# 2024 Tax Transparency Report

ASX Limited (ASX) is Australia's leading exchange group and one of the 50 largest companies by market capitalisation listed in Australia. It was created as a national exchange in 1987 after the amalgamation of Australia's six state-based stock exchanges. In 2006, ASX merged with SFE Corporation, which operated the major derivatives exchange in Australia.

## ASX Group

ASX is ranked among the world's top 10 exchange groups measured by market capitalisation. As a fully integrated exchange group, ASX offers a suite of services including listings, trading, clearing and settlement across multiple asset classes – equities, fixed income, commodities, and energy. ASX has an expansive customer base including retail, institutional and corporate customers directly and through Australian and international intermediaries.

Operations of ASX are licensed by the Australian Securities and Investments Commission (ASIC) and the Reserve Bank of Australia (RBA).

## ASX's approach to tax risk management and governance

ASX has a robust corporate governance and risk management framework that governs the operations of the business. Tax is an important subset of this framework which incorporates comprehensive risk management processes and procedures. The Board and Management have the responsibility of ASX's tax risk and strategy, with the CFO providing regular updates to the Audit & Risk Committee on any material tax issues and developments.

ASX carries out operations in Australia through one consolidated tax group. ASX is the head of the consolidated tax group and is responsible for the income tax liability of the Australian-based entities within the group. ASX operates a US-domiciled subsidiary and representative office in New Zealand. These offices promote ASX services to offshore customers only and ASX provides these services from Australia. The US domiciled subsidiary's contribution to tax is immaterial.

ASX adopts a low risk tax strategy to its activities and tax compliance obligations. ASX's Tax Policy reinforces the following key principles:

- > Identify, control and report tax risks.
- > Adopt a conservative approach in its interpretation of applicable taxation legislation.
- > Ensure that the taxation principles are applied consistently.
- > Maintain open and transparent professional relationships with revenue authorities.

## ASX's engagement with the ATO and risk appetite

ASX's adopts a low level of risk to all tax compliance and significant transaction activities. Early engagement with the ATO and tax advisers is undertaken by ASX in order to fully comply with tax obligations and operate in a low risk tax environment.

ASX is also meeting all compliance and payment obligations in each overseas jurisdiction, including the payment of local, state and federal taxes.

## Income tax expense disclosed in the Annual Report

ASX's income tax expense reconciliation is disclosed in Note B7 of the ASX Group's 2024 Annual Financial Report. The income tax expense disclosed in the Annual Financial Report is calculated in accordance with Australian Accounting standards and represents the profit before income tax expense multiplied by the applicable corporate income tax rate of 30% adjusted for "non-temporary" differences. Non temporary differences represent differences between income and expense recognition criteria under accounting principles and income tax legislation and may include non-deductible expenses and non-assessable adjustments.

ASX's Effective Tax Rate (ETR) is calculated as income tax expense divided by profit before income tax expense.

The following table provides ASX's ETR for the past five years. The higher ETR in FY24 is due to non-deductible losses relating to equity accounted investments and non-deductible expenses.

The size of our US subsidiary's contribution to the overall financial results of the business is immaterial and therefore does not affect the overall effective tax rate disclosed in this report.

## Reconciliation of income tax expense to income tax payable

The table below reconciles income tax expense to income tax payable. Temporary differences represent the differences between the transactions being recognised for accounting purposes compared to being recognised for tax purposes.

	FY20 \$m	FY21 \$m	FY22 \$m	FY23 \$m	FY24 \$m
<b>Income tax expense</b>	<b>222.2</b>	<b>207.0</b>	<b>221.8</b>	<b>129.9</b>	<b>207.3</b>
Adjustments in the current year relating to the prior year	0.2	0.1	0.2	1.5	0.9
Temporary differences	3.0	3.9	13.3	16.1	0.2
R&D tax offset <sup>1</sup>	(3.7)	(7.3)	(8.3)	—	—
<b>Income tax payable</b>	<b>221.7</b>	<b>203.7</b>	<b>227.0</b>	<b>147.5</b>	<b>208.4</b>

<sup>1</sup>The R&D tax offset has arisen from the CHESS replacement project. Following the derecognition of the cost of the capitalised asset in FY23, no R&D offset has been claimed on the project.

## ATO published tax information

The ATO releases tax information for large public companies on an annual basis. The ATO has published ASX's taxation information for income tax years 2014 to 2022.

The following table details ASX's published tax information for the income tax years 2020 to 2022. Income tax years 2023 and 2024 are yet to be published by the ATO.

	FY20 \$m	FY21 \$m	FY22 \$m
<b>Total income</b>	<b>1,095.3</b>	<b>1,017.1</b>	<b>1,082.8</b>
Taxable income	754.5	708.5	789.6
<b>Income tax payable</b>	<b>221.7</b>	<b>203.7</b>	<b>227.0</b>

Total income in the above table comprises total revenue and gross interest income. Taxable income is calculated on accounting concepts and adjusted for allowable tax temporary differences and non-temporary differences in accordance with Australian income tax legislation. Tax payable is calculated at the corporate income tax rate of 30% of taxable income, less tax offsets. ASX's tax offsets relate to R&D tax offsets.
