

Change of Company Name & ASX Code

Southern Gold Limited (ASX: SAU) (the Company) is pleased to announce a change in the Company's name to londrive Limited. The change of name and change of ASX code from SAU to ION will be effective for ASX purposes tomorrow, 15 November 2023.

Effective tomorrow, the Company will also change its website address to: londrive.com.au

The change of the Company's name to londrive Limited follows overwhelming shareholder approval for the change on 9 November 2023.

Managing Director Robert Smillie said:

"As our business strategy advances, with the continuing focus on exploration for minerals critical to the global clean energy transition and the recent expansion into commercialisation of battery technologies, it was becoming imperative to adopt a new brand identity that better reflects this evolving strategy. londrive symbolises our dedication to sourcing and developing the materials that power a sustainable future.

Complementing the introduction of our new name, londrive, we are also revealing a new logo that embodies our renewed commitment. This logo signifies our strategic pivot towards advanced battery technology and materials. It represents the dynamic future we envision, driven by our proprietary technology and our exploration expertise within South Korea."

Authorised for release by the Chair of Southern Gold Limited.

Southern Gold Limited: Company Profile

Southern Gold is a strategically well positioned mineral exploration and battery technology commercialisation group listed on the Australian Securities Exchange (under ASX ticker “SAU”). The mineral exploration business includes 100% interest in a substantial portfolio of REE, Li and precious metals exploration projects in South Korea. Backed by a first-class technical team, Southern Gold’s aim is to find world-class deposits in a jurisdiction that has seen very little modern exploration. The commercialisation business holds three exclusive world-wide licences comprising the next generation battery technologies comprising 1) an enhanced performance non-flammable lithium-ion based battery, 2) a low-cost, environmentally sustainable method for recycling lithium batteries, and 3) a low-cost, high cycle life water-based battery.
