibility studies supporting the land and property developments. The end values of the developments in the feasibility studies are based on assumptions such as capitalisation rates, letting up periods, rental income and incentives that are consistent with those observed in the relevant market. If the feasibility study calculations indicate that the forecast cost of a completed development will exceed the net realisable value, then the inventories are impaired.

#### Investment properties

#### Stabilised investment properties

The fair value of stabilised investment properties is based on current prices in an active market for similar properties in the same location and condition and subject to similar lease and other contracts. The current price is the estimated amount for which a property could be exchanged between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgably, prudently and without compulsion.

#### Approach to determination of fair value

The approach to determination of fair value of investment properties is applied to both investment properties held directly and investment properties held in Partnerships.

Valuations are determined based on assessments and estimates of uncertain future events, including upturns and downturns in property markets and availability of similar properties, vacancy rates, market rents and capitalisation and discount rates. Recent and relevant sales evidence and other market data are taken into account. Valuations are either based on an external, independent valuation or on an internal valuation.

External valuations are undertaken only where market segments were observed to be active. In making the determination of whether a market segment is active, the following characteristics are considered:

- + Function of the asset (distribution/warehouse or suburban office)
- + Location of the asset (city, suburb or regional area)
- + Carrying value of the asset (categorised by likely appeal to private (including syndicates), national and/or institutional investors)
- + Categorisation as primary or secondary based on a combination of location, weighted average lease expiry, quality of tenant covenant (internal assessment based on available market evidence) and age of construction.

Each property asset is assessed and grouped with assets in the same or similar market segments. Information on all relevant recent sales is also analysed using the same criteria to provide a comparative set. The number of sales and the circumstances of each sale are assessed to determine whether a market segment is active or inactive.

Where a market segment is observed to be active, then external independent valuations are instructed for stabilised investment properties where there has been a combination of factors that are likely to have resulted in a material movement in valuation. The considerations include a greater than 10% movement in market rents, more than a 25 basis point movement in capitalisation rates, a material change in tenancy profile (including changes in the creditworthiness of a significant customer that may have a material impact on the property valuation), significant capital expenditure, a change in use (or zoning), a development has reached completion/stabilisation of the asset or it has been two years since the previous external independent valuation. For all other stabilised investment properties in an active market segment, an internal valuation is performed based on observable capitalisation rates and referenced to independent market data.

Operating assets and liabilities (continued)

5 Property assets (continued)

Where a market segment is observed to be inactive, then no external independent valuations are performed and internal valuations are undertaken based on discounted cash flow (DCF) calculations. The DCF calculations are prepared over a 10-year period. The key inputs considered for each individual calculation are:

- + Current contractual lease terms
- + Current market rents
- + Projected growth in market rents
- + Expected and likely capital expenditures
- + Projected letting up incentives provided to customers and vacant time on expiry of leases
- + Discount rates computed using the 10-year bond rate or equivalent in each jurisdiction plus increments to reflect country risk, tenant credit risk and industry risk. Where possible, the components of the discount rate are benchmarked to available market data.

#### Market assessment

With the more volatile economic conditions in FY23 compared to prior years, there have been fewer transactions of industrial, logistics and warehousing properties during the year. Nevertheless, at 30 June 2023, the Board has been able to assess that all markets in which the Consolidated Entity operates are active and as a consequence, no adjustments have been made to the carrying values of the Consolidated Entity's stabilised investment property portfolios on the basis of internally prepared discounted cash flow valuations.

The overall weighted average capitalisation rates for the divisional portfolios (including Partnerships) are set out in the table below:

	Total portfolio w average capitalisa	0
Segment	<b>2023</b> %	<b>2022</b> %
Asia	5.2	5.2
Continental Europe	4.4	3.4
United Kingdom	4.9	3.7

#### Sensitivity Ananlysis

The fair value measurement approach for directly held investment properties has been categorised as a Level 3 fair value based on the inputs to the valuation method used. The usual valuation methods are either based on income capitalisation or market comparison. Where the income comparison method is adopted then the stabilised investment property valuations at 30 June 2023 are most sensitive to the following inputs:

- + Capitalisation rates
- + Market rents
- + Incentives provided to customers and/or vacant time on expiry of leases.

The directly held stabilised investment properties are in Asia. The average net market rents, average capitalisation rate and range of prices is summarised in the table below:

Valuation technique	Significant unobservable inputs	2023	2022
Income capitalisation	Average net market rent (per square metre per annum)	\$302	\$258
	Average capitalisation rate	4.2%	4.2%
Market comparison	Price per square metre	\$9,885 - \$21,218	\$9,201 - \$18,019

The impacts on the Consolidated Entity's financial position that would arise from the changes in capitalisation rates, market rents and incentives/re-leasing time are set out in the table below. This illustrates the impacts on the Consolidated Entity in respect of both the directly held stabilised investment properties and its share of those stabilised investment properties held by Partnerships.

	Directly held properties A\$M	Partnerships <sup>1</sup> \$M
Book value at 30 June 2023	451.7	1,991.9
Changes in capitalisation rates:		
Increase in capitalisation rates +50 basis points (bps)	(48.5)	(180.7)
Increase in capitalisation rates +25 bps	(25.6)	(94.6)
Decrease in capitalisation rates -25 bps	28.9	104.6
Decrease in capitalisation rates -50 bps	61.8	220.9
Changes in market rents:		
Decrease in rents -5%	(20.0)	(88.6)
Decrease in rents -2.5%	(10.0)	(44.3)
Increase in rents +2.5%	10.0	44.3
Increase in rents +5%	20.0	88.6
Changes in incentives/vacant time <sup>2</sup> :		
Increase in incentives/re-leasing times +3 months	(1.8)	(6.3)
Increase in incentives/re-leasing times +6 months	(3.5)	(12.5)

- $1. \hspace{0.5cm} \hbox{Reflects the Consolidated Entity's share in Partnerships.} \\$
- On assumed lease expiries over the next 12 months.

### Investment properties under development

For the directly held investment properties under development, external independent valuations are generally not performed, but instead valuations are determined at each reporting date using the feasibility assessments supporting the developments. The end values of the developments in the feasibility studies are based on assumptions such as capitalisation rates, market rents, incentives provided to customers and vacant time that are consistent with those observed in the relevant market, adjusted for a profit and risk factor. The profit and risk factors are dependent on the function, location, size and current status of the developments and are generally in a market range of 10% to 15%; although for larger more complex projects that are at an early stage of the development, the profit and risk factor could be higher. This adjusted end value is then compared to the forecast cost of a completed development to determine whether there is an increase or decrease in value.

