

## Phase 3 RC Drilling Program Completed at The Louie Prospect, Claw Gold Project, WA

**BPM Minerals Ltd (ASX: BPM)** ('BPM' or 'the Company') is pleased to advise that it has successfully completed its Phase 3 reverse circulation (RC) drilling program at the Louie Prospect, within the Claw Gold Project in Western Australia.

11 RC holes were completed for 1,995m over the past two weeks. This campaign targeted high-grade mineralisation at depth, focusing on the 600m long core of the Louie Prospect.

The Phase 3 drilling program is part of a broader exploration strategy supported by a drill for equity agreement with Western Australian contractor Topdrill Pty. Ltd.

### Next Steps:

The samples collected during the campaign have been submitted for assay in Perth, with results expected early next year. The Company remains on track to commence aircore drilling in January/February 2025, a program designed to test ~8km of highly prospective, untested strike.

### About BPM Minerals

BPM Minerals Limited (ASX:BPM) is a Perth-based precious, base and critical mineral explorer with a portfolio of projects located across Western Australia. The Company seeks to build its landholdings within Tier-1 mining jurisdictions. The Company is currently focussed upon its Claw Gold Project, adjacent to Capricorn Metals Ltd.'s Mt Gibson Gold Project, a highly prospective greenfield opportunity on the doorstep of West Australia's next major mining operations.

The management and exploration teams are well supported by an experienced Board of Directors who have a strong record of funding and undertaking exploration activities which have resulted in the discovery of globally significant deposits both locally and internationally.