In respect of the Partnerships, certain Partnerships obtain external independent valuations of investment properties under development at reporting dates. However, the majority determine the fair values at reporting dates by reference to the feasibility assessments, with external independent valuations obtained when the properties have been stabilised.

Operating assets and liabilities (continued) 5 Property assets (continued)

#### (d) Inventories

	2023 \$M	2022 \$M
Current		
Freehold land and development properties	29.3	175.2
Leasehold land and development properties	92.3	_
	121.6	175.2
Non-current		
Freehold land and development properties	969.6	964.1
Leasehold land and development properties	441.0	413.3
	1,410.6	1,377.4

During the current and prior financial year, no impairment losses were recognised on land and development properties.

As at 30 June 2023, the ownership interests in leasehold land and development properties, carried at the lower of cost or net realisable value, are held in China and Continental Europe with remaining lease terms of between 40 and 97 years.

#### (e) Investment properties

#### Reconciliation of carrying amount of directly held investment properties

	2023 \$M	2022 \$M
Leasehold investment properties		
Carrying amount at the beginning of the year	336.8	163.9
Acquisitions	100.2	420.4
Capital expenditure	1.2	4.5
Disposals	-	(269.7)
Net loss from fair value adjustments	(0.4)	(0.3)
Effect of foreign currency translation	13.9	18.0
Carrying amount at the end of the year	451.7	336.8
Analysed by segment:		
Asia	451.7	336.8
	451.7	336.8

As at 30 June 2023, the ownership interests in leasehold investment properties, carried at fair value, are held in Hong Kong with remaining lease terms of 24 years.

### Non-cancellable operating lease commitments receivable from investment property customers

The analysis in the table below reflects the gross property income, excluding recoverable outgoings, based on existing lease agreements. It assumes that leases will not extend beyond the next review date, where the customer has an option to end the lease.

	2023 \$M	2022 \$M
Non-cancellable operating lease commitments receivable:		
Less than one year	14.5	8.6
One to two years	12.2	8.7
Two to three years	9.9	8.2
Three to four years	4.3	6.6
Four to five years	0.2	3.5
	41.1	35.6

#### (f) Investments accounted for using the equity method

Investments accounted for using the equity method comprise associates and JVs, which are collectively referred to as Partnerships.

#### Associates

An associate is an entity in which the Consolidated Entity exercises significant influence but not control over its financial and operating policies.

### JVs

A JV is an arrangement in which the Consolidated Entity is considered to have joint control for accounting purposes, whereby the Consolidated Entity has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities.

In the consolidated financial statements, investments in Partnerships are accounted for using the equity method. Under this method, the Consolidated Entity's investment is initially recognised at cost. Subsequent to initial recognition, the consolidated financial statements include the Consolidated Entity's share of the gains or losses and other comprehensive income of Partnerships until the date on which significant influence or joint control ceases.

#### Transactions eliminated on consolidation

Unrealised gains arising from asset disposals with JVs, including those relating to contributions of non-monetary assets on establishment, are eliminated to the extent of the Consolidated Entity's interest. Unrealised gains relating to JVs are eliminated against the carrying amount of the investment. Unrealised losses are eliminated in the same way as unrealised gains unless they evidence an impairment of an asset.

#### Impairment

#### Non-financial assets

The carrying amounts of the Consolidated Entity's assets are reviewed at each reporting date to determine whether there is any indication of impairment. If such indication exists, the asset is written down to the recoverable amount. The impairment is recognised in profit or loss in the reporting period in which it occurs.

An impairment loss is recognised whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses are recognised in profit or loss, unless an asset has previously been revalued, in which case the impairment loss is recognised as a reversal to the extent of that previous revaluation, with any excess recognised through profit or loss.

#### (i) Investments in associates

The Consolidated Entity owns a 39.9% interest in certain development entities in Continental Europe with a carrying value of \$0.2 million.

The consolidated share of the results recognised during the year was a loss of \$0.4 million.

#### (i) Investments in JVs

The Consolidated Entity's principal Partnerships are set out below:

		Consolidated share of net results recognised		Consolidated ownership interest		in	solidated vestment g amount
Name	Country of establishment	2023 \$M	2022 \$M	<b>2023</b> %	<b>2022</b> %	2023 \$M	2022 \$M
Property investment and development							
Goodman China Logistics Partnership (GCLP)	Cayman Islands	26.8	56.8	20.0	20.0	923.3	918.0
Goodman UK Partnerships (GUKP) <sup>1</sup>	United Kingdom	(125.4)	213.4	35.0	35.3	573.7	676.3
Other JVs		7.2	75.1			353.4	251.3
		(91,4)	345.3			1,850.4	1,845.6

<sup>1.</sup> The consolidated ownership interest in GUKP reflected the weighted average ownership in GUKP, GUKP II and GUKP III.

The Consolidated Entity's property investment Partnerships have a long-term remit to hold investment properties to earn rental income and for capital appreciation, although they will undertake developments when an appropriate opportunity arises.

The reconciliation of the carrying amount of investments in JVs is set out as follows:

Movements in carrying amount of investments in JVs	2023 \$M	2022 \$M
Carrying amount at the beginning of the year	1,845.6	1,470.0
Share of net results after tax (before fair value adjustments)	78.7	84.6
Share of fair value adjustments attributable to investment properties after tax	(160.1)	269.8
Share of fair value adjustments on derivative financial instruments	(10.0)	(9.1)
Share of net results	(91.4)	345.3
Share of movements in reserves	(O.1)	7.2
Acquisitions	329.8	263.3
Disposals	(O.1)	(3.4)
Capital return	(141.7)	(166.3)
Dividends/distributions received and receivable	(102.1)	(65.8)
Effect of foreign currency translation	10.4	(4.7)
Carrying amount at the end of the year	1,850.4	1,845.6

Operating assets and liabilities (continued) 5 Property assets (continued)

#### Summary financial information of JVs

The following table summarises the financial information of the material Partnerships as included in their own financial statements. The table also reconciles the summarised financial information to the carrying amount of the Consolidated Entity's interest in the JVs.

		GCLP		GUKP	
	2023 \$M	2022 \$M	2023 \$M	2022 \$M	
Summarised statement of financial position					
Current assets					
Cash and cash equivalents	398.2	427.4	44.2	41.1	
Other current assets	198.2	148.3	15.8	12.9	
Total current assets	596.4	575.7	60.0	54.0	
Total non-current assets	6,660.0	6,303.3	2,216.0	2,421.8	
Current liabilities					
Financial liabilities (excluding trade payables and other provisions)	77.2	70.6	-	_	
Other current liabilities	2,990.0	2,870.0	55.1	24.7	
Total current liabilities	3,067.2	2,940.6	55.1	24.7	
Non-current liabilities					
Financial liabilities (excluding trade payables and other provisions)	1,354.2	1,111.8	583.1	537.8	
Other non-current liabilities	733.4	718.3	-	-	
Total non-current liabilities	2,087.6	1,830.1	583.1	537.8	
Net assets (100%)	2,101.6	2,108.3	1,637.8	1,913.3	
Consolidated ownership interest (%)	20.0	20.0	35.0	35.3	
Consolidated share of net assets	420.4	421.7	573.2	676.0	
Shareholder loans <sup>1</sup>	499.6	492.9	-	_	
Other items, including acquisition costs	3.3	3.4	0.5	0.3	
Carrying amount of interest in JV	923.3	918.0	573.7	676.3	
Summarised statement of comprehensive income					
Revenue	210.0	215.0	93.2	39.8	
Net finance expense	(32.7)	(20.3)	(11.3)	(1.0)	
Income tax expense	(44.1)	(46.3)	(0.2)	(0.2)	
Profit and total comprehensive income (100%)	134.1	320.0	(337.0)	575.6	
Consolidated share of profit and total comprehensive income	26.8	64.0	(125.4)	213.4	
Dividends/distributions received and receivable by the Consolidated Entity	8.5	7.3	_	3.9	

<sup>1.</sup> Shareholder loans have been provided by investors of GCLP in proportion to their ownership interest. The shareholder loans are interest-free, unsecured and have no fixed terms of repayment. The shareholder loans are not expected to be repaid within 12 months from the end of the reporting period and the Directors consider the loans to form part of the Consolidated Entity's investment in GCLP.

With respect to the Consolidated Entity's other JVs, the total profit after tax and revaluations was \$59.9 million (2022: \$308.7 million) and total other comprehensive income was \$nil (2022: \$nil).

#### 6 Receivables

#### Non-derivative financial assets

The Consolidated Entity initially recognises loans and receivables and deposits on the date that they are originated. All other financial assets are recognised initially on the trade date at which the Consolidated Entity becomes a party to the contractual provisions of the instrument.

The Consolidated Entity derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the right to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Consolidated Entity is recognised as a separate asset or liability.

Financial assets and liabilities are offset and the net amount presented in the consolidated statement of financial position when, and only when, the Consolidated Entity has a legal right to offset the amounts and intends to either settle on a net basis or to realise the asset and settle the liability simultaneously.

#### Loans and receivables

Loans and receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables comprise trade and other receivables, amounts due from related parties and loans to related parties. Such assets are recognised initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, loans and receivables are measured at amortised cost using the effective interest rate method, less allowance for impairment of doubtful debts, except where the receivables are interest-free loans made to related parties without any fixed repayment terms or the effect of discounting would be immaterial. In such cases, the receivables are stated at cost less allowance for impairment of doubtful debts.

#### Amounts recoverable on development contracts

Amounts recoverable on development contracts arise when the Consolidated Entity contracts to sell a completed development asset either prior to or during the development phase. The receivables are stated at cost plus profit recognised to date less an allowance for foreseeable losses and less amounts already billed.

#### Impairment

#### Financial assets and contract assets

The Consolidated Entity recognises an impairment loss allowance for expected credit losses (ECLs) on financial assets measured at amortised cost and contract assets. Financial assets measured at amortised cost include cash and cash equivalents, trade and other receivables, amounts due from related parties and loans to related parties.

Other financial assets measured at fair value are not subject to the EOL assessment.

#### Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all expected cash shortfalls. In measuring ECLs, the Consolidated Entity takes into account information about past events, current conditions and forecasts of future economic conditions.

Impairment loss allowances for trade and other receivables, amounts due from related parties and contract assets are measured at an amount equal to a lifetime ECL. Lifetime ECLs are losses that are expected to result from all possible default events over the expected lives of the items to which the ECL model applies.

The Consolidated Entity recognises an impairment loss allowance equal to the expected losses within 12 months after the reporting date on loans to related parties, unless there has been a significant increase in credit risk of the loans since initial recognition, in which case the loss allowance is measured at an amount equal to lifetime ECLs.

	Note	2023 \$M	2022 \$M
Current			
Trade receivables		19.6	5.0
Other receivables		56.6	70.2
Amounts due from related parties		46.3	37.1
Loans to related parties	20(c)	51.3	3.3
		173.8	115.6
Non-current			
Loans to related parties	20(c)	612.0	789.6
		612.0	789.6

The maximum exposure to credit risk at the reporting date is the fair value of each class of receivable mentioned above. All non-current receivables of the Consolidated Entity are due within five years from the reporting date. There is no material difference between the carrying values and the fair values of receivables.

Operating assets and liabilities (continued) 6 Receivables (continued)

#### Trade receivables

No trade receivables were impaired at 30 June 2023 and 2022. There are no significant overdue trade receivables at 30 June 2023.

#### Other receivables

At 30 June 2023, none of the other receivables were overdue or impaired (2022: \$nii).

#### Amounts due from related parties

At 30 June 2023, none of the amounts due from related parties was overdue or impaired (2022: \$nil). Amounts due from related parties are typically repayable within 30 days. The amounts due from related parties are unsecured.

#### Loans to related parties

Loans to related parties principally relate to loans to fellow subsidiaries of GL and GIT and loans to JVs. Refer to note 20(c) for details of loans to related parties. During the year, no impairment losses were recognised on loans to related parties (2022: \$nil). The loans to related parties are unsecured

#### 7 Contract assets and liabilities

Contract assets primarily comprise amounts recoverable from fixed price development contracts (disclosed net of any payments received on account) and accrued performance fee income where the Consolidated Entity assesses that the income can be reliably measured.

Contract liabilities primarily comprise deposits and other amounts received in advance for development contracts and rental guarantees.

The following table provides an analysis of receivables from contracts with customers (excluding rental income receivables), contract assets and contract liabilities at the reporting dates:

	2023 \$M	2022 \$M
Current		
Receivables from contracts with customers, which are included in trade receivables, other receivables and amounts due from related parties	65.7	42.7
Contract assets	70.7	60.5
Contract liabilities	9.8	4.6

Significant changes in the contract assets and the contract liabilities balances during the year are set out below:

	202	2023		22
	Contract assets		Contract assets \$M	Contract liabilities
	\$M	\$М		\$М
Balance at the beginning of the year	60.5	4.6	55.7	5.8
Revenue recognised that was included in the contract liability balance at the beginning of the year	-	_	-	(1.4)
Increases due to cash received, excluding amounts recognised as revenue during the year	_	5.2	_	_
Transfers from contract assets to receivables	(371.6)	-	(380.4)	-
Increase due to changes in the measure of progress during the year	379.8	_	385.0	_
Effect of foreign currency translation	2.0	-	0.2	0.2
Balance at the end of the year	70.7	9.8	60.5	4.6
Current contract assets and liabilities	70.7	9.8	60.5	4.6
	70.7	9.8	60.5	4.6

## Transaction price allocated to the remaining contract obligations

The amount of the transaction price allocated to the remaining performance obligations under the Consolidated Entity's existing contracts is \$nil (2022; \$nil).

 $The \ Consolidated \ Entity's \ future \ rental \ income \ from \ existing \ lease \ agreements \ is \ included \ in \ note \ 5.$ 

In addition, the Consolidated Entity receives investment management, development management and property services fees under various contracts that it has with its Partnerships. These contracts are for varying lengths of time and are typically transacted on terms that are consistent with market practice. The revenues under these contracts are linked to the AUM, total development project costs or gross property income of the Partnerships and are invoiced as the services are provided.

Operating assets and liabilities (continued)

## 8 Payables

#### Non-derivative financial liabilities

The Consolidated Entity initially recognises debt securities issued and subordinated liabilities on the date that they are originated. All other financial liabilities are recognised initially on the trade date at which the Consolidated Entity becomes a party to the contractual provisions of the instrument.

The Consolidated Entity derecognises a financial liability when the contractual obligations are discharged or cancelled or expire.

Financial assets and liabilities are offset and the net amount presented in the consolidated statement of financial position when, and only when, the Consolidated Entity has a legal right to offset the amounts and intends to either settle on a net basis or to realise the asset and settle the liability simultaneously.

Such financial liabilities are recognised initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, these financial liabilities are measured at amortised cost using the effective interest rate method.

Other financial liabilities comprise trade payables, other payables and accruals, contract liabilities and lease liabilities.

	N	2023	2022
	Note	\$M	\$M
Current			
Trade payables		47.5	45.7
Other payables and accruals		220.2	216.1
Contract liabilities	7	9.8	4.6
Lease liabilities	9	7.7	8.2
		285.2	274.6
Non-current			
Other payables and accruals		62.9	56.1
Lease liabilities	9	30.4	37.1
		93.3	93.2

#### 9 Leases

The Consolidated Entity leases office buildings, motor vehicles and office equipment. Certain investment properties and developments classified as inventories are also built on land held under leasehold interests.

The Consolidated Entity recognises a right of use asset and a lease liability at the lease commencement date. The right of use asset is initially measured at cost plus any direct costs incurred and an estimate of costs to restore the underlying asset or the site on which it is located, less any lease incentives received.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the lessee's incremental borrowing rate. After initial recognition, the lease liability is measured at amortised cost and interest expense is calculated using the effective interest rate method. The lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, or there is a change arising from the reassessment of whether the Consolidated Entity will be reasonably certain to exercise an extension or termination option.

The right of use assets in respect of office buildings, motor vehicles and office equipment are depreciated using the straight-line method over the period of the lease. Right of use assets that meet the definition of investment property are carried at fair value in accordance with note 5(a). Ground leases of development land that are classified as inventories are not depreciated but are assessed at each reporting date for impairments to ensure they are recorded at the lower of cost and net realisable value.

Information about leases for which the Consolidated Entity is a lessee is detailed below:

533.3	413.3
451.7	336.8
15.5	18.1
1,000.5	768.2
7.7	8.2
30.4	37.1
38.1	45.3
	451.7 15.5 1,000.5 7.7 30.4

The following were recognised during the year:

	2023 \$M	2022 \$M
Additions to right of use assets	229.5	332.0
Depreciation of right of use assets	6.9	6.9
Interest expense on lease liabilities	0.4	0.4
Cash outflows on lease liabilities	7.6	8.0

## **CAPITAL MANAGEMENT**

## 10 Net finance expense

#### Finance income

Interest is recognised on an accruals basis using the effective interest rate method, and, if not received at the reporting date, is reflected in the consolidated statement of financial position as a receivable.

#### Finance expense

Expenditure incurred in obtaining debt finance is offset against the principal amount of the interest bearing liability to which it relates and is recognised as a finance cost on an effective interest rate basis over the life of the facility or until the facility is significantly modified. Where a facility is significantly modified, any unamortised expenditure in relation to that facility and incremental expenditure incurred in modifying the facility are recognised as a finance cost in the financial year in which the significant modification occurs.

Finance costs relating to a qualifying asset are capitalised as part of the cost of that asset using a weighted average cost of debt. Qualifying assets are assets which take a substantial time to get ready for their intended use or sale. All other finance costs are expensed using the effective interest rate method.

	N	2023	2022
	Note	\$M	\$M
Finance income			
Interest income on loans to:			
- Related parties	20	23.1	11.6

Capitalised borrowing costs		9.2	11.6
		(129.1)	(71.4)
Net finance expense		(91.0)	(23.4)

Borrowing costs were capitalised to inventories and investment properties under development during the financial year at rates between 1.9% and 8.9% per annum (2022: 1.0% and 10.6% per annum).

## 11 Interest bearing liabilities

Interest bearing liabilities comprise bank loans. Interest bearing liabilities are recognised initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, interest bearing liabilities are measured at amortised cost using the effective interest rate method.

Capital management (continued)

#### 12 Other financial assets and liabilities

Other financial assets and liabilities are recognised initially on the trade date at which the Consolidated Entity become a party to the contractual provisions of the instrument.

#### Derivative financial instruments and hedging

The Consolidated Entity uses derivative financial instruments to hedge its economic exposure to foreign exchange and interest rate risks arising from operating, investing and financing activities. In accordance with its treasury policy, the Consolidated Entity does not hold or issue derivative financial instruments for speculative trading purposes.

The Consolidated Entity's derivative financial instruments are not designated as a hedge for accounting purposes, and accordingly movements in the fair value of derivative financial instruments are recognised in profit or loss.

#### Investments in unlisted securities

Subsequent to initial recognition, investments in unlisted securities are measured at fair value and changes therein are recognised as other comprehensive income and presented in the asset revaluation reserve in equity. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in other comprehensive income and are never reclassified to profit or loss. When such an asset is derecognised, the cumulative gain or loss in equity is transferred to retained earnings.

## 13 Financial risk management

The Goodman Group Board has overall responsibility for approving Goodman Group's risk management framework. The Goodman Group Board has established the Goodman Group Audit, Risk and Compliance committee, which is responsible for reviewing, approving and subsequently monitoring Goodman Group's risk management policies, including the FRM policy. The FRM policy is established to identify and analyse the financial risks faced by Goodman Group, to set appropriate risk limits and controls for managing the financial affairs of Goodman Group, and to monitor those risks and adherence to limits by Goodman Group Management.

Goodman Group's treasury function is responsible for the day to day compliance with Goodman Group's FRM policy and prepares reports for consideration by management committees and the Goodman Group Board including:

- Cash flow projections over a period of at least 12 months to assess the level of cash and undrawn facilities, and headline gearing at each month end
- + Debt maturity profile, to allow Goodman Group to plan well in advance of maturing facilities
- Interest rate hedge profile over the next 10 years, to allow Goodman Group to manage the proportion of fixed and floating rate debt in accordance with its FRM policy
- + Capital hedge position (by currency) and profile of expiring currency derivatives, to allow Goodman Group to manage its net investment hedging in accordance with its FRM policy.

Any significant investments or material changes to the finance facilities or FRM policy require approval by the Goodman Group Board.

The Consolidated Entity's key financial risks are market risk (including foreign exchange and interest rate risk), liquidity risk and credit risk.

#### (a) Market risk

#### Foreign exchange risk

The Consolidated Entity is exposed to transactional foreign currency risk and net investment foreign currency risk through its investments in Hong Kong, Japan, China, Continental Europe and the United Kingdom and also loans to related parties in North America. Foreign exchange risk represents the loss that would be recognised from adverse fluctuations in currency prices as a result of future commercial transactions, recognised assets and liabilities and, principally, net investments in foreign operations.

Goodman Group manages foreign currency exposure on a consolidated basis. In managing foreign currency risks, Goodman Group aims to reduce the impact of short-term fluctuations on earnings and net assets. However, over the long term, permanent changes in foreign exchange will have an impact on both earnings and net assets.

Goodman Group's capital hedge policy for each overseas region is to hedge between 65% and 90% of foreign currency denominated assets with foreign currency denominated liabilities. This is achieved by borrowing in the same functional currency as the investments to form a natural economic hedge against any foreign currency fluctuations and/or using derivatives such as cross currency interest rate swaps (CCIRS) and forward exchange contracts (FEC).

As at 30 June 2023, a summary of the derivative financial instruments used to hedge the Consolidated Entity's exposures arising from its investments in foreign operations is set out below:

		2023			2022			
	Amounts payable	Amounts receivable	Weighted average exchange rate	Amounts payable	Amounts receivable	Weighted average exchange rate		
	HKD'M	AUD'M	AUD/HKD	HKD'M	AUD'M	AUD/HKD		
AUD receivable/HKD payable	(1,650.0)	300.5	5.5118	(1,150.0)	202.3	5.6948		
	EUR'M	AUD'M	AUD/EUR	EUR'M	AUD'M	AUD/EUR

	CNY'M	USD'M	USD/CNY	CNY'M	USD'M	USD/CNY		
USD receivable/CNY payable	(4,727.6)	642.2	7.3612	(4,258.6)	539.6	7.8927		

### Sensitivity analysis

Throughout the financial year, if the Australian dollar had been 5% (2022: 5%) stronger against all other currencies, with all other variables held constant, the Consolidated Entity's profit attributable to Shareholders, excluding derivative mark to market and unrealised foreign exchange movements, would have decreased by \$21.9 million (2022: \$48.8 million). If the Australian dollar had been 5% (2022: 5%) weaker against all other currencies, with all other variables held constant, the Consolidated Entity's profit attributable to Shareholders, excluding derivative mark to market and unrealised foreign exchange movements, would have increased by \$21.9 million (2022: \$48.8 million).

#### Interest rate risk

Goodman Group's interest rate payments risk arises from variable rate borrowings and Goodman Group's CCIRS that hedge the overseas investments. Goodman Group has a policy of hedging between 60% and 100% of its payments exposure to changes in interest rates for a 3 year period, progressively decreasing from the fourth year. The Consolidated Entity enters into interest rate derivatives (IRD) to manage cash flow risks associated with the interest rates on payments that are floating. The IRD contracts are for 90-day intervals and involve quarterly payments or receipts of the net amount of interest.

As at 30 June 2023, the Consolidated Entity's fixed and floating rate exposure (by principal) based on existing interest bearing liabilities and derivative financial instruments is set out below:

	Interest bearing	Impact	Impact of derivatives	
	liabilities \$M	CCIRS \$M	IRD \$M	rate exposure \$M
30 June 2023 <sup>1</sup>				
Fixed rate liabilities	-	-	1,418.7	1,418.7
Floating rate liabilities	47.9	2,232.8	(1,418.7)	862.0
	47.9	2,232.8	-	2,280.7
30 June 2022 <sup>2</sup>				
Fixed rate liabilities	-	-	1,106.0	1,106.0
Floating rate liabilities	9.0	2,551.6	(1,106.0)	1,454.6
	9.0	2,551.6	_	2,560.6

<sup>1.</sup> The Consolidated Entity is also exposed to variable interest rates on cash at bank and the principal amount of the Australian dollar receiver legs of the CCIRS. At 30 June 2023, the Consolidated Entity's cash at bank was \$391.9 million (FY22: \$357.5 million) and the principal amount of the Australian dollar receiver legs of the CCIRS was \$2,195.5 million (FY22: \$2,621.5 million). Accordingly, at 30 June 2023, the Consolidated Entity had a total variable interest rate exposure on its cash and receivables (by principal) of \$2,587.4 million (2022: \$2,979.0 million).

<sup>2.</sup> For consistency with the current year's presentation, the comparative figures have been adjusted to exclude the principal amount of the Australian dollar receiver legs of CCIRS which hedge the Australia dollar receiver legs. The adjustments amounted to \$2,621.5 million to the principal amount of CCIRS.

Capital management (continued)
13 Financial risk management (continued)

As a result of the fixed rate interest bearing liabilities and derivative financial instruments that existed at 30 June 2023, the Consolidated Entity would have the following fixed payable interest rate exposure (by principal) at the end of each of the next five financial years. This assumes all interest bearing liabilities and derivative financial instruments mature in accordance with current contractual terms and that no new arrangements are entered into.

	202	23	2022		
Number of years post balance date	Fixed interest rate (by principal) \$M	Weighted average interest rate % per annum	Fixed interest rate (by principal) <sup>1</sup> \$M	Weighted average interest rate <sup>1</sup> % per annum	
1 year	1,350.7	0.88	1,033.7	0.54	
2 years	619.3	1.69	970.7	0.54	
3 years	491.1	1.98	275.3	0.44	
4 years	491.1	1.98	151.7	0.31	
5 years	458.4	2.14	151.7	0.31	

For consistency with the current year's presentation, the comparative figures have been adjusted to exclude the principal amount and associated interest rate impact of the Australian dollar receiver legs of CCIRS and the principal amount of IRDs which hedge the inflows arising from them.

#### Sensitivity analysis

Based on the Consolidated Entity's interest bearing borrowings and derivative financial instruments at 30 June 2023, if interest rates on borrowings had been 100 bps per annum (2022: 100 bps per annum) higher/lower, with all other variables held constant, the Consolidated Entity's profit attributable to Shareholders, excluding derivative mark to market movements, would have been \$10.2 million lower/higher (2022: \$11.8 million lower/higher).

#### Managing interest rate benchmark reform and associated risks

In recent years, a fundamental reform of major interest rate benchmarks is being undertaken globally by relevant regulators, including the replacement of some interbank offered rates (IBORs) with alternative risk-free rates (referred to as IBOR reform). The Consolidated Entity had exposure to IBORs that have changed or are soon to change through certain of its related party loans and its derivative instruments (IRD and CCIRS). The Consolidated Entity's derivative instruments are governed by contracts based on the International Swaps and Derivatives Association (ISDA) master agreements.

Amendments to the Consolidated Entity's financial instruments with contractual terms indexed to sterling London Interbank Offered Rate (LIBOR), Japanese yen LIBOR or US dollar LIBOR, such that they incorporate the new benchmark rates, were completed by 31 December 2021. The sterling and Japanese yen LIBORs transitioned on 1 January 2023 and the US dollar LIBOR transitioned to the Secured Overnight Financing Rate on 1 July 2023.

For the Consolidated Entity's other IBOR exposures, the transition to alternative risk-free rates has been deferred and/or extended and therefore no action has been or will be taken in that regard until such time as the alternative reference rates are defined and scheduled. It is expected that these will follow the conventions established in other markets and the Consolidated Entity will apply the same principles for those transitions as and when they become relevant.

## (b) Liquidity risk

Liquidity risk is the risk that the Consolidated Entity will not be able to meet its financial obligations as they fall due. The Consolidated Entity's objective is to maintain sufficient liquidity to fund short-term working capital, capital expenditure, investment opportunities and dividends. Management seeks to achieve these objectives through the preparation of regular forecast cash flows to understand the application and use of funds and through the identification of future funding, primarily through loans from related parties in Goodman Group.

The contractual maturities of financial liabilities are set out below:

	Carrying amount	Contractual cash flows	Up to 12 months	1 to 2 year(s)	2 to 3 years	3 to 4 years	4 to 5 years	More than 5 years
	\$M	\$M	\$M	\$М	\$М	\$М	\$M	\$М

<sup>1.</sup> Contractual cash flows relating to bank loans exclude any estimate of interest payments that might arise under the Consolidated Entity's bank facilities.

<sup>2.</sup> Net settled includes IRD and  $\bar{\text{FEC}}.$ 

<sup>3.</sup> Gross settled includes CCIRS.

Capital management (continued)
13 Financial risk management (continued)

#### (c) Credit risk

Oredit risk represents the loss that would be recognised if counterparties failed to perform as contracted.

The maximum exposure to credit risk on financial assets, excluding investments, of the Consolidated Entity which have been recognised in the consolidated statement of financial position, is the carrying amount (refer to note 6).

The Consolidated Entity has a policy of assessing the creditworthiness of all potential customers and is not materially exposed to any one customer. The Consolidated Entity evaluates all customers' perceived credit risk.

In relation to material bank deposits, the Consolidated Entity minimises credit risk by dealing with major financial institutions. The counterparty must have a long-term investment grade credit rating from a major rating agency. The amounts and other terms associated with bank deposits are formally reviewed monthly.

From time to time, the Consolidated Entity also makes loans to JVs, typically to fund development projects. In making its investment decisions, the Consolidated Entity will undertake a detailed assessment of the development feasibility and credit risks associated with the relevant counterparties.

During the current and prior year, credit risk arising from cash and cash equivalents, trade receivables, amounts and loans due from related parties and other receivables was not determined to be significant and no impairment losses were recognised.

The credit risks associated with derivative financial instruments are managed by:

- + Transacting with multiple derivatives counterparties that have a long-term investment grade credit rating
- Utilising ISDA agreements with derivative counterparties in order to limit exposure to credit risk through netting of amounts receivable and amounts payable to individual counterparties (refer below)
- + Formal review of the mark to market position of derivative financial instruments by counterparty on a monthly basis.

### Master netting off or similar agreements

Goodman Group enters into derivative transactions under ISDA master netting off agreements. Under these agreements, where certain credit events occur (such as a default), all outstanding transactions under the agreement are terminated and a single net termination value is payable in full and final settlement.

#### (d) Fair values of financial instruments

Except for derivative financial instruments and investments in unlisted securities which are carried at fair value, the Consolidated Entity's financial instruments are carried at cost or amortised cost. The carrying amounts of the Consolidated Entity's financial instruments carried at cost or amortised cost were not materially different from their fair values as at 30 June 2023 and 2022.

## (i) Fair value hierarchy

The table below analyses financial instruments carried at fair value, by valuation method (see Basis of preparation):

	Level 1	Level 2	Level 3	Total
	\$M	\$M	\$М	\$M
As at 30 June 2023				
Derivative financial assets	-	117.9	-	117.9
Investment in unlisted securities	_	-	54.5	54.5
	-	117.9	54.5	172.4
Derivative financial liabilities	-	178.0	-	178.0
	-	178.0	-	178.0
As at 30 June 2022				
Derivative financial assets	-	131.3	_	131.3
Investment in unlisted securities	_	-	43.5	43.5
	-	131.3	43.5	174.8
Derivative financial liabilities	-	186.8	-	186.8
	_	186.8	-	186.8

There were no transfers between the levels during the year.

### (ii) Valuation techniques used to derive Level 2 and Level 3 fair values

The Level 2 derivative financial instruments held by the Consolidated Entity consist of IRD, CCIRS and FEC.

The fair values of derivatives are determined using generally accepted pricing models which discount estimated future cash flows based on the terms and maturity of each contract and current market interest rates and/or foreign currency rates, adjusted for specific features of the instruments.

The fair value measurement for investment in unlisted securities has been categorised as a Level 3 fair value. The following table shows the valuation technique used in measuring fair value as well as the significant unobservable inputs used:

Туре	Valuation technique	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
Equity securities + Goodman	DCF: The valuation model was determined by discounting the future	+ Assets under management of \$7.2 billion in year five	The estimated fair value would increase/(decrease) if:
Japan Limited  cash flows expected to be generated from continuing operations. The future cash flows were based on fund and development forecasts and then estimating a year five terminal value using a terminal growth rate and an appropriate discount rate.	+ Average annual development of 124,982 square metres	<ul> <li>The level of assets under management, development</li> </ul>	
	and development forecasts and then	+ Five-year terminal value growth rate of 0.91%	activity and terminal value growth rate were higher/(lower) or
	using a terminal growth rate and an	+ Risk adjusted post tax discount rate of 7.38% per annum.	+ The risk adjusted discount rate were lower/(higher).

#### (iii) Reconciliation of Level 3 fair values

	2023	2022
	\$M	\$M
Carrying amount at the beginning of the year	43.5	38.2
Acquisitions	1.2	_
Net change in fair value - included in other comprehensive income	10.7	9.4
Effect of foreign currency translation	(0.9)	(4.1)
Carrying amount at the end of the year	54.5	43.5

## 14 Dividends

During the financial year, the Company declared a final dividend of 5.0 cents per share amounting to \$94.2 million. This dividend will be paid on 25 August 2023. In the prior year, the Company declared a final dividend of 2.5 cents per share amounting to \$46.7 million. This was paid on 25 August 2022.

Capital management (continued)

## 15 Share capital

#### (a) Ordinary shares

Ordinary shares of the Company are classified as equity. Incremental costs directly attributable to issues of ordinary shares are recognised as a deduction from equity, net of any tax effects.

	2023	2022	2023	2022
	Number of	Number of shares		
Share capital	1,883,819,883	1,868,222,609	931.6	873.6
Less: Accumulated issue costs			(0.7)	(0.6)

Date	Details	Number of shares	Share capital \$M
	Ordinary shares, issued and fully paid		
	Balance at 30 June 2021	1,847,429,255	792.5
31 Aug 2021	Shares issued to employees of Goodman Group <sup>1</sup>	14,716,648	57.4
31 Aug 2021	Treasury shares issued	1,233,333	4.8
2 Sep 2021	Ordinary shares issued	4,843,373	18.9
	Balance at 30 June 2022	1,868,222,609	873.6
1 Sep 2022	Shares issued to employees of Goodman Group <sup>1</sup>	12,246,479	46.1
19 May 2023	Ordinary shares issued	3,350,795	11.9
	Balance at 30 June 2023	1,883,819,883	931.6

<sup>1.</sup> During the year, the Company issued 12,246,479 (2022:14,716,648) shares to employees of Goodman Group under the LTIP.

The holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of the Company. All ordinary shares rank equally with regard to the Company's residual assets.

#### (b) Equity settled share based payment transactions

## LTIP

Goodman Group's share based payments primarily relate to performance rights awarded to employees under the LTIP. These performance rights entitle an employee to either acquire Goodman Group securities for \$nil consideration (equity settled performance rights) or, in certain jurisdictions, to receive an amount in cash equal to the value of the securities (cash settled performance rights), subject to the vesting conditions having been satisfied.

During the year, the movement in the number of performance rights under the LTIP was as follows:

	Nur	mber of rights
	2023	2022
Outstanding at the beginning of the year	24,616,181	22, 734,427
Issued	8,149,820	8,220,860
Vested	(5,568,204)	(6,208,554)
Forfeited	(439,388)	(130,552)
Outstanding at the end of the year	26,758,409	24,616,181
Exercisable at the end of the year	-	-

#### Share based payments transactions

The fair value of equity settled performance rights at the grant date is expensed with a corresponding increase in the employee compensation reserve over the period from the grant date to the vesting dates. The expense is adjusted to reflect the actual number of performance rights for which the related service and non-market vesting conditions are expected to be met. The accumulated share based payments expense of performance rights which have vested or lapsed is transferred from the employee compensation reserve to retained earnings.

The fair value of cash settled performance rights is also recognised as an expense but with a corresponding increase in liabilities over the vesting period. The expense is adjusted to reflect the actual number of performance rights for which the related service and non-market vesting conditions are expected to be met. The liability is remeasured at each reporting date and at the vesting date based on the fair value of the rights.

The fair value of services received in return for performance rights granted under the LTIP is measured by reference to the fair value of the performance rights granted. The fair value of the performance rights granted during the year was measured as follows:

- + Operating earnings per security tranche: these rights were valued as a granted call option, using the standard Black Scholes model with a continuous dividend yield
- + Relative total shareholder return tranche: these rights were valued using a Monte Carlo model which simulated total returns for each of the ASX 100 stocks and discounted the future value of any potential future vesting performance rights to arrive at a present value. The model uses statistical analysis to forecast total returns, based on expected parameters of variance and co-variance.

The model inputs for performance rights, both equity and cash settled, awarded during the current financial year included the following:

	10-year rights issued on 17 Nov 2022	10-year rights issued on 30 Sep 2022	5-year rights issued on 30 Sep 2022
Fair value at measurement date (\$)	13.89	11.69	12.32
Security price (\$)	18.18	15.78	15.78

Balance at the end of the year		2,383.2	2,290.0	1,522.9	1,013.3

#### 19 Investments in subsidiaries

#### **Subsidiaries**

Subsidiaries are entities controlled by the Company. The Company controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. When assessing whether the Company has power, only substantive rights (held by the Company and other parties) are considered.

An investment in a subsidiary is consolidated into the consolidated financial statements from the date that control commences until the date that control ceases. When an entity ceases to be controlled by the Company, it is accounted for as a disposal of the entire interest in the entity, with a resulting gain or loss being recognised in profit or loss.

In the Company's statement of financial position, an investment in a subsidiary is stated at cost less impairment losses.

The following list contains only the particulars of subsidiaries which principally affected the results, assets or liabilities of the Consolidated Entity. The class of shares held is ordinary unless otherwise stated.

			Inter	est held
Significant controlled companies	Principal activities	Country of incorporation	<b>2023</b> %	<b>2022</b> %
Goodman Asia Limited	Investment and property management services	Hong Kong	100.0	100.0
Goodman China Limited	Property management and development	Hong Kong	100.0	100.0

Goodman Real Estate (UK) Limited	Investment and property development	United Kingdom	100.0	100.0

Other items (continued)

#### Combination of entities or businesses under common control

Where the Consolidated Entity acquires entities or businesses from other members of Goodman Group such that all of the combining entities (businesses) are ultimately controlled by Goodman Group Securityholders both before and after the combination, the Consolidated Entity applies the pooling of interests method.

At the date of the combination of entities under common control, the assets and liabilities of the combining entities are reflected at their carrying amounts. No adjustments are made to reflect fair values or recognise any new assets or liabilities that would otherwise be done under the acquisition method. The only goodwill that is recognised is any existing goodwill relating to either of the combining entities. Any difference between the consideration transferred and the equity "acquired" by the Consolidated Entity is reflected within equity (common control reserve).

Similar to the acquisition method, the results of the "acquired" entity are included only from the date control commenced. Comparatives are not restated to present the consolidated financial statements as if the entities had always been combined.

## 20 Related party transactions

#### Related parties

- (i) A person, or a close member of that person's family, is related to the Company if that person:
  - (1) Has control or joint control over the Company
  - (2) Has significant influence over the Company or
  - (3) Is a member of the key management personnel of the Company or the Company's parent.
- (ii) An entity is related to the Company if any of the following conditions applies:
  - (1) The entity and the Company are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others)
  - (2) One entity is an associate or JV of the other entity (or an associate or JV of a member of a group of which the other entity is a member)
  - (3) Both entities are JVs of the same third party
  - (4) One entity is a JV of a third entity and the other entity is an associate of the third entity
  - (5) The entity is a post-employment benefit plan for the benefit of employees of either the Company or an entity related to the Company
  - (6) The entity is controlled or jointly controlled by a person identified in (i)
  - (7) A person identified in (i)(1) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity) or
  - (8) The entity, or any member of a group of which it is a part, provides key management personnel services to the Company or the Company's parent.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

## (a) Directors' remuneration

Directors' remuneration (including alternate Directors) disclosed pursuant to section 383(1) of the Hong Kong Companies Ordinance and Part 2 of the Companies (Disclosure of Information about Benefits of Directors) Regulation is as follows:

	2023 \$M	2022 \$M

	663.3	792.9	(1,676.1)	(1,941.0)	(24.4)	(30.2)

<sup>1.</sup> Loans by the Consolidated Entity to/from JVs and other related parties have generally been provided on an arm's length basis. At 30 June 2023, details in respect of the principal loan balances are set out below:

<sup>+</sup> Loans to GL, GIT and their controlled entities amounting to \$656.3 million (2022: \$765.6 million) are interest bearing and repayable on demand. The interest bearing loans incur interest at rates ranging from 0.8% to 6.4% per annum (2022: 0.6% to 5.1% per annum)

<sup>+</sup> Loans from GL, GIT and their controlled entities are interest bearing and amount to \$1,676.1 million (2022: \$1,941.0 million). \$86.6 million of the loans is repayable on demand and \$1,589.5 million is repayable greater than one year from the reporting date. The interest bearing loans incur floating interest at rates ranging from 0.8% to 10.5% per annum (2022: 0.2% to 10.6% per annum).

Other items (continued)

#### 21 Commitments

#### **Development activities**

At 30 June 2023, the Consolidated Entity was committed to \$172.8 million (2022: \$206.4 million) expenditure in respect of inventories and other development activities.

#### Investment properties

At 30 June 2023, the Consolidated Entity had capital expenditure commitments of \$0.1 million (2022: \$0.1 million) in respect of its stabilised investment property portfolio.

## 22 Contingencies

#### Capitalisation Deed Poll

GLHK, GL, GIT and certain of their wholly owned controlled entities are "investors" under a Capitalisation Deed Poll (CDP) dated 23 May 2007. Under the CDP, each investor undertakes to pay to the relevant controlled entity borrower (borrower) any amounts owing under finance documents for the purpose of the CDP when the borrower fails to make a payment. Any payments by an investor to a borrower will be by way of loan to, or proceeds for the subscription of equity in, the borrower by the investor.

#### US144A/Regulation S senior notes

Under the issue of notes in the US144A/Regulation S bond market, controlled entities of GIT had on issue USD and EUR notes amounting to US\$1,350.0 million and €500.0 million respectively. GL, Goodman Funds Management Limited, as responsible entity of GIT, and GLHK have unconditionally and irrevocably guaranteed on a joint and several basis the payment of principal and interest in respect of each of the notes.

Disclaimer: This document has been prepared by Goodman Group (Goodman Limited (ABN 69 000 123 071), Goodman Funds Management Limited (ABN 48 067 796 641; AFSL Number 223621) as the Responsible Entity for Goodman Industrial Trust (ARSN 091 213 839) and Goodman Logistics (HK) Limited (Company No. 1700359; ARBN 155 911 149 - a Hong Kong company with limited liability)). It is not intended to be relied upon as advice to investors or potential investors and does not take into account the investment objectives, financial situation or needs of any particular investor. These should be considered, with professional advice, when deciding if an investment is appropriate. This document does not constitute an offer, invitation, solicitation, recommendation or advice with respect to the issue, purchase or sale of any stapled securities or other financial products in the Goodman Group. It does not constitute an offer to sell, or the solicitation of an offer to buy, any securities in the United States or to any "US person" (as defined in Regulation S under the US Securities Act of 1933, as amended (Securities Act) (US Person). Securities may not be offered or sold in the United States or to US Persons unless they are registered under the Securities Act or an exemption from registration is available. The stapled securities of Goodman Group have not been, and will not be, registered under the Securities Act or the securities laws of any state or jurisdiction of the US. This document contains certain "forward-looking statements". The words "anticipate", "believe", "expect", "project", "forecast", "estimate", "likely", "intend", "should", "could", "may", "target", "plan" and other similar expressions are intended to identify forwardlooking statements. Indications of, and guidance on, future earnings and financial position and performance as well as expectations, objectives and assumptions in our climate change and sustainability related statements are also forward-looking statements. Due care and attention have been used in the preparation of forecast information. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors, many of which are beyond the control of Goodman Group, that may cause actual results to differ materially from those expressed or implied in such statements. Past performance of any product described in this document is not a reliable indication of future performance. Neither the Goodman Group, nor any other person, gives any representation, warranty, assurance or guarantee that the occurrence of the events expressed or implied in any forward looking statements in this document will actually occur. Due to the inherent uncertainty and limitations in measuring greenhouse gas (GHG) emissions and operational energy consumption under the calculation methodologies used in the preparation of such data, GHG emissions and operational energy consumption data or references to GHG emissions and operational energy consumption volumes (including ratios or percentages) in the sustainability content published in this document may include estimates. There can be no assurance that actual outcomes will not differ materially from these statements. All values are expressed in Australian currency unless otherwise stated. September 2023.
